

CITY OF MADEIRA, OHIO

Independent Auditors' Report on
Internal Controls and Compliance
Year Ended December 31, 2016

CLARK SCHAEFER HACKETT
CPAs & ADVISORS

Dave Yost • Auditor of State

City Council
City of Madeira
7141 Miami Avenue
Cincinnati, Ohio 45243

We have reviewed the *Independent Auditors' Report* of the City of Madeira, Hamilton County, prepared by Clark, Schaefer, Hackett & Co., for the audit period January 1, 2016 through December 31, 2016. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The City of Madeira is responsible for compliance with these laws and regulations.

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE
AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS****INDEPENDENT AUDITORS' REPORT**

To the City Council
City of Madeira, Ohio:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Madeira, Ohio ("City"), as of and for the year ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated June 28, 2017.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. *A material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did identify a certain deficiency in internal control, described in the accompanying schedule of findings and responses as 2016-001 that we considered to be a significant deficiency.

Compliance And Other Matters

As part of obtaining reasonable assurance about whether the City's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

City's Response to the Finding

The City's response to the finding identified in our audit is described in the accompanying schedule of findings and responses. The City's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the City's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Clark, Schaefer, Hackett & Co.

Cincinnati, Ohio
June 28, 2017

CITY OF MADEIRA, OHIO
Schedule of Findings and Reponses
Year Ended December 31, 2016

2016-001 Financial Reporting

During the course of our audit, we identified a misstatement in the financial statements that was not initially identified by the City's internal control over financial reporting. A deficiency in internal control exists when the design of operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. In this case, the internal controls over the preparation and review of the City's financial statements did not operate as designed.

Adjustments to the financial statements were necessary to properly report fund balance classifications in the General Fund and record deferred inflows related to pension.

We recommend the City enhance its internal controls over financial reporting with steps such as management analysis of the financial statements.

Views of Responsible Officials: The City concurs with the adjustments which have been posted to the financial statements.

INTRODUCTORY SECTION

This Page is Intentionally Left Blank

June 28, 2017

To the Honorable Mayor, Members of the Governing Council, and Citizens of the City of Madeira:

State law requires that all general-purposes local governments publish a complete set of financial statements presented in conformity with generally accepted accounting principles (GAAP). Pursuant to that requirement, we hereby issue the comprehensive annual financial report of the City of Madeira for the fiscal year ended December 31, 2016.

This report consists of management's representations concerning the finances of the City of Madeira. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, management of the City of Madeira has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Madeira financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the City of Madeira's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The City of Madeira's financial statements have been audited by Clark Schaefer Hackett. The goal of the independent audit is to provide reasonable assurance that the financial statements of the City of Madeira for the fiscal year ended December 31, 2016 are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that the City of Madeira's financial statements for the fiscal year ended December 31, 2016 are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

GAAP require that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). The letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The City of Madeira's MD&A can be found immediately following the report of the independent auditors.

Profile of the Government

The City of Madeira, incorporated in 1910 as a village, is located in the southwestern part of the

state. The City of Madeira currently occupies a land area of 3.4 square miles and serves a population of 8,976. The City of Madeira is empowered to levy a property tax on real properties located within its boundaries.

The City of Madeira has operated under the council-manager form of government since 1959. Policy-making and legislative authority are vested in a governing council consisting of the mayor and six other members. The governing council is responsible, among other things, for passing ordinances, adopting the budget, appointing committees, and hiring the government's manager, treasurer, clerk of council and law director. The City Manager is responsible for carrying out the policies and ordinances of the governing council, for overseeing the day to day operations of the government, and for appointing the heads of the various departments. The council is elected on a non-partisan basis. Council members are elected at large and serve four-year staggered terms, with elections every two years. The Madeira Home Rule Charter specifies term limits of three consecutive terms.

The Madeira City Council elects a Mayor and Vice-Mayor from within its ranks. The Mayor and Vice-Mayor each serve a two-year term. The Mayor's primary duties include presiding over City Council meetings, performing ceremonial civic duties and overseeing the proceedings of Mayor's Court. The Vice-Mayor assumes the duties of the Mayor in his or her absence.

The City of Madeira provides a full range of services, including police and fire protection; the construction and maintenance of highways, streets, and other infrastructure; and recreational activities and cultural events.

The annual budget serves as the foundation for the financial planning and control. The City Manager presents a proposed budget to the council for review prior to December 31. The council is required to hold public hearings on the proposed budget and to adopt a final budget by no later than December 31, the close of the City of Madeira's fiscal year. The appropriated budget is prepared by fund, function (e.g., public safety), and department (e.g., police). Budget to actual comparisons are provided in this report for each individual governmental fund for which an appropriated annual budget has been adopted. For the general fund and major special revenue funds, this comparison is presented as part of the basic financial statements for the governmental funds. For governmental funds, other than the general fund and major special revenue funds, with appropriated annual budgets, this comparison is presented in the governmental fund subsection of this report.

Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the City of Madeira operates.

Local economy. The City of Madeira currently enjoys a favorable economic environment and local indicators point to continued stability. The region has a varied manufacturing and industrial base that adds to the relative stability of the unemployment rate. Major industries with headquarters or divisions located within the City's boundaries or in close proximity include consumer product manufacturers, jet engine and automobile component manufacturers, and several financial and insurance institutions.

The City's central business district is expected to maintain its current high occupancy rate with a variety of stores, specialty shops, and commercial businesses. Meanwhile, there continues to be a discernible trend toward steady residential growth.

Long-term financial planning. Unassigned fund balance in the general fund (26% of general fund expenditures) falls above the policy guidelines set by the city council for budgeting and planning purposes (i.e. – between 20 and 25 percent of general fund expenditures). It is council's intent to not borrow to fund improvement projects unless the project size is over \$1 million. The City Council plans to add and improve walk ways, bike ways, park space and obtain improvement grants from the state for road improvements. In addition, they are trying to repave all streets on the existing 20 year schedule. The anticipated future annual street improvement budget is approximately \$500,000 per year.

Relevant financial policies. During 2016, the City began planning for future infrastructure projects. The City may consider an increase in income tax rates, fees and reducing spending and services to cover the cost if necessary.

Major Initiatives. The City will continue to reduce the principal on the Kenwood Road Bond Anticipation Notes by \$120,000 each year until it is retired. The City is also completing the replacement of aging waterlines on three streets totaling more than \$450,000. These streets will then be resurfaced in 2017 after waterlines are completed. In an effort to improve the business district and "Downtown" Madeira, City Council authorized the purchase of property and a commitment to construct a public parking lot to revitalize an area adjacent to the newly created Madeira Historic District. In conjunction with the parking lot, there is proposed a new restaurant to be constructed in late 2017.

Awards and Acknowledgments

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City of Madeira for its comprehensive annual financial report (CAFR) for the fiscal year ended December 31, 2015. This was the twenty-first consecutive year that the government has received this prestigious award. In order to be awarded a Certificate of Achievement, the government published an easily readable and efficiently organized CAFR. This report satisfied both GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report would not have been possible without the efficient and dedicated services of the entire staff of the finance and administration department. We would like to express our appreciation to all members of the department who assisted and contributed to the preparation of this report. Credit also must be given to the Mayor and the City Council for their unfailing support for maintaining the highest standards of professionalism in the management of the City of Madeira's finances.

Respectfully submitted,

FINANCIAL SECTION

INDEPENDENT AUDITORS' REPORT

To the City Council
City of Madeira, Ohio:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Madeira, Ohio (the "City") as of and for the year ended December 31, 2016, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Madeira, Ohio, as of December 31, 2016, and the respective changes in financial position and, where applicable, cash flows and the budgetary comparisons for the General Fund and the Street Repair Fund thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplementary information, as identified in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The combining and individual nonmajor fund financial statements and schedules, capital asset schedules, introductory and statistical sections are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statements and schedules and capital asset schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements and schedules and capital asset schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 28, 2017 on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Clark, Schaefer, Hackett & Co.

Cincinnati, Ohio

Management's Discussion and Analysis (unaudited)

As management of the City of Madeira, we offer readers of the City of Madeira's financial statements this narrative overview and analysis of the financial activities of the City of Madeira for the fiscal year ended December 31, 2016. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found in this report.

Financial Highlights

- The assets and deferred outflows of the City of Madeira exceeded its liabilities and deferred inflows at the close of the most recent fiscal year by \$10,230,593 (net position). Of this amount, \$499,297 (unrestricted net position) may be used to meet the government's ongoing obligations to citizens and creditors.
- The government's total net position decreased by (\$161,388).
- As of the close of the current fiscal year, the City of Madeira's governmental funds reported combined ending fund balances of \$2,995,884, an increase of \$163,285 in comparison with the prior year. Fifty-four percent (54%) of this total amount, \$1,602,920 is available for spending at the government's discretion (unassigned fund balance).
- At the end of the current fiscal year, unassigned fund balance for the general fund was \$1,602,920 or twenty-six percent (26%) of total general fund expenditures.
- The City of Madeira's total debt decreased by \$120,000 (20%) during the current fiscal year.

During 2015, the City adopted GASB Statement 68, "Accounting and Financial Reporting for Pensions—an Amendment of GASB Statement 27," which significantly revises accounting for pension costs and liabilities. For reasons discussed below, many end users of this financial statement will gain a clearer understanding of the City actual financial condition by adding deferred inflows related to pension and the net pension liability to the reported net position and subtracting deferred outflows related to pension.

Governmental Accounting Standards Board standards are national and apply to all government financial reports prepared in accordance with generally accepted accounting principles. When accounting for pension costs, GASB 27 focused on a funding approach. This approach limited pension costs to contributions annually required by law, which may or may not be sufficient to fully fund each plan's *net pension liability*. GASB 68 takes an earnings approach to pension accounting; however, the nature of Ohio's statewide pension systems and state law governing those systems requires additional explanation in order to properly understand the information presented in these statements.

Under the new standards required by GASB 68, the net pension liability equals the City proportionate share of each plan's collective:

1. Present value of estimated future pension benefits attributable to active and inactive employees' past service
2. Minus plan assets available to pay these benefits

Most long-term liabilities have set repayment schedules or, in the case of compensated absences (i.e. sick and vacation leave), are satisfied through paid time-off or termination payments. There is no repayment schedule for the net pension liability. As explained above, changes in pension benefits, contribution rates, and return on investments affect the balance of the net pension liability, but are outside the control of the local government. In the event that contributions, investment returns, and other changes are insufficient to keep up with required pension payments, State statute does not assign/identify the responsible party for the unfunded portion. Due to the unique nature of how the net pension liability is satisfied, this liability is separately identified within the long-term liability section of the statement of net position.

In accordance with GASB 68, the City's statements prepared on an accrual basis of accounting include an annual pension expense for their proportionate share of each plan's *change* in net pension liability not accounted for as deferred inflows/outflows.

As a result of implementing GASB 68, the City is reporting a net pension liability and deferred inflows/outflows of resources related to pension on the accrual basis of accounting.

Overview of the Financial Statements

The discussion and analysis are intended to serve as an introduction to the City of Madeira's basic financial statements. The City of Madeira's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the City of Madeira's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the City of Madeira's assets, deferred outflows, liabilities and deferred inflows of resources, with the residual being reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City of Madeira is improving or deteriorating.

The statement of activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in the statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave). Both of the government-wide financial statements distinguish functions of the City of Madeira that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the City of Madeira include general government, public safety, transportation, sanitation, community environment, and recreation. The business-type activity of the City of Madeira is rental property.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City of Madeira, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City of Madeira can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. These funds are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets and deferred outflow of resources that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the City's general government operations and the basic services it provides. Both the governmental fund balance sheet and the government fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate a comparison between governmental activities (reported in the statement of net position and the statement of activities) and governmental funds.

The City of Madeira maintains thirteen individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental funds statement of revenues, expenditures, and changes in fund balances, for the general fund and the street repair fund; both are considered to be major funds. Data from the other eleven governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

The City of Madeira adopts an annual appropriated budget for its governmental funds. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

Proprietary fund. The City of Madeira maintains one type of proprietary fund. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The City of Madeira uses an enterprise fund to account for its rental property operation.

Proprietary funds provide the same type of information as the governmental-wide financial statements, only in more detail. The proprietary fund financial statements provide information for the rental property operation, which is considered to be a major fund of the City of Madeira.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statement because the resources of those funds are not available to support the City of Madeira's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Notes to the financial statements. The notes provide additional information that is essential for a full understanding of the data provided in the government-wide and fund financial statements.

Required supplementary information. Displays required information to better understand pension costs and liabilities.

Other information. In addition to the basic financial statements and the accompanying notes, this report also presents certain other information that the City of Madeira believes readers will find useful. The combining statements referred to earlier in connection with nonmajor governmental funds are presented immediately following the notes to the financial statements.

Government-wide Financial Analysis

As noted earlier, the statement of net position may serve over time as a useful indicator of a government’s financial position. In the case of the City of Madeira, the net position at the close of the most recent fiscal year was \$10,230,593.

A portion of the City of Madeira’s net position (89%) reflects its investment in capital assets (e.g., land, buildings, machinery, and equipment), less any related debt used to acquire those assets to provide services to citizens consequently; these assets are not available for future spending. Although the City of Madeira’s investment is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets cannot be used to liquidate these liabilities.

The following table provides a summary of the City’s net position compared to the previous year.

City of Madeira's Net Position
(In Thousands)

	Governmental Activities		Business-type Activities		Total Government	
	2016	2015	2016	2015	2016	2015
Current and other assets	\$7,046	\$6,579	\$42	\$24	\$7,088	\$6,603
Capital Assets	9,313	9,268	286	301	9,599	9,569
Total Assets	16,359	15,847	328	325	16,687	16,172
Deferred Outflows of Resources	1,257	436	0	0	1,257	436
Current and other liabilities	663	242	4	6	667	248

Total Liabilities	5,489	4,081	4	6	5,493	4,087
Total Deferred Inflows of Resources	2,221	2,129	0	0	2,221	2,129
Net Position:						
Net Investment in Capital Assets	8,833	8,668	286	301	9,119	8,969
Restricted	612	373	0	0	612	373
Unrestricted	461	1,032	38	18	499	1,050
Total Net Position	\$9,906	\$10,073	\$324	\$319	\$10,230	\$10,392

An additional portion of the City of Madeira’s net position (6%) represents resources that have been restricted on how they may be used. The remaining balance of unrestricted net position of \$499,297 may be used to meet the government’s ongoing obligations to citizens and creditors.

At the end of the current fiscal year, the City of Madeira is able to report positive balances in all three categories of net position, both for the government as a whole, as well as for its governmental activities. The same situation held true for the prior fiscal year.

The government's net position decreased by (\$161,388), during the current fiscal year. This largely reflects expenses in excess of income due to recording \$603,787 of pension expense.

In order to further understand what makes up the changes in net position for the current year, the following table gives readers further details regarding the results of activities for the current and prior year.

City of Madeira's Changes in Net Position

(In thousands)

Net Position - Ending	\$9,906	\$10,073	\$324	\$319	\$10,230	\$10,392

Governmental activities. Governmental activities decreased the City of Madeira's net position by (\$166,462), thereby accounting for namely all of the reduction in the net position of the City of Madeira. Key elements of this decrease are as follows:

- Charges for services decreased 6% from the previous year due to reduced collection of EMS fees.
- The income and franchise taxes increased by \$225,363 due to an improved economy.
- Grants for road work decreased revenues by \$234,040.
- Operating grants increased revenues by \$15,509.

For the most part, increases in expenses closely paralleled inflation and growth in the demand for services; however, the public safety expenses increased due to additional staff positions and pension costs of \$388,258.

The transportation cost increased due to increases in repairs and staffing in the amount of \$69,751, depreciation expense increased by \$78,127 due to more assets being depreciated and contractual services and Supplies increased by \$336,000 due to special projects.

Business-type activities. Business-type activities increased the City of Madeira's net position by \$5,074.

Financial analysis of the City of Madeira's Funds

As noted earlier, the City of Madeira uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the City of Madeira's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City of Madeira's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the City of Madeira's governmental funds reported combined ending fund balances of \$2,995,884, an increase of \$163,285 in comparison with the prior year. Of this amount, \$1,602,920, constitutes unassigned fund balance, which is available for spending at the government's discretion and \$222,872, constitutes assigned fund balance, and has been budgeted to be spent in 2017.

The general fund is the chief operating fund of the City of Madeira. At the end of the current fiscal year, unassigned fund balance of the general fund was \$1,602,920. As a measure of the general fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total fund expenditures. Unassigned and total fund balance represents 26% and 31% of total general fund expenditures respectively.

The fund balance of the City of Madeira's general fund decreased by (\$95,060) during the current fiscal year. Key factors in this change are as follows:

- Increase in tax collections of \$298,301 due to a stronger economy.
- Increase in general government expenditures of \$171,404 due to increased wages and insurance costs.
- Decrease in transfers to other funds of \$558,000.
- Increase in Public Safety expenditures of \$139,802 due to higher wages and contracted services

The fund balance for Street Repair increased by \$238,542, which was due to transfers from the general fund. Also, there was an increase in intergovernmental revenues and a decrease in capital outlay.

Proprietary fund. The City of Madeira's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net position of the rental property fund at the end of the year amounted to \$38,391. The increase in net position was \$5,074. The largest factor in the increase is the addition of a tenant resulting in higher revenues.

General Fund Budgetary Highlights

The increase between the original and final budget anticipated revenues totaled \$100,000. It was evident as the year progressed that intergovernmental revenue and permits were going to exceed original estimates.

The original budget and the final amended budget for expenditures increased \$340,000. During the year, expenditures were more than budgetary estimates, thus increasing the amount to be drawn upon the existing fund balance. Actual revenues, expenditures and transfers finished better than expected by a total of \$69,441. The favorable variance was due to anticipated capital expenditures not incurred prior to the end of the year and conservative budgeting.

Capital Asset and Debt Administration

Capital assets. The City of Madeira's investment in capital assets for its governmental and business type activities as of December 31, 2016 amounts to \$9,598,885 (net of accumulated depreciation). This investment in capital assets includes vehicles, improvements, furniture and equipment and roads. The total increase in the City of Madeira's investment in capital assets for the current fiscal year was 0.31%.

Total	\$9,313	\$9,268	\$286	\$301	\$9,599	\$9,569

The Infrastructure capital assets increased due to road and waterline improvements. Additional information on City of Madeira's capital assets can be found in note IV.C.

Long-term debt. At the end of the current year, the City of Madeira had a bond anticipation note outstanding in the amount of \$480,000.

All \$480,000 is backed by the full faith and credit of the government.

**City of Madeira's Outstanding Debt
General Obligation Bonds
(In thousands)**

	Governmental Activities	
	2016	2015
General obligation bond anticipation note	\$480	\$600

Additional information on City of Madeira's long-term debt can be found in note IV.E.

The City of Madeira's total debt decreased by \$120,000 during the current fiscal year. The key factor in the decrease was the scheduled principal retirement payment.

Economic Factors and Next Year's Budgets and Rates

- The occupancy rate of the City's central business district has remained at a high percent for the past three years.
- Inflationary trends in the region compare favorably to national indices.
- Building permits and earnings tax to remain flat.
- Increase in expenditures due to anticipated capital projects.

All of these factors were considered in preparing the City of Madeira's budget for the 2017 fiscal year.

Requests for Information

This financial report is designed to provide a general overview of the City of Madeira's finances for all those with an interest in the City's finances. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the Office of the Treasurer, 7141 Miami Avenue, Madeira, Ohio, 45243.

CITY OF MADEIRA, OHIO

Reconciliation of the Statement of Revenues, Expenditures and Changes
in Fund Balances of Governmental Funds to the Statement of Activities
For the Year Ended December 31, 2016

Net Change in Fund Balances - Total Governmental Funds	\$163,285
---	-----------

**Amounts reported for governmental activities in the
statement of activities are different because**

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outflows exceeded depreciation in the current period.

45,198

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.

Property Taxes	5,315	
Income Tax	(51,027)	
Intergovernmental Revenues	<u>(24,223)</u>	
Total		(69,935)

Contractually required contributions are reported as expenditures in governmental funds; however, the statement of net position reports these amounts as deferred outflows.

322,672

Except for amounts reported as deferred inflows/outflows, changes in the net pension liability are reported as pension expense in the statement of activities.

(603,787)

Expenses reported in the statement of activities do not require the use of current financial resources and, therefore are not reported as expenditures in governmental activities.

Interest	(1,160)	
Compensated Absences	<u>(22,735)</u>	
Total		<u>(23,895)</u>

CITY OF MADEIRA, OHIO
NOTES TO THE FINANCIAL STATEMENTS
DECEMBER 31, 2016

I. Summary of significant accounting policies

A. Reporting Entity

The City of Madeira (the City) is a home rule municipal corporation organized under the laws of the State of Ohio. The City operates under its own charter, which provides for a council/manager form of government and was adopted in 1959. The seven-member council is elected to four-year terms. Every two years council selects one of its members to serve as mayor and one of its members to serve as vice-mayor. Council also appoints the city manager, treasurer, law director and clerk of council.

The reporting entity is composed of the primary government, component units and other organizations. The primary government includes all funds, organizations, activities and component units for which the City is financially accountable and that are not legally separate. Component units are legally separate organizations for which the City is financially accountable. The City is financially accountable for an organization if it appoints a voting majority of the organization's governing board and either (1) the City is able to significantly influence the programs or services performed or provided by the organization, or (2) the City is legally entitled to or can otherwise access the organization's resources; the City is legally obligated or has otherwise assumed the responsibility to finance the deficits of or provide financial support to the organization; or the City is obligated for the debt of the organization. Component units may also include organizations that are fiscally dependent on the City in that the City approves the budget, the issuance of debt, or the levying of taxes. Based upon this definition, the City has no component units.

The City participates in two governmental joint ventures called the Sycamore Township JEDZ Kenwood – Central and Sycamore Township JEDZ Kenwood – East. These joint ventures are presented in Note V. Other information, C. Joint Ventures in the notes to the basic financial statements and are excluded from the accompanying financial statements except as noted.

The City provides various services including police protection, parks and recreation, planning, street maintenance and repair, and community development. The City also provides refuse collection and fire protection through annual contracts with outside contractors.

For financial reporting purposes, the City's financial statements include all funds for which the City is financially accountable based upon criteria set forth in Governmental Accounting Standards Board (GASB) Statement 61. The City reviewed certain legally separate organizations to determine if the elected officials of the City were financially accountable. No such organizations were identified.

B. Government-wide and fund financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed

from these statements; however interfund services provided and used are not eliminated in the process of consolidating. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segments are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental and proprietary funds. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. However, Agency funds have no measurement focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

The government reports the following major governmental funds:

The general fund is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The street repair fund accounts for that portion of the state gasoline tax and motor vehicle registration fees are restricted for maintenance of streets within the City.

The government reports the following proprietary fund:

The proprietary fund type consists of only one Enterprise Fund. This fund accounts for operations of rental properties.

The government reports the following fiduciary funds:

The fiduciary fund type consists of three Agency Funds. The City's agency funds are Mayor's Court (used to account for funds collected by the court) and two Joint Economic Development Zones (used to account for various economic development projects).

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the enterprise fund is rent. Operating expenses for enterprise funds include the cost of services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Revenue resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on the accrual basis when the exchange takes place.

Nonexchange transactions, in which the City receives value without directly giving equal value in return, include income taxes, property taxes, grants, entitlements, and donations. On an accrual basis, revenue from income taxes is recognized in the period in which the income is earned. Revenue from property taxes is recognized in the year for which the taxes are levied (see Note D). Revenue from grants, entitlements, and donations is recognized in the year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the year when use is first permitted, matching requirements, in which the City must provide local resources to be used for a specified purpose, and expenditure requirements, in which the resources are provided to the City on a reimbursement basis. On the modified accrual basis, revenue from nonexchange transactions must also be available before it can be recognized.

Under modified accrual basis, the following revenue sources are considered to be both measurable and available at year end: income tax, state-levied locally shared taxes (including gasoline tax and motor vehicle license tax), fines and forfeitures, interest, grants and entitlements, and rentals.

In addition to assets, the statements of financial position will sometimes report a separate section for deferred outflows of resources. Deferred outflows of resources represent a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense) until then.

In addition to liabilities, the statements of net position report a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources until that time. Unavailable revenue is reported only on the governmental funds balance sheet and represents receivables which will not be collected within the available period.

On the accrual basis of accounting, expenses are recognized at the time they are incurred.

The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred, if measurable. Allocations of cost, such as depreciation and amortization, are not recognized in governmental funds.

D. Assets, liabilities, and net position or equity

1. Deposits and investments

The City's cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

State statutes authorize the City to invest in obligations of the U.S. Treasury, Certificates of Deposit, repurchase agreements, and the State Treasurer's Investment Pool.

Investments for the government are reported at fair value. The State Treasurer's Investment Pool operates in accordance with appropriate state laws and regulations. The reported value of the pool is the same as the fair value of the pool shares.

2. Receivables

All trade and property tax receivables are considered collectable at December 31, 2016, and the allowance for uncollectible amounts receivable is zero.

Real property taxes are levied on assessed values which equal 35% of appraised value. The county auditor reappraises all real property every six years with a triennial update. The last update was completed for tax year 2015. Real property taxes collected in any calendar year are generally levied on assessed values as of January 1 of the preceding year according to the following calendar:

Property Tax Calendar - 2016 Collections

Lien Date	January 1, 2015
Levy Date	October 31, 2015
First Installment Payment Due	January 31, 2016
Second Installment Payment Due	June 20, 2016

The full tax rate applied to real property for the fiscal year ended December 31, 2016, was \$7.50 per \$1,000 of assessed valuation. Real property owners' tax bills are further reduced by

homestead and rollback deductions, when applicable. The amount of these homestead and rollback reductions is reimbursed to the City by the State of Ohio.

The Hamilton County Treasurer collects property tax on behalf of all taxing districts within the County. The Hamilton County Auditor periodically remits to the taxing districts their portions of the taxes collected.

Public utilities real and tangible personal property taxes collected in any calendar year are those levied on assessed values as of December 31 of the preceding year. Certain tangible personal property of public utilities is currently assessed at 100% of its true value. Real property of public utilities is currently assessed at 35% of true value. Property taxes on public utilities are subject to the same calendar as real property taxes, which are described above.

Property taxes that are measurable but not available at fiscal yearend are recorded as a receivable with the corresponding revenue deferred until available. Delinquent property tax amounts, net of allowance for uncollectibles, are recorded if material in amount.

3. Inventories

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

4. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than \$1,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Property, plant, and equipment of the City are depreciated using the straight line method over the following estimated useful lives:

Assets	Years
Building & Improvements	27
Infrastructure	10 – 15
Police Vehicles	3
All Other Vehicles	5
Office Furniture & Software	3 – 5

Infrastructure assets acquired prior to 2004 have not been capitalized.

5. Deferred Outflows/Inflows of Resources

Deferred outflows of resources are reported on the government-wide statement of net position for pension. The deferred outflows of resources related to pension are explained in V. F.

Deferred inflows of resources include property taxes, pensions and unavailable revenue. Property taxes represent amounts for which there is an enforceable legal claim as of December 31, 2016, but which were levied to finance 2017 operations. These amounts have been recorded as a deferred inflow on both the government-wide statement of net position and governmental fund financial statements. Unavailable revenue includes delinquent property taxes, intergovernmental grants, and miscellaneous revenues. These amounts are deferred and recognized as an inflow of resources in the period the amounts become available. Deferred inflows of resources related to pension are reported on the government-wide statement of net position. (See Note V. F)

6. Accrued Liabilities and Long Term Obligations

It is the government's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. There is no liability for unpaid accumulated sick leave since the government does not have a policy to pay any amounts when employees separate from service with the government, unless they are eligible to retire. If they are eligible to retire, a liability is recorded for 40 percent of their accrued sick leave up to a maximum of 85 days and accounted for using the termination method. All vacation pay is accrued when incurred in the government-wide and proprietary financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

All payables, accrued liabilities and long-term obligations are reported in the government-wide financial statements.

In general, governmental fund payables and accrued liabilities that once incurred, are paid in a timely manner and in full from current financial resources, and are reported as obligations of the funds. However, claims and judgements, compensated absences and net position liability that will be paid from governmental funds are reported as a liability in the fund financial statements only to the extent that they are due for payment during the current year. Bonds are recognized as a liability on the fund financial statements when due.

7. Fund balance

The following fund balance classifications describe the relative strength of the spending constraints placed on the purposes for which resources can be used:

Nonspendable fund balance – amounts that are not in a spendable form (such as inventory and prepaid items) are required to be maintained intact.

Restricted fund balance – amounts constrained to specific purposes by their providers (such as grantors, bondholders, and higher levels of government), through constitutional provisions or by enabling legislation. The City's restricted fund balance is the police department and the street

repair fund. The purposes imposed by the state are for crime prevention and detection and maintenance and repairs of the streets.

Committed fund balance – amounts constrained to specific purposes by a government itself, using its highest level of decision-making authority; to be reported as committed, amounts cannot be used for any other purpose unless the government takes the same highest level action to remove or change the constraint. The City’s committed funds consist of recreation and capital improvements. Council has committed funds for recreation programs and amounts for future capital improvements to sidewalks, storm sewers and other large capital purchases.

Assigned fund balance – amounts a government intends to use for a specific purpose; intent is expressed by City Council.

Unassigned fund balance – amounts that are available for any purpose; positive amounts are reported only in the general fund. Unassigned funds are used after all other fund balances are expended.

City Council establishes (and modifies or rescinds) fund balance commitments by passage of an ordinance. This is typically done through adoption and amendment of the budget. A fund balance commitment is further indicated in the budget document as a designation or commitment of the fund (such as for special incentives). Assigned fund balance is established by City Council through adoption or amendment of the budget as intended for specific purpose (such as the purchase of capital assets, construction, debt service, or for other purposes). The City generally uses committed funds first, assigned funds second and unassigned funds last when expenditures are made.

8. Net Position

Net position represents the difference between assets plus deferred outflows and liabilities plus deferred inflows. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvement of those assets plus deferred outflows related to debt refunding. Net position is reported as restricted when there are limitations imposed on their use either through constitutional provisions or enabling legislation or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments.

The City applies restricted resources when an expense is incurred for purposes for which both net position-restricted and net position-unrestricted are available.

9. Estimates

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

10. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the pension plans and additions to/deductions from their fiduciary net position have been determined on the same basis as they are reported by the pension systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension systems report investments at fair value.

II. Reconciliation of government-wide and fund financial statements

A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position

The governmental fund balance sheet includes reconciliation between fund balance - total governmental funds and net position - governmental activities as reported in the government-wide statement of net position. One element of that reconciliation explains that “long-term liabilities, including compensated absence and accrued interest, are not due and payable in the current period and therefore are not reported in the funds.” The details of this difference are as follows:

Compensated Absences	\$222,838
Accrued Interest Payable	5,450
Net adjustment to reduce fund balance - total governmental funds to arrive at net position - governmental activities	\$228,288

B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities

The government fund statement of revenues, expenditures, and changes in fund balances includes reconciliation between net changes in fund balances - total governmental funds and changes in net position of governmental activities as reported in the government-wide statements of activities. One element of that reconciliation explains that “Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets are allocated over their estimated useful lives and reported as depreciation expense.” The details of this difference are as follows:

Capital Outlay	\$1,008,933
Depreciation Expense	(963,735)
Net adjustment to increase net changes in fund balances – total governmental funds to arrive at changes in net position of governmental activities	\$45,198

III. Stewardship, compliance, and accountability

A. Budgetary information

In 1994 the City, being a home rule Municipal Corporation, adopted, through ordinance, GAAP (generally accepted accounting principle) as its budgetary basis. This change was thought necessary in order to provide more comparable budget and actual revenue and expenditure analysis. Therefore, the revenue and expenditure statements contained herein for comparative purposes are presented on the basis of generally accepted accounting principles. The City is reporting at the legal level of budgetary control which requires the governing body to approve any over budget expenditures of appropriations or transfers of appropriated amounts at the fund level.

Budgetary Process. Annual budgets are adopted for all governmental funds. The City adopts an annual budget for the proprietary fund; however, budgetary data is not presented for the proprietary fund due to the nature of the fund. There is no legal requirement to report on such budget. The budgetary process is prescribed by provisions of the Ohio Revised Code. The legal level of budgetary control is defined as the level at which management may not reallocate appropriations without the approval of the governing body (City Council). For the City, the legal level of control is the fund level for each fund. The major documents prepared are:

Tax Budget. A tax budget of estimated cash revenues and expenditures for all budgeted funds, for the period January 1 to December 31 of the following year, is submitted to the County Auditor by July 20 of each year. The County Budget Commission determines if the budget substantiates a need to levy all or part of previously authorized taxes and reviews estimated revenue. The commission certifies its actions to the City by October 1. As part of this certification, the City receives the official certificate of estimated resources, which states the projected revenues of each fund. The certificate of estimated resources may be further amended during the year if the fiscal officer determines that the revenue collected is greater or less than the current estimates. Because the tax budget prepared for the County Auditor is on a cash basis, those numbers do not match the GAAP-basis budget shown in this report as required by ordinance.

Appropriations. A temporary appropriation measure to control expenditures may be passed on or about January 1 of each year for the period from January 1 to March 31. The annual appropriation ordinance must be passed by April 1 of each year for the period January 1 to December 31. The appropriation ordinance may be amended during the year by ordinance of council as new information becomes available provided that total fund appropriations do not exceed current estimated resources, as certified. During the year, one supplemental appropriation measure was passed. The budget figures which appear in the statements of budgetary comparisons represent the final appropriation amounts, including all amendments and modifications. All annual appropriations lapse at December 31.

Encumbrances. As part of formal budgetary control, purchase orders, contracts and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation and to determine and maintain

legal compliance. Unencumbered and unexpended appropriations lapse at year end. Encumbrances are closed to unassigned fund balance/net position at year end and are re-encumbered and re-appropriated at the start of the following year.

IV. Detailed notes on all funds

A. Deposits and investments

The City follows the practice of pooling cash and investments with the Treasurer, except for the cash and cash equivalents in Agency Fund. Each fund's portion of total cash and investments is summarized by fund type in the Balance Sheet as either "Cash and Cash Equivalents" and/or "Investments."

Deposits

Custodial Credit Risk. Custodial credit risk is the risk that in the event of a bank failure, the City's deposits may not be returned to it. The City's custodial credit risk policy requires that deposits be collateralized as required by ORC Chapter 135. Ohio Law requires that deposits be placed in eligible banks or savings and loan associations located in Ohio. Any public depository in which the City places deposits must pledge as collateral eligible securities of aggregate market value equal to the excess of deposits not insured by the Federal Deposit Insurance Corporation (FDIC). The securities pledged as collateral are pledged to a pool for each individual financial institution in amounts equal to at least 105% of the carrying value of all public deposits held by each institution. Obligations that may be pledged as collateral are limited to obligations of the United States and its agencies and obligations of any state, county, Municipal Corporation or other legally constituted authority of any other state, or any instrumentality of such county, municipal corporation or other authority. Collateral is held by trustees including the Federal Reserve Bank and designated third party trustees of the financial institutions.

At year-end, \$54,240 of the City's bank balance of \$312,342 was exposed to custodial credit risk.

Investments

The City's investments at December 31, 2016 are as summarized as follows:

	Fair Value	Average Maturity Years
Star Ohio	\$2,833,809	n/a

Credit Risk. It is the City's policy to limit its investments that are not obligations of the U.S. Government or obligations explicitly guaranteed by the U.S. Government to investments which have a credit quality rating of the top 2 ratings by nationally recognized statistical rating organizations. Investments in STAR Ohio are rated AAAM by Standard & Poor's.

Concentration of credit risk is defined as the risk of loss attributed to the magnitude of a government's investment in a single issuer. The City is required to disclose the amount of investments with any one issuer that represent five percent or more of total investments. Investments issued by the U.S. government, investments, and investments in external investment

pools are excluded from this requirement. At December 31, 2016 100% of the City's investments are at STAR Ohio, which is an external investment pool.

STAR Ohio is an investment pool managed by the State Treasurer's Office that allows governments within the State to pool their funds for investment purposes. STAR Ohio is not registered with the SEC as an investment company, but does operate in a manner consistent with Rule 2a7 of the Investment Company Act of 1940. Investments in STAR Ohio are valued at the net asset value per share provided by Star Ohio on an amortized cost basis at December 31, 2016, which approximates fair value. Investments in Star Ohio are excluded from fair value measurement requirements under generally accepted accounting principles, and instead are reported at amortized cost.

For 2016, there were no limitations or restrictions on any participant withdrawals due to redemption notice periods, liquidity fees, or redemption gates. However, notice must be given 24 hours in advance of all deposits and withdrawals exceeding \$25 million. STAR Ohio reserves the right to limit the transaction to \$50 million, requiring the excess amount to be transacted the following business day(s), but only to the \$50 million limit. All accounts of the participant will be combined for these purposes.

The classification of cash and cash equivalents and investments on the financial statements is based on criteria set forth in GASB Statement No. 9. Reconciliation between the classifications of cash and investments on the financial statements and the classifications per GASB Statement No. 3 is as follows:

	Cash and Cash Equivalents	Investments
GASB Statement 9	\$3,897,668	\$0
Star Ohio	(2,833,809)	2,833,809
GASB Statement 3		\$2,833,809

Cash with Fiscal Agent

Represents cash held by Miami Valley Risk Management Association (MVRMA) and due to the City. See Note V regarding insurance pool information.

B. Receivables

Governmental funds report deferred inflows in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned.

C. Capital assets

Capital asset activity for the year ended December 31, 2016 was as follows:

Governmental Activities	Balance at 1/1/2016	Increases	Decreases	Balance at 12/31/2016
Land - not being depreciated	\$645,000	\$0	\$0	\$645,000
Capital Assets - being depreciated				
Building & Land Improvements	3,476,093	0	0	3,476,093
Vehicles	751,205	112,561	(104,250)	759,516
Infrastructure	11,272,671	888,170	0	12,160,841
Furniture, Equipment and Software	623,466	8,202	(36,303)	595,365
Total Capital Assets	<u>16,768,435</u>	<u>1,008,933</u>	<u>(140,553)</u>	<u>17,636,815</u>
Less Accumulated Depreciation				
Building & Land Improvements	(2,688,997)	(147,751)	0	(2,836,748)
Vehicles	(655,438)	(55,603)	104,250	(606,791)
Infrastructure	(3,614,226)	(746,907)	0	(4,361,133)
Furniture, Equipment and Software	(541,866)	(13,474)	36,303	(519,037)
Total Accumulated Depreciation	<u>(7,500,527)</u>	<u>(963,735)</u>	<u>140,553</u>	<u>(8,323,709)</u>
Total Capital Assets, being depreciated, Net	<u>8,622,908</u>	<u>45,198</u>	<u>0</u>	<u>8,668,106</u>
Governmental Activities Capital Assets, Net	<u>\$9,267,908</u>	<u>\$45,198</u>	<u>\$0</u>	<u>\$9,313,106</u>

Business-type Activities	Balance at 1/1/2016	Increases	Decreases	Balance at 12/31/2016
Land - not being depreciated	\$134,008	\$0	\$0	\$134,008
Capital assets being depreciated:				
Land Improvements	179,521	4,381	(54,260)	129,642
Buildings	370,164	0	0	370,164
Subtotal	683,693	4,381	(54,260)	633,814
Less Accumulated Depreciation:				
Land Improvements	(124,590)	(6,333)	54,260	(76,663)
Buildings	(257,692)	(13,680)	0	(271,372)
Total Accumulated Depreciation	(382,282)	(20,013)	54,260	(348,035)
Total Capital Assets, being depreciated, net	167,403	(15,632)	0	151,771
Net Capital Assets	\$301,411	(\$15,632)	\$0	\$285,779

Depreciation expense was charged to functions/programs of the primary government as follows:

Governmental Activities:	
General Government	\$66,216
Public Safety	38,161
Transportation	802,159
Recreation	57,199

Total depreciation expense - governmental activities \$963,735

Business-type Activities	
Enterprise	\$20,013

D. Interfund transfers

Interfund transfers:

Fund	Transfers In	Transfers Out
General Fund	\$0	\$362,000
Street Repair Fund	200,000	0
Other Governmental Funds	162,000	0
Totals	\$362,000	\$362,000

Transfers were made to fund capital improvements and subsidize recreation programs.

E. Other Liabilities

Short Term Debt

On May 19, 2016, the City issued a one-year bond anticipation note in the amount of \$480,000 with an interest rate of 1.85% for the Kenwood Road resurfacing project. This note will be due on May 18, 2017. The City retired the note dated May 20, 2015 with an interest rate of 1.16% in the amount of \$600,000 on May 19, 2016.

Changes in other liabilities

Other liability activity for the year ended December 31, 2016 was as follows:

Governmental Activities	Beginning Balance	Additions	Reductions	Ending Balance
Short Term				
Bond Anticipation Note	\$600,000	\$480,000	(\$600,000)	\$480,000
Compensated Absences	144,107	128,827	(109,450)	163,484
Total Short Term	\$744,107	\$608,827	(\$709,450)	\$643,484
Long-Term Liabilities				
Compensated Absences	\$55,996	\$3,358	\$0	\$59,354
Net Pension Liability:				
OPERS	697,133	404,326	0	1,101,459
OP&F	2,342,092	679,947	0	3,022,039
Total Net Pension Liability	\$3,039,225	\$1,084,273	\$0	\$4,123,498

Compensated absences have been liquidated from the General Fund in the past.

V. Other information

A. Risk Management

The City is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; error and omissions; injuries to employees and natural disasters. During 2016, the City contracted with Miami Valley Risk Management Association for vehicle, property and general liability insurance. There has been no reduction in coverage from the prior years and claims have not exceeded coverage in any of the past three years. The City provided medical insurance through Humana Health Insurance, dental insurance through Dental Care Plus and life insurance through Humana Health Insurance.

Insurance Pool

Miami Valley Risk Management Association, Inc. (MVRMA, Inc.) is a consortium of municipalities located in southwest Ohio which, beginning in 1988, formed an Association under Section 2744.081 of the Ohio Revised Code (ORC) to act collectively in addressing its members' risk management and risk financing needs. At December 31, 2016, Madeira's participation was limited to coverage for all real and personal property, crime, surety, general liability, boiler and machinery, employment practices liability, police professional and public official liability coverage up to the limits stated below. Membership in MVRMA is intended to provide broad based coverage up to the limits stated below, with increased emphasis on safety and loss prevention and to create an opportunity for other local governments to participate.

MVRMA is a non-profit corporation governed by a twenty member board of trustees, consisting of a representative appointed by each of the member cities. The board of trustees elects the officers of the corporation, with each trustee having a single vote. Management is provided by an Executive Director, who is assisted by a Claims Manager, a full-time Loss Control Manager and office staff. The board is responsible for its own financial matters and the corporation maintains its own books of account. Budgeting and financing of MVRMA is subject to the approval of the board, and the organization is covered by policies, procedures, and formally adopted bylaws. The individual MVRMA, Inc. members are not considered "participants having equity interest" as defined by GASB Statement No. 61 since members have no rights to any assets of MVRMA, Inc. other than possible residual claims upon dissolution. The risk of loss is transferred from the City to the pool. Therefore, MVRMA, Inc. is a multi-jurisdictional arrangement that has the characteristics of a joint venture but has additional features that distinguish it, for financial reporting purposes, from the traditional joint venture defined in GASB Statement No. 61.

The following is a summary of insurance coverage at year end:

General/Automobile Liability \$12,000,000 per occurrence
Public Officials Errors and Omissions Liability 12,000,000 per occurrence
Property 1,000,000,000 per occurrence
Boiler and Machinery 100,000,000 per occurrence

The deductible per occurrence for all types is \$2,500.

MVRMA issues a stand-alone financial report that includes financial statements and required supplementary information for MVRMA, Inc. Interested parties may obtain a copy by making a written request to: 4625 Presidential Way, Kettering, OH 45429-5706.

The City pays the State Workers' Compensation System a premium based on a rate per \$100 of salaries. This rate is calculated based on accident history and administrative costs. In order to lower rates charged to the City, the City has joined a group rating program through Ohio Municipal League.

B. Contingent liabilities

The City is of the opinion that ultimate disposition of claims and legal proceedings will not have a material effect, if any, on the financial condition of the City.

C. Joint Venture

Sycamore Township and the City of Madeira contracted to create two Sycamore Township Joint Economic Development Zones for the purpose of facilitating economic development in the Zone.

A .75% income tax was enacted for each JEDZ. Imposition of the tax began on October 1, 2013 and terminates December 31, 2053 with three 10 year automatic extensions.

Distribution of Gross Tax:

- 2% Service Fee for the City of Madeira to collect the income
- 2% Escrow payments for refunds
- 1% Maintenance of the JEDZ
- 95% Net Distribution

Net Distribution:

- 90% Sycamore Township
- 10% City of Madeira

Financial information may be obtained from Sycamore Township, 8540 Kenwood Road, Cincinnati, OH 45236.

D. Contractual commitments

The City contracts with the Madeira/Indian Hill Joint Fire District for fire protection and emergency medical services. The contract fee for 2016 was \$1,583,683.

The City also contracts with CSI for solid waste collection. The contract fee for 2016 was \$505,232.

Health Department services are provided by Hamilton County. The contract for 2016 was \$20,391.

E. Resolution of legal claim

In March 1992, an employee of the City suffered a fatal accident while working on City business. In February of 1993, Council approved Resolution 10-93 which approved an agreement concerning a settlement with the employee's widow. The settlement provided for a guaranteed amount of \$88,400, payable to the widow (or her estate) in monthly installments of \$737 from February of 1993 through February of 2003. The guaranteed amount was paid off in February of 2003 and no liability exists at December 31, 2016 relative to the guaranteed settlement.

In addition, the agreement provided for monthly payments of \$650 to the widow after February of 2003, contingent upon death or remarriage. The City made all such required payments to the widow from January through December 2016.

F. Defined Benefit Pension Plan

Net Pension Liability

All of the City's employees participate in one of two separate retirement systems which are cost-sharing multiple employer defined benefit pension plans.

The net pension liability reported on the statement of net position represents a liability to employees for pensions. Pensions are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period. The obligation to sacrifice resources for pensions is a present obligation because it was created as a result of employment exchanges that already have occurred.

The net pension liability represents the City's proportionate share of each pension plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension plan's fiduciary net position. The net pension liability calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting this estimate annually.

Ohio Revised Code limits the City's obligation for this liability to annually required payments. The City cannot control benefit terms or the manner in which pensions are financed; however, the City does receive the benefit of employees' services in exchange for compensation including pension.

GASB 68 assumes the liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires all funding to come from these employers. All contributions to date have come solely from these employers (which also includes costs paid in the form of withholdings from employees). State statute requires the pension plans to amortize unfunded liabilities within 30 years. If the amortization period exceeds 30 years, each pension plan's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension liability.

Resulting adjustments to the net pension liability would be effective when the changes are legally enforceable.

Ohio Public Employees Retirement System (OPERS)

The City of Madeira employees, other than full-time police, participate in the Ohio Public Employees Retirement System (OPERS). OPERS is a cost-sharing, multiple-employer public employee retirement system comprised of three separate pension plans: the Traditional Pension Plan (TP), the Combined Plan (CO) and the Member-Directed Plan (MD). All public employees in Ohio, except those covered by one of the other state or local retirement systems in Ohio, are members of OPERS. While members may elect the CO and MD, substantially all employees are in the TP; therefore, the following disclosure focuses on the traditional pension plan.

OPERS provides retirement, disability, survivor and death benefits, and annual cost of living adjustments to members of the TP and CO. Members of the MD do not qualify for ancillary benefits. Authority to establish and amend benefits is provided by Chapter 145 of the Ohio Revised Code. OPERS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about OPERS' fiduciary net position. Interested parties may obtain a copy by visiting <https://www.opers.org/financial/reports.shtml>, by writing to the Ohio Public Employees Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling 800-222-7377.

Plan Description and Plan Benefits:

The TP is a defined benefit plan in which a member's retirement benefits are calculated on a formula that considers years of service and final average salary. The pension benefits are funded by both member and employer contributions, and investment earnings on those contributions.

The CP is a defined benefit plan with elements of a defined contribution plan. Under the CP, members earn a formula benefit similar to, but at a factor less than, the TP benefit. This defined benefit is funded by employer contributions and associated investment earnings. Additionally, member contributions are deposited into a defined contribution account in which the member self-directs the investment. Upon retirement or termination, the member may choose a defined contribution retirement distribution that is equal in amount to the member's contributions to the plan and investment earnings (or losses) on those contributions. Members may also elect to use their defined contribution account balances to purchase a defined benefit annuity administered by OPERS.

The MD is a defined contribution plan in which members self-direct the investment of both member and employer contributions. The retirement distribution under this plan is equal to the sum of member and vested employer contributions, plus investment earnings (or losses) on those contributions. Employer contributions and associated investment earnings vest over a five-year period at a rate of 20% per year. Upon retirement or termination, the member may choose a defined contribution retirement distribution, or may elect to use his/her defined contribution account balances to purchase a defined benefit annuity administered by OPERS. The Board of Trustees, pursuant to Chapter 145, has elected to maintain funds to provide health care coverage

to eligible TP and CP retirees and survivors of members. Healthcare coverage does not vest and is not required under Chapter 145. As a result, coverage may be reduced or eliminated at the discretion of the Board.

Senate Bill (SB) 343 was enacted into law with an effective date of January 7, 2013. In the legislation, members were categorized into three groups with varying provisions of the law applicable to each group. Members who were eligible to retire under law in effect prior to SB 343 or will be eligible to retire no later than five years after January 7, 2013, comprise transition Group A. Members who have 20 years of service credit prior to January 7, 2013, or will be eligible to retire no later than 10 years after January 7, 2013, are included in transition Group B. Group C includes those members who are not in either of the other groups and members who were hired on or after January 7, 2013.

The following table provides age and service requirements for retirement and the retirement formula applied to final average salary (FAS) for the three member groups under the traditional plan as per the reduced benefits adopted by SB 343 (see OPERS CAFR referenced above for additional information):

Group A Eligible to retire prior to January 7, 2013 or five years after January 7, 2013	Group B 20 years of service credit prior to January 7, 2013 or eligible to retire ten years after January 7, 2013	Group C Members not in other Groups and members hired on or after January 7, 2013
State and Local	State and Local	State and Local
Age and Service Requirements: Age 60 with 60 months of service credit or Age 55 with 25 years of service credit	Age and Service Requirements: Age 60 with 60 months of service credit or Age 55 with 25 years of service credit	Age and Service Requirements: Age 57 with 25 years of service credit or Age 62 with 5 years of service credit
Formula: 2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30	Formula: 2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30	Formula: 2.2% of FAS multiplied by years of service for the first 35 years and 2.5% for service years in excess of 35

Final average Salary (FAS) represents the average of the three highest years of earnings over a member's career for Groups A and B. Group C is based on the average of the five highest years of earnings over a member's career.

Members who retire before meeting the age and years of service credit requirement for unreduced benefits receive a percentage reduction in the benefit amount.

When a benefit recipient has received benefits for 12 months, an annual cost of living adjustment (COLA) is provided. This COLA is calculated on the base retirement benefit at the date of retirement and is not compounded. For those retiring prior to January 7, 2013, the COLA will continue to be a 3 percent simple annual COLA. For those retiring subsequent to January 7, 2013, beginning in calendar year 2019, the COLA will be based on the average percentage increase in the Consumer Price Index, capped at 3 percent.

Funding Policy

The Ohio Revised Code provides the statutory authority requiring public employers to fund health care through their contributions to OPERS. A portion of each employer's contribution to OPERS is set aside to fund OPERS health care plans. For 2016, member and employer contribution rates were consistent across all three plans. The member contribution rates were 10.0% of earnable salary and the employer contribution rates were 14.0% of earnable salary, which is the maximum contribution rate set by State statutes. The City's contractually required employer contributions for all plans are equal to 100% of employer charges. The City's Contributions for the years ending December 31, 2016, 2015, and 2014 were \$113,894, \$112,844, and \$102,462 respectively, of which \$16,265, \$16,120, \$17,432, respectively, was allocated to the health care plan.

Ohio Police & Fire Pension Fund (OP&F)

City of Madeira full-time police participate in Ohio Police and Fire Pension Fund (OP&F), a cost-sharing, multiple-employer defined benefit pension plan administered by OP&F. OP&F provides retirement and disability pension benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Authority to establish and amend benefits is provided by state statute per Chapter 742 of the Ohio Revised Code. OP&F issues a publicly available financial report that includes financial information, required supplementary information and detailed information about OP&F's fiduciary net position. Interested parties may obtain a copy by visiting the OP&F website at www.op-f.org or by writing to the Ohio Police and Fire Pension Fund, 140 East Town Street, Columbus, Ohio 43215-5164.

Upon attaining a qualifying age with sufficient years of service, a member of OP&F may retire and receive a lifetime monthly pension. OP&F offers four types of service retirement: normal, service commuted, age/service commuted and actuarially reduced.

Each type has different eligibility guidelines and is calculated using the member's average annual salary. The following discussion of the pension formula relates to normal service retirement.

For members hired after July 1, 2013, the minimum retirement age is 52 for normal service retirement with at least 25 years of service credit. For members hired on or before July 1, 2013, the minimum retirement age is 48 for normal service retirement with at least 25 years of service credit.

The annual pension benefit for normal service retirement is equal to a percentage of the allowable average annual salary. The percentage equals 2.5 percent for each of the first 20 years of service credit, 2.0 percent for each of the next five years of service credit and 1.5 percent for each year of service credit in excess of 25 years. The maximum pension of 72 percent of the allowable average annual salary is paid after 33 years of service credit.

Under normal service retirement, retired members who are at least 55 years old and have been receiving OP&F benefits for at least one year may be eligible for a cost-of-living allowance adjustment. The age 55 provision for receiving a COLA does not apply to those who are receiving a permanent and total disability benefit and statutory survivors.

Members retiring under normal service retirement, with less than 15 years of service credit on July 1, 2013, will receive a COLA equal to either three percent or the percent increase, if any, in the consumer price index (CPI) over the 12-month period ending on September 30 of the immediately preceding year, whichever is less. The COLA amount for members with at least 15 years of service credit as of July 1, 2013 is equal to three percent of their base pension or disability benefit.

Funding Policy

The Ohio Revised Code provides statutory authority for employee and employer contributions. During 2016, plan members were required to contribute 12.25% of their annual covered payroll. During 2016, the City was required to contribute 19.5% of annual covered payroll for police officers. The City's contractually require contributions to OP&F for the years ending December 31, 2016, 2015, and 2014 were \$230,965, \$206,835, and \$193,682 respectively, of which \$6,005, \$5,303, and \$4,479, respectively, was allocated to the health care plan.

In addition to current contributions, the City pays installments on a specific liability of the City incurred when the State of Ohio established the statewide pension system for police and fire fighters in 1967. As of December 31, 2016, the specific liability of the City was \$912 and payable through the year 2035.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The net pension asset and net pension liability for OPERS was measured as of December 31, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. OP&F's total pension liability was measured as of December 31, 2015, and was determined by rolling forward the total pension liability as of January 1, 2015, to December 31, 2015. The City's proportion of the net pension liability was based on the City's share of contributions to the pension plan relative to the contributions of all participating entities. Following is information related to the proportionate share and pension expense:

	<u>OPERS</u>	<u>OP&F</u>	<u>Total</u>
Proportionate Share of the Net Pension Liability	\$1,101,459	\$3,022,039	\$4,123,498
Proportion of the Net Pension Liability	0.006359%	0.0469770%	
Change in Proportion	0.000579%	0.0017665%	
Contributions	\$178,520	\$425,267	\$603,787

At December 31, 2016, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	<u>OPERS</u>	<u>OP&F</u>	<u>Total</u>
Deferred Outflows of Resources			
Net difference between projected and actual earnings on pension plan investments	\$320,968	\$488,917	\$809,885
Change in City's proportionate share	47,790	76,727	124,517
City contributions subsequent to the measurement date	<u>97,629</u>	<u>225,043</u>	<u>322,672</u>
Total Deferred Outflows of Resources	<u>\$466,387</u>	<u>\$790,687</u>	<u>\$1,257,074</u>
Deferred Inflows of Resources			
Differences between expected and actual experience	<u>\$21,282</u>	<u>\$8,486</u>	<u>\$29,768</u>

\$322,672 reported as deferred outflows of resources related to pension resulting from City contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending December 31, 2017. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

Year Ending December 31:	<u>OPERS</u>	<u>OP&F</u>	<u>Total</u>
2017	\$92,495	\$141,688	\$234,183
2018	97,202	141,688	238,890
2019	85,174	141,686	226,860
2020	72,605	116,451	189,056
2021	0	13,149	13,149
Thereafter	<u>0</u>	<u>2,496</u>	<u>2,496</u>
Total	<u>\$347,476</u>	<u>\$557,158</u>	<u>\$904,634</u>

Actuarial Assumptions - OPERS

Actuarial valuations of an ongoing plan involve estimates of the values of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation. The total pension liability in the December 31, 2015, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Wage Inflation	3.75 percent
Future Salary Increases, including inflation COLA or Ad Hoc COLA	4.25 to 10.05 percent including wage inflation Pre 1/7/13 retirees: 3% simple Post 1/7/13 retirees: 3% simple through 2018, then 2.8% simple
Investment Rate of Return	8 percent
Actuarial Cost Method	Individual Entry Age

Mortality rates were based on the RP-2000 Mortality Table projected 20 years using Projection Scale AA. For males, 105 percent of the combined healthy male mortality rates were used. For females, 100 percent of the combined healthy female mortality rates were used. The mortality rates used in evaluating disability allowances were based on the RP-2000 mortality table with no projections. For males 120 percent of the disabled female mortality rates were used set forward two years. For females, 100 percent of the disabled female mortality rates were used.

The most recent experience study was completed for the five year period ended December 31, 2010. The long-term rate of return on defined benefit investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation.

During 2015, OPERS managed investments in four investment portfolios: the Defined Benefits portfolio, the Health Care portfolio, the 115 Health Care Trust portfolio and the Defined Contribution portfolio. During 2016, OPERS consolidated the health care portfolios. The Defined Benefit portfolio includes the investment assets of the Traditional Pension Plan, the defined benefit component of the Combined Plan, the annuitized accounts of the Member-Directed Plan and the VEBA Trust. Within the Defined Benefit portfolio, contributions into the plans are all recorded at the same time, and benefit payments all occur on the first of the month. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. The money weighted rate of return, net of investments expense, for the Defined Benefit portfolio is 0.40 percent for 2015.

The allocation of investment assets with the Defined Benefit portfolio is approved by the Board of Trustees as outlined in the annual investment plan. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the defined benefit pension plans. The table below displays the Board-approved asset allocation policy for 2015 and the long-term expected real rates of return:

Asset Class	Target Allocation	Weighted Average Long-Term Expected Real Rate of Return (Arithmetic)
Fixed Income	23.00 %	2.31 %
Domestic Equities	20.70	5.84
Real Estate	10.00	4.25
Private Equity	10.00	9.25
International Equities	18.30	7.40
Other investments	18.00	4.59
Total	100.00 %	5.27 %

Discount Rate The discount rate used to measure the total pension liability was 8 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers are made at the statutorily required rates. Based on those assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefits payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the City’s Proportionate Share of the Net Pension Liability to Changes in the Discount Rate The following table presents the City’s proportionate share of the net pension liability calculated using the current period discount rate assumption of 8 percent, as well as what the City’s proportionate share of the net pension liability would be if it were calculated using a discount rate that is one-percentage-point lower (7 percent) or one-percentage-point higher (9 percent) than the current rate:

	1% Decrease (7.00%)	Current Discount Rate (8.00%)	1% Increase (9.00%)
City's proportionate share of the net pension liability	\$1,754,844	\$1,101,459	\$550,311

Actuarial Assumptions – OP&F

OP&F’s total pension liability as of December 31, 2015 is based on the results of an actuarial valuation date of January 1, 2015, and rolled-forward using generally accepted actuarial procedures. The total pension liability is determined by OP&F’s actuaries in accordance with GASB Statement No. 67, as part of their annual valuation. Actuarial valuations of an ongoing plan involve estimates of reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment mortality, salary increases, disabilities, retirements and employment terminations. Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future.

Key methods and assumptions used in calculating the total pension liability in the latest actuarial valuation, prepared as of January 1, 2015, are presented below:

Valuation Date	January 1, 2015
Actuarial Cost Method	Entry Age Normal
Investment Rate of Return	8.25 percent
Projected Salary Increases	4.25 percent to 11 percent
Payroll Increases	3.75 percent
Inflation Assumptions	3.25 percent
Cost of Living Adjustments	2.60 percent and 3.00 percent

Rates of death are based on the RP2000 Combined Table, age-adjusted as follows. For active members, set back six years. For disability retirements, set forward five years. For service retirements, set back zero years. For beneficiaries, set back zero years. The rates are applied on a fully generational basis, with a base year of 2009, using mortality improvement Scale AA.

The most recent experience study was completed January 1, 2012.

The long-term expected rate of return on pension plan investments was determined using a building-block approach and assumes a time horizon, as defined in the Statement of Investment Policy. A forecasted rate of inflation serves as the baseline for the return expectation. Various real return premiums over the baseline inflation rate have been established for each asset class. The long-term expected nominal rate of return has been determined by calculating a weighted averaged of the expected real return premiums for each asset class, adding the projected inflation rate and adding the expected return from rebalancing uncorrelated asset classes. Best estimates of the long-term expected geometric real rates of return for each major asset class included in OP&F's target asset allocation as of December 31, 2015 are summarized below:

Asset Class	Target Allocation	10 Year Expected Real Rate of Return **	30 Year Expected Real Rate of Return **
Cash and Cash Equivalents	- %	- %	- %
Domestic Equity	16.00	4.47	7.80
Non-US Equity	16.00	4.47	8.00
Core Fixed Income *	20.00	1.62	5.35
Global Inflation Protected *	20.00	1.33	4.73
High Yield	15.00	3.39	7.21
Real Estate	12.00	3.93	7.43
Private Markets	8.00	6.98	10.73
Timber	5.00	4.92	7.35
Master Limited Partnerships	8.00	7.03	10.75
Total	120.00 %		

* levered 2x

** numbers include inflation

OP&F's Board of Trustees has incorporated the "risk parity" concept into OP&F's asset liability valuation with the goal of reducing equity risk exposure, which reduces overall Total Portfolio risk without sacrificing return, and creating a more risk-balanced portfolio based on their relationship between asset classes and economic environments. From the notional portfolio perspective above, the Total Portfolio may be levered up to 1.2 times due to the application of leverage in certain fixed income asset classes.

Discount Rate The total pension liability was calculated using the discount rate of 8.25 percent. The projection of cash flows used to determine the discount rate assumed the contributions from employers and from the members would be computed based on contribution requirements as stipulated by State statute. Projected inflows from investment earning were calculated using the longer-term assumed investment rate of return 8.25 percent. Based on those assumptions, the plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, a long-term expected rate of return on pension plan investments was applied to all periods of projected benefits to determine the total pension liability.

Sensitivity of the City's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate Net pension liability is sensitive to changes in the discount rate, and to illustrate the potential impact the following table presents the net pension liability calculated using the discount rate of 8.25 percent, as well as what the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (7.25 percent), or one percentage point higher (9.25 percent) than the current rate.

	1% Decrease (7.25%)	Current Discount Rate (8.25%)	1% Increase (9.25%)
City's proportionate share of the net pension liability	\$3,985,767	\$3,022,039	\$2,205,484

G. Other postemployment benefits

Ohio Public Employees Retirement System (OPERS)

Ohio Public Employees Retirement System (OPERS) administers three separate pension plans: The Traditional Pension Plan - a cost-sharing, multiple-employer defined benefit pension plan; the Member-Directed Plan - a defined contribution plan; and the Combined Plan - a cost sharing, multiple-employer defined benefit pension plan that has elements of both a defined benefit and defined contribution plan.

In March 2016, OPERS received two favorable rulings from the Internal Revenue Service (IRS) allowing OPERS to consolidate all health care assets into the OPERS 115 Health Care Trust. Transition to the new health care trust structure was completed July 1, 2016. As of December 31, 2016, OPERS maintains a cost-sharing, multiple employer defined benefit post-employment health care trust, which funds multiple health care plans including medical coverage, prescription drug coverage, and deposits to a Health Reimbursement Arrangement to qualifying benefit recipients of both the Traditional Pension and the Combined plans. Members of the Member-Directed Plan do not qualify for ancillary benefits, including OPERS sponsored health care coverage. OPERS funds a Retiree Medical Account (RMA) for participants in the Member-Directed Plan. At retirement or refund, participants can be reimbursed for qualified medical expenses from their vested RMA balance.

In order to qualify for health care coverage, age-and-service retirees under the Traditional Pension and Combined Plans must have 20 or more years of qualifying Ohio service credit. Health care coverage for disability benefit recipients and qualified survivor benefit recipients is available. The health care coverage provided by OPERS meets the definition of an Other Post Employment Benefit (OPEB) as described in GASB Statement 45. Please see the Plan Statement in the OPERS 2015 CAFR for details.

The Ohio Revised Code permits, but does not require, OPERS to provide health care to its eligible recipients. Authority to establish and amend health care coverage is provided to the OPERS Board of Trustees (OPERS Board) in Chapter 145 of the Ohio Revised Code.

OPERS issues a stand-alone financial report. Interested parties may obtain a copy by visiting

<https://www.opers.org/investments/cafr.shtml>, by writing to OPERS, 277 East Town Street, Columbus OH 43215-4642, or by calling 614-222-5601 or 800-222-7377.

Funding Policy

The Ohio Revised Code provides the statutory authority requiring public employers to fund health care through their contributions to OPERS. A portion of each employer's contribution to OPERS is set aside to fund OPERS health care plans.

Employer contribution rates are expressed as a percentage of the earnable salary of active members. In 2016, employers contributed at a rate of 14.0% of earnable salary. These are the maximum employer contribution rates permitted by the Ohio Revised Code. Active member contributions do not fund health care.

Each year, the OPERS Board determines the portion of the employer contribution rate that will be set aside to fund health care plans. The portion of employer contributions allocated to health care for members in the Traditional Pension Plan and Combined Plan was 2.0% during calendar year 2016. As recommended by OPERS' actuary, the portion of employer contributions allocated to health care beginning January 1, 2017 decreased to 1.0% for both plans. The OPERS Board is also authorized to establish rules for the retiree or their surviving beneficiaries to pay a portion of the health care provided. Payment amounts vary depending on the number of covered dependents and the coverage selected. The employer contribution as a percentage of covered payroll deposited into the RMA for participants in the Member-Directed Plan for 2016 was 4.0%.

The total employer contribution rate stated above is the statutorily required contribution rates for OPERS. The employer contributions actually made to fund post-employment health benefits for the years ending December 31, 2016, 2015, and 2014 were \$16,265, \$16,120, \$17,432, respectively, which equaled the required contributions each year.

Ohio Police & Fire Pension Fund (O&PF)

The City of Madeira contributes to the Ohio Police and Fire Pension Fund (OP&F) sponsored health care program, a cost sharing multiple-employer defined postemployment health care plan administered by OP&F. OP&F provides healthcare benefits including coverage for medical, prescription drugs, dental, vision, Medicare Part B Premium and long term care to retirees, qualifying benefit recipients and their eligible dependents.

OP&F provides access to post-retirement health care coverage for any person who receives or is eligible to receive a monthly service, disability, or statutory survivor benefit or is a spouse or eligible dependent child of such person. The health care coverage provided by OP&F meets the definition of an Other Post Employment Benefit (OPEB) as described in GASB Statement 45.

The Ohio Revised Code allows, but does not mandate OP&F to provide OPEB benefits. Authority for the OP&F Board of Trustees to provide health care coverage to eligible participants and to establish and amend benefits is codified in Chapter 742 of the Ohio Revised Code.

OP&F issues a publicly available financial report that includes financial information and required supplementary information for the Plan. That report may be obtained by writing to OP&F, 140 East Town Street, Columbus, Ohio 43215-5164 or by visiting their website at www.op-f.org.

Funding Policy

Ohio Revised Code provides for contribution requirements of the participating employers and of plan members to the OP&F (defined benefit pension plan). Participating employers are required to contribute to the pension plan at rates expressed as percentages of the payroll of active pension plan members, currently, 19.50% of covered payroll for police employers. The Ohio Revised Code states that the employer contribution may not exceed 19.50% of covered payroll for police employer units. Active members do not make contributions to the OPEB Plan.

OP&F maintains funds for health care in two separate accounts. One for health care benefits under an IRS Code Section 115 trust and one for Medicare Part B reimbursements administrated as an Internal Revenue Code 401(h) account, both of which are within the defined benefit pension plan, under the authority granted by the Ohio Revised Code to the OP&F Board of Trustees.

The Board of Trustees is authorized to allocate a portion of the total employer contributions made into the pension plan to the Section 115 trust and the Section 401(h) account as the employer contribution for retiree health care benefits. The portion of employer contributions allocated to the health care was .5% of covered payroll from January 1, 2016 thru December 31, 2016. The amount of employer contributions allocated to the health care plan each year is subject to the Trustees' primary responsibility to ensure that pension benefits are adequately funded and is limited by the provisions of Sections 115 and 401(h).

The OP&F Board of Trustees also is authorized to establish requirements for contributions to the health care plan by retirees and their eligible dependents, or their surviving beneficiaries. Payment amounts vary depending on the number of covered dependents and the coverage selected.

The City of Madeira's contributions to OP&F to fund postemployment health benefits for the years ending December 31, 2016, 2015, and 2014 were \$6,005, \$5,303, and \$4,479, respectively, was allocated to the health care plan.

H. Tax Abatements

In 2010, the City approved it's only tax abatement for the Euclid Avenue Community Reinvestment area to encourage development in this specific area. The percentage of tax exemption is on the increase in assessed valuation resulting from improvements to the residential real property and the term of these exemptions shall be in the amount of 50% for a maximum of fifteen years from the date of improvement. This area includes 23 townhomes, of which 22 have qualified for the tax abatement. The total abated tax for 2016 was \$14,347.

Nonmajor Governmental Funds

Special Revenue Funds

Special revenue funds are used to account for specific revenues that are legally restricted or committed to expenditures for particular purposes.

Sidewalk Repair Fund: Accounts for maintenance and repair of all City sidewalks.

Recreation and Parks: Accounts for the City's operation of recreation programs and improvements to the City's two parks, Sellman and McDonald Commons. Revenues are derived from recreation fees.

Street Dance: Accounts for the annual Street Dance held in August by the Recreation and Parks Commission. Revenues are proceeds from the sale of beer at the function.

Police Trust Fund: Receives proceeds from the sale of confiscated properties (vehicles, weapons, etc.) other than from drug cases. Disbursements may be made from the fund only to pay the costs of investigations, technical training, matching funds for federal grants or other appropriate law enforcement purposes.

Police Forfeitures: Receives proceeds from the sale of confiscated properties and equipment from drug related cases. Expenditures may only be made for drug enforcement programs.

DUI: Receives fines imposed upon DUI offenders. Under state law, disbursements may be made from this fund for law enforcement purposes related to informing the public of laws governing the operation of a motor vehicle while under the influence of alcohol, and other information relating to the operation of a motor vehicle and the consumption of alcoholic beverages.

Computer Fund: Receives fines for the operation and maintenance of the computer system for the police department.

Nonmajor Governmental Funds

Capital Project Funds

Stormwater: Accounts for expenditures made to repair and replace parts of the City's stormwater system.

Water Distribution System Fund – Accounts for revenue & expense to replace water lines throughout the City

Central Business District: Accounts for expenditures made for the repair and improvement of Madeira's central business district.

CI&R: Accounts for capital expenditures made for all general improvement projects not funded elsewhere.

STATISTICAL SECTION

This part of the City of Madeira’s comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the government’s overall financial health.

<u>Contents</u>	<u>Page</u>
Financial Trends	96
These schedules contain trend information to help the reader understand how the government’s financial performance and well-being have changed over time.	
Revenue Capacity	106
These schedules contain information to help the reader assess the government’s most significant local revenue source, the property tax.	
Debt Capacity	111
These schedules present information to help the reader assess the affordability of the government’s current levels of outstanding debt and the government’s ability to issue additional debt in the future.	
Demographic and Economic Information	116
These schedules offer demographic and economic indicators to help the reader understand the environment within which the government’s financial activities take place.	
Operating Information	120
These schedules contain service and infrastructure data to help the reader understand how the information in the government’s financial report relates to the services the government provides and the activities it performs.

Real property is reappraised every six years with a State mandated update of the current market value in the third year following each reappraisal. The assessed value of real property (including public utility real property) is 35 percent of estimated true value. The assessed value of public utility personal property ranges from 25 percent of true value for railroad property to 88 percent for electric transmission and distribution property. General business tangible personal property was assessed in previous years at 25 percent for machinery and equipment and 23 percent for inventories. General business tangible personal property tax is being phased out beginning in 2006. For collection year 2006 both types of general business tangible personal property were assessed at 18.75 percent. The percentage will be 12.5 percent for 2007, 6.25 percent for 2008 and zero for 2009.

The tangible personal property values associated with each year are the values that, when multiplied by the applicable rates, generated the property tax revenue billed in that year. For real property, the amounts generated by multiplying the assessed values by the applicable rates would be reduced by the 10%, 2 1/2% and homestead exemptions before being billed. Beginning in the 2006 collection year, the 10% rollback for commercial/industrial property has been eliminated.

Notes: The rates presented for a particular calendar year are the rates that, when applied to the assessed values presented in the Assessed Value Table, generate the property tax revenue billed in that year. The city's basic property tax rate may be increased only by a majority vote of the City's residents.

Charter Millage is consistently applied to all types of property.

The real property tax rates for the voted levies of the overlapping taxing districts are reduced so that inflationary increases in value do not generate additional revenue.
