Auditor of State

Board of Trustees
Dayton Metro Library
215 East Third Street
Dayton, Ohio 45402

We have reviewed the *Independent Auditors' Report* of the Dayton Metro Library, Montgomery County, prepared by Clark, Schaefer, Hackett & Co., for the audit period January 1, 2007 through December 31, 2007. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Dayton Metro Library is responsible for compliance with these laws and regulations.

Independent Auditors' Report

Board of Trustees
Dayton Metro Library
215 East Third Street
Dayton, Ohio 45402

We have audited the accompanying financial statements of the governmental activities, each major fund and the aggregate remaining fund information of Dayton Metro Library (the Library), as of and for the year ended December 31, 2007, which collectively comprise the Library's basic financial statements as listed in the table of contents. These financial statements are the responsibility of management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in the Comptroller General of the United States' *Government Auditing Standards*. Those standards require that we plan and perform the audit to reasonably assure whether the financial statements are free of material misstatement. An audit includes examining on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe our audit provides a reasonable basis for our opinions.

As discussed in Note 2, the accompanying financial statements and notes follow the cash basis of accounting. This is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective cash basis financial position of the governmental activities, each major fund and the aggregate remaining fund information of Dayton Metro Library, as of December 31, 2007, and the respective changes in cash basis financial position and the respective budgetary comparisons for the General Fund for the year then ended in conformity with the accounting basis Note 2 describes.

In accordance with *Government Auditing Standards*, we have also issued our report dated May 5, 2008, on our consideration of the Library's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report describes the scope of our testing of internal control over financial reporting and compliance and the results of that testing, not to provide an opinion on the internal control over financial reporting on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis is not a required part of the basic financial statements but is supplementary information the Governmental Accounting Standards Board requires. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Clark, Schaefer, Hackett & Co.

Dayton Metro Library
Management's Discussion and Analysis
For the Year Ended December 31, 2007
Unaudited

The management's discussion and analysis of the Dayton Metro Library's (the Library) financial performance provides an overall review of the Library's financial activities for the year ended December 31, 2007, within the limitations of the Library's cash basis of accounting. The intent of this management's discussion and analysis is to examine the Library's financial performance as a whole. Readers should also review the basic financial statements and notes to enhance their understanding of the Library's financial performance.

Financial Highlights

Key financial highlights for 2007 are as follows:

- Net assets of governmental activities increased \$3,527,124, or 20.5 percent, a significant increase from the prior year. This increase is primarily due to the Library budgeting expenditures below the additional revenues generated from the 2004 tax levy in order to maintain funds for future capital improvements.
- The Library's general receipts are primarily made up of property and other local taxes (\$8,950,282) and other government grants-in-aid, such as the State Library and Local Government Support Fund (LLGSF) (\$20,471,725). These receipts represent, respectively, 28.5 and 65.1 percent of the total cash received for governmental activities during the year. Property and other local tax receipts for 2007 were less than 2006, primarily due to the phase out of the tangible personal property tax.
- Program specific receipts in the form of charges for services and sales and operating grants and contributions represent \$716,908 or 2.3 percent of total receipts and are primarily comprised of charges for maintaining public service programs.
- The Library reported \$27,900,623 in disbursements for 2007 compared to \$27,451,365 for 2006. Public service and programs accounts for the largest portion of the increase in current year distributions with expenditures exceeding \$329,838 over the prior year.

Using This Annual Financial Report

This annual report is presented in a format consistent with the presentation requirements of Governmental Accounting Standards Board Statement No. 34, as applicable to the Library's cash basis of accounting.

This annual report consists of a series of financial statements and notes to those statements. These statements are prepared and organized so the reader can understand the Library as a financial whole or as an entire operating entity. The statements provide a detailed look at the Library's specific financial activities and conditions on a cash basis of accounting.

Financial Report Components

The statement of net assets and the statement of activities provide information about the cash activities of the Library as a whole.

Fund financial statements provide a greater level of detail. Funds are created and maintained on the financial records of the Library as a way to segregate money whose use is restricted to a particular specified purpose. The fund financial statements also look at the Library's most significant funds with all other non-major funds presented in total in one column.

Dayton Metro Library
Management's Discussion and Analysis
For the Year Ended December 31, 2007
Unaudited

The notes to the financial statements are an integral part of the government-wide and fund financial statements and provide expanded explanation and detail regarding the information reported in the statements.

Basis of Accounting

The basis of accounting is a set of guidelines that determine when financial events are recorded. The Library has elected to present its financial statements on a cash basis of accounting. This basis of accounting is a basis of accounting other than generally accepted accounting principles. Under the Library's cash basis of accounting, receipts and disbursements are recorded when cash is received or paid.

As a result of using the cash basis of accounting, certain assets and their related revenues (such as accounts receivable) and certain liabilities and their related expenses (such as accounts payable) are not recorded in the financial statements. Therefore, when reviewing the financial information and discussion within this report, the reader must keep in mind the limitations resulting from the use of the cash basis of accounting.

Reporting the Library as a Whole

The statement of net assets and the statement of activities reflect how the Library did financially during 2007, within the limitations of cash basis accounting. The statement of net assets presents the cash balances of the governmental activities of the Library at year end. The statement of activities compares cash disbursements with program receipts for each governmental program. Program receipts include charges paid by the recipient of the program's goods or services and grants and contributions restricted to meeting the operational or capital requirements of a particular program. General receipts are all receipts not classified as program receipts. The comparison of cash disbursements with program receipts identifies how each governmental function draws from the Library's general receipts.

These statements report the Library's cash position and the changes in cash position. Keeping in mind the limitations of the cash basis of accounting, you can think of these changes as one way to measure the Library's financial health. Over time, increases or decreases in the Library's cash position is one indicator of whether the Library's financial health is improving or deteriorating. When evaluating the Library's financial condition, you should also consider other non-financial factors as well, such as the Library's property tax base, the condition of the Library's capital assets, the extent of the Library's debt obligations, the reliance on non-local financial resources for operations and the need for continued growth in the major local revenue sources such as property and income taxes.

The statement of net assets and the statement of activities are comprised of governmental activities only:

Governmental Activities - The Library's services, support services and capital outlay are reported here. Property and other local taxes and government grants-in-aid finance most of these activities. Benefits provided through governmental activities are not necessarily paid for by the people receiving them.

Dayton Metro Library
Management's Discussion and Analysis
For the Year Ended December 31, 2007
Unaudited

Reporting the Library's Most Significant Funds

Fund financial statements provide detailed information about the Library's major funds – not the Library as a whole. The Library establishes separate funds to better manage its many activities and to help demonstrate that money that is restricted as to how it may be used is being spent for the intended purpose. The funds of the Library are split into two categories: governmental and fiduciary.

Governmental Funds - Most of the Library's activities are reported in governmental funds. The governmental fund financial statements provide a detailed view of the Library's governmental operations and the basic services it provides. Governmental fund information helps determine whether there are more or less financial resources that can be spent to finance the Library's programs. The Library's significant governmental funds are presented on the financial statements in separate columns. The information for non-major funds (funds whose activity or balances are not large enough to warrant separate reporting) is combined and presented in total in a single column. The Library's major governmental funds are the General Fund and the Building and Repair Fund. The programs reported in governmental funds are identical to those reported in the governmental activities section of the entity-wide statements.

Fiduciary Funds - Fiduciary funds are used to account for resources held for the benefit of parties outside the Library. Fiduciary funds are not reflected on the government-wide financial statements because the resources of these funds are not available to support the Library's programs. The Library has one fiduciary fund, an agency fund for a flexible spending benefit account.

The Library as a Whole

Table 1 provides a summary of the Library's net assets for 2007 compared to 2006 on a cash basis:
 (Table 1)

		Net Assets –Cash Basis		
		<u>Governmental Activities</u>		
		<u>2007</u>	<u>2006</u>	<u>Increase (Decrease)</u>
Assets:				
Cash and Cash Equivalents	\$	20,759,420	17,232,296	3,527,124
Total Assets		<u>20,759,420</u>	<u>17,232,296</u>	<u>3,527,124</u>
Net Assets:				
Restricted		239,951	228,169	11,782
Unrestricted		20,519,469	17,004,127	3,515,342
Total Net Assets	\$	<u>20,759,420</u>	<u>17,232,296</u>	<u>3,527,124</u>

As mentioned previously, net assets of governmental activities increased \$3,527,124 or 20.5 percent during 2007. The primary reasons for the increase in cash balances is the Library managing expenditures by budgeting for transfers from the general operating funds to the building and repair funds in order to provide funding of future capital improvements that are anticipated over the next five years.

Dayton Metro Library
Management's Discussion and Analysis
For the Year Ended December 31, 2007
Unaudited

Table 2 reflects the changes in net assets on a cash basis in 2007 and 2006 for governmental activities.

	Governmental Activities	
	2007	2006
Receipts		
Program Receipts:		
Charges for Services and Sales	\$ 650,772	806,264
Operating Grants and Contributions	66,136	59,779
Total Program Receipts	<u>716,908</u>	<u>866,043</u>
General Receipts:		
Property and Other Local Taxes	8,950,282	9,215,468
Unrestricted Gifts and Contributions	52,607	8,946
Sale of Capital Assets	4,484	42,200
Grants and Entitlements Not Restricted to Specific Programs	20,471,725	20,194,059
Interest	1,088,518	898,699
Miscellaneous	143,223	295,310
Total General Receipts	<u>30,710,839</u>	<u>30,654,682</u>
Total Receipts	<u>31,427,747</u>	<u>31,520,725</u>
Disbursements:		
Library Services		
Public Service and Programs	16,024,686	15,694,848
Collection Development and Processing	6,388,389	5,807,335
Support Services		
Facilities Operation and Maintenance	465,451	404,416
Information Services Support	804,838	827,847
Business Administration	2,936,278	2,511,539
Capital Outlay	1,280,981	2,205,380
Total Disbursements	<u>27,900,623</u>	<u>27,451,365</u>
Increase in Net Assets	3,527,124	4,066,360
Net Assets, January 1, 2007	17,232,296	13,165,936
Net Assets, December 31, 2007	<u>\$ 20,759,420</u>	<u>17,232,296</u>

Program receipts represent only 2.3 percent of total receipts and are primarily comprised of patron fees, grants, contributions and services provided to other entities.

General receipts represent 97.7 percent of the Library's total receipts, and of this amount, approximately 29.1 percent are property and other local taxes. Earnings on investments account for 3.5 percent of the general receipts. State grants and entitlements comprise 66.7 percent of the Library's general receipts.

Disbursements for library services consist of expenses for public service and programs and collection development and processing. Library service costs for 2007 were 80.3 percent of total disbursements. Disbursements for support services consist of expenses for facilities operations and maintenance, information services support, and business administration. Support service costs for 2007 represented 15.1 percent of total disbursements.

Dayton Metro Library
Management's Discussion and Analysis
For the Year Ended December 31, 2007
Unaudited

Capital Outlay expenditures of \$1,280,981 represented 4.6 % of expenditures and were primarily for the following:

- Library furnishings, including shelving and computer hardware and software
- Phase II of the new P.C. Reservation and Print Management System (PC RES) was put into place at nine branches in 2007. Installation was completed in October 2007 and the final payment of \$32,898 was made.
- A digital video security system was installed at the Main Library at a cost of \$18,910.
- Eighteen self-check stations were added to five branches as well as six stations at the Main Library. These stations, at a total cost of \$229,290, allow patrons to check-out their circulation items without needing an employee to wait on them. Employees will have more time to spend helping patrons to research and locate the items that they need.

Governmental Activities

If you look at the Statement of Activities on page 11, you will see that the first column lists the major services provided by the Library. The next column identifies the costs of providing these services. The major program disbursements for governmental activities are for public service and programs and collection development and processing, which account for 57.4 and 22.9 percent of all governmental disbursements, respectively. Business administration, Facilities Operations and Information Services Support represents 15.1 percent of all government spending. The next two columns of the Statement entitled Program Cash Receipts identify amounts paid by people who are directly charged for services and grants received by the Library that must be used to provide a specific service. The net Receipt (Disbursement) column compares the program receipts to the cost of the service. This “net cost” amount represents the cost of the service which ends up being paid from money provided by local taxpayers and grants, entitlements, interest earnings and other miscellaneous income. These net costs are paid from the general receipts which are presented at the bottom of the Statement. A comparison between the total cost of services and the net cost of services for 2007 and 2006 is presented in Table 3.

(Table 3)
Governmental Activities

	2007		2006	
	Total Cost of Service	Net Cost of Service	Total Cost of Service	Net Cost of Service
Library Services				
Public Service and Programs	\$ 16,024,686	(15,445,086)	15,694,848	(14,932,077)
Collection Development and Processing	6,388,389	(6,335,618)	5,807,335	(5,796,059)
Support Services:				
Facilities Operation and Maintenance	465,451	(465,451)	404,416	(404,416)
Information Services Support	804,838	(720,301)	827,847	(738,851)
Business Administration	2,936,278	(2,936,278)	2,511,539	(2,511,539)
Capital Outlay	1,280,981	(1,280,981)	2,205,380	(2,205,380)
Total Expenses	\$ 27,900,623	(27,183,715)	27,451,365	(26,588,322)

The dependence upon property tax receipts and unrestricted grants and entitlements is apparent as 94.6 percent of governmental activities are supported through these general receipts.

Unaudited

The Library's Funds

As illustrated on the Statement of Cash Receipts, Disbursements, and Changes in Fund Balance – Governmental Funds on Page 13, total governmental funds had receipts of \$31,423,263 and disbursements of \$27,900,623. The General Fund is the chief operating fund of the Library. The fund balance of the General Fund decreased \$978,060 as the result of movement of funds to our Building & Repair Fund in preparation for implementation of our new Strategic Planning Initiative.

As illustrated on the Statement of Assets and Fund Balances – Governmental Funds on Page 12, at the end of the current fiscal year, unreserved fund balance of the General Fund was \$5,720,241, while the total General fund balance reached \$7,512,038. As a measure of the General Fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures. Unreserved fund balance represents 20.6 percent of total General Fund expenditures, while total fund balance represents 27 percent of that same amount.

General Fund Budgeting Highlights

The Library's budget is prepared according to Ohio law and is based upon accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The most significant budgeted fund is the General Fund.

As illustrated on the Statement of Receipts, Disbursements and Changes in Fund Balance – Budget and Actual – General Fund on page 14, final receipts were budgeted at \$30,679,435 while actual receipts were \$30,969,673. The difference between final budgeted receipts and actual receipts was \$290,238. Other financing sources of actual receipts included \$4,484 for the sale of real property.

Final disbursements were budgeted at \$34,235,196 while actual disbursements were \$29,600,448. The Library kept spending below budgeted amounts as demonstrated by the reported variances. Due to \$4,143,566 in transfers from the general fund to other governmental funds, the net result is the decrease in General Fund balance of \$2,769,857 for 2007.

Capital Assets

The Dayton Metro Library does not report capital assets on its financial statements. The Library does keep track of its capital assets and infrastructure independently. The Library uses a software package to accomplish this task. In 2007, the inventory information was internally audited by the Finance Department and corrections, deletions, and additions were recorded. The inventory software company was processing the 2007 information and will have an updated file available in early 2008.

Debt

The Dayton Metro Library has no debt.

Current Issues

The challenge for all Ohio libraries is to provide quality services to the public while staying within the restrictions imposed by limited, and in some cases shrinking, funding. We rely heavily on property and other local taxes and the Library and Local Government Support Fund (LLGSF), which will account for approximately 95% of our revenue in 2008. The LLGSF will continue to be the primary source of funding for the Library, which is anticipated to provide approximately 62% of total library revenues in 2008.

After a three year freeze in funding for the LLGSF, the state funding mechanism for public libraries was changed in the summer of 2007 as part of the State of Ohio's biennium budget for fiscal years 2008-2009. The most significant change by this new funding mechanism is the use of a formula based on 2.22% of prior month's total State of Ohio general revenues. This new formula was originally introduced in the 2006 legislative session by a local government funding task force created by House Bill 66. The risk of this method of funding exposes the library to the state of the Ohio economy. Should tax collections be lower than expected, library funding will suffer.

As a part of the overall Strategic Planning Implementation, the Board of Directors, along with community leaders and staff developed six strategic goals for the Dayton Metro Library in 2008. Among the themes are Youth Succeeding, Adults Succeeding, Community Commons, Discovery and Interaction in a Virtual World, Lifelong Learning, and Stimulating Imagination. The goals are incorporated into the major strategic initiatives the Dayton Metro Library is vigorously implementing. These initiatives are the development of a Facilities Master Plan, Ensuring Public Awareness, Staff Development and Customer Service, Establishing a Library Foundation and Maximizing Operational Effectiveness.

Contacting the Dayton Metro Library's Financial Management

This financial report is designed to provide our citizens, taxpayers, investors, and creditors with a general overview of the Library's finances and demonstrates the Library's accountability for the all the money it receives, spends and invests. Please direct any questions about this report or financial information inquiries to Mr. Timothy Kambitsch, Executive Director/Fiscal Officer, Dayton Metro Library, 215 East Third Street, Dayton, Ohio 45402-2103. We also offer information regarding the Dayton Metro Library on our web site, www.daytonmetrolibrary.org.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 1 – Description of the Library and Reporting Entity

The Dayton Metro Library is organized as a county library under the laws of the State of Ohio. The Library has its own Board of Trustees of seven members: four are appointed by the Montgomery County Commissioners and three are appointed by the Montgomery County Common Pleas Court Judges. Under Ohio statutes, the Library is a body politic and corporate capable of suing and being sued, contracting, acquiring, holding, possessing, and disposing of real property, and of exercising such other powers and privileges conferred upon it by law. The Library also determines and operates under its own budget. Control and management of the Library is governed by sections 3375.33 to 3375.39 of the Ohio Revised Code with the administration of the day-to-day operations of the Library and financial accountability being the responsibility of the Director.

The Library is fiscally independent of Montgomery County, although Montgomery County serves in a ministerial capacity as the taxing authority for the Library. The determination to request approval of a tax levy, the role and purpose(s) of the levy, are discretionary decisions made solely by the Board of Library Trustees. Once those decisions are made, Montgomery County must put the levy on the ballot. There is no potential for the Library to provide a financial benefit to or impose a financial burden on Montgomery County.

Component units are legally separate organizations for which the Library is financially accountable. The Library is financially accountable for an organization if the Library appoints a voting majority of the organization's governing board and (1) the Library is able to significantly influence the programs or services performed or provided by the organization; or (2) the Library is legally entitled to or can otherwise access the organization's resources; the Library is legally obligated or has otherwise assumed the responsibility to finance the deficits of, or provide financial support to, the organization; or the Library is obligated for the debt of the organization. The Library is also financially accountable for any organizations for which the Library approves the budget, the issuance of debt or the levying of taxes. Component units also include legally separate, tax-exempt entities whose resources are for the direct benefit of the Library, are accessible to the Library and are significant in amount to the Library. The Library has no component units.

The Friends of the Dayton Metro Library is a not-for-profit organization with a self-appointing board. The Library is not financially accountable for the organization, nor does the Library approve the budget or the issuance of debt of the organization. The economic resources received or held by the Friends of the Library are not significant to the Library. Therefore, this organization has been excluded from the reporting entity of the Library.

The Library's management believes these financial statements present all activities for which the Library is financially accountable.

Note 2 - Summary of Significant Accounting Policies

As discussed further in Note 2.C, the financial statements of the Dayton Metro Library have been prepared on a cash basis of accounting. This cash basis of accounting differs from accounting principles generally accepted in the United States of America (GAAP). This report includes all relevant Governmental Accounting Standards Board (GASB) pronouncements, which have been applied to the extent they are applicable to the cash basis of accounting. The most significant of the Library's accounting policies are described below.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 2 - Summary of Significant Accounting Policies (continued)

A. Basis of Presentation

The Library's basic financial statements consist of government-wide statements, including a statement of net assets and a statement of activities, and fund financial statements, which provide a more detailed level of financial information.

Government-wide Financial Statements

The statement of net assets and the statement of activities display information about the Library as a whole. These statements include the financial activities of the primary government, except for fiduciary funds. Governmental activities generally are financed through taxes, intergovernmental receipts and other non-exchange transactions.

The statement of net assets presents the cash and cash equivalent balances, of the governmental activities of the Library at year-end. The statement of activities compares disbursements with program receipts for each of the Library's governmental activities. Disbursements are reported by function. A function is a group of related activities designed to accomplish a major service or regulatory program for which the Library is responsible. Program receipts include charges paid by the recipient of the program's goods or services, grants and contributions restricted to meeting the operational or capital requirements of a particular program, and receipts of interest earned on grants that are required to be used to support a particular program. General receipts are all receipts not classified as program receipts, with certain limited exceptions. The comparison of direct disbursements with program receipts identifies the extent to which each governmental function is self-financing on a cash basis or draws from the Library's general receipts.

Fund Financial Statements

During the year, the Library segregates transactions related to certain Library functions or activities in separate funds in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the Library at this more detailed level. The focus of governmental fund financial statements is on major funds. Each major fund is presented in a separate column. Non-major funds are aggregated and presented in a single column. Fiduciary funds are reported by type.

B. Fund Accounting

The Library uses funds to maintain its financial records during the year. A fund is defined as a fiscal and accounting entity with a self balancing set of accounts. The Library's funds are divided into two categories, governmental and fiduciary.

Governmental Funds

Governmental funds are financed primarily from taxes, intergovernmental receipts (e.g. grants), and other non-exchange transactions. Monies are assigned to the various governmental funds according to the purposes for which they may or must be used. The following are the Library's major governmental funds:

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 2 – Summary of Significant Accounting Policies (continued)

General Fund - The general fund accounts for all financial resources except those required to be accounted for in another fund. The general fund balance is available to the Library for any purpose provided it is expended or transferred according to the general laws of Ohio.

Building and Repair Fund - The building and repair fund accounts for monies set aside by the Board of Library Trustees specifically for building projects, including the improvements to the Library and construction of new and future facilities.

Other governmental funds of the Library are the special revenue fund and trust and endowment funds.

Fiduciary Funds

Fiduciary funds include pension trust funds, investment trust funds, private purpose trust funds, and agency funds. Trust funds are used to account for assets held under a trust agreement for individuals, private organizations, or other governments which are not available to support the Library's own programs. Agency funds are purely custodial in nature and are used to hold resources for individuals, organizations or other governments. The Library's agency fund accounts for reimbursements of eligible expenses under the health or dependent care flexible spending account.

C. Basis of Accounting

The Library's financial statements are prepared using the cash basis of accounting. Under this basis of accounting receipts are recorded in the Library's financial records and reported in the financial statements when cash is received rather than when earned and disbursements are recorded when cash is paid rather than when a liability is incurred.

As a result of the use of this cash basis of accounting, certain assets and their related revenues (such as accounts receivable and revenue for billed or provided services not yet collected) and certain liabilities and their related expenses (such as accounts payable and expenses for goods or services received but not yet paid, and accrued liabilities and the related expenses) are not recorded in these financial statements. Therefore, when reviewing the financial information and discussion within this report, the reader should keep in mind the limitations resulting from the use of the cash basis of accounting.

D. Budgetary Process

All funds, (except agency funds), are legally required to be appropriated. The major documents prepared are the tax budget, the certificate of estimated resources, and the appropriations ordinance (resolution), all of which are prepared on the budgetary basis of accounting.

The tax budget demonstrates a need for existing or increased tax rates. The certificate of estimated resources establishes a limit on the amount the Library may appropriate. The appropriations resolution is the Trustee's authorization to spend resources and sets limits on cash disbursements plus encumbrances at the level of control selected by the Trustees. The legal level of control has been established at the fund and major category of the object code level for all funds. Budgetary modifications at the legal level of control may only be made by resolution of the Board of Library Trustees.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 2 – Summary of Significant Accounting Policies (continued)

The certificate of estimated resources may be amended during the year if projected increases or decreases in receipts are identified by the Fiscal Officer. The amounts reported as the original budgeted amounts on the budgetary statements reflect the amounts of estimated resources when the original appropriations were adopted. The amounts reported as the final budgeted amounts on the budgetary statements reflect the amounts of estimated resources at the time final appropriations were enacted by the Trustees.

The appropriations resolution is subject to amendment throughout the year with the restriction that appropriations should not exceed estimated resources. The amounts reported as the original budgeted amounts reflect the first appropriation ordinance for that fund that covered the entire year, including amounts automatically carried forward from prior years. The amounts reported as the final budgeted amounts represent the final appropriation amounts passed by the Trustees during the year.

E. Cash and Cash Equivalents

To improve cash management, cash received by the Library is pooled and invested. Individual fund integrity is maintained through the Library's records. Interest in the pool is presented as "Equity in Pooled Cash and Cash Equivalents."

Investments with original maturities of three months or less at the time they are purchased and investments of the cash management pool are presented on the financial statements as cash equivalents. Investments with an initial maturity of more than three months that were not purchased from the pool are reported as investments.

Investments are reported as assets. Accordingly, purchases of investments are not recorded as disbursements, and sales of investments are not recorded as receipts. Gains or losses at the time of sale are recorded as receipts or negative receipts, respectively.

During 2007 the Library maintained a conservative, liquid position with respect to investments and all funds considered as investments were invested with the State Asset Treasury Reserve of Ohio (STAR Ohio).

STAR Ohio is an investment pool managed by the State Treasurer's Office which allows governments within the State to pool their funds for investment purposes. STAR Ohio is not registered with the SEC as an investment company, but does operate in a manner consistent with Rule 2a7 of the Investment Company Act of 1940. Investments in STAR Ohio are valued at STAR Ohio's share price, which is the price the investment could be sold for on December 31, 2007.

Investment procedures are restricted by the provisions of the Ohio Revised Code. Interest receipts credited to the General Fund, Building and Repair Fund, and Other Governmental Funds during 2007 amounted to \$634,928, \$355,198, and \$98,392, respectively.

F. Restricted Assets

Cash, cash equivalents, and investments are reported as restricted when limitations on their use change the nature or normal understanding of their use. Such constraints are either imposed by creditors, contributors, grantors, or laws of other governments, or imposed by law through constitutional provisions or enabling legislation. The government-wide statement of net assets reports \$239,951 which is restricted by contributors.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 2 – Summary of Significant Accounting Policies (continued)

G. Capital Assets

Acquisitions of property, plant and equipment are recorded as disbursements when paid. These items are not reflected as assets in the accompanying financial statements.

H. Long-Term Obligations

The Library's cash basis financial statements do not report liabilities for long-term obligations. Proceeds of debt are reported when the cash is received and principal and interest payments are reported when paid. Since recording a capital asset when entering into a capital lease is not the result of a cash transaction, neither an other financing source nor a capital outlay expenditure is reported at inception. Lease payments are reported when paid.

I. Net Assets

Net assets are reported as restricted when there are limitations imposed on their use either through enabling legislation or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The Library applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

J. Fund Balance Reserves

The Library reserves any portion of fund balances which is not available for appropriation or which is legally segregated for a specific future use. Unreserved fund balance indicates that portion of fund balance which is available for appropriation in future periods. Fund balance reserves have been established for encumbrances and endowments.

K. Interfund Transactions

Exchange transactions between funds are reported as receipts in the seller funds and as disbursements in the purchaser funds. Subsidies from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources/uses in governmental funds. Repayments from funds responsible for particular disbursements to the funds that initially paid for them are not presented in the financial statements. The Library uses interfund transfers to move unrestricted general fund revenues to finance various programs that the government must account for in other funds in accordance with budgetary authorizations.

Note 3 – Budgetary Basis of Accounting

The budgetary basis as provided by law is based upon accounting for certain transactions on the basis of cash receipts, disbursements, and encumbrances. The Statement of Receipts, Disbursements and Changes in Fund Balance – Budget and Actual – Budgetary Basis presented for the general fund is prepared on the budgetary basis to provide a meaningful comparison of actual results with the budget. The difference between the budgetary basis and the cash basis is outstanding year end encumbrances, which are treated as disbursements (budgetary basis) rather than as a reservation of fund balance (cash basis). The encumbrances outstanding at year end (budgetary basis) amounted to \$1,791,797 for the general fund.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 4 – Deposits and Investments

Monies held by the Library are classified by State statute into three categories.

Active monies are public monies determined to be necessary to meet current demands upon the Library treasury. Active monies must be maintained either as cash in the Library treasury, in commercial accounts payable or withdrawable on demand, including negotiable order of withdrawal (NOW) accounts, or in money market deposit accounts.

Inactive deposits are public deposits that the Board has identified as not required for use within the current five year period of designation of depositories. Inactive deposits must either be evidenced by certificates of deposit maturing not later than the end of the current period of designation of depositories, or by savings or deposit accounts including, but not limited to, passbook accounts.

Interim deposits are deposits of interim monies. Interim monies are those monies which are not needed for immediate use but which will be needed before the end of the current period of designation of depositories. Interim deposits must be evidenced by time certificates of deposit maturing not more than one year from the date of deposit or by savings or deposit accounts, including passbook accounts.

Interim monies held by the Library can be deposited or invested in the following securities:

1. United States Treasury bills, bonds, notes, or any other obligation or security issued by the United States Treasury, or any other obligation guaranteed as to principal and interest by the United States;
2. Bonds, notes, debentures, or any other obligation or security issued by any federal government agency or instrumentality including, but not limited to, the Federal National Mortgage Association, Federal Home Loan Bank, Federal Farm Credit Bank, Federal Home Loan Mortgage Corporation, Government National Mortgage Association, and Student Loan Marketing Association. All federal agency securities shall be direct issuances of federal government agencies or instrumentalities;
3. Written repurchase agreements in the securities listed above provided the market value of the securities subject to the repurchase agreement must exceed the principal value of the agreement by at least 2 percent and be marked to market daily, and the term of the agreement must not exceed thirty days;
4. Bonds and other obligations of the State of Ohio or Ohio local governments;
5. Time certificates of deposit or savings or deposit accounts including, but not limited to, passbook accounts;
6. No-load money market mutual funds consisting exclusively of obligations described in division (1) or (2) and repurchase agreements secured by such obligations, provided that investments in securities described in this division are made only through eligible institutions;
7. The State Treasurer's investment pool (STAR Ohio).
8. Commercial paper and bankers acceptances if Ohio Revised Code training requirements have been met.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 4 – Deposits and Investments (continued)

Investments in stripped principal or interest obligations, reverse repurchase agreements, and derivatives are prohibited. The issuance of taxable notes for the purpose of arbitrage, the use of leverage, and short selling are also prohibited. An investment must mature within five years from the date of purchase, unless matched to a specific obligation or debt of the Library, and must be purchased with the expectation that it will be held to maturity. Investments may only be made through specified dealers and institutions.

At year end, the Library had \$3,024 in undeposited cash on hand which is included as part of “Equity in Pooled Cash and Cash Equivalents” on the financial statements.

Deposits

Custodial credit risk for deposits is the risk that in the event of bank failure, the Library will not be able to recover deposits or collateral securities that are in the possession of an outside party. At year end, \$7,825,618 of the Library’s bank balance of \$8,030,346 was exposed to custodial credit risk because those deposits were uninsured and collateralized with securities held by the pledging financial institution’s trust department or agent, but not in the Library’s name.

The Library has no deposit policy for custodial risk beyond the requirements of State statute. Ohio law requires that deposits be either insured or be protected by eligible securities pledged to and deposited either with the Library or a qualified trustee by the financial institution as security for repayment, or by a collateral pool of eligible securities deposited with a qualified trustee and pledged to secure the repayment of all public monies deposited in the financial institution whose market value at all times shall be at least one hundred five percent of the deposits being secured.

Investments

Interest Rate Risk: Interest rate risk arises because the fair value of investment changes as interest rates change. The Library’s investment policy addresses interest rate risk by requiring that the Library’s investment portfolio be structured so that securities mature to meet cash requirements for ongoing operations and/or long-term debt payments, thereby avoiding that need to sell securities on the open market prior to maturity, and by investing operating funds primarily in short-term investments.

State statute requires that an investment mature within five years from the date of purchase, unless matched to a specific obligation or debt of the Library, and that an investment be purchased with the expectation that it will be held to maturity.

At year end the Library had investments in STAR Ohio at a fair value of \$13,645,778. STAR Ohio has a maturity of less than one year and is not subject to interest rate penalty on maturity issues.

Credit Risk: STAR Ohio carries a rating of AAAM by Standard and Poor’s. The Library has no investment policy dealing with investment credit risk beyond the requirements in state statutes. Ohio law requires that STAR Ohio maintain the highest rating provided by at least one nationally recognized standard rating service. The Library’s investment policy limits investments to those authorized by State statute.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 4 – Deposits and Investments (continued)

Custodial Credit Risk: For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the Library will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Library has no investment policy dealing with investment custodial risk beyond the requirements in ORC 135.14(M)(2) which states, “Payment for investments shall be made only upon the delivery of securities representing such investments to the treasurer, investing authority, or qualified trustee. If the securities transferred are not represented by a certificate, payment shall be made only upon receipt of confirmation of transfer from the custodian by the treasurer, governing board, or qualified trustee.”

The Library places no limit on the amount it may invest in any one issuer; however, investments are limited to low risk securities with the expectation of earning market rate of return.

Note 5 - Library and Local Government Support

The primary source of revenue for Ohio public libraries is the State Library and Local Government Support Fund (LLGSF). The LLGSF is allocated to each county based on the county’s prior intangibles tax of LLGSF revenues, and its population. The County Budget Commission allocates these funds to the Library based on its needs such as for the construction of new library buildings, improvements, operation, maintenance, or other expenses. The Budget Commission cannot reduce its allocation of these funds to the Library based on any additional revenues the Library receives.

Note 6 - Property Taxes

Property taxes include amounts levied against all real property, public utility property, and tangible personal property located in the taxing district of the Library within Montgomery County. Real property tax receipts received in 2007 represent the collection of 2006 taxes. Real property taxes received in 2007 were levied after October 1, 2006 on the assessed values as of January 1, 2006, the lien date. Assessed values for real property taxes are established by State statute at 35 percent of appraised market value. Property taxes are also reduced for applicable homestead and rollback deductions. Homestead and rollback amounts are then paid by the State and are reflected in the accompanying financial statements as Other Governments Grants-in-Aid. Real property taxes are payable annually or semiannually.

Public utility property tax receipts received in 2007 represent the collection of 2006 taxes. Public utility real and tangible personal property taxes received in 2007 became a lien on December 31, 2006, were levied after October 1, 2006, and are collected with real property taxes. Public utility real property is assessed at 35 percent of true value; public utility tangible personal property is currently assessed at varying percentages of true value.

Tangible personal property tax receipts received in 2007 (other than public utility property) represent the collection of 2006 taxes. Tangible personal property tax is assessed at varying percentages of true value, by the property owners who must file a list of such property to the County by each April 30.

Montgomery County is responsible for assessing property, and for billing, collecting, and distributing all property taxes on behalf of the Library.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 7 - Risk Management

The Library is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. During 2007, the Library contracted with Brower Insurance Agency, LLC for various types of insurance coverage as follows:

Company	Type of Coverage	Amount of Coverage
Chubb Insurance Group	Building (blanket)	\$ 39,175,930
Chubb Insurance Group	EDP Property	1,873,464
Chubb Insurance Group	Contents	48,878,680
Chubb Insurance Group	Third Party Property	53,657
Chubb Insurance Group	Extra Expense (blanket)	3,000,000
Cincinnati Insurance	Boiler & Machinery	25,000,000
Cincinnati Insurance	Automobile	1,000,000
Chubb Insurance Group	Public Officials	5,000,000
Cincinnati Insurance	General Liability	1,000,000

Settled claims have not exceeded coverage in any of the last three years and there was no significant reduction in coverage from the prior year.

The Library pays the State Workers' Compensation System a premium based on a rate per \$100 of salaries. This rate is calculated based on accident history and administrative costs. The System administers and pays all claims.

Note 8 - Defined Benefit Pension Plan

The Library participates in the Ohio Public Employees Retirement System (OPERS). OPERS administers three separate pension plans. The traditional plan is a cost-sharing, multiple-employer defined benefit pension plan. The member-directed plan is a defined contribution plan in which the member invests both member and employer contributions (employer contributions vest over five years at 20 percent per year). Under the member directed plan, members accumulate retirement assets equal to the value of the member and vested employer contributions plus any investment earnings. The combined plan is a cost-sharing, multiple-employer defined benefit pension plan that has elements of both a defined benefit and a defined contribution plan. Under the combined plan, employer contributions are invested by the retirement system to provide a formula retirement benefit similar to the traditional plan benefit. Member contributions, whose investment is self-directed by the member, accumulate retirement assets in a manner similar to the member directed plan.

OPERS provides retirement, disability, survivor and death benefits and annual cost of living adjustments to members of the traditional and combined plans. Members of the member directed plan do not qualify for ancillary benefits. Authority to establish and amend benefits is provided by Chapter 145 of the Ohio Revised Code. OPERS issues a stand-alone financial report that may be obtained by writing to OPERS, 277 East Town Street, Columbus, OH 43215-4642 or by calling (614) 222-6705 or (800) 222-7377.

For the year ended December 31, 2007, the members of all three plans were required to contribute 9.5 percent of their annual covered salaries. The Library's contribution rate for pension benefits for 2007 was 8.85 percent. The Ohio Revised Code provides statutory authority for member and employer contributions.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 8 - Defined Benefit Pension Plan (continued)

The Library's required contributions for pension obligations to the traditional, combined, and member-directed plans for the years ended December 31, 2007, 2006, and 2005 were \$1,129,758, \$1,195,994, and \$1,150,888 respectively; the full amount has been contributed for 2007, 2006, and 2005.

Note 9 - Employee Benefits - Deferred Compensation Plan

Employees of the Library may elect to participate in the Ohio Public Employees Deferred Compensation Plan. Under this program, employees elect to defer a portion of their pay. The deferred pay and any income earned on it are not subject to federal and state income taxation until actually received by the employee. Participation in the plan is optional. The deferred compensation is not available to employees until termination, retirement, death or unforeseen emergency.

Note 10 - Post-employment Benefits

The Ohio Public Employees Retirement System (OPERS) provides postretirement health care coverage to age and service retirees with ten or more years of qualifying Ohio service credit with either the traditional or combined plans. Health care coverage for disability recipients and primary survivor recipients is available. Members of the member-directed plan do not qualify for postretirement health care coverage. The health care coverage provided by the retirement system is considered an Other Post-employment Benefit as described in *GASB Statement No. 12*. A portion of each employer's contribution to the traditional or combined plans is set aside for the funding of postretirement health care based on authority granted by State statute. The 2007 local government employer contribution rate was 13.85 percent of covered payroll. The portion of employer contributions allocated to health care was 5.0 percent from January 1 through June 30, 2007 and 6.0 percent from July 1 through December 31, 2007.

Benefits are advance-funded using the entry age normal actuarial cost method. Significant actuarial assumptions, based on OPERS latest actuarial review performed as of December 31, 2006, include a rate of return on investments of 6.5 percent, an annual increase in active employee total payroll of 4.0 percent compounded annually (assuming no change in the number of active employees) and an additional increase in total payroll of between .50 percent and 6.30 percent based on additional annual pay increases. Health care premiums were assumed to increase between .50 to 5.0 percent annually for the next 8 years. In subsequent years, (9 and beyond) health care costs were assumed to increase at 4.0 percent (the projected wage inflation rate).

All investments are carried at market value. For actuarial valuation purposes, a smoothed market approach is used. Assets are adjusted to reflect 25 percent of unrealized market appreciation or depreciation on investment assets annually, not to exceed a 12 percent corridor.

The number of active contributing participants in the traditional and combined plans was 374,979. Actual employer contributions for 2007 which were used to fund post-employment benefits were \$745,464. The actual contribution and the actuarially required contribution amounts are the same. OPERS net assets available for payment of benefits at December 31, 2006, (the latest information available) were \$12 billion. The actuarially accrued liability and the unfunded actuarial accrued liability were \$30.7 billion and \$18.7 billion, respectively.

Dayton Metro Library
Notes to the Basic Financial Statements
For the Year Ended December 31, 2007

Note 10 – Post-employment Benefits (continued)

On September 9, 2004, the OPERS Retirement Board adopted a Health Care Preservation Plan (HCPP) with an effective date of January 1, 2007. The HCPP restructures OPERS' health care coverage to improve the financial solvency of the fund in response to increasing health care costs.

Note 11 – Operating Leases

The Library leases buildings, vehicles and other equipment under non-cancelable leases. The Library disbursed \$231,747 to pay lease costs for the year ended December 31, 2007.

Future lease payments are as follows:

Year	Amount
2008	\$ 257,052
2009	259,177
2010	256,621
2011	275,088
2012	280,802
2013-2017	997,860
Total	<u>\$ 2,326,599</u>

Office Lease – The Library leases the space at 6160 Chambersburg Heights in Huber Heights for library operation for a total cost of \$137,854 for the year. The lease expires on December 31, 2015. The Library leases space at 333 W. National Road in Englewood for library operation for a total cost of \$31,282. The Library leases space at 2293 Arbor Blvd. in Moraine for Outreach Services for a total cost of \$69,161. The lease expires April 30, 2016.

Parking Spaces – The Library leases twenty-seven (27) parking spaces for a total cost of \$6,000 for the year. The lease expires on January 1, 2008 and, in the absence of notification from either party, automatically renews for an unlimited number of successive one-year terms.

Copier Leases – The Library leases 1 copier at an annual cost of \$5,749. The lease expires on February 22, 2010. The Library leases 1 copier at an annual cost of \$1,097. The lease expires on December 31, 2012. The Library leases 2 copiers at a total annual cost of \$3,838. The lease expires on August 31, 2012.

Note 12 – Interfund Transfers

The general fund transferred \$4,000,000 to the building and repair capital projects fund for the purchase and maintenance of various items throughout the Library. The general fund transferred \$80,193 to the special revenue fund to cover additional funds needed to cover accrued and vested employee compensated absences and \$63,373 to the computer co-op fund for the purchase of computer equipment throughout the library.

Report on Internal Control Over Financial Reporting and on Compliance
and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards*

Board of Trustees
Dayton Metro Library
215 E. Third Street
Dayton, Ohio 45402

We have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Dayton Metro Library (the Library) as of and for the year ended December 31, 2007, which collectively comprise the Library's basic financial statements and have issued our report thereon dated May 5, 2008, wherein we noted the Library reported on the cash basis of accounting. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Library's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Library's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Library's internal control over financial reporting

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process or report financial data reliably in accordance with a basis of accounting described in Note 2 such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Library's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our testing disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to the Library's management in a separate letter dated May 5, 2008.

This report is intended solely for the information and use of management and the Board of Trustees and is not intended to be and should not be used by anyone other than these specified parties.
