INDEPENDENT AUDITOR'S REPORT

City of Parma Cuyahoga County 6611 Ridge Road Parma, Ohio 44129

To the Members of Council:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Parma, Cuyahoga County, Ohio, (the City), as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for preparing and fairly presenting these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes designing, implementing, and maintaining internal control relevant to preparing and fairly presenting financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to opine on these financial statements based on our audit. We did not audit the financial statements of the Parma Public Housing Agency, which represent 1.87 percent, 7.05 percent, and 6.78 percent, respectively, of the assets, net position, and revenues of the governmental activities. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amount included for the Parma Public Housing Agency, is based solely on the report of other auditors. We audited in accordance with auditing standards generally accepted in the United States of America and the financial audit standards in the Comptroller General of the United States' *Government Auditing Standards*. Those standards require us to plan and perform the audit to reasonably assure the financial statements are free from material misstatement.

An audit requires obtaining evidence about financial statement amounts and disclosures. The procedures selected depend on our judgment, including assessing the risks of material financial statement misstatement, whether due to fraud or error. In assessing those risks, we consider internal control relevant to the City's preparation and fair presentation of the financial statements in order to design audit procedures

Efficient • Effective • Transparent

City of Parma Cuyahoga County Independent Auditor's Report Page 2

that are appropriate in the circumstances, but not to the extent needed to opine on the effectiveness of the City's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of management's accounting policies and the reasonableness of their significant accounting estimates, as well as our evaluation of the overall financial statement presentation.

We believe the audit evidence we obtained is sufficient and appropriate to support our audit opinions.

Opinions

In our opinion, based on our audit and the report of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Parma, Cuyahoga County, Ohio, as of December 31, 2018, and the respective changes in financial position and where applicable, cash flows, thereof and the budgetary comparison for the General Fund thereof for the year then ended in accordance with the accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 3 to the financial statements, during 2018, the City adopted new accounting guidance in Governmental Accounting Standards Board (GASB) Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. We did not modify our opinion regarding this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require this presentation to include management's discussion and analysis, and schedules of net pension and other post-employment liabilities and pension and other post-employment contributions listed in the table of contents, to supplement the basic financial statements. Although this information is not part of the basic financial statements, the Governmental Accounting Standards Board considers it essential for placing the basic financial statements in an appropriate operational, economic, or historical context. We applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, consisting of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, to the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not opine or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to opine or provide any other assurance.

Supplementary Information

Our audit was conducted to opine on the City's basic financial statements taken as a whole.

The Schedule of Expenditures of Federal Awards presents additional analysis as required by Title 2 U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards and is not a required part of the financial statements.

City of Parma Cuyahoga County Independent Auditor's Report Page 3

The schedule is management's responsibility, and derives from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. We and the other auditors subjected this information to the auditing procedures we applied to the basic financial statements. We and the other auditors also applied certain additional procedures, including comparing and reconciling this information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves in accordance with auditing standards generally accepted in the United States of America. In our opinion, this information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 31, 2019, on our consideration of the City's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report describes the scope of our internal control testing over financial reporting and compliance, and the results of that testing, and does not opine on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Keith Faber Auditor of State

Keetle Jober

Columbus, Ohio

October 31, 2019

THIS PAGE INTENTIONALLY LEFT BLANK

The discussion and analysis of the City of Parma's (the City) financial performance provides an overall review of the City's financial activities for the year ended December 31, 2018. The intent of this discussion and analysis is to look at the City's financial performance as a whole; readers should also review the *Basic Financial Statements* to enhance their understanding of the City's financial performance.

FINANCIAL HIGHLIGHTS

Key financial highlights for 2018 are as follows:

- The liabilities of the City exceeded its assets at December 31, 2018 by \$(26,539,461) (net position). Of this amount, \$(110,016,751) is (unrestricted net position).
- Of the \$(26,539,461) of net position, business-type activities account for \$277,405 of net position, while governmental activities net position were \$(26,816,866).
- The City's net position decreased by \$(8,107,792) during 2018 due to an increase in expenses.
- Business-type activities net position decreased by \$(100,171). The decrease in business-type activities net position was primarily attributed to an increase in operating expenses.
- Governmental activities net position decreased by \$(8,007,621) due primarily to an increase in expenses.
- At the end of the current fiscal year, the General Fund fund balance was \$5,231,996 and the unassigned fund balance was \$4,674,239. The remainder of the fund balance is nonspendable or assigned to indicate that it is not available for new spending because it has been specifically reserved for expenditure by City ordinances or intent of use.
- The City's total governmental activities long-term debt decreased by \$211,976 (0.93 percent) during the current fiscal year. The decrease was primarily attributable to the payment of governmental activities debt agreements.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the City's basic financial statements.

The City's *Basic Financial Statements* are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements.

Government-wide Financial Statements - The government-wide financial statements are designed to provide readers with a broad overview of the City's finances, in a manner similar to a private-sector business. The statement of net position and the statement of activities provide information about the activities of the whole city, presenting both an aggregate view of the City's finances and a longer-term view of those finances. Major fund financial statements provide the next level of detail.

Statement of Net Position - The statement of net position presents information on all of the City's assets and liabilities, with the difference between the two reported as net position. Over time, increases

or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating.

Statement of Activities - The statement of activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the City that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the City principally include: general government, public service, public safety, human resources, community development, public health, parks and recreation, and economic development. The business-type activities of the City consist of a municipal golf course. The City also has liability self-insurance, medical insurance, and workers' compensation internal service funds.

The government-wide financial statements can be found starting on page 20 of this report.

Fund Financial Statements - A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds - Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on the near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. For governmental funds, these statements tell how services were financed in the short term as well as what dollars remain for future spending. The fund financial statements also look at the City's most significant funds with all other nonmajor funds presented in total in one column.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the City's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balance provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The City maintains 84 individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund, Debt Service Fund, City Income Tax Capital Acquisitions Fund, Sewer Construction Fund, and Street Improvements Fund; all of which are considered to be major funds. Data from the other 79 nonmajor governmental funds are combined into a single fund, aggregated presentation.

The City adopts an annual appropriated budget for each of its governmental funds. A budgetary comparison statement (non-GAAP basis) has been provided for the General Fund and each major special revenue fund.

The basic governmental fund financial statements can be found starting on page 22 of this report.

Proprietary Funds - The City maintains four proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses an enterprise fund to account for its golf course operations. Internal service funds are an accounting device used to accumulate and allocate costs internally throughout the City's various functions. The City uses internal service funds to account for its liability self-insurance, medical insurance, and workers' compensation insurance operations. Because these services predominantly benefit governmental rather than business-type activities functions, they have been included within the governmental activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Golf Course Fund, which is considered to be a major fund of the City. Conversely, internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements.

The basic proprietary fund financial statements can be found starting on page 30 of this report.

Fiduciary Funds - Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the City's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds. The City only has agency funds.

The basic fiduciary fund financial statements can be found on page 34 of this report.

Notes to the Basic Financial Statements - The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the basic financial statements begin on page 35 of this report.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

While this document contains information about the funds used by the City to provide services to our citizens, the view of the City as a whole looks at all financial transactions and asks the question "How did we do financially during 2018?" The Statement of Net Position and the Statement of Activities answer this question. These statements include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the accrual basis of accounting similar to the accounting used by the private-sector. The basis of this accounting takes into account all of the current year's revenues and expenses regardless of when the cash is received or paid. These two statements report the City's net position and the changes in net position. The change in net position is important because it tells the reader whether, for the City as a whole, the financial position of the City has improved or diminished. However, in evaluating the overall position of the City, non-financial information such as changes in the City's tax base and the condition of the City's capital assets will also need to be evaluated. The Statement of Net Position and the Statement of Activities are divided into the following sections:

- Assets
- Deferred Outflows of Resources
- Liabilities
- Deferred Inflows of Resources
- Net Position (Assets and Deferred Outflows of Resources minus Liabilities and Deferred Inflows of Resources)
- Program Revenues and Expenses
- General Revenues
- Net Position Beginning of Year and Year End

A government-wide Summary Statement of Net Position is presented on the following page.

The net pension liability (NPL) is one of the largest liabilities reported by the City at December 31, 2018, and is reported pursuant to GASB Statement No. 68, Accounting and Financial Reporting for Pensions an Amendment of GASB Statement 27. For 2018, the City adopted GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, which significantly revises accounting for costs and liabilities related to other postemployment benefits (OPEB). For reasons discussed below, many end users of this financial statement will gain a clearer understanding of the Citys actual financial condition by adding deferred inflows related to pension and OPEB, the net pension liability and the net OPEB liability to the reported net position and subtracting the net pension asset and deferred outflows related to pension and OPEB.

Governmental Accounting Standards Board standards are national and apply to all government financial reports prepared in accordance with generally accepted accounting principles. Prior accounting for pensions (GASB 27) and postemployment benefits (GASB 45) focused on a funding approach. This approach limited pension and OPEB costs to contributions annually required by law, which may or may not be sufficient to fully fund each plans net pension liability or net OPEB liability. GASB Statements Nos. 68 and 75 take an earnings approach to pension and OPEB accounting; however, the nature of Ohios statewide pension and OPEB plans and state law governing those systems requires additional explanation in order to properly understand the information presented in these statements.

GASB Statemets Nos. 68 and 75 require the net pension liability (asset) and the net OPEB liability to equal the Citys proportionate share of each plans collective:

- 1. Present value of estimated future pension benefits attributable to active and inactive employees past service.
 - 2. Minus plan assets available to pay these benefits.

GASB notes that pension and OPEB obligations, whether funded or unfunded, are part of the employment exchange that is, the employee is trading his or her labor in exchange for wages, benefits, and the promise of a future pension and other postemployment benefits. GASB noted that the unfunded portion of this promise is a present obligation of the government, part of a bargained-for benefit to the employee, and should accordingly be reported by the government as a liability since they received the benefit of the exchange; however, the City is not responsible for certain key factors affecting the balance of these liabilities. In Ohio, the employee shares the obligation of funding pension benefits with the employer. Both employer and employee contribution rates are capped by State statute. A change in these caps requires action of both Houses of the General Assembly and approval of the Governor. Benefit provisions are also determined by State statute. The Ohio revised Code permits, but does not require the retirement systems to provide healthcare to eligible benefit recipients. The retirement systems may allocate a portion of the employer contributions to provide for these OPEB benefits.

The employee enters the employment exchange with the knowledge that the employers promise is limited not by contract but by law. The employer enters the exchange also knowing that there is a specific, legal limit to its contribution to the retirement system. In Ohio, there is no legal means to enforce the unfunded liability of the pension/OPEB plan against the public employer. State law operates to mitigate the moral obligation of the public employer to the employee, because all parties enter the employment exchange with notice of the law. The retirement system is responsible for the administration of the pension and OPEB plans.

Most long-term liabilities have set repayment schedules or, in the case of compensated absences (e.g., sick and vacation leave), are satisfied through paid time-off or termination payments. There is no repayment schedule for the net pension liability or the net OPEB liability. As explained above, changes in benefits, contribution rates, and return on investments affect the balance of these liabilities, but are outside the control of the local government. In the event that contributions, investment returns, and other changes are insufficient to keep up with required payments, State statute does not assign or identify the responsible party for the unfunded portion. Due to the unique nature of how the net pension liability and the net OPEB liability are satisfied, these liabilities are separately identified within the long-term liability section of the statement of net position.

In accordance with GASB Statements Nos. 68 and 75, the Citys statements prepared on an accrual basis of accounting include an annual pension expense and an annual OPEB expense for their proportionate share of each plans change in net pension liability (asset) and net OPEB liability, respectively, not accounted for as deferred inflows/outflows.

As a result of implementing GASB Statement No. 75, the City is reporting a net OPEB liability and deferred inflows and outflows of resources related to OPEB on the accrual basis of accounting. This implementation had the effect of restating net position at December 31, 2017, from \$30,107,939 to \$(18,431,669).

Total assets increased during 2018 by \$2.4 million. The largest increases were seen in cash and cash equivalents due to increased income tax and interest revenues and property taxes receivable due to higher assessed values. Total liabilities increased by \$1.5 million during 2018. The increase in liabilities is due to decreased long-term liabilities due to the payment of debt obligations and a decrease in the net pension liability, which were offset by an increase in the net OPEB liability. The items mentioned primarily contributed to the total decrease in net position during 2018 of \$8.1 million.

A government-wide Summary Statement of Changes in Net Position is presented on the following page:

38,541,734 32,290,883 319,876 4,976,331 7,235,175 229,567 $10,412,978 \\ 39,480,153$ 3,271,466 13,1422,672,039 486,757N/A6,073,346 84,222,447 \$(18,431,669) \$24,971,362 999,112 87,751,474 (3,529,027)2017 Total 35,048,801 41,508,764 352,516 3,411,816 7,973,790 1,391,595 3,588,875 470,778 958,747 9,838,990 40,503,4863,120,173 41,61714,090,726 (8,107,792)\$19,002,898 86,597,890 94,705,682 \$(26,539,461) (18,431,669)2018 864,157 999,112 999,112 N/A\$377,576 \$864,157 (134,955)Business-Type Activities Table 2: Summary Statement of Changes in Net Position 2017 \$858,576 858,576 958,747\$277,405 958,747 (100,171)377,576 2018 38,541,734 32,290,883 319,876 4,976,331 7,235,175 229,567 3,271,466 13,1422,672,039 486,757 $10,412,978 \\ 39,480,153$ N/A\$24,107,205 6,073,346 83,358,290 86,752,362 \$(18,809,245)(3,394,072)2017 Governmental Activities 3,120,173 41,61735,048,801 41,508,764 352,516 3,411,816 7,973,790 1,391,595 3,588,875 9,838,990 40,503,486(8,007,621)\$(26,816,866) \$18,144,322 14,090,726 85,739,314 470,778 93,746,935 (18,809,245)2018 Net Position Beginning of Year - Restated General Government -Legislative and Executive Security of Persons and Property Public Health and Welfare Charges for Services Operating Grants, Contributions, Restricted to Specific Programs Investment Earnings Grants and Entitlements not Basic Utility Services Leisure Time Activities Interest and Fiscal Charges Golf Course Community Environment Change in Net Position Program Revenues Program Expenses General Revenues Total Net Position Property Taxes Total Revenues **Pransportation** Total Expenses Income Taxes and Interest RevenuesExpenses

The information necessary to restate the 2017 beginning balances and the 2017 OPEB expense amounts for the effects of the initial implementation of GASB 75 is not available; therefore, 2017 functional expenses still include OPEB expense of \$295,419 computed under GASB 45.

GASB 45 required recognizing OPEB expense equal to the contractually required contributions to the plan.

GASB 75 OPEB expense represents additional amounts earned adjusted by deferred inflows and outflows; the contractually required contributions is no longer a component of OPEB expense.

Under GASB 75, the 2018 financial statements report OPEB expense of \$4,885,088 and in order to compare 2018 total program expenses to 2017 program expenses, the following adjustments are required:

	Governmental Activities	Business-Type Activities	Total
Total 2018 GASB 75 program expenses GASB 75 OPEB expense 2018 contractually required contribution	\$93,746,935 (4,858,473) 96,743	\$958,747 (26,615) 218	\$94,705,682 (4,885,088) 96,961
Adjusted 2018 program expenses	88,985,205	932,350	89,917,555
Total 2017 GASB 45 program expenses	86,752,362	999,112	87,751,474
Increase (decrease) in program expenses not related to OPEB	\$2,232,843	\$(66,762)	\$2,166,081

Governmental Activities - Several types of revenues fund our governmental activities, with the City income tax being the biggest contributor. The income tax rate was 2.5 percent for 2018. Both residents and non-residents who work inside the City are subject to the income tax. However, if residents work in a locality that has municipal income tax, the City provides 100 percent credit to those who pay income tax to another city. The income tax revenue for 2018 was \$40,503,486. Of the \$85,739,314 in total revenues, income tax accounts for 47.24 percent of the total. Property taxes of \$9,838,990 account for 11.48 percent of total revenues. Operating grants, contributions and interest, and general revenues from grants and entitlements account for 16.43 percent of total revenues, and charges for services and investment earnings make up the remaining 24.85 percent.

General revenues from grants and entitlements, such as local government funds, are also a large revenue generator. The City monitors its sources of revenues very closely for fluctuations, especially income tax.

Total expenses of governmental activities for 2018 were \$93,746,935. The largest program function for the City relates to security of persons and property, which includes the police and fire departments, with expenses of \$41,508,764, which is 44.28 percent of program expenses. General government-legislative and executive, is the next largest program expense at 37.39 percent, followed by community environment expenses of 8.51 percent. Public health and welfare, transportation, basic utility services, leisure time activities, and interest and fiscal charges comprised 9.82 percent.

Business-Type Activities - Business-type activities decreased the City's net position by \$(100,171). Charges for services decreased by \$5,581 and operating expenses decreased by \$40,365. Total expenses of business-type activities were \$958,747 for the golf course operations.

FINANCIAL ANALYSIS OF THE CITY'S FUNDS

As noted earlier, the City uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds - The focus of the City's governmental funds is to provide information on nearterm inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year. Information about the City's governmental funds begins on page 22. These funds are accounted for by using the modified accrual basis of accounting.

As of December 31, 2018, the City's governmental funds reported combined ending fund balances of \$18,901,521. Of that amount, \$3,327,739 is unassigned fund balances. The remaining fund balance, \$15,573,782 is nonspendable, restricted, committed, or assigned to indicate that it is unavailable for new spending because it has been specifically reserved for expenditure by grant agreements, City ordinances or intent of use.

The General Fund had total revenues of \$50,437,184 and expenditures (including transfers-out) of \$51,582,377, thereby decreasing the General Fund's fund balance by \$(1,145,193) to \$5,231,996.

The General Fund is the chief operating fund of the City. At the end of 2018, the unassigned fund balance of the General Fund was \$4,674,239, while the total fund balance was \$5,231,996. The remainder of the fund balance is nonspendable or assigned to indicate that it is not available for new spending because it has been specifically reserved for expenditure by City ordinances or intent of use.

Proprietary Funds - The City's proprietary fund provides the same type of information found in the government-wide financial statements, but in more detail. Unrestricted net position of the Ridgewood Municipal Golf Course at the end of the year amounted to \$(972,068). Other factors concerning the finances of this fund have already been addressed in the discussion of the City's business-type activities.

GENERAL FUND BUDGETARY ANALYSIS

The City's budget is prepared according to Ohio law and is based on accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The most significant budgeted fund is the General Fund.

During the course of 2018, the City amended its General Fund budget numerous times. All recommendations for a budget change come from the City Auditor to the Finance Committee of Council for review before going to the whole council for ordinance enactment on the change. With the General Fund supporting many

of our major activities such as our police and fire departments, as well as most legislative and executive activities, the General Fund is monitored closely looking for possible revenue shortfalls or over spending by individual departments.

For the General Fund, original and revised budgeted revenues (including advances and transfers-in) were \$50,007,291 and \$50,007,268, respectively. Very conservative revenue projections at the beginning of the year played out as actual revenues were very close to projections. Actual revenues and other financing sources were \$50,239,692.

The City's ending unencumbered cash balance in the General Fund was \$4,078,445.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets - The City's investment in capital assets for its governmental and business-type activities as of December 31, 2018, amounts to \$91,100,310 (net of accumulated depreciation). This investment in capital assets includes land, construction-in-progress, land improvements, buildings, equipment, vehicles, software, and infrastructure. As permitted under the implementation provisions of GASB Statement No. 34, Basic Financial Statements-and Management's Discussion and Analysis-for State and Local Governments, the historical cost of infrastructure assets acquired, significantly reconstructed or that received significant improvements after January 1, 1980 have been included as part of governmental capital assets in the government-wide financial statements. The total increase in the City's investment in capital assets for the current fiscal year was 0.84 percent (a 0.87 percent increase for governmental activities and a 1.5 percent decrease for business-type activities).

A summary of the City's capital assets, net of accumulated depreciation, is presented in the table on the following page:

See Note 11, Capital Asset Activity, of the Basic Financial Statements for additional information on the City's capital assets.

Debt - At the end of the current fiscal year, the City had \$27,035,370 in bonds, loans, capital leases, compensated absences and long-term bond anticipation notes outstanding with \$7,214,059 due within one year.

The General Obligation Bonds outstanding are comprised of unvoted general obligation bonds of the City payable from ad valorem property taxes and special obligation bonds.

The principal and interest for the Special Assessment Bonds outstanding will be retired with assessments levied against property owners and/or general levies of the City based on the improvements/benefit to the respective parties. Assessments are collected by the Cuyahoga County Fiscal Officer and will be received over periods ranging from five to ten years, with interest equal to the interest on the bonds and notes issued to finance the improvements.

The Ohio Public Works Commission Loans are paid semi-annually from the Debt Service Fund and will be paid in full in the year 2038.

The Ohio Water Development Authority Loans are paid semi-annually from the Debt Service Fund and will be paid in full in the year 2039.

The Bond Anticipation Notes in the amount of \$4,453,000 are due on July 25, 2019.

The City's overall legal debt margin was \$143,509,898 at December 31, 2018.

See Note 17, Long-Term Obligations of the Basic Financial Statements for additional information on the City's debt.

A summary of the City's outstanding debt is presented in the table on the following page:

CURRENT FINANCIAL RELATED ACTIVITIES

The City of Parma, like all municipalities both locally and nationally, continues to face the challenges of economic recession. Basic operating costs continue to rise due to negotiated salary increases, higher benefit costs, and federal and state mandates placed upon municipalities while federal and state funding is being reduced.

CONTACTING THE OFFICE OF THE CITY AUDITOR

This financial report is designed to provide our citizens, taxpayers, creditors, and investors with a general overview of the City's finances and to show the City's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact Brian D. Day, Parma City Auditor, 6611 Ridge Road, Parma, OH 44129.

City of Parma, Ohio

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities

For the Year Ended December 31, 2018

Net Change in Fund Balances - Total Governmental Funds		\$1,097,418
Amounts reported for governmental activities in the Statement of Activities are different because:		
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of these assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlay exceeded depreciation in the current period:		
Capital Outlay Depreciation	\$5, 406, 428 (4, 629, 236)	777, 192
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds:		
Municipal Income Taxes	99,641	
Intergovernmental Special Assessments	(17,009) $1,584,318$	
*F		1,666,950
Other financing sources in the governmental funds increase long-term liabilities in the Statement of Net Position		
Inception of Capital Leases	(258, 287)	
Ohio Public Works Commission Loans Ohio Water Development Authority Loans	(341, 522) (1, 857, 193)	
Long-Term Notes Payable	(4, 453, 000)	(6,910,002)
Repayment of long-term debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities		, , ,
in the Statement of Net Position		2,601,552
Internal Service Funds used by management are not reported in the city-wide Statement of Activities. Governmental fund expenditures and related Internal Service Fund revenues are eliminated. The net revenue (expense) of the Internal Service Funds is allocated among the governmental activities:		
Change in Net Position	611, 115	
		611, 115
Some expenses reported in the Statement of Activities do not require the use of current financial resources and are therefore not reported as expenditures in governmental funds		
Compensated Absences	65, 392	
		65,392
Contractually required contributions are reported as expenditures in governmental funds; however, the Statement of Net Position reports these amounts as deferred inflows and outflows		
Pension OPEB	6, 236, 554 279, 538	6 516 002
Except for amounts reported as deferred inflows and outflows, changes in the net pension and OPEB liability are reported as pension expense in the Statement of Activities		6, 516, 092
Pension	(9,574,857)	
OPEB	(4,858,473)	(14, 433, 330)

NOTE 1 - DESCRIPTION OF CITY OPERATIONS AND REPORTING ENTITY

The City - The City of Parma, Ohio (the "City") is a political subdivision of the State of Ohio operated pursuant to state statute. The City was originally established as a township in 1826, incorporated as a village in 1924, and organized as a city in 1931. The City is organized as a Mayor/Council form of government. The Mayor, Council, Auditor, Treasurer and Law Director are elected, as are three Municipal Court Judges and a Clerk of Courts.

Reporting Entity - In evaluating how to define the governmental reporting entity, the City complies with the provisions of Governmental Accounting Standards Board (GASB) Statement No. 14, The Financial Reporting Entity, under which the financial statements include all the organizations, activities, functions, and component units for which the City ("primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of the component unit's board, and either (1) the City's ability to impose its will over the component unit or (2) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the City.

On this basis, the City's financial reporting entity has no component units but includes in its financial statements the financial activities of all departments, agencies, boards and commissions that are part of the primary government, including police and fire protection, parks and recreation, health, certain social services and general administrative services. In addition, the City owns and operates one enterprise activity, a municipal golf course.

Included as part of the City's primary government in the determination of the City's reporting entity is the Parma Municipal Court (the "Court"). Although the Court's territorial jurisdiction extends beyond the boundaries of the City and the judges of the Court are separately elected, the Court's operations are not legally separate from the City. In addition, the City is responsible for budgeting and appropriating funds for the operation of the Court, establishing the compensation of certain Court employees, and is ultimately responsible for any operating deficits sustained by the Court. The City's share of the fines collected by the Court, along with its share of the Court's administration and operating costs are recorded in the City's General Fund. Monies held by the Court in a fiduciary capacity are included in an agency fund in the accompanying financial statements.

The City is associated with the Parma Community General Hospital Association (also known as University Hospitals Parma Medical Center) and the Southwest Council of Governments, which are identified as jointly governed organizations and discussed in detail in Note 18, *Jointly Governed Organizations*, of the *Basic Financial Statements*. The City has no ongoing financial interest or responsibility related to these organizations.

The City is also associated with the Parma Community Improvement Corporation (PCIC). The PCIC is a not-for-profit corporation that was founded in 1996. The five-member board, which consists of two members appointed by the City and three local residents, promotes industrial, commercial, distribution and research activities within the City. The PCIC has been excluded from the reporting entity.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements as of December 31, 2018 and for the year then ended have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") applicable to local governments. The Governmental Accounting Standards Board ("GASB") is

the standard-setting body for establishing governmental accounting and financial reporting principles, which are primarily set forth in the GASB's Codification of Governmental Accounting and Financial Reporting Standards ("GASB Codification"). The most significant of the City's accounting policies are described below.

- A Basis of Presentation The City's basic financial statements consist of government-wide statements, including a statement of net position and a statement of activities, and fund financial statements, which provide a more detailed level of financial position.
- (1) Government-wide financial statements consist of a statement of net position and a statement of activities. These statements report all of the assets, liabilities, revenues, expenses, and gains and losses of the City. Governmental activities are reported separately from business-type activities. Governmental activities are normally supported by taxes and intergovernmental revenues whereas business-type activities are normally supported by fees and charges for services and are usually intended by management to be financially self-sustaining. Fiduciary funds of the City are not included in these government-wide financial statements.

Interfund receivables and payables and bonds and notes issued by the City and held by the City as investments within governmental and business-type activities have been eliminated in the government-wide statement of net position. Related interest amounts are eliminated in the government-wide statement of activities. These eliminations minimize the duplicating effect on assets and liabilities within the governmental and business-type activities total column.

Internal service fund balances, whether positive or negative, have been eliminated against the expenses and program revenues shown in the governmental activities statement of activities.

The statement of activities presents a comparison between direct expenses and program revenues for each program or function of the City's governmental activities and for the business-type activities of the City.

Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenue includes (1) charges paid by the recipients of goods or services offered by the programs and (2) grants and contributions, including special assessments that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues. General revenues identify the extent to which each governmental program or business-type activity is self-financing or draws from the general revenues of the City.

(2) - Fund financial statements segregate transactions related to certain City functions or activities in separate funds in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the City at this more detailed level.

The focus of governmental and proprietary fund financial statements is on major funds. Each major fund is presented in a separate column. Non-major funds are aggregated and presented in a single column. Internal service funds are combined and the totals are presented in a single column on the face of the proprietary fund statements. Fiduciary funds are reported by type.

B - **Fund** Accounting - The City uses funds to maintain its financial records during the year. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts. There are three categories of funds: governmental, proprietary and fiduciary.

- (1) Governmental Funds Governmental funds are those through which most governmental functions are financed. Governmental fund reporting focuses on the sources, uses, and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may be used. Current liabilities and deferred inflows of resources are assigned to the fund from which they will be paid. The difference between governmental fund assets and liabilities is reported as fund balances. The following are the City's major governmental funds:
- (a) General Fund The General Fund is the primary operating fund of the City. It is used to account for all financial resources, except those required to be accounted for in other funds. Its revenues consist primarily of income and property taxes, investment earnings, shared revenues, charges for services, and licenses, fees, and fines.

General Fund expenditures represent the costs of legislative and executive (general government), security of persons and property (including police and fire), public health and welfare, community environment, and leisure time activities. General Fund resources are also transferred annually to support other services that are accounted for in other separate funds.

- (b) Debt Service Fund The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.
- (c) City Income Tax Capital Acquisitions Fund The City Income Tax Capital Acquisitions Fund is used to account for the portion of the City's income tax to be used for the acquisition and maintenance of capital assets.
- (d) Sewer Construction Fund The Sewer Construction Fund is used to account for activity associated with the sewer construction and improvement.
- (e) Street Improvements Fund The Street Improvements Fund is used to account for activity associated with the construction and improvement of the City's streets.

The other governmental funds of the City account for grants and other resources whose use is restricted to a particular purpose.

- (2) **Proprietary Funds** Proprietary fund reporting focuses on the determination of operating income, changes in net position, financial position and cash flows. Proprietary funds are classified as either enterprise or internal service.
- (a) Enterprise Funds Enterprise Funds are used to account for operations that are financed and operated in a manner similar to private business enterprises, where the intent of the governing body is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. The City's major enterprise fund is the Municipal Golf Course Fund which is used to account for the financial activities of the Ridgewood Municipal Golf Course.
- (b) Internal Service Funds Internal Service Funds are used to account for the financing of goods or services provided by one department to other departments or to other governments on a cost-reimbursement basis. The City's internal service funds report on liability insurance, medical insurance and workers' compensation.

(3) - Fiduciary Funds - Fiduciary fund reporting focuses on net position and changes in net position. Private-purpose trust funds are used to account for trust arrangements that benefit individuals, private organizations, or other governments. For accounting measurement purposes, the private-purpose trust funds are accounted for in essentially the same manner as proprietary funds. During 2018, the City did not utilize any private-purpose trust funds. Agency funds are used to account for assets held by the City as an agent for individuals, private organizations, and other governments. For accounting measurement purposes, the agency funds are custodial in nature (assets equal liabilities) and do not involve the measurement of results of operations. The City's significant agency funds are used to account for deposits related to the Parma Municipal Court, the Parma Public Housing Agency, contractors and developers, sales taxes, and vital records. Other fiduciary funds include pension trust funds and investment trust funds. During 2018, the City did not utilize any such trust funds. Fiduciary funds are not included in the government-wide statements.

C - Measurement Focus

Government-Wide Financial Statements - The government-wide financial statements are prepared using the economic resources measurement focus. All assets and all liabilities and deferred inflows of resources associated with the operation of the City are included on the Statement of Net Position. The Statement of Activities presents increases (i.e., revenues) and decreases (i.e., expenses) in net position.

Fund Financial Statements - All governmental funds are accounted for using a flow of current financial resources measurement focus. With this measurement focus, only current assets and deferred outflows of resources along with current liabilities and deferred inflows of resources generally are included on the balance sheet. The statement of revenues, expenditures and changes in fund balances reports on the sources (i.e., revenues and other financing sources) and uses (i.e., expenditures and other financing uses) of current financial resources. This approach differs from the manner in which the governmental activities of the government-wide financial statements are prepared. Governmental fund financial statements therefore include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements for governmental funds.

Like the government-wide statements, all proprietary funds are accounted for on a flow of economic resources measurement focus. All assets and deferred outflows of resources and all liabilities and deferred inflows of resources associated with the operation of these funds are included on the statement of net position. The statement of changes in fund net position presents increases (i.e., revenues) and decreases (i.e., expenses) in total net position. The statement of cash flows provides information about how the City finances and meets the cash flow needs of its proprietary activities.

D - Basis of Accounting - Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Government-wide financial statements are prepared using the accrual basis of accounting; proprietary funds also use the accrual basis of accounting. Governmental funds use the modified accrual basis of accounting. Differences in the accrual and modified accrual basis of accounting arise in the recognition of revenue, the recording of deferred inflows and outflows and in the presentation of expenses versus expenditures.

(1) - Revenues - Exchange and Non-Exchange Transactions

Exchange Transactions - Revenues resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on the accrual basis when the exchange takes place. On a modified accrual basis, revenue is recorded in the year in which the resources are measurable and become available. Available means that the resources will be collected within the current year or are expected to be collected soon enough thereafter to be used to pay liabilities of the current year. The available period for the City is thirty-one days after year-end.

Non-exchange Transactions - Non-exchange transactions, in which the City receives value without directly giving equal value in return, include income taxes, property taxes, grants, entitlements and donations. On an accrual basis, revenue from income taxes is recognized in the period in which the income is earned.

Revenue from property taxes is recognized in the year for which the taxes are levied, as explained in Note 7, *Property Taxes*, of the *Basic Financial Statements*.

Revenue from grants, entitlements and donations is recognized in the year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the year when use is first permitted, matching requirements, in which the City must provide local resources to be used for a specified purpose, and expenditure requirements, in which the resources are provided to the City on a reimbursement basis. On a modified accrual basis, revenue from non-exchange transactions must also be available before it can be recognized.

Under the modified accrual basis, the following revenue sources are considered to be both measurable and available at year-end: income tax, state-levied locally shared taxes (including gasoline tax), fees, fines and forfeitures, licenses and permits, interest, and grants and entitlements.

(2) - Deferred Outflows/Inflows of Resources

In addition to assets, the statements of financial position will sometimes report a separate section for deferred outflows of resources. Deferred outflows of resources represent a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense/expenditure) until then. In addition to liabilities, the statements of financial position report a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time. For the City, deferred inflows of resources include property taxes and unavailable revenues. Property taxes represent amounts for which there is an enforceable legal claim as of December 31, 2018, but which were levied to finance year 2019 operations. These amounts have been recorded as a deferred inflows on both the government-wide statement of net position and the governmental fund financial statements. Unavailable revenue is reported only on the governmental funds balance sheet, and represents receivables which will not be collected within the available period. For the City, unavailable revenue includes delinquent property taxes, municipal income taxes, and certain other receivables that will not be collected within the available period. These amounts are deferred and recognized as an inflow of resources in the period the amounts become available.

(3) - Expenses/Expenditures

On the accrual basis of accounting, expenses are recognized at the time they are incurred. The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred, if measurable. Allocations of cost, such as depreciation and amortization, are not recognized in governmental funds.

E - Budgetary Procedures - The budgetary process is prescribed by provisions of the Ohio Revised Code and entails the preparation of budgetary documents within an established timetable. The major documents prepared are the tax budget, the certificate of estimated resources, and the appropriation ordinance, all of which are prepared on the budgetary basis of accounting. The certificate of estimated resources and the appropriations ordinance are subject to amendment through the year with the legal restriction that appropriations cannot exceed estimated resources, as certified. All funds, other than agency funds, are legally required to be budgeted and appropriated.

The legal level of budgetary control is at the fund/department level (personal services and other expenditures). Any budgetary modifications at this level may only be made by resolution of the City Council.

During the first Council meeting in July, the Mayor presents the annual operating budget for the following fiscal year to the City Council for consideration and passage. The adopted budget is submitted to the County Fiscal Officer, as Secretary of the County Budget Commission, by July 20 of each year, for the period January 1 to December 31 of the following year.

The County Budget Commission determines if the budget substantiates a need to levy all or part of previously authorized taxes and reviews estimated revenues. As part of this determination, the City receives the official certificate of estimated resources, which states the projected revenue of each fund. Prior to December 31, the City must revise its budget so that the total contemplated expenditures from any fund during the ensuing fiscal year will not exceed the amount available as stated in the certificate of estimated resources. The revised budget then serves as the basis for the annual appropriation ordinance.

On or about January 1, the certificate of estimated resources is amended to include any unencumbered balances at December 31 of the preceding year. Upon a determination by the City Auditor that the revenue to be collected by the City will be greater or less than the amount included in the official certificate, the City Auditor shall certify the amount of the excess or deficiency to the County Budget Commission, and if it is deemed reasonable by the Commission, the County Budget Commission shall certify an amended official certificate reflecting the deficiency or excess. The amounts reported on the budgetary statement reflects the amounts in the final amended official certificate of estimated resources issued during 2018.

A temporary appropriation ordinance to control expenditures may be passed on or about January 1 of each year for the period from January 1 to March 31. The annual appropriation ordinance must be passed by April 1 of each year for the period January 1 to December 31. The appropriation ordinance fixes spending authority at the fund/department level (personal services and other expenditures). The appropriation ordinance may be amended during the year as new information becomes available provided that total fund appropriations do not exceed current estimated resources, as certified.

Funds appropriated may not be expended for purposes other than those designated in the appropriation measure. The allocation of appropriations among departments and major objects within a fund may be modified during the year only by an ordinance of Council. During the year, several supplemental appropriation measures were passed. None of these supplemental appropriations had any significant effect on the original appropriations. The "original budget" designation that appears in the statements of budgetary comparisons represents the original budget amounts adopted in the annual appropriation ordinance; the "final budget" designation represents the budget amount including all amendments and modifications passed by Council during the year.

As part of formal budgetary control, purchase orders, contracts and other commitments for the expenditure of monies are recorded as the equivalent of expenditures on the non-GAAP budgetary basis in order to reserve that portion of the applicable appropriation, and to determine and maintain legal compliance.

The Ohio Revised Code prohibits expenditures plus encumbrances from exceeding appropriations. On the fund financial level, encumbrances outstanding at year-end are reported as restricted, committed or assigned fund balance for subsequent year expenditures for governmental funds and reported in the notes to the basic financial statements for proprietary funds.

At the close of each year, the unencumbered balance of each appropriation reverts to the respective fund from which it was appropriated and becomes subject to future appropriations. The encumbered appropriation balance is carried forward to the succeeding fiscal year and is not reappropriated.

While reporting financial position, results of operations, and changes in fund balance on the basis of generally accepted accounting principles (GAAP), the budgetary basis as provided by law is based upon accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The Statement of Revenue, Expenditures, and Changes in Fund Balance - Budget (Non-GAAP Basis) and Actual - General Fund is presented on the budgetary basis to provide a meaningful comparison of actual results with the budget.

The major differences between the budget basis and the GAAP basis are (1) revenues are recorded when received in cash (budget basis) as opposed to when susceptible to accrual (GAAP basis), (2) expenditures/expenses are recorded when paid in cash (budget basis) as opposed to when the liability is incurred (GAAP basis) and, (3) in order to determine compliance with Ohio law, and to reserve that portion of the applicable appropriation, encumbrances are recorded as the equivalent of an expenditure (budget basis) as opposed to a restricted, committed or assigned fund balance for governmental funds.

The following table reconciles the net change in fund balance from the GAAP-basis statements to the budgetary-basis statements for the General Fund:

Net Change in Fund Balance

	General
GAAP basis	\$(1, 145, 193)
Increase(decrease) due to:	
Revenues accruals Expenditure accruals	$(197, 492) \\ 528, 024$
Budget basis	\$(814,661)

F - Cash and Cash Equivalents - Cash resources of certain individual funds are combined to form a pool of cash and investments that is managed by the City Treasurer. Investments in the Pooled Cash Account, consisting of STAR Ohio, are carried at fair value (see Note 6, Pooled and Segregated Cash and Investments) based on quoted market values. Interest earned on pooled cash and investments is distributed to the appropriate funds utilizing a formula based on the month-end balance of cash and investments of each fund.

Cash equivalents are defined as highly liquid investments with a maturity of three months or less at the time they are purchased by the City.

G - *Investments* - The City reports its investments at fair value based on quoted market values and recognizes the corresponding change in the fair value of the investments recorded in investment earnings in the year in which the change occurs.

The City measures its investment in STAR Ohio at the net asset value (NAV) per share provided by STAR Ohio. STAR Ohio (the State Treasury Asset Reserve of Ohio) is an investment pool managed by the State Treasurer's Office which allows Ohio governments to pool their funds for investment purposes. STAR Ohio is not registered with the U.S. Securities and Exchange Commission (SEC) as an investment company but has adopted Governmental Accounting Standards Board (GASB) Statement No. 79, Certain External Investment Pools and Pool Participants. The NAV per share is calculated on an amortized cost basis that provides an NAV per share that approximates fair value.

For the fiscal year 2018, there were no limitations or restrictions on any participant withdrawls due to redemption notice periods, liquidity fees, or redemption gates. However, notice must be given 24 hours in advance of all deposits and withdrawls exceeding \$25 million. STAR Ohio reserves the right to limit the transaction to \$100 million, requiring the excess amount to be transacted the following business day(s), but only to the \$100 million limit. All accounts of the participant will be combined for these purposes.

- *H Prepaid Items* Payments made to vendors for services that will benefit periods beyond December 31, 2018 are recorded as prepaid items using the consumption method by recording a current asset for the prepaid amount at the time of the purchase and the expenditure/expense in the year in which services are consumed. The City did not have any prepaid items as of December 31, 2018.
- I Materials and Supplies Inventory Inventory generally consists of construction materials and parts inventory not yet placed into service. Inventories of governmental funds are stated at cost while inventory of proprietary funds are stated at the lower of cost or market. For all funds, cost is determined on a first-in, first-out basis. The costs of inventory items are recorded as expenditures in the governmental fund types when purchased and as expenses in the proprietary fund types when used. Reported supplies inventory is equally offset by a fund balance reserve in the governmental funds that indicates that it does not constitute available spendable resources even though it is a component of net current assets.
- J Capital Assets Capital assets, which include property, plant, and equipment are reported in the applicable governmental or business-type activities columns in the government-wide financial statements to the extent the City's capitalization threshold is met. The City defines capital assets as assets with an estimated useful life in excess of 5 years and an individual cost of more than \$5,000. Infrastructure assets and computer software assets are capitalized when the acquisition cost is greater than \$100,000.

Assets are recorded at historical cost or estimated historical cost, if historical cost is not available. Contributed capital assets are recorded at their estimated fair market value on the date contributed.

As permitted under the implementation provisions of GASB Statement No. 34, Basic Financial Statements-and Management's Discussion and Analysis-for State and Local Governments, the historical cost of infrastructure assets acquired, significantly reconstructed or that received significant improvements prior to January 1, 1980 have not been included as part of governmental capital assets in the government-wide financial statements. As permitted under the implementation provisions of GASB Statement No. 34, Basic Financial Statements-and Management's Discussion and Analysis-for State and Local Governments, the historical cost of infrastructure assets acquired, significantly reconstructed or that received significant improvements after January 1, 1980 have been included as part of governmental capital assets in the government-wide financial

statements.

Capital assets in the proprietary funds are capitalized in the fund in which they are utilized. The valuation threshold for proprietary fund capital assets are the same as those used for the general capital assets.

Costs for maintenance and repairs are expensed when incurred. However, costs for repairs and upgrades that materially add to the value or life of an asset and meet the above criteria are capitalized.

The City depreciates capital assets on a straight-line basis using the following estimated useful lives:

Asset	Estimated Useful Life	
T 1 1 4 4	N. ()	
Land and construction-in-progress	Not depreciated	
Land improvements	10-20 years	
Buildings	70 years	
Equipment and vehicles	10 years for governmental activities	
	15 years for business-type activities	
Computer software	15 years	
Infrastructure	5-50 years	

K - Compensated Absences - The liability for compensated absences is based on GASB Statement No. 16, Accounting for Compensated Absences.

Vacation benefits are accrued as a liability as the benefits are earned if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the employer will compensate the employees for the benefits through paid time off or some other means. Normally, all vacation time is to be taken in the year available.

Sick days not taken may be accumulated until retirement. An employee is paid one-third of accumulated sick leave upon retirement, calculated at current wage rates, with the balance being forfeited. The City uses the vesting method to calculate its sick leave liability. Under this method, a liability for severance is based on sick leave accumulated at the balance sheet date by those employees who are currently eligible to receive termination (severance) payments according to City union agreements.

In the government-wide and proprietary funds financial statements, the entire amount of unpaid compensated absences is reported as a liability. A liability for compensated absences is accrued in the governmental funds only if the amount is currently due and payable at year-end. These amounts are recorded as compensated absences payable in the fund from which the employees who have accumulated leave are paid.

For governmental funds, the current portion of unpaid compensated absences is the amount expected to be paid using expendable available resources. These amounts are recorded in the account "compensated absences payable" in the fund from which the employees who have accumulated unpaid leave are paid.

L - Long-Term Obligations - In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statements of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life

of the bonds using the effective interest method. Losses on advance refundings are deferred and amortized over the life of the new debt, or the life of the advance refunded debt, whichever is shorter. Bonds payable are reported net of the applicable unamortized bond premium, discount or advance refunding losses. Bond issuance costs are reported as other assets and amortized over the term of the related debt.

In the governmental fund financial statements, bond premiums and discounts, as well as bond issuance costs, are recognized as revenues or expenditures during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as other financing uses.

M - Fund Balance - Fund balance is divided into five classifications based primarily on the extent to which the City is bound to observe constraints imposed upon the use of the resources in the governmental funds. The classifications are:

Nonspendable - The nonspendable fund balance category includes resources that cannot be spent because they are not inspendable form or are legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash.

Restricted - The restricted fund balance category includes resources that have constraints placed upon their use either externally by creditors, eg; debt covenants, grantors, contributors, laws or regulations of other governments or internally by constitutional provisions or enabling legislation, eg; City ordinances.

Enabling legislation authorizes the City to assess, levy, charge, or otherwise mandate payment of resources from external resource providers and includes a legally enforceable requirement that those resources be used only for the specific purposes specified in the legislation. Legal enforceability means that the City can be compelled by an external party, such as citizens, public interest groups, or the judiciary, to use resources created by enabling legislation only for the purpose specified by the legislation.

Committed - The committed fund balance classification includes resources that can be used only for specific purposes imposed by a formal action of the City Council, eg; a resolution or an ordinance. Those resources cannot be used for any other purpose unless the City Council removes or changes the specified use by taking the same type of action used to commit those resources. In contrast to fund balance that is restricted by enabling legislation, committed fund balance classification may be redeployed for other purposes with appropriate due process. Constraints imposed on the use of committed resources are imposed by City Council, separate from the authorization to raise the underlying resource; therefore, compliance with these constraints is not considered to be legally enforceable. Committed fund balance also incorporates contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements.

Assigned - The assigned fund balance classification includes resources that can be used for specific purposes but do not meet the criteria to be classified as restricted or committed. In governmental funds other than the general fund, assigned fund balance represents the remaining amount that is not restricted or committed. In the general fund, assigned amounts represent intended uses established by City Council or a City official delegated that authority by City Charter or ordinance, or by State statute.

Unassigned - The unassigned fund balance classification is the residual classification for the general fund and includes all spendable resources not contained in the other classifications. In other governmental funds, the unassigned classification is used only to report a deficit balance resulting from overspending for specific purposes for which amounts had been restricted, committed, or assigned.

The City applies restricted resources first when expenditures are incurred for purposes for which either restricted or unrestricted (committed, assigned, and unassigned) amounts are available. Similarly, within unrestricted fund balance, committed amounts are reduced first, followed by assigned, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used.

N - Grants and Other Intergovernmental Revenues

Grants and assistance awards made on the basis of entitlement programs are recorded as intergovernmental receivables and revenues when entitlement occurs. Reimbursement type grants are recorded as intergovernmental receivables and revenues when the related expenditures (expenses) are incurred. The City accounts for loans receivable related to the Community Development Block Grants as a reservation of fund balance in the fund financial statements to the extent that these loans do not have to be repaid to the Federal government. The loan proceeds are earmarked for future reprogramming under federal guidelines and are not available to fund current operating expenditures of the City.

O - Encumbrances

Encumbrance accounting is employed in all City funds with the exception of Parma Public Housing. As part of the City's formal budgetary control, purchase orders, contracts, and other commitments for the expenditure of monies are recorded as the equivalent of expenditures on the non-GAAP budgetary basis in order to reserve that portion of the applicable appropriation and to determine and maintain legal compliance. Encumbrances outstanding at year-end are reported as restricted, committed or assigned fund balances in the fund financial statements since they do not constitute expenditures or liabilities and are carried forward to the next fiscal year.

P - Interfund Transactions

During the course of normal operations, the City has numerous transactions between funds, including the allocation of centralized expenses and transfers of resources to provide services, construct assets and service debt. Such transactions are generally reflected as transfers or direct expenses of the fund that is ultimately charged for such costs. Quasi-external transactions are accounted for as revenues and expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund are recorded as expenditures/expenses in the reimbursing fund and as reductions of expenditures/expenses in the fund that is reimbursed. Non-recurring or non-routine permanent transfers of equity are reported as residual equity transfers. All other interfund transfers are reported as transfers.

Q - Operating Revenues and Expenses

Operating revenues are those that are generated directly from the primary activity of the proprietary funds. For the City, those revenues are charges for services for the golf course. Operating expenses are necessary costs incurred to provide the service for the primary activity of the fund. Revenues and expenses not meeting these definitions are reported as non-operating.

R - Pension/Other Postemployment Benefits (OPEB)

For purposes of measuring the net pension/OPEB liability, deferred outflows of resources and deferred inflows of resources related to pensions/OPEB, and pension/OPEB expense, information about the fiduciary net position of the pension/OPEB plans and additions/deductions from their fiduciary net position have been determined on the same basis as they are reported by the pension/OPEB plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension/OPEB plans report investments at fair value.

S - Net Position

Net position represent the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. The net investment in capital assets component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through constitutional provisions or enabling legislation or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The City applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position is available.

T - Extraordinary and Special Items

Extraordinary items are transactions or events that are both unusual in nature and infrequent in occurrence. Special items are transactions or events that are within the control of the City Administration and that are either unusual in nature or infrequent in occurrence. Neither type of transaction occurred during 2018.

U - Statement of Cash Flows

The City utilizes the direct method of reporting cash flows from operating activities in the Statement of Cash Flows as defined by the GASB Statement No. 9, Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities that Use Proprietary Fund Accounting. In the statement of cash flows, cash receipts and cash payments are classified according to operating, noncapital financing, capital and related financing, and investing activities.

V - *Estimates* - The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

NOTE 3 - CHANGE IN ACCOUNTING PRINCIPLES AND RESTATEMENT OF NET POSITION

For 2018, the City implemented Governmental Accounting Standards Board (GASB) Statement No. 85, Omnibus 2017, Statement No. 89, Accounting for Interest Cost Incurred Before the End of a Construction Period, Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other than Pensions, and related guidance from GASB Implementation Guide No. 2017-3, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions (and Certain Issues Related to OPEB Plan Reporting).

For 2018, the City implemented GASB Implementation Guide No. 2017-1. These changes were incorporated in the City's 2018 financial statements; however, there was no effect on beginning net position/fund balance.

GASB Statement No. 85 addresses a variety of topics including issues related to blending component units, goodwill, fair value measurement and application, and postemployment benefits (pensions and other postemployment benefits (OPEB)). These changes were incorporated in the City's 2018 financial statements; however, there was no effect on beginning net position/fund balance.

GASB Statement No. 89 establishes accounting requirements for interest cost incurred before the end of a construction period. These changes were incorporated in the City's 2018 financial statements; however, there was no effect on beginning net position.

GASB Statement No. 75 establishes standards for measuring and recognizing postemployment benefit liabilities, deferred outflows of resources, deferred inflows of resources and expenses/expenditures.

The implementation of GASB Statement No. 75 had the following effect on net position at December 31, 2017:

	Governmental Activities	Business - Type Activities (Golf Course)
Net Position at December 31, 2017 Adjustments:	\$29,482,464	\$625,475
Net OPEB Liability	(48,571,247)	(263,780)
Deferred Outflow - Payments Subsequent to Measurement Date	279,538	15,881
Restated Net position - December 31, 2017	\$(18,809,245)	\$377,576

NOTE 4 - FUND BALANCES

Fund balance is classified as nonspendable, restricted, committed, assigned and/or unassigned based primarily on the extent to which the City is bound to observe constraints imposed upon the use of the resources in the government funds. The constraints placed on fund balance for the major governmental funds and all other governmental funds are presented below:

Fund Balances	General	Debt Service	City Income Tax Capital Acquisitions	Sewer Construction
Nonspendable Inventory	\$122,225	\$-	\$-	\$-
inventory	9122,223	Φ-	Φ-	Ψ-
Total nonspendable	122,225			
Restricted for:				
Police operations	_	_	-	-

Encumbrances are commitments related to unperformed contracts for goods or services. Encumbrances accounting is used to the extent necessary to assure effective budgetary control, accountability, and cash management. At year-end the encumbrances expected to be honored upon performance by the vendor in the following year were:

Governmental Funds	Balance
General Fund	\$869,729
City Income Tax Capital Acquisitions Fund	3,416,725
Sewer Construction Fund	379,713
Street Improvements Fund	103,818
Nonmajor Governmental Funds	513,690
Total Governmental Funds	\$5,283,675

NOTE 5 - COMPLIANCE AND ACCOUNTABILITY

Deficit Fund Balances - The following major and non-major funds had deficit fund balances on a GAAP basis at year-end:

Fund	Balance
Debt Service Fund	\$(287,049)
Sewer Construction Fund	(1,518,322)
Community Development Block Grant Fund	(19,260)
Ohio and Erie Canal Fund	(24,951)
SAFER Grant Fund	(2,127)
Law Enforcement Diversion Fund	(7,198)

Management is aware of these deficits and is analyzing fund operations to determine the appropriate action to eliminate them. The General Fund is liable for deficits in other funds and provides operating transfers when cash is required, not when deficits arising from accrual accounting occur.

NOTE 6 - POOLED AND SEGREGATED CASH AND INVESTMENTS

Except for monies of the Parma Public Housing Agency and the Parma Municipal Court, whose depository accounts are presented as "Cash and cash equivalents in segregated accounts" or as "Cash and cash equivalents with fiscal and escrow agents", monies of all other funds of the City are maintained or invested in a common group of bank accounts. Collectively these common bank accounts and investments are presented as "Equity in pooled cash and cash equivalents" on the statement of net position. Individual fund integrity is maintained through the City's accounting records.

Certain funds have made cash disbursements in excess of their individual equities in the pooled cash accounts. Such amounts have been classified as interfund receivables and interfund payables between the General Fund and the respective funds that have made disbursements in excess of their individual equities in the pooled cash accounts.

Public depositories must give security for all public funds on deposit. Ohio law requires that deposits either be insured or protected by either (1) eligible securities pledged to the City and deposited with a qualified trustee by the financial institution as security for repayment whose market value at all times shall be at least 105 percent of the

deposits being secured or (2) participation in the Ohio Pooled Collateral System (OPCS), a collateral pool of eligible securities deposited with a qualified trustee and pledged to the Treasurer of State to secure the repayment of all public monies deposited in the financial institution. OPCS requires the total market value of the securities pledged to be 102 percent of the deposits being secured or a rate set by the Treasurer of State.

The City is prohibited from investing in any financial instrument, contract, or obligation whose value or return is based upon or linked to another asset or index, or both, separate from the financial instrument, contract, or obligation itself (commonly known as a "derivative"). The City is also prohibited from investing in reverse purchase agreements.

During 2018, the City complied with the provisions of these statutes pertaining to the types of investments held and institutions in which deposits were made, as well as the provisions of the statutes concerning security deposits. The City will continue to monitor compliance with applicable statutes in the future pertaining to its deposits and investments. At December 31, 2018, all of the City's deposits and investments (excluding STAR Ohio) were held by local banks or financial institutions that qualify under Ohio Revised Code §135.14(M)(I).

Deposits - Ohio law requires that deposits be placed in eligible banks or savings and loan associations located in Ohio.

Custodial credit risk is the risk that, in the event of a bank failure, the City's deposits may not be returned. The City does not have a deposit policy for custodial credit risk.

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City will not be able to recover deposits or collateral securities that are in the possession of an outside party. At December 31, 2018, \$20,222,824 of the City's total bank balance of \$22,102,034 was exposed to custodial credit risk because those deposits were uninsured and uncollateralized. Four of the City's financial institutions participate in the Ohio Pooled Collateral System (OPCS) and three were approved for a reduced collateral floor of 50 percent resulting in the uninsured and uncollateralized balance.

Investments - The City's investment policies are governed by state statutes and City ordinances which authorize the City to invest in obligations of the U.S. Treasury, agencies and instrumentalities; bonds and other State of Ohio obligations; certificates of deposit; U.S. Government Money Market Mutual Funds; State Treasury Asset Reserve of Ohio (STAR Ohio); guaranteed investment contracts and repurchase transactions. Such repurchase transactions must be purchased from financial institutions as discussed in "Deposits" above or registered broker/dealers. Repurchase transactions are not to exceed a period of one year and confirmation of securities pledged must be obtained. Under City policy, investments are limited to repurchase agreements, U.S. government securities, certificates of deposit, investments in certain money market mutual funds and State Treasury Asset Reserve of Ohio (STAR Ohio). Generally, investments are recorded in segregated accounts by way of book entry through the bank's commercial or trust department and are kept at the Federal Reserve Bank in the depository institution's separate custodial account for the City, apart from the assets of the depository institution. Ohio statute prohibits the use of reverse repurchase agreements as of September 1996.

It is the policy of the City to invest public funds in a manner which will provide the highest investment return with the maximum security, safety and preservation of principal while meeting the daily cash flow demands of the City. To the extent possible, the City attempts to match its investments with anticipated cash flow requirements.

At December 31, 2018, the fair value of the City's investments were:

Investment	Fair Value/ Carrying Value
STAR Ohio	\$133,000
	\$133,000

The City categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets. Level 2 inputs are significant other observable inputs. Level 3 inputs are significant unobservable inputs. The above table identifies the City's recurring fair value measurements as of December 31, 2018. As discussed further in Note 2G, STAR Ohio is reported at its share price.

Interest Rate Risk - In accordance with its investment policy, the City does not invest in securities that mature more than five (5) years from the date of purchase if such securities bear interest at a fixed rate or securities that mature more than two (2) years from the date of settlement if such securities bear interest at a variable rate. Other than these two requirements, the City has no written policy regarding interest rate risk.

At December 31, 2018, the City's investments had maturities as follows:

	Portfolio Weighted/
Maturity	Average Maturity
Average of 44.9 Days	100.00%

Credit Risk - State law limits investments in corporate debt to the top two ratings issued by nationally recognized statistical rating organizations. The City does not have a written policy limiting its corporate debt investments to the top ratings. However, U.S. Agencies are rated AAA, which is the top rating available for those investment types. The City invests in STAR Ohio, which is rated AAAm by Standard & Poor's.

Custodial Credit Risk - For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City has no written policy limiting the dollar amount of holdings by any single counterparty.

Reconciliation to Combined Balance Sheet Classification - The following table summarizes the City's deposits and investments as of December 31, 2018:

Deposits	\$20,890,324
Investments	133,000
Total	\$21,023,324

 ${\it Reconciliation\ to\ the\ Basic\ Financial\ Statements}$ - Total cash and investments are:

Government-Wide Financial Statements Unrestricted	
Equity in Pooled Cash and Cash Equivalents	\$16,925,369
Cash and Cash Equivalents in Segregated Accounts	1,172,372
Total Government-Wide Financial Statements	\$18,097,741
Fund Financial Statements	
Balance Sheet - Governmental Funds	
Equity in Pooled Cash and Cash Equivalents	\$14,660,729
Cash and Cash Equivalents in Segregated Accounts	$1,\!162,\!620$
Statement of Fund Net Position - Proprietary Funds	
Equity in Pooled Cash and Cash Equivalents	2,264,640
Cash and Cash Equivalents in Segregated Accounts	9,752
Total Governmental and Proprietary Funds	18,097,741
Statement of Fiduciary Assets and Liabilities	
Equity in Pooled Cash and Cash Equivalents	2,482,613
Cash and Cash Equivalents in Segregated Accounts	14,000
Cash and Cash Equivalents with Fiscal and Escrow Agents	428,970
Total Fund Financial Statements	\$21,023,324

NOTE 7 - PROPERTY TAXES

Property taxes include amounts levied against all real, public utility and tangible property (used in business) located in the City. The 2018 levy was based upon an assessed valuation of approximately \$1,510,824,840. Ohio law prohibits taxation of property from all taxing authorities in excess of 10 mills of assessed value without a vote of the people. Under current procedures, the City's share is 7.26 mills, of which 0.60 mills is dedicated to the payment of police and fire pension obligations. A revaluation of all property is required to be completed no less than every six years, with a statistical update every third year. Assessed values are established by the Cuyahoga County Fiscal Officer. The County Treasurer collects property taxes on behalf of all taxing districts in the County including the City.

Real property taxes, excluding public utility property, are all assessed at 35% of appraised market value. Applicable real property tax dates are:

Collection Dates: January 20 and June 20 of the current year

Lien Date: January 1 of the year preceding the collection year Levy Date: October 1 of the year preceding the collection year

An electric company's taxable transmission and distribution property is assessed at 88% of true value, while all of its other taxable property is assessed at 25% of true value. Applicable public utility tangible personal property tax dates are:

Collection Dates: January 20 and June 20 of the current year

Lien Date: December 31 of the second year preceding the collection year

Levy Date: October 1 of the year preceding the collection year

The full tax rate for all City operations for the year ended December 31, 2018, was \$7.26 per \$1,000 of assessed value. The assessed values of real and tangible personal property certified for tax year 2018 are as follows:

Property Type	Assessed Value
Real Public Utility	\$1,462,491,710 48,333,130
Total Assessed Value	\$1,510,824,840

NOTE 8 - INCOME TAXES

The City levies a municipal income tax of 2.5% on all salaries, wages, commissions and other compensation earned within the City. A portion of the City income tax is restricted to use for capital expenditures and debt service and is included in the City Income Tax Capital Acquisitions Fund. All other income tax revenue is included in the General Fund. Employers are required to withhold income tax from all employees working within the City, without regard to the employees' city of residence. The income tax withheld by employers must be remitted to the City on a monthly basis if the amount exceeds \$100 per month, otherwise quarterly. Persons under 18 years of age are not subject to the City income tax.

Corporations and area businesses are also subject to the 2.5% City income tax. All net profits earned by resident business are subject to City income tax, less the amount credited for taxes paid to another municipality. All non-resident businesses' net profits earned within the City are subject to the City income tax.

City residents are also subject to a 2.5% income tax on all income earned outside the City. A credit of 100%, up to a maximum of 2%, is allowed on all municipal income taxes paid to another community.

All taxpayers incurring a liability that exceeds \$100 are required to pay estimated taxes on a quarterly basis.

In 2018, income tax proceeds were credited, on a cash basis, 78.75% to the General Fund and 21.25% to the City Income Tax Capital Acquisitions Fund.

NOTE 9 - DUE FROM OTHER GOVERNMENTS

The following table summarizes the City's due from other governments at December 31, 2018:

Receivable	Amount
Local Government	\$942,968
Gasoline Tax	1,309,738
Permissive Motor Vehicle License Tax	$271,\!861$
Motor Vehicle License Registration	$272,\!850$
Homestead and Rollback	$537,\!155$
Liquor Permits	46,059
Parma Municipal Court	448,670
Total Due from Other Governments	\$3,829,301

NOTE 10 - COMPENSATED ABSENCES

Accumulated Vacation - City employees earn vacation leave at varying rates based upon length of service. Vacation leave is earned in one year and must be used in the next year. Any unused vacation leave is eliminated from the employee's vacation leave balance. In the case of death or retirement, an employee (or his estate) is paid for his unused vacation leave to a maximum of the amount of vacation leave earned in the prior year but not yet used and, on a pro rata basis, vacation leave earned during the current year. At December 31, 2018, the total vacation obligation for the City as a whole amounted to \$1,766,929.

Accumulated Unpaid Sick Leave - City employees earn sick leave at the rate of four and six tenths hours per eighty hours of service. Sick leave is cumulative without limit. In the case of death or retirement, an employee (or his estate) with ten or more years of service (except five or more years of service for American Federation of State, County, and Municipal Employees union members) is paid for one-third of his accumulated sick leave not to exceed various ceilings depending on the department for which the employee worked. The total obligation for sick leave accrual for the City as a whole as of December 31, 2018, was \$1,633,913.

Accumulated Overtime - All City employees earn overtime for work performed in excess of regular hours. Limitations of maximum accumulation of overtime hours are specified in the union agreements. During 2018, overtime was accumulated at a rate of one and one-half hours of overtime for each excess hour worked. All unpaid, accumulated overtime is paid to employees upon separation or death. Overtime is paid at the current wage rate in effect when the overtime is paid. At December 31, 2018, accumulated, unpaid overtime for the City as a whole was \$1,766.326.

NOTE 11 - CAPITAL ASSET ACTIVITY

Capital asset activity of the Governmental Activities for the year ended December 31, 2018 is summarized in the following table:

	Balances 12/31/2017	Additions	Disposals	Balances 12/31/2018

Leisure Time Activities	259,611	-
Golf Course		19,033
Total	\$4,750,620	\$19,033

NOTE 12 - RISK MANAGEMENT

Liability Self Insurance - The City is exposed to various risks of loss related to torts, thefts of, damage to and destruction of assets, errors and omissions, injuries to employees, and natural disasters. The City carries various insurance coverages for such risks. An excess coverage insurance (stop loss) policy covers claims in excess of \$250,000 per occurrence and an aggregate of \$10,000,000 per occurrence. Settled claims have not exceeded coverage in any of the last three years and there has been no significant reduction in coverage from the prior year.

In accordance with GASB Statement No. 10, Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, claims liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNR). Claims that meet this criteria are reported as liabilities of either governmental or business-type activities in the government-wide statement of net position. In the fund financial statements, claims liabilities that relate to internal service funds are reported; however, the long-term portion of claims liabilities is not reported for governmental funds.

The result of the process to estimate the claims liability is not an exact amount as it depends on many complex factors, such as inflation, changes in legal doctrines, and damage awards. Accordingly, claims are re-evaluated periodically to consider the effects of inflation, recent claim settlement trends (including frequency and amount of payouts), and other economic and social factors. The estimate of the claims liability also includes amounts for incremental claim adjustment expenses related to specific claims and other claim adjustment expenses, regardless of whether allocated to specific claims. Estimated recoveries, for example from salvage or subrogation, are another component of the claims liability estimate.

A liability of \$50,000 provided by the City's Law Director has been recorded.

Changes in the Liability Insurance Self-Insurance Fund claims liability amount for 2016 through 2018 were:

Year_	January 1	Claims	_Payments_	December 31
2016	Ф 22 0, 000	Ф	Φ(00,000)	Ø1 F0 000
2016	\$230,000	\$-	\$(80,000)	\$150,000
2017	150,000	$23,\!445$	(73,445)	100,000
2018	100,000	-	(50,000)	50,000

Medical Self Insurance - In October 1988, the City replaced its major health insurance with a Medical Insurance Self Insurance fund. A third-party administrator, Medical Mutual of Ohio, reviews all claims that are then paid by the Medical Insurance Self Insurance fund. The City pays a premium for reinsurance specific stop-loss coverage for the claim period October 1 through September 30, which carries a deductible of \$100,000 per person.

The Medical Insurance Self Insurance fund generates revenues by charging an actuarially determined premium to each fund based on the number of employees enrolled in the self-insured plan and their type of coverage. The Medical Insurance Self Insurance fund subsequently pays for all costs of providing claims servicing and claims payment.

A liability, estimated by the third party administrator, in the amount of \$926,886 has been recorded to reflect unpaid claims cost including incurred but not reported claims as of December 31, 2018. The estimate was not affected by incremental claim adjustment expenses and does not include other allocated or unallocated claim adjustment expense. Changes in the Medical Insurance Self-Insurance Fund claims liability amount for 2016 through 2018 were:

Year	January 1	Claims	Payments	December 31
2016	\$547,671	\$8,304,794	\$(7,894,981)	\$957,484
2017	957,484	8,393,066	(8,573,538)	777,012
2018	777,012	9,041,323	(8,891,449)	926,886

Workers Compensation Insurance Fund (WCIF) - Effective January 1, 2006, the City commenced participation in the Ohio Bureau of Workers' Compensation retrospective rating and payment plan under which the City assumes a portion of the risk in return for a possible reduction in premiums. Under this plan, the City pays a minimum premium for administrative services and stop-loss coverage plus the actual claims cost for any injured employees, with a claim limit of \$250,000. The City previously participated in the retroactive rating plan through December 31, 1996. A liability in the amount of \$219,114 based on information provided by the Ohio Bureau of Workers' Compensation, has been recorded to reflect unpaid claims cost, including incurred but not reported claims, as of December 31, 2018. The estimate was not affected by incremental claim adjustment expenses and does not include other allocated or unallocated claim adjustment expense.

All costs of workers claims, premiums, administrative costs and other additional assessments are paid out of the WCIF. Changes in the Workers' Compensation Insurance Fund claims liability amount for 2016 through 2018 were:

Year	January 1	Claims	Payments	December 31
2016	0004 FF1	4005 500	Φ(000 cc1)	Φ100 7 00
2016	\$324,771	\$805,599	\$(936,661)	\$193,709
2017	193,709	$621,\!002$	(532,114)	$282,\!597$
2018	$282,\!597$	$540,\!315$	(603,798)	219,114

NOTE 13 - INTERFUND TRANSACTIONS AND BALANCES

Interfund Transactions - During the course of normal operations, the City records numerous transactions between funds including expenditures and transfers of resources to provide services, subsidize operations, and service debt. The City has the following types of transactions among funds:

Reciprocal interfund services provided and used - Purchases and sales of goods and services between funds for a price approximating their external exchange value. These activities include liability, medical, and workers' compensation insurance and storeroom operations.

Nonreciprocal interfund transfers - Flows of assets between funds without equivalent flows of assets in return and without a requirement for repayment. This includes transfers to subsidize various funds.

Nonreciprocal interfund reimbursements - Repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them.

Interfund Balances - Interfund balances at December 31, 2018 represent charges for services or reimbursable expenses. These remaining balances resulted from the time lag between the dates that (1) interfund goods or services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting records, and (3) payments between funds are made. All are expected to be paid within one year.

A summary of interfund receivables and payables as of December 31, 2018 are:

Fund	Receivables	Payables
General Fund	\$477,038	\$-
City Income Tax Capital Acquisitions Fund	3,640,713	-
Debt Service Fund	-	$613,\!856$
Sewer Construction Fund	-	2,756,948
Street Improvements Fund	=	269,910
Other Governmental Funds	=	$232,\!037$
Golf Course Fund		245,000
Total	\$4,117,751	\$4,117,751

A summary of interfund transfers as of December 31, 2018 are:

Fund	Transfers-In	Transfers-Out
	Ф	¢9, cc0, 040
General Fund	\$-	\$3,669,849
Debt Service Fund	1,726,670	-
City Income Tax Capital Acquisitions Fund	-	2,055,530
Street Improvements Fund	592,860	=
Other Governmental Funds	5,742,849	3,164,000
Internal Service Funds	400,000	
Total	\$8,462,379	\$8,889,379

The transfers-in and transfers-out do not balance due to a \$427,000 transfer from the General Fund to various agency funds.

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Note 14 - Defined Benefit Pension Plans

The Statewide retirement systems provide both pension benefits and other postemployment benefits (OPEB).

Net Pension Liability/Net OPEB Liability

The net pension liability and the net OPEB liability reported on the statement of net position represent liabilities to employees for pensions and OPEB, respectively. Pensions/OPEB are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions/OPEB are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period. The obligation to sacrifice resources for pensions is a present obligation because it was created as a result of employment exchanges that already have occurred.

The net pension/OPEB liability represent the City's proportionate share of each pension/OPEB plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension/OPEB plan's fiduciary net position. The net pension/OPEB liability calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting these estimates annually.

Ohio Revised Code limits the City's obligation for this liability to annually required payments. The City cannot control benefit terms or the manner in which pensions are financed; however, the City does receive the benefit of employees' services in exchange for compensation including pension and OPEB.

GASB 68/75 assumes the liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires funding to come from these employers. All pension contributions to date have come solely from these employers (which also includes pension costs paid in the form of withholdings from employees). The retirement systems may allocate a portion of the employer contributions to provide for these OPEB benefits. In addition, health care plan enrollees pay a portion of the health care costs in the form of a monthly premium. State statute requires the retirement systems to amortize unfunded pension liabilities within 30 years. If the pension amortization period exceeds 30 years, each retirement system's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension/OPEB liability. Resulting adjustments to the net pension/OPEB liability would be effective when the changes are legally enforceable. The Ohio revised Code permits, but does not require the retirement systems to provide healthcare to eligible benefit recipients.

The proportionate share of each plan's unfunded benefits is presented as a long-term *net pension/OBEB liability* on the accrual basis of accounting. Any liability for the contractually-required pension/OPEB contribution outstanding at the end of the year is included in *intergovernmental payable* on both the accrual and modified accrual bases of accounting. The remainder of this note includes the required pension disclosures. See Note 15 for the required OPEB disclosures.

Plan Description – Ohio Public Employees Retirement System (OPERS)

Plan Description - City employees, other than full-time police and firefighters, participate in the Ohio Public Employees Retirement System (OPERS). OPERS administers three separate pension plans. The traditional pension plan is a cost-sharing, multiple-employer defined benefit pension plan. The member-directed plan is a

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

defined contribution plan and the combined plan is a combination cost-sharing, multiple-employer defined benefit/defined contribution pension plan.

OPERS provides retirement, disability, survivor and death benefits, and annual cost of living adjustments to members of the traditional and combined plans. Authority to establish and amend benefits is provided by Chapter 145 of the Ohio Revised Code. OPERS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about OPERS' fiduciary net position that may be obtained by visiting https://www.opers.org/financial/reports.shtml, by writing to the Ohio Public Employees Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling 800-222-7377.

Senate Bill (SB) 343 was enacted into law with an effective date of January 7, 2013. In the legislation, members in the tradition and combined plans were categorized into three groups with varying provisions of the law applicable to each group. The following table provides age and service requirements for retirement and the retirement formula applied to final average salary (FAS) for the three member groups under the traditional and combined plans as per the reduced benefits adopted by SB 343 (see OPERS CAFR referenced above for additional information, including requirements for reduced and unreduced benefits):

Croun	٨
(+rolln	\mathcal{H}

Eligible to retire prior to January 7, 2013 or five years after January 7, 2013

State and Local

Age and Service Requirements:

Age 60 with 60 months of service credit or Age 55 with 25 years of service credit

Traditional Plan Formula:

2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30

Combined Plan Formula:

1% of FAS multiplied by years of service for the first 30 years and 1.25% for service years in excess of 30

Group B

20 years of service credit prior to January 7, 2013 or eligible to retire ten years after January 7, 2013

State and Local

Age and Service Requirements:

Age 60 with 60 months of service credit or Age 55 with 25 years of service credit

Traditional Plan Formula:

2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30

Combined Plan Formula:

1% of FAS multiplied by years of service for the first 30 years and 1.25% for service years in excess of 30

Group C

Members not in other Groups and members hired on or after January 7, 2013

State and Local

Age and Service Requirements:

Age 57 with 25 years of service credit or Age 62 with 5 years of service credit

Traditional Plan Formula:

2.2% of FAS multiplied by years of service for the first 35 years and 2.5% for service years in excess of 35

Combined Plan Formula:

1% of FAS multiplied by years of service for the first 35 years and 1.25% for service years in excess of 35

Final average Salary (FAS) represents the average of the three highest years of earnings over a member's career for Groups A and B. Group C is based on the average of the five highest years of earnings over a member's career.

Members who retire before meeting the age and years of service credit requirement for unreduced benefits receive a percentage reduction in the benefit amount.

When a traditional plan benefit recipient has received benefits for 12 months, an annual cost of living adjustment (COLA) is provided. This COLA is calculated on the base retirement benefit at the date of retirement and is not compounded. Members retiring under the combined plan receive a cost—of—living adjustment of the defined benefit portion of their pension benefit. For those retiring prior to January 7, 2013, the COLA will continue to be a 3 percent simple annual COLA. For those retiring subsequent to January 7, 2013, beginning in calendar year 2019, the COLA will be based on the average percentage increase in the Consumer Price Index, capped at 3 percent.

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Defined contribution plan benefits are established in the plan documents, which may be amended by the Board. Member-directed plan and combined plan members who have met the retirement eligibility requirements may apply for retirement benefits. The amount available for defined contribution benefits in the combined plan consists of the member's contributions plus or minus the investment gains or losses resulting from the member's investment selections. Combined plan members wishing to receive benefits must meet the requirements for both the defined benefit and defined contribution plans. Member-directed participants must have attained the age of 55, have money on deposit in the defined contribution plan and have terminated public service to apply for retirement benefits. The amount available for defined contribution benefits in the member-directed plan consists of the members' contributions, vested employer contributions and investment gains or losses resulting from the members' investment selections. Employer contributions and associated investment earnings vest over a five-year period, at a rate of 20 percent each year. At retirement, members may select one of several distribution options for payment of the vested balance in their individual OPERS accounts. Options include the purchase of a monthly defined benefit annuity from OPERS (which includes joint and survivor options), partial lump-sum payments (subject to limitations), a rollover of the vested account balance to another financial institution, receipt of entire account balance, net of taxes withheld, or a combination of these options.

Funding Policy - The Ohio Revised Code (ORC) provides statutory authority for member and employer contributions as follows:

	State and Local
2018 Statutory Maximum Contribution Rates	
Employer	14.0 %
Employee *	10.0 %
2018 Actual Contribution Rates	
Employer:	
Pension ****	14.0 %
Post-employment Health Care Benefits ****	0.0
Total Employer	14.0 %
Employee	10.0 %

^{*} Member contributions within the combined plan are not used to fund the defined benefit retirement allowance.

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll.

For 2018, The City's contractually required contribution was \$2,604,158 for the traditional plan, \$47,474 for the combined plan and \$27,249 for the member-directed plan. Of these amounts, \$276,675 is reported as an intergovernmental payable for the traditional plan, \$5,029 for the combined plan, and \$2,899 for the member-directed plan.

^{****} These pension and employer health care rates are for the traditional and combined plans. The employer contributions rate for the member-directed plan is allocated 4 percent for health care with the remainder going to pension.

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Plan Description – Ohio Police & Fire Pension Fund (OP&F)

Plan Description – City full-time police and firefighters participate in Ohio Police and Fire Pension Fund (OP&F), a cost-sharing, multiple-employer defined benefit pension plan administered by OP&F. OP&F provides retirement and disability pension benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Benefit provisions are established by the Ohio State Legislature and are codified in Chapter 742 of the Ohio Revised Code. OP&F issues a publicly available financial report that includes financial information and required supplementary information and detailed information about OP&F fiduciary net position. The report that may be obtained by visiting the OP&F website at www.op-f.org or by writing to the Ohio Police and Fire Pension Fund, 140 East Town Street, Columbus, Ohio 43215-5164.

Upon attaining a qualifying age with sufficient years of service, a member of OP&F may retire and receive a lifetime monthly pension. OP&F offers four types of service retirement: normal, service commuted, age/service commuted and actuarially reduced. Each type has different eligibility guidelines and is calculated using the member's average annual salary. The following discussion of the pension formula relates to normal service retirement.

For members hired after July 1, 2013, the minimum retirement age is 52 for normal service retirement with at least 25 years of service credit. For members hired on or before after July 1, 2013, the minimum retirement age is 48 for normal service retirement with at least 25 years of service credit.

The annual pension benefit for normal service retirement is equal to a percentage of the allowable average annual salary. The percentage equals 2.5 percent for each of the first 20 years of service credit, 2.0 percent for each of the next five years of service credit and 1.5 percent for each year of service credit in excess of 25 years. The maximum pension of 72 percent of the allowable average annual salary is paid after 33 years of service credit (see OP&F CAFR referenced above for additional information, including requirements for Deferred Retirement Option Plan provisions and reduced and unreduced benefits):

Under normal service retirement, retired members who are at least 55 years old and have been receiving OP&F benefits for at least one year may be eligible for a cost-of-living allowance adjustment. The age 55 provision for receiving a COLA does not apply to those who are receiving a permanent and total disability benefit, surviving beneficiaries, and statutory survivors. Members participating in the DROP program have separate eligibility requirements related to COLA.

Members retiring under normal service retirement, with less than 15 years of service credit on July 1, 2013, and members whose pension benefit became effective on or after July 1, 2013, will receive a COLA equal to a percentage of the member's base pension benefit where the percentage is the lesser of three percent or the percentage increase in the consumer price index, if any, over the 12 month period that ends on the thirtieth day of September of the immediately preceding year, rounded to the nearest one-tenth of one percent.

Funding Policy – The Ohio Revised Code (ORC) provides statutory authority for member and employer contributions as follows:

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

	Police	Firefighters
2018 Statutory Maximum Contribution Rates		
Employer	19.50 %	24.00 %
Employee	12.25 %	12.25 %
2018 Actual Contribution Rates		
Employer:		
Pension	19.00 %	23.50 %
Post-employment Health Care Benefits	0.50	0.50
Total Employer	19.50 %	24.00 %
Employee	12.25 %	12.25 %

Employer contribution rates are expressed as a percentage of covered payroll. The City's contractually required contribution to OP&F was \$3,637,954 for 2018. Of this amount, \$375,198 is reported as an intergovernmental payable.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The net pension liability for OPERS was measured as of December 31, 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. OP&F's total pension liability was measured as of December 31, 2017, and was determined by rolling forward the total pension liability as of January 1, 2017, to December 31, 2017. The City's proportion of the net pension liability was based on the City's share of contributions to the pension plan relative to the contributions of all participating entities. Following is information related to the proportionate share and pension expense of the City's defined benefit pension plans:

	OPERS Traditional Plan	OPERS Combined Plan	OP&F	Total
	Traditional Pian	Combined Plan	UPAF	Total
Proportion of the Net Pension				
Liability/Asset:				
Current Measurement Date	0.13899400%	0.07492800%	0.76739000%	
Prior Measurement Date	0.13498000%	0.08282000%	0.75095200%	
Change in Proportionate Share	0.00401400%	-0.00789200%	0.01643800%	
Proportionate Share of the:				
Net Pension Liability	\$21,805,463	\$0	\$47,098,190	\$68,903,653
Net Pension Asset	0	102,002	0	102,002
P	4.529.625	(69.262)	5 110 705	0.501.060
Pension Expense	4,538,625	(68,262)	5,110,705	9,581,068

2018 pension expense for the member-directed defined contribution plan was \$38,149.

At December 31, 2018, the City reported deferred outflows of resources and deferred inflows of resources related

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

to defined benefit pensions from the following sources:

	OPERS Traditional Plan	OPERS Combined Plan	OP&F	Total
Deferred Outflows of Resources	Traditional Fran	Combined Fian	OF &F	Total
Differences between expected and				
actual experience	\$22,268	\$0	\$714,747	\$737,015
Changes of assumptions	2,605,899	8,914	2,052,317	4,667,130
Changes in proportion and differences	2,000,000	0,21.	2,002,017	.,007,100
between City contributions and				
proportionate share of contributions	420,332	3,826	791,054	1,215,212
City contributions subsequent to the	,	,	,	, ,
measurement date	2,604,158	47,474	3,637,954	6,289,586
Total Deferred Outflows of Resources	\$5,652,657	\$60,214	\$7,196,072	\$12,908,943
Deferred Inflows of Resources				
Differences between expected and				
actual experience	\$429,717	\$30,387	\$85,202	\$545,306
Net difference between projected				
and actual earnings on pension				
plan investments	4,681,346	16,093	1,629,236	6,326,675
Changes in proportion and differences				
between City contributions and				
proportionate share of contributions	223,159	0	2,610,001	2,833,160
Total Deferred Inflows of Resources	\$5,334,222	\$46,480	\$4,324,439	\$9,705,141

\$6,289,586 reported as deferred outflows of resources related to pension resulting from City contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

	OPERS Traditional Plan	OPERS Combined Plan	OP&F	Total
Year Ending December 31:		•

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Actuarial Assumptions - OPERS

Actuarial valuations of an ongoing plan involve estimates of the values of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation. The total pension liability was determined by an actuarial valuation as of December 31, 2017, using the following actuarial assumptions applied to all periods included in the measurement in accordance with the requirements of GASB 67. Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, prepared as of December 31, 2017, are presented below.

	OPERS Traditional Plan	OPERS Combined Plan
Wage Inflation	3.25 percent	3.25 percent
Future Salary Increases,	3.25 to 10.75 percent	3.25 to 8.25 percent
including inflation	including wage inflation	including wage inflation
COLA or Ad Hoc COLA:		
Pre-January 7, 2013 Retirees	3 percent, simple	3 percent, simple
Post-January 7, 2013 Retirees	3 percent, simple through 2018,	3 percent, simple through 2018,
	then 2.15 percent, simple	then 2.15 percent, simple
Investment Rate of Return	7.5 percent	7.5 percent
Actuarial Cost Method	Individual Entry Age	Individual Entry Age

Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

The most recent experience study was completed for the five year period ended December 31, 2015.

The long-term rate of return on defined benefit investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation.

During 2017, OPERS managed investments in three investment portfolios: the Defined Benefit portfolio, the Health Care portfolio, and the Defined Contribution portfolio. The Defined Benefit portfolio contains the

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

investment assets for the Traditional Pension Plan, the defined benefit component of the Combined Plan and the annuitized accounts of the Member-Directed Plan. Within the Defined Benefit portfolio, contributions into the plans are all recorded at the same time, and benefit payments all occur on the first of the month. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. The annual money-weighted rate of return expressing investment performance, net of investment expenses and adjusted for the changing amounts actually invested, for the Defined Benefit portfolio was 16.82 percent for 2017.

The allocation of investment assets with the Defined Benefit portfolio is approved by the Board of Trustees as outlined in the annual investment plan. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the defined benefit pension plans. The table below displays the Board-approved asset allocation policy for 2017 and the long-term expected real rates of return:

		Weighted Average
		Long-Term Expected
	Target	Real Rate of Return
Asset Class	Allocation	(Arithmetic)
Fixed Income	23.00 %	2.20 %
Domestic Equities	19.00	6.37
Real Estate	10.00	5.26
Private Equity	10.00	8.97
International Equities	20.00	7.88
Other investments	18.00	5.26
Total	100.00 %	5.66 %

Discount Rate The discount rate used to measure the total pension liability was 7.5 percent for the traditional plan and the combined plan. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers are made at the contractually required rates, as actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefits payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the City's Proportionate Share of the Net Pension Liability (Asset) to Changes in the Discount Rate The following table presents the City's proportionate share of the net pension liability (asset) calculated using the current period discount rate assumption of 7.5 percent, as well as what the City's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is one-percentage-point lower (6.5 percent) or one-percentage-point higher (8.5 percent) than the current rate:

	1% Decrease	Discount Rate	1% Increase
	(6.50%)	(7.50%)	(8.50%)
City's proportionate share			
of the net pension liability (asset)			
OPERS Traditional Plan	\$38,720,949	\$21,805,463	\$7,703,047
OPERS Combined Plan	(55,447)	(102,002)	(134,121)

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Changes between Measurement Date and Report Date In October 2018, the OPERS Board adopted a change in the investment return assumption, reducing it from 7.5 percent to 7.2 percent. This change will be effective for the 2018 valuation. The exact amount of the impact to the City's net pension liability is not known.

Actuarial Assumptions – OP&F

OP&F's total pension liability as of December 31, 2017, is based on the results of an actuarial valuation date of January 1, 2017, and rolled-forward using generally accepted actuarial procedures. The total pension liability is determined by OP&F's actuaries in accordance with GASB Statement No. 67, as part of their annual valuation. Actuarial valuations of an ongoing plan involve estimates of reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment mortality, salary increases, disabilities, retirements and employment terminations. Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future. Assumptions considered were: withdrawal rates, disability retirement, service retirement, DROP elections, mortality, percent married and forms of the payment, DROP interest rate, CPI-based COLA, investment returns, salary increases and payroll growth.

Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, prepared as of January 1, 2017, compared with January 1, 2016, are presented below.

	January 1, 2017	January 1, 2016
Valuation Date	January 1, 2016, with actuarial liabilities rolled forward to December 31, 2017	January 1, 2016, with actuarial liabilities rolled forward to December 31, 2016
Actuarial Cost Method	Entry Age Normal	Entry Age Normal
Investment Rate of Return	8.0 percent	8.25 percent
Projected Salary Increases	3.75 percent to 10.5 percent	4.25 percent to 11 percent
Payroll Growth	Inflation rate of 2.75 percent plus	Inflation rate of 3.25 percent plus
	productivity increase rate of 0.5 percent	productivity increase rate of 0.5 percent
Cost of Living Adjustments	3.00 percent simple; 2.2 percent simple	3.00 percent simple; 2.6 percent simple
	for increased based on the lesser of the	for increased based on the lesser of the
	increase in CPI and 3 percent	increase in CPI and 3 percent

For the January 1, 2017, valuation, mortality for non-disabled participants is based on the RP-2014 Total Employee and Healthy Annuitant Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Conduent Modified 2016 Improvement Scale. Rates for surviving beneficiaries are adjusted by 120 percent.

Age	Police	Fire
67 or less	77 %	68 %
68-77	105	87
78 and up	115	120

For the January 1, 2017, valuation, mortality for disabled retirees is based on the RP-2014 Disabled Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Conduent Modified 2016 Improvement Scale.

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Age	Police	Fire
59 or less	35 %	35 %
60-69	60	45
70-79	75	70
80 and up	100	90

For the January 1, 2016 valuation, rates of death were based on the RP2000 Combined Table, age-adjusted as follows. For active members, set back six years. For disability retirements, set forward five years for police and three years for firefighters. For service retirements, set back zero years for police and two years for firefighters. For beneficiaries, set back zero years. The rates are applied on a fully generational basis, with a base year of 2009, using mortality improvement Scale AA.

The most recent experience study was completed for the five year period ended December 31, 2016, the prior experience study was completed December 31, 2011.

The long-term expected rate of return on pension plan investments was determined using a building-block approach and assumes a time horizon, as defined in the Statement of Investment Policy. A forecasted rate of inflation serves as the baseline for the return expected. Various real return premiums over the baseline inflation rate have been established for each asset class. The long-term expected nominal rate of return has been determined by calculating a weighted averaged of the expected real return premiums for each asset class, adding the projected inflation rate and adding the expected return from rebalancing uncorrelated asset classes. Best estimates of the long-term expected geometric real rates of return for each major asset class included in OP&F's target asset allocation as of December 31, 2017, are summarized below:

Target Allocation	Long-Term Expected Real Rate of Return
_	
- %	0.00 %
16.00	5.21
16.00	5.40
20.00	2.37
20.00	2.33
15.00	4.48
12.00	5.65
8.00	7.99
5.00	6.87
8.00	7.36
120.00 %	
	Allocation - % 16.00 16.00 20.00 20.00 15.00 12.00 8.00 5.00 8.00

Note: Assumptions are geometric.

OP&F's Board of Trustees has incorporated the risk parity concept into OP&F's asset liability valuation with the goal of reducing equity risk exposure, which reduces overall Total Portfolio risk without sacrificing return, and creating a more risk-balanced portfolio based on their relationship between asset classes and economic environments. From the notional portfolio perspective above, the Total Portfolio may be levered up to 1.2 times due to the application of leverage in certain fixed income asset classes.

^{*} levered 2x

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Discount Rate For 2017, the total pension liability was calculated using the discount rate of 8.00 percent. The discount rate used for 2016 was 8.25 percent. The projection of cash flows used to determine the discount rate assumed the contributions from employers and from the members would be computed based on contribution requirements as stipulated by State statute. Projected inflows from investment earning were calculated using the longer-term assumed investment rate of return 8.00 percent. Based on those assumptions, the plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, a long-term expected rate of return on pension plan investments was applied to all periods of projected benefits to determine the total pension liability.

Sensitivity of the City's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate Net pension liability is sensitive to changes in the discount rate, and to illustrate the potential impact the following table presents the net pension liability calculated using the discount rate of 8.00 percent, as well as what the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (7.00 percent), or one percentage point higher (9.00 percent) than the current rate.

	Current		
	1% Decrease Discount Rate 1% Increa		
	(7.00%)	(8.00%)	(9.00%)
City's proportionate share			
of the net pension liability	\$65,290,440	\$47,098,190	\$32,260,744

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Note 15 - Defined Benefit OPEB Plans

See Note 14 for a description of the net OPEB liability

Plan Description – Ohio Public Employees Retirement System (OPERS)

Plan Description - The Ohio Public Employees Retirement System (OPERS) administers three separate pension plans: the traditional pension plan, a cost-sharing, multiple-employer defined benefit pension plan; the member-directed plan, a defined contribution plan; and the combined plan, a cost-sharing, multiple-employer defined benefit pension plan that has elements of both a defined benefit and defined contribution plan.

OPERS maintains a cost-sharing, multiple-employer defined benefit post-employment health care trust, which funds multiple health care plans including medical coverage, prescription drug coverage and deposits to a Health Reimbursement Arrangement to qualifying benefit recipients of both the traditional pension and the combined plans. This trust is also used to fund health care for member-directed plan participants, in the form of a Retiree Medical Account (RMA). At retirement or refund, member directed plan participants may be eligible for reimbursement of qualified medical expenses from their vested RMA balance.

In order to qualify for postemployment health care coverage, age and service retirees under the traditional pension and combined plans must have twenty or more years of qualifying Ohio service credit. Health care coverage for disability benefit recipients and qualified survivor benefit recipients is available. The health care coverage provided by OPERS meets the definition of an Other Post Employment Benefit (OPEB) as described in GASB Statement 75. See OPERS' CAFR referenced below for additional information.

The Ohio Revised Code permits, but does not require OPERS to provide health care to its eligible benefit recipients. Authority to establish and amend health care coverage is provided to the Board in Chapter 145 of the Ohio Revised Code.

Disclosures for the health care plan are presented separately in the OPERS financial report. Interested parties may obtain a copy by visiting https://www.opers.org/financial/reports.shtml, by writing to OPERS, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling (614) 222-5601 or 800-222-7377.

Funding Policy - The Ohio Revised Code provides the statutory authority requiring public employers to fund postemployment health care through their contributions to OPERS. When funding is approved by OPERS Board of Trustees, a portion of each employer's contribution to OPERS is set aside to fund OPERS health care plans.

Employer contribution rates are expressed as a percentage of the earnable salary of active members. In 2018, state and local employers contributed at a rate of 14.0 percent of earnable salary and public safety and law enforcement employers contributed at 18.1 percent. These are the maximum employer contribution rates permitted by the Ohio Revised Code. Active member contributions do not fund health care.

Each year, the OPERS Board determines the portion of the employer contribution rate that will be set aside to fund health care plans. The portion of employer contributions allocated to health care for members in the Traditional Pension Plan and Combined Plan was 1.0 percent during calendar year 2017. As recommended by OPERS' actuary, the portion of employer contributions allocated to health care beginning January 1, 2018 decreased to 0 percent for both plans. The OPERS Board is also authorized to establish rules for the retiree or

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

their surviving beneficiaries to pay a portion of the health care provided. Payment amounts vary depending on the number of covered dependents and the coverage selected. The employer contribution as a percentage of covered payroll deposited into the RMA for participants in the Member-Directed Plan for 2018 was 4.0 percent.

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll. The City's contractually required contribution was \$10,900 for 2018. Of this amount, \$1,159 is reported as an intergovernmental payable.

Plan Description – Ohio Police & Fire Pension Fund (OP&F)

Plan Description – The City contributes to the Ohio Police and Fire Pension Fund (OP&F) sponsored healthcare program, a cost-sharing, multiple-employer defined post-employment healthcare plan administered by a third-party provider. This program is not guaranteed and is subject to change at any time upon action of the Board of Trustees. OP&F provides health care benefits including coverage for medical, prescription drug, dental, vision, and Medicare Part B Premium to retirees, qualifying benefit recipients and their eligible dependents.

OP&F provides access to postretirement health care coverage for any person who receives or is eligible to receive a monthly service, disability, or statutory survivor benefit, or is a spouse or eligible dependent child of such person. The health care coverage provided by OP&F meets the definition of an Other Post Employment Benefit (OPEB) as described in Government Accounting Standards Board (GASB) Statement No. 75.

The Ohio Revised Code allows, but does not mandate, OP&F to provide OPEB benefits. Authority for the OP&F Board of Trustees to provide health care coverage to eligible participants and to establish and amend benefits is codified in Chapter 742 of the Ohio Revised Code.

OP&F issues a publicly available financial report that includes financial information and required supplementary information for the plan. The report may be obtained by visiting the OP&F website at www.op-f.org or by writing to the Ohio Police and Fire Pension Fund, 140 East Town Street, Columbus, Ohio 43215-5164.

Funding Policy – The Ohio Revised Code provides for contribution requirements of the participating employers and of plan members to the OP&F defined benefit pension plan. Participating employers are required to contribute to the pension plan at rates expressed as percentages of the payroll of active pension plan members, currently 19.5 percent and 24 percent of covered payroll for police and fire employer units, respectively. The Ohio Revised Code states that the employer contribution may not exceed 19.5 percent of covered payroll for police employer units and 24 percent of covered payroll for fire employer units. Active members do not make contributions to the OPEB Plan.

OP&F maintains funds for health care in two separate accounts. There is one account for health care benefits and one account for Medicare Part B reimbursements. A separate health care trust accrual account is maintained for health care benefits under IRS Code Section 115 trust. An Internal Revenue Code 401(h) account is maintained for Medicare Part B reimbursements.

The Board of Trustees is authorized to allocate a portion of the total employer contributions made into the pension plan to the Section 115 trust and the Section 401(h) account as the employer contribution for retiree

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

health care benefits. For 2018, the portion of employer contributions allocated to health care was 0.5 percent of covered payroll. The amount of employer contributions allocated to the health care plan each year is subject to the Trustees' primary responsibility to ensure that pension benefits are adequately funded and is limited by the provisions of Sections 115 and 401(h).

The OP&F Board of Trustees is also authorized to establish requirements for contributions to the health care plan by retirees and their eligible dependents or their surviving beneficiaries. Payment amounts vary depending on the number of covered dependents and the coverage selected.

The City's contractually required contribution to OP&F was \$86,061 for 2018. Of this amount, \$8,925 is reported as an intergovernmental payable.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

The net OPEB liability and total OPEB liability for OPERS were determined by an actuarial valuation as of December 31, 2016, rolled forward to the measurement date of December 31, 2017, by incorporating the expected value of health care cost accruals, the actual health care payment, and interest accruals during the year. OP&F's total OPEB liability was measured as of December 31, 2017, and was determined by rolling forward the total OPEB liability as of January 1, 2017, to December 31, 2017. The City's proportion of the net OPEB liability was based on the City's share of contributions to the retirement plan relative to the contributions of all participating entities. Following is information related to the proportionate share and OPEB expense:

	OPERS	OP&F	
Proportion of the Net OPEB Liability:			
Current Measurement Date	0.1337800%	0.7673900%	
Prior Measurement Date	0.1305800%	0.7509520%	
Change in Proportionate Share	0.0032000%	0.0164380%	
			Total
Proportionate Share of the Net			
Pension Liability	\$14,527,523	\$43,479,242	\$58,006,765
OPEB Expense	\$1,330,683	\$3,554,405	\$4,885,088

At December 31, 2018, the City reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

	OPERS	OP&F	Total
Deferred Outflows of Resources			
Differences between expected and			
actual experience	\$11,317	\$0	\$11,317
Changes of assumptions	1,057,758	4,242,649	5,300,407
Changes in proportion and differences			
between City contributions and			
proportionate share of contributions	218,665	627,448	846,113
City contributions subsequent to the			
measurement date	10,900	86,061	96,961
Total Deferred Outflows of Resources	\$1,298,640	\$4,956,158	\$6,254,798
Deferred Inflows of Resources			
Differences between expected and			
actual experience	\$0	\$219,291	\$219,291
Net difference between projected and			
actual earnings on OPEB plan investments	1,082,203	286,200	1,368,403
Total Deferred Inflows of Resources	\$1,082,203	\$505,491	\$1,587,694

\$96,961 reported as deferred outflows of resources related to OPEB resulting from City contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability in 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

	OPERS	OP&F	Total
Year Ending December 31:			
2019	\$345,122	\$608,392	\$953,514
2020	345,122	608,392	953,514
2021	(214,157)	608,392	394,235
2022	(270,550)	608,392	337,842
2023	0	679,942	679,942
Thereafter	0	1,251,096	1,251,096
Total	\$205,537	\$4,364,606	\$4,570,143

Actuarial Assumptions - OPERS

Actuarial valuations of an ongoing plan involve estimates of the values of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan and include the types

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

of coverage provided at the time of each valuation and the historical pattern of sharing of costs between OPERS and plan members. The total OPEB liability was determined by an actuarial valuation as of December 31, 2016, rolled forward to the measurement date of December 31, 2017. The actuarial valuation used the following actuarial assumptions applied to all prior periods included in the measurement in accordance with the requirements of GASB 74:

Wage Inflation

Projected Salary Increases,
including inflation

Single Discount Rate:
Current measurement date
Prior Measurement date
Investment Rate of Return

3.25 to 10.75 percent
including wage inflation
3.85 percent
4.23 percent
6.50 percent

Municipal Bond Rate

Health Care Cost Trend Rate

3.31 percent

7.5 percent, initial

3.25 percent, ultimate in 2028

Actuarial Cost Method Individual Entry Age

Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

The most recent experience study was completed for the five year period ended December 31, 2015.

The long-term expected rate of return on health care investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation.

During 2017, OPERS managed investments in three investment portfolios: the Defined Benefit portfolio, the Health Care portfolio and the Defined Contribution portfolio. The Health Care portfolio includes the assets for health care expenses for the Traditional Pension Plan, Combined Plan and Member-Directed Plan eligible members. Within the Health Care portfolio, contributions into the plans are assumed to be received continuously throughout the year based on the actual payroll payable at the time contributions are made, and health care-related payments are assumed to occur mid-year. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. The annual money-weighted rate of return expressing investment performance, net of investment expenses and adjusted for the changing amounts actually invested, for the Health Care portfolio is 15.2 percent for 2017.

The allocation of investment assets with the Health Care portfolio is approved by the Board of Trustees as

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

outlined in the annual investment plan. Assets are managed on a total return basis with a long-term objective of continuing to offer a sustainable health care program for current and future retirees. OPERS' primary goal is to achieve and maintain a fully funded status for the benefits provided through the defined pension plans. Health care is a discretionary benefit. The table below displays the Board-approved asset allocation policy for 2017 and the long-term expected real rates of return:

		Weighted Average		
		Long-Term Expected		
	Target	Real Rate of Return		
Asset Class	Allocation	(Arithmetic)		
Fixed Income	34.00 %	1.88 %		
Domestic Equities	21.00	6.37		
Real Estate Investment Trust	6.00	5.91		
International Equities	22.00	7.88		
Other investments	17.00	5.39		
Total	100.00 %	4.98 %		

Discount Rate A single discount rate of 3.85 percent was used to measure the OPEB liability on the measurement date of December 31, 2017. A single discount rate of 4.23 percent was used to measure the OPEB liability on the measurement date of December 31, 2016. Projected benefit payments are required to be discounted to their actuarial present value using a single discount rate that reflects (1) a long-term expected rate of return on OPEB plan investments (to the extent that the health care fiduciary net position is projected to be sufficient to pay benefits), and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the contributions for use with the long-term expected rate are not met). This single discount rate was based on an expected rate of return on the health care investment portfolio of 6.50 percent and a municipal bond rate of 3.31 percent. The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made at rates equal to the actuarially determined contribution rate. Based on these assumptions, the health care fiduciary net position and future contributions were sufficient to finance health care costs through 2034. As a result, the long-term expected rate of return on health care investments was applied to projected costs through the year 2034, and the municipal bond rate was applied to all health care costs after that date.

Sensitivity of the City's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate The following table presents the City's proportionate share of the net OPEB liability calculated using the single discount rate of 3.85 percent, as well as what the City's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is one-percentage-point lower (2.85 percent) or one-percentage-point higher (4.85 percent) than the current rate:

	Current		
	1% Decrease Discount Rate 1% Incre		
	(2.85%)	(3.85%)	(4.85%)
City's proportionate share			
of the net OPEB liability	\$19,300,441	\$14,527,523	\$10,666,279

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Sensitivity of the City's Proportionate Share of the Net OPEB Liability to Changes in the Health Care Cost Trend Rate Changes in the health care cost trend rate may also have a significant impact on the net OPEB liability. The following table presents the net OPEB liability calculated using the assumed trend rates, and the expected net OPEB liability if it were calculated using a health care cost trend rate that is 1.0 percent lower or 1.0 percent higher than the current rate.

Retiree health care valuations use a health care cost-trend assumption that changes over several years built into the assumption. The near-term rates reflect increases in the current cost of health care; the trend starting in 2018 is 7.50 percent. If this trend continues for future years, the projection indicates that years from now virtually all expenditures will be for health care. A more reasonable alternative is that in the not-too-distant future, the health plan cost trend will decrease to a level at, or near, wage inflation. On this basis, the actuaries project premium rate increases will continue to exceed wage inflation for approximately the next decade, but by less each year, until leveling off at an ultimate rate, assumed to be 3.25 percent in the most recent valuation.

	Current Health Care		
	Cost Trend Rate		
	1% Decrease	Assumption	1% Increase
City's proportionate share			
of the net OPEB liability	\$13,899,742	\$14,527,523	\$15,176,003

Changes between Measurement Date and Report Date In October 2018, the OPERS Board adopted a change in the investment return assumption, reducing it from 6.5 percent to 6.0 percent. This change will be effective for the 2018 valuation. The exact amount of the impact to the City's net OPEB liability is not known.

Actuarial Assumptions – OP&F

OP&F's total OPEB liability as of December 31, 2017, is based on the results of an actuarial valuation date of January 1, 2017, and rolled-forward using generally accepted actuarial procedures. The total OPEB liability is determined by OP&F's actuaries in accordance with GASB Statement No. 74, as part of their annual valuation. Actuarial valuations of an ongoing plan involve estimates of reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment mortality, salary increases, disabilities, retirements and employment terminations. Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing benefit costs between the employers and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial calculations reflect a long-term perspective. For a newly hired employee, actuarial calculations will take into account the employee's entire career with the employer and also take into consideration the benefits, if any, paid to the employee after termination of employment until the death of the employee and any applicable contingent annuitant. In many cases, actuarial calculations reflect several decades of service with the employer and the payment of benefits after termination.

Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, are presented below.

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Actuarial Cost Method Investment Rate of Return Projected Salary Increases Payroll Growth

Entry Age Normal 8.0 percent 3.75 percent to 10.5 percent Inflation rate of 2.75 percent plus

productivity increase rate of 0.5 percent

Single discount rate:

Current measurement date
Prior measurement date
Cost of Living Adjustments

3.24 percent 3.79 percent

3.00 percent simple; 2.2 percent simple for increased based on the lesser of the increase in CPI and 3 percent

Mortality for non-disabled participants is based on the RP-2014 Total Employee and Healthy Annuitant Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Conduent Modified 2016 Improvement Scale. Rates for surviving beneficiaries are adjusted by 120 percent.

Age	Police	Fire
		•
67 or less	77 %	68 %
68-77	105	87
78 and up	115	120

Mortality for disabled retirees is based on the RP-2014 Disabled Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Conduent Modified 2016 Improvement Scale.

Age	Police	Fire
59 or less	35 %	35 %
60-69	60	45
70-79	75	70
80 and up	100	90

The most recent experience study was completed for the five year period ended December 31, 2016, the prior experience study was completed December 31, 2011.

The OP&F health care plan follows the same asset allocation and long-term expected real rate of return for each major asset class as the pension plan, see Note 14.

Discount Rate The total OPEB liability was calculated using the discount rate of 3.24 percent. The projection of cash flows used to determine the discount rate assumed the contribution from employers and from members would be computed based on contribution requirements as stipulated by state statute. Projected inflows from investment earnings were calculated using the longer-term assumed investment rate of return 8 percent. Based

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

on those assumptions, OP&F's fiduciary net position was projected to not be able to make all future benefit payments of current plan members. Therefore, a municipal bond rate of 3.16 percent at December 31, 2017 and 3.71 percent at December 31, 2016, was blended with the long-term rate of 8 percent, which resulted in a blended discount rate of 3.24 percent. The municipal bond rate was determined using the S&P Municipal Bond 20 Year High Grade Rate Index. The OPEB plan's fiduciary net position was projected to be available to make all projected OPEB payments until 2025. The long-term expected rate of return on health care investments was applied to projected costs through 2025, and the municipal bond rate was applied to all health care costs after that date.

Sensitivity of the City's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate Net OPEB liability is sensitive to changes in the discount rate, and to illustrate the potential impact the following table presents the net OPEB liability calculated using the discount rate of 3.24 percent, as well as what the net OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (2.24 percent), or one percentage point higher (4.24 percent) than the current rate.

	Current		
	1% Decrease Discount Rate 1% Inc		
	(2.24%)	(3.24%)	(4.24%)
City's proportionate share			
of the net OPEB liability	\$54,349,577	\$43,479,242	\$35,114,920

Sensitivity of the City's Proportionate Share of the Net OPEB Liability to Changes in the Health Care Cost Trend Rate Net OPEB liability is sensitive to changes in the health care cost trend rate. The trend rate is the annual rate at which the cost of covered medical services is assumed to increase from the current year to the next year. Beginning in 2017, the per-capita costs are assumed to change by the following percentages each year:

	Non-Medicare	Non-AARP	AARP	Rx Drug	Medicare Part B
Year		_			
2017	-0.47%	-2.50%	4.50%	-0.47%	5.20%
2018	7.00%	7.00%	4.50%	7.00%	5.10%
2019	6.50%	6.50%	4.50%	6.50%	5.00%
2020	6.00%	6.00%	4.50%	6.00%	5.00%
2021	5.50%	5.50%	4.50%	5.50%	5.00%
2022	5.00%	5.00%	4.50%	5.00%	5.00%
2023 and Later	4.50%	4.50%	4.50%	4.50%	5.00%

To illustrate the potential impact, the following table presents the net OPEB liability calculated using the current healthcare cost trend current rates as outlined in the table above, a one percent decrease in the trend rates and a one percent increase in the trend rates.

	Current		
	1% Decrease	Rates	1% Increase
City's proportionate share			
of the net OPEB liability	\$33,775,457	\$43,479,242	\$56,556,661

Notes to the Basic Financial Statements For the Year Ended December 31, 2018

Changes between Measurement Date and Report Date

In March 2018, the OP&F Board of Trustees approved the implementation date and framework for a new health care model. Beginning January 1, 2019, the current self-insured health care plan will no longer be offered. In its place is a stipend-based health care model. A stipend funded by OP&F will be placed in individual Health Reimbursement Accounts that retirees will use to be reimbursed for health care expenses. The impact to the City's NOL is not known.

NOTE 16 - NOTES PAYABLE

Notes payable activity for the year ended December 31, 2018 is summarized in the following table:

	Principal Balance 12/31/2017	Increase	Decrease	Principal Balance 12/31/2018
$Governmental\ Activities$				
Notes Payable				
2.00%-(2017) Various Purpose Notes	\$4,953,000	\$	\$4,953,000	<u></u> \$-

During 2018, the City issued \$4,453,000 in bond anticipation notes which were used to repay a portion of the City's 2017 2.00% notes payable and for the reconstruction and resurfacing of certain City roads, highways and streets. Bond anticipation notes that were rolled over prior to the issuance of the financial statements and have a new maturity beyond the end of the year in which the report is issued have been reported in the government-wide statements as long-term liabilities and have been excluded from the amount due in more than one year.

All bonds are secured by the full faith and credit of the City. Such bonds and notes are payable from ad valorem property taxes levied within the limitations provided by law, irrespective of whether such bonds or notes are secured by other receipts of the City in addition to such ad valorem property taxes.

Special assessment (S.A.) bonds will be paid from the proceeds of special assessments levied against benefited property owners. In the event that a property owner fails to pay the assessment, payment would be made by the City. General Obligation (G.O.) bonds, with the exception of the internal service fund various purpose bonds, will be paid from the *Debt Service Fund*. The Ohio Public Works Commission (O.P.W.C.) and Ohio Water Development Authority (O.W.D.A.) loans will be repaid from the *Debt Service Fund*. Compensated absences will be paid from the fund from which the employees' salaries are paid. The capital leases will be paid from the *City Income Tax Capital Acquisitions Fund* and other governmental funds.

The City's overall legal debt margin was \$143,509,898 at December 31, 2018.

Principal and interest requirements to retire the City's governmental-activities general obligation bonds, special assessment bonds, O.W.D.A. loans and O.P.W.C. loans at December 31, 2018 are:

Capital Lease Arrangements - The City has entered into leases for the acquisition of vehicles and equipment. For governmental funds, capital lease payments are reflected as debt service expenditures in the basic financial statements.

The assets recorded by the City under capital leases as of December 31, 2018 are:

Asset	Governmental Activities
Equipment Vehicles	\$1,545,394 3,305,857
Less: Accumulated depreciation	(1,708,129)
Carrying value	\$3,143,122

Fully depreciated assets were removed from the above listing.

Future minimum lease payments and the present value of the minimum lease payments as of December 31, 2018 are:

Year	Governmental Activities
2019	\$862,458
2020 2021	713, 811 703, 295
2022 2023	455, 038 57, 493
Total minimum lease payments	2,792,095
Amount representing interest	(131, 586)
Present value of minimum lease payments	\$2,660,509

On March 23, 2006, the City issued general obligation bonds (Series 2006 Refunding Bonds) to advance refund the Series 1998 Justice Center General Obligation Bonds. This refunded debt is considered defeased (in-substance) and accordingly, has been removed from the statement of net position. On December 31, 2018, \$4,470,000 of bonds outstanding are considered defeased.

On May 15, 2013, the City issued general obligation bonds (Series 2013 Park Acquisition Refunding Bonds) to advance refund the Series 2003 Park Acquisition General Obligation Bonds. This refunded debt is considered defeased (in-substance) and accordingly, has been removed from the statement of net position. On December 31, 2018, \$980,000 of bonds outstanding are considered defeased.

On May 15, 2013, the City issued general obligation bonds (Series 2013 Municipal Facility Refunding Bonds) to advance refund the Series 2005 Fire Station Improvement General Obligation Bonds. This refunded debt is considered defeased (in-substance) and accordingly, has been removed from the statement of net position. On December 31, 2018, \$3,160,000 of bonds outstanding are considered defeased.

On November 22, 2016, the City issued general obligation bonds (Series 2016 Municipal Facility Refunding Bonds) to advance refund the Series 2006 Refunding Bonds. This refunded debt is considered defeased (in-substance) and accordingly, has been removed from the statement of net position. On December 31, 2018, \$4,295,000 of bonds outstanding are considered defeased.

On November 22, 2006, at the request of the Cuyahoga County General Health District (the District), the City Council authorized and approved the defeasance of \$2,395,000 of the 2003 Health District Bonds scheduled to mature over the next 15 years. The District placed unrestricted available funds in an irrevocable trust with an escrow agent to provide for all future debt service payments on the outstanding bonds. On December 31, 2018, \$880,000 of bonds outstanding are considered defeased.

Conduit Debt Obligations - To assist the PRL Corporation (the "Corporation"), an Ohio corporation wholly owned by the Parma Community General Hospital Association (also known as University Hospitals Parma Medical Center), in financing the costs of acquiring the Medical Arts Center IV, the City of Parma issued \$9,140,000 of Taxable Economic Development Revenue Bonds (the "Bonds"). The Bonds are special obligations of the City, payable solely from revenues of the Corporation. The bonds do not and shall not constitute a debt or pledge of the faith and credit or the taxing power of the City or State or any political subdivision of the State and accordingly have not been reported in the accompanying financial statements. At December 31, 2018 the Bonds outstanding aggregated \$5,965,000.

To assist the Sheet Metal Workers Local #33 Cleveland District Joint Apprenticeship and Training Fund (the "Fund"), an Ohio nonprofit organization, to finance the acquisition, construction, and equipping of a training facility, the City of Parma issued \$3,500,000 of Taxable Economic Development Revenue Bonds (the "Bonds"). The Bonds are special obligations of the City, payable solely from revenues of the Fund. The bonds do not and shall not constitute a debt or pledge of the faith and credit or the taxing power of the City or State or any political subdivision of the State and accordingly have not been reported in the accompanying financial statements. At December 31, 2018 the Bonds outstanding aggregated \$2,470,000.

To assist the Catholic Charities Facilities Corporation (the "Corporation"), a nonprofit corporation organized under the laws of the State of Ohio to finance the costs of acquisition, construction, furnishing and equipping a new residential intensive treatment center, a multipurpose center, a new medical clinic, administrative offices and related facilities on the Corporation's Parmadale Campus, the City of Parma issued \$5,800,000 Healthcare Facilities Revenue Bonds, Series 2008 (Catholic Charities Facilities Corporation) (the "'Bonds"'). The Bonds are special obligations of the City, payable solely from revenues of the Corporation. The bonds do not and shall not constitute a debt or pledge of the faith and credit or the taxing power of the City or State or any political subdivision of the State and accordingly have not been reported in the accompanying financial statements. At December 31, 2018 the Bonds outstanding aggregated \$3,645,000.

NOTE 18 - JOINTLY GOVERNED ORGANIZATIONS

Parma Community General Hospital Association - The Parma Community General Hospital Association, also known as University Hospitals Parma Medical Center (the "Hospital Association"), is a not-for-profit adult care hospital that became part of the University Hospitals Health System in January 2014. University Hospitals Health Systems, Inc. ("UH") is the sole member of the Hospital Association. Day-to-day management of the operations of the Hospital Association is overseen by a Board of Directors comprised of (i) 16 directors appointed from the cities of Parma, North Royalton, Brooklyn, Parma Heights, Seven Hills and Brooklyn Heights, such appointments by the cities being subject to UH approval, (ii) up to 3 directors appointed by UH, and (iii) 2 physician directors appointed by the Board. UH, as the sole member of the Hospital Association, possesses approval rights on strategic and operational decisions. The City appoints 6 members to the Hospital Association's Board of Directors. The City's degree of influence is limited to its appointments to the Board of Directors.

Because there is no ongoing equity interest, there is no requirement to disclose the investment in the jointly governed organization in the Government-Wide Financial Statements. There does exist, however, a residual equity interest upon the dissolution or sale of the Hospital, according to the terms of the original agreement among the Cities. The City of Parma has made no contributions to the Hospital during the year. The Hospital's financial statements may be obtained by contacting the Parma Community General Hospital, Parma, Ohio.

Southwest Council of Governments - The Southwest Council of Governments helps foster cooperation between municipalities in areas affecting health, safety, welfare, education, economic conditions and regional development. The board is comprised of one member from each of the sixteen participating entities. The board exercises total control over the operation of the Council including budgeting, appropriating, contracting and designating management. Budgets are adopted by the board. Each City's degree of control is limited to its representation on the board.

The Council has established two subsidiary organizations, the Hazardous Material Response Team ("Haz Mat") which provides hazardous material protection and assistance and the Southwest Enforcement Bureau that provides extra assistance to cities in the form of a Special Weapons and Tactics Team ("SWAT Team"). The Council's financial statements may be obtained by contacting the Southwest Council of Governments, Parma Heights, Ohio.

NOTE 19 - CONTINGENCIES

General Contingencies - Various claims and lawsuits are pending against the City. In accordance with GASB Statement No. 10, Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, those claims which are considered "probable" are accrued (see Note 12, Risk Management), while those claims that are considered "reasonably possible" are disclosed but not accrued.

As of December 31, 2018, the amount of claims against the City for which an unfavorable outcome is deemed to be reasonably possible was \$50,000 for governmental funds.

These estimates were based on a case-by-case review of outstanding claims by the City's Law Director.

Contingencies Under Grant Programs - The City participates in a number of federally assisted Investment Act grant programs, principal of which are Community Development Block Grants. These programs are subject to financial and compliance audits by the grantors or their representatives. Audits have been completed by granting agencies for the Parma Public Housing Agency grants. The City believes that disallowed costs on other grants, if any, would not be material.

NOTE 20 - TAX ABATEMENT DISCLOSURES

In accordance with GASB Statement No. 77, Tax Abatement Disclosures, the City is required to disclose certain information about tax abatements as defined in the Statement. For purposes of the Statement, a tax abatement is a reduction in tax revenue that results from an agreement between one of more governments and an individual or entity in which (a) one or more governments promise to forgo to which they are are otherwise entitled and (b) the individual or entity promises to take a specific action after the agreement has been entered into that contributes to economic development or otherwise benefits the City or its citizens. The City has entered into such agreements. A description of the City's abatement programs where the City has has promised to forgo taxes follows:

- (1) Community Reinvestment Area (CRA) programs are an economic development tool administered by municipal and county governments that provide property tax exemptions for property owners who renovate existing or construct new buildings. CRAs are areas in which property owners can receive tax incentives for investing in real property improvements. These programs permit municipalities or counties to designate areas where investment has been discouraged as a CRA to encourage revitalization of the existing housing stock and the development of new structures.
- (2) Enterprise Zone programs are an economic development tool administered by municipal and county governments that provide real property tax exemptions to businesses making investments in local communities. Enterprise Zones are designated areas of land in which businesses can receive tax incentives in the form of tax exemptions on eligible new investment. The Enterprise Zone program can provide tax exemptions for a portion of the value of new real property investment when the investment is made in conjunction with a project that includes job creation. Existing land values and existing building values are not eligible (except as noted in rare circumstances). Local communities may offer tax incentives for non-retail projects that are established or expanding operations in the community. Real property investments are eligible for tax incentives.

The total amount of taxes abated through these programs during 2018 was \$138,040.

NOTE 21 - Significant Contractual Commitments

At December 31, 2018, the City had the following significant contractual commitments:

Contract	Amount	Paid	Remaining
Cargill, Inc.	\$760,000	\$-	\$760,000
Republic Services	4,732,483	4,213,047	519,436

Changes in Assumptions – OPERS Pension

Amounts reported beginning in 2017 incorporate changes in assumptions used by OPERS in calculating the total pension liability in the latest actuarial valuation. These new assumptions compared with those used in 2016 and prior are presented below:

	2017	2016 and prior
W	2.25	0.77
Wage Inflation	3.25 percent	3.75 percent
Future Salary Increases,	3.25 to 10.75 percent	4.25 to 10.05 percent
including inflation	including wage inflation	including wage inflation
COLA or Ad Hoc COLA:		
Pre-January 7, 2013 Retirees	3 percent, simple	3 percent, simple
Post-January 7, 2013 Retirees	3 percent, simple through 2018,	3 percent, simple through 2018,
	then 2.15 percent, simple	then 2.8 percent, simple
Investment Rate of Return	7.5 percent	8 percent
Actuarial Cost Method	Individual Entry Age	Individual Entry Age

Amounts reported beginning in 2017 use mortality rates based on the RP-2014 Healthy Annuitant mortality table. For males, Healthy Annuitant Mortality tables were used, adjusted for mortality improvement back to the observation period base of 2006 and then established the base year as 2015. For females, Healthy Annuitant Mortality tables were used, adjusted for mortality improvements back to the observation period base year of 2006 and then established the base year as 2010. The mortality rates used in evaluating disability allowances were based on the RP-2014 Disabled mortality tables, adjusted for mortality improvement back to the observation base year of 2006 and then established the base year as 2015 for males and 2010 for females. Mortality rates for a particular calendar year for both healthy and disabled retiree mortality tables are determined by applying the MP-2015 mortality improvement scale to the above described tables.

Amounts reported for 2016 and prior use mortality rates based on the RP-2000 Mortality Table projected 20 years using Projection Scale AA. For males, 105 percent of the combined healthy male mortality rates were used. For females, 100 percent of the combined healthy female mortality rates were used. The mortality rates used in evaluating disability allowances were based on the RP-2000 mortality table with no projections. For males 120 percent of the disabled female mortality rates were used set forward two years. For females, 100 percent of the disabled female mortality rates were used.

City of Parma, Ohio Notes to the Required Supplementary Information For the year ended December 31, 2018

Changes in Assumptions - OP&F Pension

Amounts reported for 2018 incorporate changes in assumptions used by OP&F in calculating the total pension liability in the latest actuarial valuation. These new assumptions compared with those used in 2017 and prior are presented below:

	2018	2017 and Prior
Valuation Date	January 1, 2016, with actuarial liabilities rolled forward to December 31, 2017	January 1, 2016, with actuarial liabilities rolled forward to December 31, 2016
Actuarial Cost Method	Entry Age Normal	Entry Age Normal
Investment Rate of Return	8.0 percent	8.25 percent
Projected Salary Increases	3.75 percent to 10.5 percent	4.25 percent to 11 percent
Payroll Growth	Inflation rate of 2.75 percent plus	Inflation rate of 3.25 percent plus
	productivity increase rate of 0.5 percent	productivity increase rate of 0.5 percent
Cost of Living Adjustments	3.00 percent simple; 2.2 percent simple	3.00 percent simple; 2.6 percent simple
	for increased based on the lesser of the	for increased based on the lesser of the
	increase in CPI and 3 percent	increase in CPI and 3 percent

Amounts reported for 2018 use valuation, mortality for non-disabled participants is based on the RP-2014 Total Employee and Healthy Annuitant Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Conduent Modified 2016 Improvement Scale. Rates for surviving beneficiaries are adjusted by 120 percent.

Age	Police	Fire
67 or less	77 %	68 %
68-77	105	87
78 and up	115	120

Amounts reported for 2018 use valuation, mortality for disabled retirees is based on the RP-2014 Disabled Mortality Tables rolled back to 2006, adjusted according to the rates in the following table, and projected with the Conduent Modified 2016 Improvement Scale.

Age	Police	Fire
59 or less	35 %	35 %
60-69	60	45
70-79	75	70
80 and up	100	90

Amounts reported for 2017 and prior use valuation, rates of death were based on the RP2000 Combined Table, age-adjusted as follows. For active members, set back six years. For disability retirements, set forward five years for police and three years for firefighters. For service retirements, set back zero years for police and two years for firefighters. For beneficiaries, set back zero years. The rates are applied on a fully generational basis, with a base year of 2009, using mortality improvement Scale AA.

City of Parma, Ohio Notes to the Required Supplementary Information For the year ended December 31, 2018

Changes in Assumptions – OPERS OPEB

For 2018, the single discount rate changed from 4.23 percent to 3.85 percent.

Changes in Assumptions – OP&F OPEB

For 2018, the single discount rate changed from 3.79 percent to 3.24 percent.

CITY OF PARMA CUYAHOGA COUNTY

NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS 2 CFR 200.510(b)(6) FOR THE YEAR ENDED DECEMBER 31, 2018

NOTE A - BASIS OF PRESENTATION

The accompanying Schedule of Expenditures of Federal Awards (the Schedule) includes the federal award activity of the City of Parma (the City's) under programs of the federal government for the year ended December 31, 2018. The information on this Schedule is prepared in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the City, it is not intended to and does not present the financial position, changes in net position, or cash flows of the City.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the cash basis of accounting. Such expenditures are recognized following the cost principles contained in Uniform Guidance wherein certain types of expenditures may or may not be allowable or may be limited as to reimbursement.

NOTE C - INDIRECT COST RATE

The City has elected not to use the 10-percent de minimis indirect cost rate as allowed under the Uniform Guidance.

NOTE D - FOOD DONATION PROGRAM

The City reports commodities consumed on the Schedule at the entitlement value. The City allocated donated food commodities to the respective programs that benefitted from the use of those donated food commodities.

NOTE E- MATCHING REQUIREMENTS

Certain Federal programs require the City to contribute non-Federal funds (matching funds) to support the Federally-funded programs. The City has met its matching requirements. The Schedule does not include the expenditure of non-Federal matching funds.

CFDA - Catalog of Federal Domestic Assistance.

N/A – Not applicable.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS REQUIRED BY GOVERNMENT AUDITING STANDARDS

City of Parma Cuyahoga County 6611 Ridge Road Parma, Ohio 44129

To the Members of Council:

We have audited, in accordance with auditing standards generally accepted in the United States and the Comptroller General of the United States' *Government Auditing Standards*, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Parma, Cuyahoga County, Ohio (the City) as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated October 31, 2019. Our report refers to other auditors who audited the financial statements of the Parma Public Housing Agency, as described in our report on the City's financial statements. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that those auditors separately reported.

Internal Control Over Financial Reporting

As part of our financial statement audit, we considered the City's internal control over financial reporting (internal control) to determine the audit procedures appropriate in the circumstances to the extent necessary to support our opinions on the financial statements, but not to the extent necessary to opine on the effectiveness of the City's internal control. Accordingly, we have not opined on it.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, when performing their assigned functions, to prevent, or detect and timely correct misstatements. A material weakness is a deficiency, or combination of internal control deficiencies resulting in a reasonable possibility that internal control will not prevent or detect and timely correct a material misstatement of the City's financial statements. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all internal control deficiencies that might be material weaknesses or significant deficiencies. Given these limitations, we did not identify any deficiencies in internal control that we consider material weaknesses. However, unidentified material weaknesses may exist.

City of Parma
Cuyahoga County
Independent Auditor's Report on Internal Control
Over Financial Reporting and on Compliance and Other Matters
Required by Government Auditing Standards
Page 2

Compliance and Other Matters

As part of reasonably assuring whether the City's financial statements are free of material misstatement, we tested its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could directly and materially affect the determination of financial statement amounts. However, opining on compliance with those provisions was not an objective of our audit and accordingly, we do not express an opinion. The results of our tests disclosed no instances of noncompliance or other matters we must report under *Government Auditing Standards*.

Purpose of this Report

Keth Tobu

This report only describes the scope of our internal control and compliance testing and our testing results, and does not opine on the effectiveness of the City's internal control or on compliance. This report is an integral part of an audit performed under *Government Auditing Standards* in considering the City's internal control and compliance. Accordingly, this report is not suitable for any other purpose.

Keith Faber Auditor of State

Columbus, Ohio

October 31, 2019

Lausche Building, 12th Floor 615 Superior Avenue, NW Cleveland, Ohio 44113-1801 (216) 787-3665 or (800) 626-2297 NortheastRegion@ohioauditor.gov

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO THE MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

City of Parma Cuyahoga County 6611 Ridge Road Parma, Ohio 44129

To the Members of Council:

Report on Compliance for the Major Federal Program

We have audited the City of Parma's (the City) compliance with the applicable requirements described in the U.S. Office of Management and Budget (OMB) *Compliance Supplement* that could directly and materially affect the City of Parma's major federal program for the year ended December 31, 2018. The *Summary of Auditor's Results* in the accompanying schedule of findings identifies the City's major federal program.

The City's basic financial statements include the operations of the Parma Public Housing Agency, which expended \$5,582,153 in federal awards which is not included in the City's Schedule of Expenditures of Federal Awards during the year ended December 31, 2018. Our audit, described below, did not include the operations of the Parma Public Housing Agency because the Parma Public Housing Agency engaged another auditor to audit its Federal award programs in accordance with the Uniform Guidance.

Management's Responsibility

The City's Management is responsible for complying with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to opine on the City's compliance for the City's major federal program based on our audit of the applicable compliance requirements referred to above. Our compliance audit followed auditing standards generally accepted in the United States of America; the standards for financial audits included in the Comptroller General of the United States' *Government Auditing Standards*; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). These standards and the Uniform Guidance require us to plan and perform the audit to reasonably assure whether noncompliance with the applicable compliance requirements referred to above that could directly and materially affect a major federal program occurred. An audit includes examining, on a test basis evidence about the City's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

Efficient • Effective • Transparent

City of Parma
Cuyahoga County
Independent Auditor's Report on Compliance with Requirements
Applicable to the Major Federal Program and on Internal Control
Over Compliance Required by the Uniform Guidance
Page 2

We believe our audit provides a reasonable basis for our compliance opinion on the City's major program. However, our audit does not provide a legal determination of the City's compliance.

Opinion on the Major Federal Program

In our opinion, the City of Parma complied, in all material respects with the compliance requirements referred to above that could directly and materially affect its major federal program for the year ended December 31, 2018.

Report on Internal Control Over Compliance

The City's management is responsible for establishing and maintaining effective internal control over compliance with the applicable compliance requirements referred to above. In planning and performing our compliance audit, we considered the City's internal control over compliance with the applicable requirements that could directly and materially affect a major federal program, to determine our auditing procedures appropriate for opining on the major federal program's compliance and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not to the extent needed to opine on the effectiveness of internal control over compliance. Accordingly, we have not opined on the effectiveness of the City's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, when performing their assigned functions, to prevent, or to timely detect and correct, noncompliance with a federal program's applicable compliance requirement. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a federal program compliance requirement will not be prevented, or timely detected and corrected. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with federal program's applicable compliance requirement that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.
