Paulding, OH 45879

We have reviewed the *Independent Auditor's Report* of the Paulding County Hospital, Paulding County, prepared by Plattenburg & Associates, Inc., for the audit period January 1, 2021 through December 31, 2021. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Paulding County Hospital is responsible for compliance with these laws and regulations.

INDEPENDENT AUDITOR'S REPORT

Board of Trustees
Paulding County Hospital
Paulding, Ohio

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of Paulding County Hospital (the Hospital), a component unit of Paulding County, Ohio, as of and for the year ended December 31, 2021, and the related notes to the financial statements, which collectively comprise the Hospital's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Paulding County Hospital, as of December 31, 2021, and the changes in financial position and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Hospital and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Other Matters

The financial statements of the Hospital as of and for the year ended December 31, 2020, were audited by predecessor auditors whose report dated November 3, 2021, expressed an unmodified opinion on those statements.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Hospital's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Hospital's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and schedules of pension information and other postemployment information be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Hospital who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Hospital's basic financial statements. The accompanying schedule of expenditures of federal awards, as required by Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 31, 2023, on our consideration of the Hospital's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Hospital's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Hospital's internal control over financial reporting and compliance.

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Management's Discussion and Analysis
For the Years Ended December 31, 2021 and 2020
(Unaudited)

Introduction

The management's discussion and analysis of the financial performance of Paulding County Hospital (Hospital) provides an overview of the Hospital's financial activities for the years ended December 31, 2021, 2020 and 2019. It should be read in conjunction with the accompanying financial statements of the Hospital. Management is responsible for the completeness and fairness of the financial statements and the related note disclosures along with management's discussion and analysis.

Financial Highlights

- The Hospital's total net position increased \$8,003,800 from 2020. While net position increased \$235,284 from 2019 to 2020.
- The Hospital's net patient services revenues increased \$4,409,147 from 2020.
- The Hospital's unrestricted net position was (\$5,270,871) and (\$12,697,049) for 2021 and 2020, respectively.

The following table provides a breakdown of the Hospital's net position by category for the years ended December 31, 2021, 2020 and 2019:

	<u>2021</u>	<u>2020</u>	<u>2019</u>
Net Position			
Net investment in capital assets	\$7,608,640	\$7,912,353	\$7,426,929
Restricted - net pension asset	1,113,078	231,743	124,719
Unrestricted	<u>(5,270,871)</u>	<u>(12,697,049)</u>	<u>(12,339,885)</u>
Total Net Position	<u><u>\$3,450,847</u></u>	<u><u>(\$4,552,953)</u></u>	<u><u>(\$4,788,237)</u></u>

In the year ended December 31, 2021, the Hospital's revenue and other support were greater than total expenses, creating an increase in net position of \$8,003,800, which was mainly due to changes in net pension and OPEB liabilities and assets.

Using This Annual Report

This annual financial report includes the report of independent auditors, this management's discussion and analysis, the financial statements and notes to the financial statements. The Hospital's financial statements consist of three statements—a balance sheet; a statement of revenues, expenses and changes in net position; and a statement of cash flows. These statements and related notes provide information about the activities of the Hospital, including resources held but restricted. The Hospital is accounted for as a business-type activity and presents its financial statements using the economic resources measurement focus and the accrual basis of accounting.

The Balance Sheet and Statement of Revenue, Expenses and Changes in Net Position

One of the most important questions asked about any Hospital's finances is, "Is the Hospital as a whole better or worse off as a result of the year's activities?" The balance sheet and the statement of revenue, expenses and changes in net position report information about the Hospital as a whole and on its activities in a way that helps answer this question. These statements include all restricted and unrestricted assets and deferred outflows of resources and all liabilities and deferred inflows of resources—using the accrual basis of accounting. Using the accrual basis of accounting means that all of the current year's revenue and expenses are taken into account regardless of when cash is received or paid.

These two statements report the Hospital's net position and changes therein. The Hospital's total net position—assets and deferred outflows of resources less liabilities and deferred inflows of resources—is one measure of the Hospital's financial health or financial position. Over time, increases or decreases in the Hospital's net position are an indicator of whether its financial health is improving or deteriorating. Other nonfinancial factors, such as changes in the Hospital's patient base, changes in legislation and regulations, measures of the quantity and quality of services provided to its patients and local economic factors should also be considered to assess the overall financial health of the Hospital.

The Statement of Cash Flows

The statement of cash flows reports cash receipts, cash payments and net changes in cash and cash equivalents resulting from four defined types of activities. It provides answers to such questions as where did cash come from, what was cash used for and what was the change in cash and cash equivalents during the reporting period.

Total Assets	25,407,904	22,769,734	21,608,495	2,638,170	11.59%
Deferred Outflows of Resources	1,811,451	3,251,256	5,984,639	(1,439,805)	-44.28%
Liabilities:					
Current liabilities	7,247,215	5,778,194	6,246,592	1,469,021	25.42%
Noncurrent liabilities	447,880	356,065	388,238	91,815	25.79%
Net pension and OPEB liability	8,638,588	20,179,603	25,450,334	(11,541,015)	-57.19%
Total Liabilities	16,333,683	26,313,862	32,085,164	(9,980,179)	-37.93%
Deferred Inflows of Resources	7,434,825	4,260,081	296,207	3,174,744	74.52%
Net Position:					
Net investment in capital assets	7,608,640	7,912,353	7,426,929	(303,713)	-3.84%
Restricted - net pension asset	1,113,078	231,743	124,719	881,335	380.31%
Unrestricted	(5,270,871)	(12,697,049)	(12,339,885)	7,426,178	-58.49%
Total Net Position	3,450,847	(4,552,953)	(4,788,237)	8,003,800	-175.79%
Total liabilities, deferred inflows of resources and net position	\$27,219,355	\$26,020,990	\$27,593,134	\$1,198,365	4.61%

The Hospital saw a decrease in capital assets due to current year depreciation expense being greater than current year additions. Total liabilities decreased mainly due to the changes in net pension and OPEB liabilities.

*-Restated

Operating Revenue

Operating revenue includes all transactions that result in the sales and/or receipts from goods and services, such as inpatient services, outpatient services, physician offices and the cafeteria.

Operating revenue changes were a result of the following factors:

Net patient service revenue increased by 21.39 percent from 2020 to 2021. To calculate net patient service revenue, gross patient revenue is reduced by revenue deductions. These deductions are the amounts that are not paid to the Hospital under contractual arrangements primarily with Medicare, Medicaid, Anthem

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Management's Discussion and Analysis
For the Years Ended December 31, 2021 and 2020
(Unaudited)

and other commercial carriers. These revenue deductions have varies from year to year. The change in revenue deductions is due in part to third-party settlement estimates, state reimbursements for indigent care and changes in bad debt allowances.

Other operating revenue decreased 19.98 percent from 2020, which was due to variations in items included in other operating revenue. In 2020 and 2019, other operating revenue increased 4.82 percent and increased 36.0 percent, respectively.

Operating Expenses

Operating expenses are all the costs necessary to perform and conduct the services and primary purposes of the Hospital. The operating expense changes were the result of the following factors:

Salary costs increased 9.90 percent from 2020 to 2021. Salary costs decreased 0.65 percent for 2020 and decreased 1.60 percent in 2019.

Benefit costs decreased 216.17 percent, due primarily to decreased pension and OPEB expenses for the current year. Benefit costs decreased 33.24 percent in 2020 and increased 55.70 percent in 2019.

Medical supplies and drugs increased 12.73 percent, due primarily to patient volume fluctuations. Medical supplies and drugs increased 9.84 percent in 2020 and increased 6.70 percent in 2019.

Professional services and consultant fees increased 10.24 percent due primarily to inflationary increases associated with various professional services and consultant fees. Professional services and consultant fees increased 3.01 and 1.50 percent in 2020 and 2019, respectively.

Purchased services increased 1.73 percent, primarily due to inflationary increases and fluctuations based on volume and needs of the Hospital. Purchased services increased 11.67 and 7.90 percent in 2020 and 2019, respectively.

Nonoperating Revenue and Expenses

Nonoperating revenue and expenses are all sources and uses that are primarily nonexchange in nature. They consist of noncapital grant, investment income, other income/expenses and contributions.

There was a decrease in nonoperating revenue from the prior year, primarily due to a decrease in noncapital grants.

The Hospital's Cash Flows

Another way to assess the financial health of a hospital is to look at the statement of cash flows.

Its primary purpose is to provide relevant information about the cash receipts and cash payments of an entity during a period. The statement of cash flows also helps assess:

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Management's Discussion and Analysis
For the Years Ended December 31, 2021 and 2020
(Unaudited)

- An entity's ability to generate future net cash flows
- Its ability to meet its obligations as they come due
- Its needs for external financing

	2021	2020	2019	2021 / 2020 Increase (Decrease)
Cash Provided by (Used in)				
Operating activities	\$2,554,023	(\$1,566,170)	\$1,041,909	\$4,120,193
Noncapital financing activities	301,523	4,139,334	76,322	(3,837,811)
Capital and related financing activities	(837,103)	(1,506,418)	(967,518)	669,315
Investing activities	468,489	586,841	(276,427)	(118,352)
Net Decrease in Cash and Cash Equivalents	<u>2,486,932</u>	<u>1,653,587</u>	<u>(125,714)</u>	<u>833,345</u>
Cash and Cash Equivalents, Beginning of Year	4,443,719	2,790,132	2,915,846	1,653,587
Cash and Cash Equivalents, End of Year	<u>\$6,930,651</u>	<u>\$4,443,719</u>	<u>\$2,790,132</u>	<u>\$2,486,932</u>

The Hospital's liquidity changed during the year. The following discussion amplifies the overview of cash flows presented above:

Cash used in operating activities increased approximately \$4.1 million over the prior year. Cash from operating activities decreased approximately \$2.6 million in 2020 and decreased approximately \$32,000 in 2019.

Noncapital financing activities provided cash of approximately \$0.3 million in 2021, approximately \$4.1 million in 2020 and \$76,000 in 2019.

Capital and related financing activities used cash of approximately \$0.8 million. Net capital purchases for 2020 and 2019 were approximately \$1.5 million and \$1.0 million, respectively.

Investing activities provided cash of \$0.5 million in 2021. Investing activities provided cash of approximately \$0.6 million in 2020 and investing activities used cash of approximately of \$0.3 million in 2019.

Capital Assets

At December 31, 2021, the Hospital had \$31,414,073 invested in capital assets. Capital assets for 2020 and 2019 were \$30,576,970 and \$30,551,995, respectively. Depreciation and amortization expense totaled \$1,028,817 for the current year compared to \$1,020,994 and \$931,742 in 2020 and 2019, respectively. Details of these assets for the past three years are shown below:

Other Economic Factors

The Paulding County Hospital will continue to explore revenue enhancements, cost reductions and productivity improvements in an effort to remain an asset in the community. Its economic position is also closely tied to that of the local medical staff as it continually works with physicians in the community to ensure that the medical needs of the public are being met.

The Supplemental Upper Payment Limit and Health Care Assurance programs have continued to provide relief for our Medicaid shortfalls. As in the past, our Administrative Team will continue to monitor suggested changes with the Ohio Hospital Association and the Department of Job and Family Services.

On March 11, 2020, the World Health Organization designated the SARS-CoV-2 virus and the incidence of COVID-19 as a global pandemic. For healthcare providers, patient volumes and related revenues were affected by COVID-19 as various policies were implemented by federal, state and local governments in response to the pandemic that led many people to remain at home and forced the closure of or limitations on certain businesses, as well as suspended elective procedures by health care facilities. While some of these policies have been eased and states have lifted moratoriums on non-emergent procedures, some restrictions remain in place. There is still considerable uncertainty around the duration and ultimate financial impacts of the COVID-19 pandemic. The Hospital continues to monitor the direct and indirect impacts of the pandemic and develop responses accordingly to maintain its operational and financial flexibility.

Aside from COVID-19, the healthcare industry continues to be challenged with ongoing healthcare reform and how it will impact the overall care delivery model for hospitals, physicians and other healthcare providers. Uncertainty with the fate of programs such as the Affordable Care Act requires healthcare organizations to remain vigilant and flexible. The Hospital continues to work toward operating in the most efficient manner possible to help mitigate rising costs. The Hospital collaborates with its physician practices to further incorporate patient-centered care and pay-for-performance practices that entail provider-recognition models for exemplary patient service and satisfaction.

Contacting the Hospital's Financial Management

This financial report is intended to provide our county and bondholders with a general overview of the Hospital's finances and to show the Hospital's accountability for the funds over which it has stewardship. If you have questions about this report or need additional information, we welcome you to contact the Chief Financial Officer, Andrew Wannemacher.

See Notes to Financial Statements.

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations and Reporting Entity

Paulding County Hospital (Hospital) is a 25-bed critical access hospital located in Paulding, Ohio. The Hospital operates under the authority of Section 339, Ohio Revised Code, to provide inpatient, outpatient and emergency care services for the residents of Paulding County, Ohio. A Board of Trustees appointed by the County Commissioners, the probate judge and the Judge of the Court of Common Pleas of Paulding County governs the Hospital. The Hospital is considered a component unit of Paulding County, Ohio (County).

Basis of Accounting and Presentation

The financial statements of the Hospital have been prepared on the accrual basis of accounting using the economic resources measurement focus. Revenue, expenses, gains, losses, assets and liabilities and deferred inflows and outflows of resources from exchange and exchange-like transactions are recognized when the exchange transaction takes place, while those from government-mandated or voluntary nonexchange transactions (principally federal and state grants and county appropriations) are recognized when all applicable eligibility requirements are met. Operating revenue and expenses include exchange transactions and program-specific, government mandated or voluntary nonexchange transactions. Government-mandated or voluntary nonexchange transactions that are not program specific (such as county appropriations), investment income and interest on capital assets-related debt are included in nonoperating revenues and expenses. The Hospital first applies restricted net position, if applicable, when an expense or outlay is incurred for purposes for which both restricted and unrestricted net position are available.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and deferred inflows and outflows of resources and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Hospital considers all liquid investments with original maturities of three months or less to be cash and cash equivalents.

Assets Limited as to Use and Investment Income

Assets limited as to use consist of cash equivalents and certificates of deposit plus accrued interest and include assets set aside by the Hospital's Board of Trustees for future capital improvements, over which the Board retains control and may, at its discretion, subsequently use for other purposes. Certificates of deposit are stated at cost, plus accrued interest, which approximates market value.

Investment income on board-designated funds (funded depreciation) is recorded as nonoperating income.

Patient Accounts Receivable

Accounts receivable from patients, insurance companies and governmental agencies are based on gross charges. An allowance for uncollectible accounts is established on an aggregate basis by using historical write-off rate factors applied to unpaid accounts based on aging. Loss rate factors are based on historical loss experience and adjusted for economic conditions and other trends affecting the Hospital's ability to collect outstanding amounts. Uncollectible amounts are written off against the allowance for doubtful accounts in the period they are determined to be uncollectible. An allowance for contractual adjustments and interim payment advances is based on expected payment rates from payers based on current reimbursement methodologies. This amount also includes amounts received as interim payments against unpaid claims by certain payers.

Inventory

Inventories, consisting primarily of medical supplies and drugs, are stated at the lower of cost, determined using the first-in, first-out method, or market.

Capital Assets

Capital assets are recorded at cost at the date of acquisition, or fair value at the date of donation if acquired by gift. Depreciation is computed using the straight-line method over the estimated useful life of each asset. Leasehold improvements are depreciated over the shorter of the lease term or their respective estimated useful lives. The following estimated useful lives are being used by the Hospital:

Land improvements	5-25 years
Buildings and building improvements	5-50 years
Fixed equipment	3-20 years
Major moveable equipment	3-20 years

Notes Receivable

Notes receivable represent loans to physicians under various cash flow support and loan arrangements. These loans are to be repaid in varying monthly installments, including varying interest rates ranging from the minimum applicable federal rate to prime plus 1 percent, and are unsecured. A majority of the physician notes receivable are forgiven over time under the terms specified in the physician loan agreement.

Deferred Outflows of Resources

The Hospital reports increases in net position that relate to future periods as deferred outflows of resources in a separate section of its balance sheets.

Compensated Absences

Paid time off is charged to operations when earned. The unused and earned benefits are recorded as a current or long-term liability in the financial statements depending on when amounts are expected to be paid. Employees accumulate vacation days at varying rates depending on years of service. Employees are not paid for accumulated sick leave if they leave before retirement. However, employees who retire from the Hospital may convert accumulated sick leave to termination payments equal to one-half of the accumulated balance calculated at the employee's base pay rate as of the retirement date. Employees

hired after June 8, 2001, are only eligible to receive termination payments on one-half of the accumulated sick leave balance up to a maximum of 240 hours.

Cost-Sharing Multiple-Employer Defined Benefit Pension Plans

The Hospital participates in two cost-sharing multiple-employer defined benefit pension plans administered by the Ohio Public Employees Retirement System, the Traditional Pension Plan and the Combined Plan (Plans). For purposes of measuring the net pension (asset) liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Plans and additions to/deductions from the Plans' fiduciary net position have been determined on the same basis as they are reported by the Plans. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Cost-Sharing Defined Benefit Other Postemployment Benefit Plan

The Hospital participates in a cost-sharing multiple-employer defined benefit other postemployment benefit plan administered by the Ohio Public Employees Retirement System (the OPEB Plan). For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the OPEB Plan and additions to/deductions from the OPEB Plan's fiduciary net position have been determined on the same basis as they are reported by the OPEB Plan. For this purpose, benefit payments are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Deferred Inflows of Resources

The Hospital reports decreases in net position that relate to future periods as deferred inflows of resources in a separate section of its balance sheets.

Net Position

Net position of the Hospital is classified in three components. The net investment in capital assets consists of capital assets net of accumulated depreciation and reduced by the outstanding balances of borrowings used to finance the purchase or construction of those assets. Restricted net position represents the net pension and OPEB asset of the Hospital. Unrestricted net position can be either positive or negative and represents the remaining assets less remaining liabilities that do not meet the definition of the net investment in capital assets or restricted net position.

Net Patient Service Revenue

The Hospital has agreements with third-party payers that provide for payments to the Hospital at amounts different from its established rates. Net patient service revenue is reported at the estimated net realizable amounts from patients, third-party payers and others for services rendered and includes estimated retroactive revenue adjustments and a provision for uncollectible accounts. Retroactive adjustments are considered in the recognition of revenue on an estimated basis in the period the related services are rendered and such estimated amounts are revised in future periods as adjustments become known.

Charity Care

The Hospital provides care without charge or at amounts less than its established rates to patients meeting certain criteria under its charity care policy. Because the Hospital does not pursue collection of

Paulding County Hospital
A Component Unit of Paulding County, Ohio

Notes to Financial Statements

December 31, 2021 and 2020

amounts determined to qualify as charity care, these amounts are not reported as net patient service revenue.

Grants and Contributions

From time to time, the Hospital receives certain federal and state grants, as well as contributions from individuals and private organizations. Revenues from grants and contributions (including contributions of capital assets) are recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenues. Amounts restricted to capital acquisitions are reported after nonoperating revenues and expenses.

Income Taxes

As an instrumentality of a political subdivision of the state of Ohio, the Hospital is generally exempt from federal and state income taxes under the Internal Revenue Code and a similar provision of state law. However, the Hospital is subject to federal income tax on any unrelated business taxable income.

Risk Management

The Hospital is exposed to various risks of loss from torts; theft of, damage to and destruction of assets; business interruption; errors and omissions; employee injuries and illnesses; natural disasters; medical malpractice; and employee health, dental and accident benefits. Commercial insurance coverage is purchased for claims arising from such matters other than employee health claims. Settled claims have not exceeded this commercial coverage in any of the three preceding years.

The Hospital is self-insured for a portion of its exposure to risk of loss from employee health claims. Annual estimated provisions are accrued for the self-insured portion of employee health claims and include an estimate of the ultimate costs for both reported claims and claims incurred, but not yet reported.

Note 2: Net Patient Service Revenue

The Hospital has agreements with third-party payers that provide for payments to the Hospital at amounts different from its established rates. These payment arrangements include:

Medicare - Effective January 1, 2001, the Hospital received full accreditation from the Centers for Medicare and Medicaid Services for the critical access hospital designation. As a critical access hospital, the Hospital receives reasonable, cost-based reimbursement for both inpatient and outpatient services provided to Medicare beneficiaries.

Medicaid - Inpatient and outpatient services rendered to Medicaid program beneficiaries are reimbursed under a cost reimbursement methodology for certain services and at prospectively determined rates for all other services. The Hospital is reimbursed for cost reimbursable services at tentative rates with final settlement determined after submission of annual cost reports by the Hospital and audits thereof by the Medicaid administrative contractor.

Paulding County Hospital
A Component Unit of Paulding County, Ohio

Notes to Financial Statements

December 31, 2021 and 2020

Approximately 53 and 55 percent of net patient service revenue is from participation in the Medicare and state-sponsored Medicaid programs for each of the years ended December 31, 2021 and 2020, respectively. Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation and change. As a result, it is reasonably possible that recorded estimates will change materially in the near term.

The Hospital has also entered into payment agreements with certain commercial insurance carriers, health maintenance organizations and preferred provider organizations. The basis for payment to the Hospital under these agreements includes prospectively determined rates per discharge, discounts from established charges and prospectively determined daily rates.

Note 3: Deposits, Investments and Investment Income

Chapter 135 of the Ohio Uniform Depositor Act authorizes local governmental units to make deposits in any national bank located in the state, subject to inspection by the superintendent of financial institutions, as eligible to become a public depository. Section 135.14 of the Ohio Revised Code allows the local government to invest in United States Treasury bills, notes, bonds or any other obligation or security issued by the United States Treasury or any other obligation guaranteed as to principal and interest by the United States of America and bonds and other obligations of the state of Ohio. Investments in no-load money market mutual funds, repurchase agreements, commercial paper and bankers' acceptances are permitted subject to certain limitations that include completion of additional training, approved by the auditor of state, by the treasurer or governing board investing in these instruments.

The Hospital has designated multiple banks for the deposit of its funds. Investment of interim funds is limited to bonds, notes, debentures or any other obligations or securities issued by any federal government agency or instrumentality, no-load money market mutual funds and the Ohio subdivision's fund (STAR Ohio).

Statutes require the classification of funds held by the Hospital into three categories:

Active Funds - Active funds are required to be kept in a "cash" or "near cash" status for immediate use by the Hospital. Such funds must be maintained either in depository accounts or withdrawable on demand, including negotiable order of withdrawal (NOW) accounts.

Inactive Funds - Inactive funds are not required for use within the current five-year period of designated depositories. Ohio law permits inactive monies to be deposited or invested as certificates of deposit, maturing not later than the end of the current period of designated depositories or as savings or deposit accounts, including, but not limited to, passbook accounts.

Interim Funds - Interim funds are funds which are not needed for immediate use but will be needed before the end of the current period of designation of deposit. Ohio law permits interim funds to be invested or deposited in the following securities:

1. Bonds, notes or other obligations guaranteed by the United States or those for which the faith of the United States is pledged for the payment of principal and interest

2. Bonds, notes, debentures or other obligations or securities issued by any federal governmental agency
3. No-load money market mutual funds consisting exclusively of obligations described in (1) or (2) above and repurchase agreements secured by such obligations, provided that investments in securities described in this division are made only through eligible institutions
4. Interim deposits in the eligible institutions applying for interim funds to be evidenced by time certificates of deposit, maturing not more than one year from date of deposit, or by savings or deposit accounts, including but not limited to passbook accounts
5. Bonds and other obligations of the state of Ohio
6. The Ohio State Treasurer's investment pool (STAR Ohio)
7. Commercial paper and bankers' acceptances which meet the requirements established by Ohio Revised Code SEC 135.142
8. Under limited circumstances, corporate debt interest in either of the two highest rating classifications by at least two nationally recognized rating agencies

Protection of the Hospital's deposits is provided by the Federal Deposit Insurance Corporation, by eligible securities pledged by the financial institution as security for repayment, by surety company bonds deposited with the treasurer, by the financial institution or by single collateral pool established by the financial institution to secure the repayment of all public funds deposited with the institution.

Investments in stripped principal or interest obligations, reverse repurchase agreements and derivatives are prohibited. The issuance of taxable notes for the purpose of arbitrage, the use of leverage, and short selling are also prohibited. An investment must mature within five years from the date of purchase unless matched to a specific obligation or debt of the Hospital and must be purchased with the expectation that it will be held to maturity.

The Hospital's cash and investments are subject to several types of risk, which are examined in more detail below:

Custodial Credit Risk of Bank Deposits

Custodial credit risk is the risk that in the event of a bank failure, the Hospital's deposits may not be returned to it. The Hospital does not have a specific deposit policy for custodial credit risk. At December 31, 2021, the Hospital had no bank deposits (certificates of deposit, checking and savings accounts) that were uninsured and uncollateralized. The Hospital believes that due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. However, since all of the Hospital's bank deposits are collateralized, the Hospital believes it has maintained an acceptable risk level at these institutions.

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

Summary of Carrying Values

The Hospital's deposits are comprised of the following:

	<u>2021</u>	<u>2020</u>
Carrying value		
Cash and cash equivalents	\$4,615,267	\$2,627,697
Assets whose use is limited		
Money market funds	3,482,546	1,816,022
Certificates of deposit	4,842,179	6,359,361
Accrued interest	594	89,821
Total Carrying value	<u>12,940,586</u>	<u>10,892,901</u>
Deposits

Note 6: Long-Term Obligations

The following is a summary of long-term obligation transactions for the Hospital for the years ended December 31:

	2021				
	Beginning Balance	Additions	Deletions	Ending Balance	Current Portion
<i>Other long-term obligations:</i>					
Accrued compensated absences	\$656,065	\$391,815	\$300,000	\$747,880	\$300,000
Net Pension Liability	11,613,720	0	2,975,132	8,638,588	0
Net OPEB Liability	8,565,883	0	8,565,883	0	0
Total other long-term obligations	<u>\$20,835,668</u>	<u>\$391,815</u>	<u>\$11,841,015</u>	<u>\$9,386,468</u>	<u>\$300,000</u>

	2020				
	Beginning Balance	Additions	Deletions	Ending Balance	Current Portion
<i>Other long-term obligations:</i>					
Accrued compensated absences	\$688,238	\$517,090	\$549,263	\$656,065	\$300,000
Net Pension Liability	16,915,634	0	5,301,914	11,613,720	0
Net OPEB Liability	8,534,700	31,183	0	8,565,883	0
Total other long-term obligations	<u>\$26,138,572</u>	<u>\$548,273</u>	<u>\$5,851,177</u>	<u>\$20,835,668</u>	<u>\$300,000</u>

Note 7: Medical Malpractice Claims

Based on the nature of its operations, the Hospital is at times subject to pending or threatened legal actions, which arise in the normal course of its activities.

The Hospital is insured against medical malpractice claims under a claims-made policy, whereby only the claims reported to the insurance carrier during the policy period are covered, regardless of when the incident giving rise to the claim occurred. Under the terms of the policy, the Hospital bears the risk of the ultimate costs of any individual claims exceeding \$1,000,000 or aggregate claims exceeding \$3,000,000 for claims asserted in the policy year. In addition, the Hospital has an umbrella policy with an additional \$5,000,000 of coverage.

Should the claims-made policy not be renewed or replaced with equivalent insurance, claims based on the occurrences during the policy term, but reported subsequent to the policy term, will be uninsured.

While there is pending litigation against the Hospital, management is not aware of any such medical malpractice claims, either asserted or unasserted, that would exceed the policy limits. The cost of the insurance policy represents the Hospital's cost for such claims for the year and it has been charged to operations as a current expense.

The Hospital is exposed to various risks of loss related to property and general losses and employee injuries (workers' compensation). The Hospital has purchased commercial insurance for claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three years. See Note 9 for discussion of self-insured health programs.

Note 8: Accrued Liabilities and Other

Accrued expenses included in current liabilities at December 31 consisted of:

	<u>2021</u>	<u>2020</u>
Payroll and related items	\$639,533	\$530,137
Compensated absences	300,000	300,000
Deferred government grants	14,120	973,241
Health insurance claims	88,110	214,198
	<u>\$1,041,763</u>	<u>\$2,017,576</u>

Note 9: Self-insurance

The Hospital is partially self-insured under a plan covering all employees for employee health insurance. The plan is covered by a stop-loss policy that covers claims over \$100,000 per employee or total claims in excess of \$2,107,019. The plan policy year ends on December 31. Claims, charged to operations when incurred, were approximately \$1,347,000 and \$1,257,000 for the years ended December 31, 2021 and 2020, respectively.

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

A reconciliation of accrued health insurance at December 31, 2021, consists of the following:

Balance at January 1, 2020	\$170,223
Health insurance expense	1,257,324
Payments made	(1,213,349)
Balance at December 31, 2020	<u>214,198</u>
Health insurance expense	1,346,811
Payments made	(1,472,899)
Balance at December 31, 2021	<u><u>\$88,110</u></u>

Note 10: Contingencies

Litigation

In the normal course of business, the Hospital is, from time to time, subject to allegations that may or do result in litigation. Some of these allegations are in areas not covered by the Hospital's self insurance program (discussed elsewhere in these notes) or by commercial insurance; for example, allegations regarding employment practices or performance of contracts. The Hospital evaluates such allegations by conducting investigations to determine the validity of each potential claim. Based upon the advice of legal counsel, management records an estimate of the amount of ultimate expected loss, if any, for each. Events could occur that would cause the estimate of ultimate loss to differ materially in the near term.

Note 11: Defined Benefit Pension Plans

The Statewide retirement systems provide both pension and other postemployment benefits (OPEB).

Net Pension Liability/Net OPEB Liability (Asset)

Pensions and OPEB are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period.

The net pension liability and the net OPEB liability represent the Hospital's proportionate share of each pension/OPEB plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension/OPEB plan's fiduciary net position. The net pension/OPEB liability calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting this estimate annually.

Ohio Revised Code limits the Hospital's obligation for this liability to annually required payments. The Hospital cannot control benefit terms or the manner in which pensions/OPEB are financed; however, the

Hospital does receive the benefit of employees' services in exchange for compensation including pension and OPEB.

GASB 68/75 assumes the liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires funding to come from these employers. All pension contributions to date have come solely from these employers (which also includes pension costs paid in the form of withholdings from employees). The retirement systems may allocate a portion of the employer contributions to provide for these OPEB benefits. In addition, health care plan enrollees may pay a portion of the health care costs in the form of a monthly premium. State statute requires the retirement systems to amortize unfunded pension liabilities within 30 years. If the pension amortization period exceeds 30 years, each retirement system's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension/OPEB liability. Resulting adjustments to the net pension/OPEB liability would be effective when the changes are legally enforceable. The Ohio Revised Code permits, but does not require the retirement systems to provide healthcare to eligible benefit recipients.

The proportionate share of each plan's unfunded benefits is presented as a long-term net pension/OPEB liability (asset) on the accrual basis of accounting. Any liability for the contractually-required pension/OPEB contribution outstanding at the end of the year is included in accrued wages and benefits on both the accrual and modified accrual bases of accounting.

The remainder of this note includes the required pension disclosures. See Note 12 for the required OPEB disclosures.

Plan Description – Ohio Public Employees Retirement System (OPERS)

Plan Description

The Hospital employees, participate in the Ohio Public Employees Retirement System (OPERS). OPERS administers three separate pension plans. The traditional pension plan is a cost-sharing, multiple-employer defined benefit pension plan. The member-directed plan is a defined contribution plan and the combined plan is a combination cost-sharing, multiple-employer defined benefit/defined contribution pension plan. Participating employers are divided into state, local, law enforcement and public safety divisions. Members in the state and local divisions may participate in all three plans. While employees may elect the member-directed plan or the combined plan, substantially all employees are in the traditional plan; therefore, the following disclosure focuses on the traditional plan.

OPERS provides retirement, disability, survivor and death benefits, and annual cost of living adjustments to members of the traditional and combined plans. Authority to establish and amend benefits is provided by Chapter 145 of the Ohio Revised Code. OPERS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about OPERS' fiduciary net position that may be obtained by visiting www.opers.org/financial/reports.shtml, by writing to the Ohio Public Employees Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling 800-222-7377.

Senate Bill (SB) 343 was enacted into law with an effective date of January 7, 2013. In the legislation, members in the traditional and combined plans were categorized into three groups with varying

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

provisions of the law applicable to each group. The following table provides age and service requirements for retirement and the retirement formula applied to final average salary (FAS) for the three member groups under the traditional and combined plans as per the reduced benefits adopted by SB 343 (see OPERS Annual Comprehensive Financial Report referenced above for additional information, including requirements for reduced and unreduced benefits):

<u>Group A</u>	<u>Group B</u>	<u>Group C</u>
Eligible to retire prior to January 7, 2013 or five years after January 7, 2013	20 years of service credit prior to January 7, 2013 or eligible to retire ten years after January 7, 2013	Members not in other Groups and members hired on or after January 7, 2013
<u>State and Local</u>	<u>State and Local</u>	<u>State and Local</u>
Age and Service Requirements: Age 60 with 60 months of service credit or Age 55 with 25 years of service credit	Age and Service Requirements: Age 60 with 60 months of service credit or Age 55 with 25 years of service credit	Age and Service Requirements: Age 57 with 25 years of service credit or Age 62 with 5 years of service credit
Traditional Plan Formula: 2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30	Traditional Plan Formula: 2.2% of FAS multiplied by years of service for the first 30 years and 2.5% for service years in excess of 30	Traditional Plan Formula: 2.2% of FAS multiplied by years of service for the first 35 years and 2.5% for service years in excess of 35
<u>Public Safety</u>	<u>Public Safety</u>	<u>Public Safety</u>
Age and Service Requirements: Age 48 with 25 years of service credit or Age 52 with 15 years of service credit	Age and Service Requirements: Age 48 with 25 years of service credit or Age 52 with 15 years of service credit	Age and Service Requirements: Age 52 with 25 years of service credit or Age 56 with 15 years of service credit
<u>Law Enforcement</u>	<u>Law Enforcement</u>	<u>Law Enforcement</u>
Age and Service Requirements: Age 52 with 15 years of service credit	Age and Service Requirements: Age 48 with 25 years of service credit or Age 52 with 15 years of service credit	Age and Service Requirements: Age 48 with 25 years of service credit or Age 56 with 15 years of service credit
<u>Public Safety and Law Enforcement</u>	<u>Public Safety and Law Enforcement</u>	<u>Public Safety and Law Enforcement</u>
Traditional Plan Formula: 2.5% of FAS multiplied by years of service for the first 25 years and 2.1% for service years in excess of 25	Traditional Plan Formula: 2.5% of FAS multiplied by years of service for the first 25 years and 2.1% for service years in excess of 25	Traditional Plan Formula: 2.5% of FAS multiplied by years of service for the first 25 years and 2.1% for service years in excess of 25

Final average Salary (FAS) represents the average of the three highest years of earnings over a member’s career for Groups A and B. Group C is based on the average of the five highest years of earnings over a member’s career.

Members who retire before meeting the age and years of service credit requirement for unreduced benefits receive a percentage reduction in the benefit amount. The initial amount of a member’s pension benefit is vested upon receipt of the initial benefit payment for calculation of an annual cost-of-living adjustment.

When a traditional plan benefit recipient has received benefits for 12 months, current law provides for an annual cost of living adjustment (COLA). This COLA is calculated on the base retirement benefit at the date of retirement and is not compounded. Members retiring under the combined plan receive a cost-of-living adjustment on the defined benefit portion of their pension benefit. For those who retired prior to January

7, 2013, the cost of living adjustment is 3 percent. For those retiring on or after January 7, 2013, beginning in calendar year 2019, the adjustment is based on the average percentage increase in the Consumer Price Index, capped at 3 percent.

Defined contribution plan benefits are established in the plan documents, which may be amended by the Board. Member-directed plan and combined plan members who have met the retirement eligibility requirements may apply for retirement benefits. The amount available for defined contribution benefits in the combined plan consists of the member's contributions plus or minus the investment gains or losses resulting from the member's investment selections. Combined plan members wishing to receive benefits must meet the requirements for both the defined benefit and defined contribution plans. Member-directed participants must have attained the age of 55, have money on deposit in the defined contribution plan and have terminated public service to apply for retirement benefits. The amount available for defined contribution benefits in the member-directed plan consists of the members' contributions, vested employer contributions and investment gains or losses resulting from the members' investment selections. Employer contributions and associated investment earnings vest over a five-year period, at a rate of 20 percent each year. At retirement, members may select one of several distribution options for payment of the vested balance in their individual OPERS accounts. Options include the annuitization of the benefit (which includes joint and survivor options), partial lump-sum payments (subject to limitations), a rollover of the vested account balance to another financial institution, receipt of entire account balance, net of taxes withheld, or a combination of these options. When members choose to annuitize their defined contribution benefit, the annuitized portion of the benefit is reclassified to a defined benefit.

Beginning in 2022, the Combined Plan will be consolidated under the Traditional Pension Plan (defined benefit plan) and the Combined Plan option will no longer be available for new hires beginning in 2022.

This Space Intentionally Left Blank

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

Funding Policy

The Ohio Revised Code (ORC) provides statutory authority for member and employer contributions as follows:

	<u>State and Local</u>
2021 Statutory Maximum Contribution Rates	
Employer	14.0 %
Employee *	10.0 %
2021 Actual Contribution Rates	
Employer:	
Pension ****	14.0 %
Post-employment Health Care Benefits ****	<u>0.0</u>
Total Employer	<u>14.0 %</u>
Employee	<u>10.0 %</u>

* Member contributions within the combined plan are not used to fund the defined benefit retirement allowance.

** This rate is determined by OPERS' Board and has no maximum rate established by ORC.

*** This rate is also determined by OPERS' Board, but is limited by ORC to not more than 2 percent greater than the Public Safety rate.

**** These pension and employer health care rates are for the traditional and combined plans. The employer contributions rate for the member-directed plan is allocated 4 percent for health care with the remainder going to pension.

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll.

For 2021, the Hospital's contractually required contribution was \$1,223,624.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The net pension liability for OPERS was measured as of December 31, 2020, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Hospital's proportion of the net pension liability was based on the Hospital's share of contributions to the pension plan relative to the contributions of all participating entities. Following is information related to the proportionate share of the Hospital's defined benefit pension plans:

Paulding County Hospital
A Component Unit of Paulding County, Ohio

Notes to Financial Statements
December 31, 2021 and 2020

	OPERS	
	2021	2020
Proportionate Share of the:		
Net Pension Liability	\$8,638,588	\$11,613,720
Proportion of the Net Pension Liability:		
Current Measurement Date	0.05833800%	0.05875700%
Prior Measurement Date	0.05875700%	0.06176300%
Change in Proportionate Share	<u>-0.00041900%</u>	<u>-0.00300600%</u>
Pension Expense	(\$28,454)	\$1,685,055

At December 31 2021 and December 31 2020, the Hospital's reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	2021
<u>Deferred Outflows of Resources</u>	
Contributions subsequent to the measurement date	\$1,223,624
Total Deferred Outflows of Resources	<u>\$1,223,624</u>

<u>Deferred Inflows of Resources</u>	
Differences between expected and actual experience	\$361,359
Net difference between projected and actual earnings on pension plan investments	3,367,068
Changes in employer proportionate share of net pension liability	199,128
Total Deferred Inflows of Resources	<u>\$3,927,555</u>

	2020
<u>Deferred Outflows of Resources</u>	
Changes of assumptions	\$620,309
Contributions subsequent to the measurement date	1,150,249
Total Deferred Outflows of Resources	<u>\$1,770,558</u>

<u>Deferred Inflows of Resources</u>	
Differences between expected and actual experience	\$146,839
Net difference between projected and actual earnings on pension plan investments	2,316,676
Changes in employer proportionate share of net pension liability	287,921
Total Deferred Inflows of Resources	<u>\$2,751,436</u>

At December 31, 2021, \$1,223,624 reported as deferred outflows of resources related to pension resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending December 31, 2022.

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

At December 31, 2020, \$1,150,249 reported as deferred outflows of resources related to pension resulting from contributions subsequent to the measurement date was recognized as a reduction of the net pension liability in the year ending December 31, 2021.

Other amounts reported as deferred outflows of resources and deferred inflows of resources at December 31, 2021, related to pension will be recognized in pension expense as follows:

Year Ending December 31:	OPERS
2022	(\$1,601,089)
2023	(494,717)
2024	(1,372,532)
2025	(459,217)
Total	<u><u>(\$3,927,555)</u></u>

Actuarial Assumptions - OPERS

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial-reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation. The total pension liability was determined by an actuarial valuation as of December 31, 2020, using the following actuarial assumptions applied to all periods included in the measurement in accordance with the requirements of GASB 67. Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results, prepared as of December 31, 2020, are presented below.

	OPERS Traditional Plan
Wage Inflation	3.25%
Future Salary Increases, including inflation	3.25% to 10.75% including wage inflation
COLA or Ad Hoc COLA:	
Pre-January 7, 2013 Retirees	3.00%, simple
Post-January 7, 2013 Retirees	0.50%, simple through 2021, then 2.15%, simple
Investment Rate of Return	7.20%
Actuarial Cost Method	Individual Entry Age

Paulding County Hospital
A Component Unit of Paulding County, Ohio

Notes to Financial Statements

December 31, 2021 and 2020

In October 2020, the OPERS Board adopted a change in COLA for Post-January 7, 2013 retirees, changing it from 1.4 percent simple through 2020 then 2.15 simple to .5 percent simple through 2021 then 2.15 percent simple.

Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

The most recent experience study was completed for the five year period ended December 31, 2015.

The allocation of investment assets with the Defined Benefit portfolio is approved by the Board of Trustees as outlined in the annual investment plan. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the defined benefit pension plans. The long-term expected rate of return on defined benefit investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation. Best estimates of arithmetic real rates of return were provided by the Board's investment consultant. For each major asset class that is included in the Defined Benefit portfolio's target asset allocation as of December 31, 2020, these best estimates are summarized in the following table:

Asset Class	Target Allocation	Weighted Average Long-Term Expected Real Rate of Return (Arithmetic)
Fixed Income	25.00 %	1.32 %
Domestic Equities	21.00	5.64
Real Estate	10.00	5.39
Private Equity	12.00	10.42
International Equities	23.00	7.36
Other investments	9.00	4.75
Total	100.00 %	5.43 %

Discount Rate

The discount rate used to measure the total pension liability was 7.2 percent for the traditional plan and the combined plan. The projection of cash flows used to determine the discount rate assumed that

Paulding County Hospital
A Component Unit of Paulding County, Ohio

Notes to Financial Statements
December 31, 2021 and 2020

contributions from plan members and those of the contributing employers are made at the contractually required rates, as actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefits payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments for the traditional pension plan, combined plan and member-directed plan was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following table presents the Hospital's proportionate share of the net pension liability (asset) calculated using the current period discount rate assumption of 7.2 percent, as well as what the Hospital's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one-percentage-point lower (6.2 percent) or one-percentage-point higher (8.2 percent) than the current rate:

	1% Decrease (6.20%)	Current Discount Rate (7.20%)	1% Increase (8.20%)
Proportionate share of the net pension liability	\$16,478,151	\$8,638,588	\$2,120,003

Changes from the Measurement Date to the Report Date

During 2021, the OPERS Board lowered the investment rate of return from 7.2 percent to 6.9 percent along with certain other changes to assumptions for the actuarial valuation as of December 31, 2021. The effects of these changes are unknown.

Note 12: Postemployment Benefits

See Note 11 for a description of the net OPEB liability (asset).

Plan Description – Ohio Public Employees Retirement System (OPERS)

Plan Description

The Ohio Public Employees Retirement System (OPERS) administers three separate pension plans: the traditional pension plan, a cost-sharing, multiple-employer defined benefit pension plan; the member-directed plan, a defined contribution plan; and the combined plan, a cost-sharing, multiple-employer defined benefit pension plan that has elements of both a defined benefit and defined contribution plan.

OPERS maintains a cost-sharing, multiple-employer defined benefit post-employment health care trust, which funds multiple health care plans including medical coverage, prescription drug coverage and deposits to a Health Reimbursement Arrangement (HRA) to qualifying benefit recipients of both the traditional pension and the combined plans. Currently, Medicare-eligible retirees are able to select medical and prescription drug plans from a range of options and may elect optional vision and dental plans. Retirees and eligible dependents enrolled in Medicare Parts A and B have the option to enroll in a Medicare supplemental plan with the assistance of the OPERS Medicare Connector. The OPERS Medicare Connector is a relationship with a vendor selected by OPERS to assist retirees, spouses and dependents with selecting a medical and pharmacy plan. Monthly allowances, based on years of service and the age

at which the retiree first enrolled in OPERS coverage, are deposited into an HRA. For non-Medicare retirees and eligible dependents, OPERS sponsors medical and prescription coverage through a professionally managed self-insured plan. An allowance to offset a portion of the monthly premium is offered to retirees and eligible dependents. The allowance is based on the retiree's years of service and age when they first enrolled in OPERS coverage.

Medicare-eligible retirees who choose to become re-employed or survivors who become employed in an OPERS-covered position are prohibited from participating in an HRA. For this group of retirees, OPERS sponsors secondary coverage through a professionally managed self-insured program. Retirees who enroll in this plan are provided with a monthly allowance to offset a portion of the monthly premium. Medicare-eligible spouses and dependents can also enroll in this plan as long as the retiree is enrolled.

OPERS provides a monthly allowance for health care coverage for eligible retirees and their eligible dependents. The base allowance is determined by OPERS.

The health care trust is also used to fund health care for member-directed plan participants, in the form of a Retiree Medical Account (RMA). At retirement or separation, member directed plan participants may be eligible for reimbursement of qualified medical expenses from their vested RMA balance.

Effective January 1, 2022, OPERS will discontinue the group plans currently offered to non-Medicare retirees and re-employed retirees. Instead, eligible non-Medicare retirees will select an individual medical plan. OPERS will provide a subsidy or allowance via an HRA allowance to those retirees who meet health care eligibility requirements. Retirees will be able to seek reimbursement for plan premiums and other qualified medical expenses. These changes are reflected in the December 31, 2020, measurement date health care valuation.

In order to qualify for postemployment health care coverage, age and service retirees under the traditional pension and combined plans must have twenty or more years of qualifying Ohio service credit with a minimum age of 60, or generally 30 years of qualifying service at any age. Health care coverage for disability benefit recipients and qualified survivor benefit recipients is available. Current retirees eligible (or who become eligible prior to January 1, 2022) to participate in the OPERS health care program will continue to be eligible after January 1, 2022. Eligibility requirements will change for those retiring after January 1, 2022, with differing eligibility requirements for Medicare retirees and non-Medicare retirees. The health care coverage provided by OPERS meets the definition of an Other Post Employment Benefit (OPEB) as described in GASB Statement 75. See OPERS' Annual Comprehensive Financial Report referenced below for additional information.

The Ohio Revised Code permits, but does not require OPERS to provide health care to its eligible benefit recipients. Authority to establish and amend health care coverage is provided to the Board in Chapter 145 of the Ohio Revised Code.

Disclosures for the health care plan are presented separately in the OPERS financial report. Interested parties may obtain a copy by visiting www.opers.org/financial/reports.shtml, by writing to OPERS, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling (614) 222-5601 or 800-222-7377.

Paulding County Hospital

December 31, 2021 and 2020

Funding Policy

The Ohio Revised Code provides the statutory authority allowing public employers to fund postemployment health care through their contributions to OPERS. When funding is approved by OPERS' Board of Trustees, a portion of each employer's contribution to OPERS is set aside to fund OPERS health care plans. Beginning in 2018, OPERS no longer allocated a portion of its employer contributions to health care for the traditional plan and the combined plan

Employer contribution rates are expressed as a percentage of the earnable salary of active members. In 2021, state and local employers contributed at a rate of 14.0 percent of earnable salary and public safety and law enforcement employers contributed at 18.1 percent. These are the maximum employer contribution rates permitted by the Ohio Revised Code. Active member contributions do not fund health care.

Each year, the OPERS Board determines the portion of the employer contribution rate that will be set aside to fund health care plans. For 2021, OPERS did not allocate any employer contribution to health care for members in the Traditional Pension Plan and Combined Plan. The OPERS Board is also authorized to establish rules for the retiree or their surviving beneficiaries to pay a portion of the health care provided. Payment amounts vary depending on the number of covered dependents and the coverage selected. The employer contribution as a percentage of covered payroll deposited into the RMA for participants in the member-directed plan for 2021 was 4.0 percent.

Employer contribution rates are actuarially determined and are expressed as a percentage of covered payroll. The Hospital's contractually required contribution was \$0 for 2021.

Net OPEB Liability (Asset)

The net OPEB liability (asset) and total OPEB liability (asset) for OPERS were determined by an actuarial valuation as of December 31, 2019, rolled forward to the measurement date of December 31, 2020, by incorporating the expected value of health care cost accruals, the actual health care payment, and interest accruals during the year. The Hospital's proportion of the net OPEB liability (asset) was based on the Hospital's share of contributions to the retirement plan relative to the contributions of all participating entities. Following is information related to the proportionate share:

	OPERS	
	2021	2020
Proportionate Share of the:		
Net OPEB (Asset)	(\$1,113,078)	
Net OPEB Liability		\$8,565,883
Proportion of the Net OPEB Liability (Asset):		
Current Measurement Date	0.06247700%	0.06201500%
Prior Measurement Date	0.06201500%	0.06546200%
Change in Proportionate Share	<u>0.00046200%</u>	<u>-0.00344700%</u>
OPEB Expense	(\$6,796,923)	\$849,890

Paulding County Hospital

Notes to Financial Statements
December 31, 2021 and 2020

At December 31 2021 and December 31 2020, reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	<u>2021</u>
<u>Deferred Outflows of Resources</u>	
Changes in assumptions	\$547,202
Changes in employer proportionate share of net OPEB liability (asset)	<u>40,625</u>
Total Deferred Outflows of Resources	<u><u>\$587,827</u></u>
 <u>Deferred Inflows of Resources</u>	
Differences between expected and actual experience	\$1,004,546
Changes in assumptions	1,803,519
Net difference between projected and actual earnings on OPEB plan investments	592,841
Changes in employer proportionate share of net OPEB liability (asset)	<u>106,364</u>
Total Deferred Inflows of Resources	<u><u>\$3,507,270</u></u>
	<u>2020</u>
<u>Deferred Outflows of Resources</u>	
Differences between expected and actual experience	\$230
Changes in assumptions	1,355,888
Changes in employer proportionate share of net OPEB liability (asset)	<u>30,658</u>
Total Deferred Outflows of Resources	<u><u>\$1,386,776</u></u>
 <u>Deferred Inflows of Resources</u>	
Differences between expected and actual experience	\$783,389
Net difference between projected and actual earnings on OPEB plan investments	436,172
Changes in employer proportionate share of net OPEB liability (asset)	<u>204,620</u>
Total Deferred Inflows of Resources	<u><u>\$1,424,181</u></u>

At December 31, 2021 \$0 reported as deferred outflows of resources related to OPEB resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net OPEB liability (asset) in the year ending December 31, 2022.

At December 31, 2020 \$30,658 reported as deferred outflows of resources related to OPEB resulting from contributions subsequent to the measurement date was recognized as a reduction of the net OPEB liability (asset) in the year ending December 31, 2021.

Notes to Financial Statements
December 31, 2021 and 2020

Other amounts reported as deferred outflows of resources and deferred inflows of resources at December 31, 2021, related to OPEB will be recognized in OPEB expense as follows:

Year Ending December 31:	OPERS
2022	(\$1,570,782)
2023	(1,021,182)
2024	(257,624)
2025	(69,855)
Total	<u><u>(\$2,919,443)</u></u>

Actuarial Assumptions - OPERS

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of health care costs for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of coverage provided at the time of each valuation and the historical pattern of sharing of costs between OPERS and plan members. The total OPEB asset was determined by an actuarial valuation as of December 31, 2019, rolled forward to the measurement date of December 31, 2020. The actuarial valuation used the following actuarial assumptions applied to all prior periods included in the measurement in accordance with the requirements of GASB 74:

Wage Inflation	3.25%
Projected Salary Increases, including inflation	3.25% to 10.75% including wage inflation
Single Discount Rate:	
Current measurement date	6.00%
Prior Measurement date	3.16%
Investment Rate of Return	6.00%
Municipal Bond Rate:	
Current measurement date	2.00%
Prior Measurement date	2.75%
Health Care Cost Trend Rate:	
Current measurement date	8.50%, initial 3.50%, ultimate in 2035
Prior Measurement date	10.50%, initial 3.50%, ultimate in 2030
Actuarial Cost Method	Individual Entry Age

Paulding County Hospital
A Component Unit of Paulding County, Ohio

Notes to Financial Statements
December 31, 2021 and 2020

Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Postretirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Postretirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

The most recent experience study was completed for the five year period ended December 31, 2015.

The allocation of investment assets within the Health Care portfolio is approved by the Board of Trustees as outlined in the annual investment plan. Assets are managed on a total return basis with a long-term objective of continuing to offer a sustainable health care program for current and future retirees. OPERS' primary goal is to achieve and maintain a fully funded status for the benefits provided through the defined pension plans. Health care is a discretionary benefit. The long-term expected rate of return on health care investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected real rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation. Best estimates of arithmetic rates of return were provided by OPERS investment consultant. For each major asset class that is included in the Health Care's portfolio's target asset allocation as of December 31, 2020, these best estimates are summarized in the following table:

Asset Class	Target Allocation	Weighted Average Long-Term Expected Real Rate of Return (Arithmetic)
Fixed Income	34.00 %	1.07 %
Domestic Equities	25.00	5.64
Real Estate Investment Trust	7.00	6.48
International Equities	25.00	7.36
Other investments	9.00	4.02
Total	100.00 %	4.43 %

Discount Rate

A single discount rate of 6.0 percent was used to measure the OPEB liability on the measurement date of December 31, 2020. A single discount rate of 3.16 percent was used to measure the OPEB liability on the measurement date of December 31, 2019. Projected benefit payments are required to be discounted to their actuarial present value using a single discount rate that reflects (1) a long-term expected rate of return on OPEB plan investments (to the extent that the health care fiduciary net position is projected to be sufficient to pay benefits), and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

the contributions for use with the long-term expected rate are not met). This single discount rate was based on an expected rate of return on the health care investment portfolio of 6.00 percent and a municipal bond rate of 2.00 percent (Fidelity Index’s “20-Year Municipal GO AA Index”). The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made at rates equal to the actuarially determined contribution rate. Based on these assumptions, the health care fiduciary net position and future contributions were sufficient to finance health care costs through 2120. As a result, the actuarial assumed long-term expected rate of return on health care investments was applied to projected costs through the year 2120, the duration of the projection period through which projected health care payments are fully funded.

Sensitivity of the Hospital’s Proportionate Share of the Net OPEB Asset to Changes in the Discount Rate

The following table presents the Hospital’s proportionate share of the net OPEB asset calculated using the single discount rate of 6.00 percent, as well as what the Hospital’s proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is one-percentage-point lower (5.00 percent) or one-percentage-point higher (7.00 percent) than the current rate:

	1% Decrease <u>(5.00%)</u>	Current Discount Rate <u>(6.00%)</u>	1% Increase <u>(7.00%)</u>
Proportionate share of the net OPEB liability (asset)	(\$276,773)	(\$1,113,078)	(\$1,800,587)

Sensitivity of the Proportionate Share of the Net OPEB Asset to Changes in the Health Care Cost Trend Rate

Changes in the health care cost trend rate may also have a significant impact on the net OPEB asset. The following table presents the net OPEB asset calculated using the assumed trend rates, and the expected net OPEB liability if it were calculated using a health care cost trend rate that is 1.0 percent lower or 1.0 percent higher than the current rate.

Retiree health care valuations use a health care cost-trend assumption that changes over several years built into the assumption. The near-term rates reflect increases in the current cost of health care; the trend starting in 2021 is 8.50 percent. If this trend continues for future years, the projection indicates that years from now virtually all expenditures will be for health care. A more reasonable alternative is the health plan cost trend will decrease to a level at, or near, wage inflation. On this basis, the actuaries project premium rate increases will continue to exceed wage inflation for approximately the next decade, but by less each year, until leveling off at an ultimate rate, assumed to be 3.50 percent in the most recent valuation.

	1% Decrease	Current Health Care Cost Trend Rate Assumption	1% Increase
Proportionate share of the net OPEB liability (asset)	(\$1,140,205)	(\$1,113,078)	(\$1,082,726)

Changes between Measurement Date and Reporting Date

During 2021, the OPERS Board made various changes to assumptions for the actuarial valuation as of December 31, 2021. The effects of these changes are unknown.

Note 13: COVID-19 Pandemic & CARES Act Funding

On March 11, 2020, the World Health Organization designated the SARS-CoV-2 virus and the incidence of COVID-19 (COVID-19) as a global pandemic. Patient volumes and the related revenues were significantly affected by COVID-19 as various policies were implemented by federal, state, and local governments in response to the pandemic that led many people to remain at home and forced the closure of or limitations on certain businesses, as well as suspended elective procedures by health care facilities.

While some of these policies have been eased and states have lifted moratoriums on nonemergent procedures, some restrictions remain in place, and some state and local governments reimposed certain restrictions due to increasing rates of COVID-19 cases. The Hospital will continue to monitor the direct and indirect impacts of the pandemic and develop responses accordingly to maintain its operational and financial flexibility.

The Hospital experienced temporary negative impacts to its operational results during 2020. There is considerable uncertainty around the duration and financial impact of the market disruption by the COVID-19 pandemic in future periods and cannot be reasonably estimated at this time due to many factors, most of which are beyond the Hospital's control and ability to forecast. Such factors include, but are not limited to, the scope and duration of stay-at-home practices and business closures and restrictions, government-imposed or recommended suspensions of elective procedures, increases in the number of uninsured and underinsured patients as a result of higher sustained rates of unemployment, incremental expenses required for supplies and personal protective equipment, and changes in professional and general liability exposure. Because of these and other uncertainties, decreases in cash flows and operations could result, impacting debt covenant compliance and the inputs and assumptions used in significant accounting estimates, including the allowance for uncollectible accounts related to patient accounts receivable, and potential impairments of long-lived and other assets.

Provider Relief Funds

During the year ended December 31, 2020, the Hospital received \$4,048,047 of distributions from the *Coronavirus Aid, Relief, and Economic Security Act* (CARES Act) Provider Relief Fund (Provider Relief Fund). These distributions from the Provider Relief Fund are not subject to repayment, provided the Hospital is able to attest to and comply with the terms and conditions of the funding, including demonstrating that the distributions received have been used for qualifying expenses and lost revenue attributable to COVID-19, as defined by the Department of Health and Human Services (HHS).

The Hospital accounts for such payments as voluntary nonexchange transactions in accordance with GASB Statement No. 33, *Accounting and Financial Reporting for Nonexchange Transactions*. Payments are recognized as grant revenue once the applicable terms and conditions required to retain the funds have been substantially met. Revenue recognized is classified as nonoperating and the associated cash flows are included within noncapital financing activities. Based on an analysis of the compliance and reporting requirements of the Provider Relief Fund and the effect of the pandemic on the Hospital's revenues and expenses through December 31, 2020, the Hospital recognized \$3,074,806 related to the distributions from the Provider Relief Fund as nonoperating COVID-19 grant revenue within the accompanying statements of revenues, expenses and changes in net position. The remaining unrecognized amount of

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to Financial Statements
December 31, 2021 and 2020

distributions from the Provider Relief Fund was deferred and is included within accrued expenses and other on the accompanying 2020 balance sheet.

The Hospital monitored compliance with the terms and conditions of the Provider Relief Fund and the effect of the pandemic on the Hospital's revenues and expenses. The terms and conditions governing the Provider Relief Fund were complex and subject to interpretation and change. The Hospital was aware if then were unable to attest to or comply with current or future terms and conditions, its ability to retain some or all of the distributions received would be affected. Provider Relief Fund payments are subject to government oversight, including potential audits. A final reconciliation of the amounts warmed and to be refunded to the Federal Government was made in early 2022. The liability of \$1,401,318 on the 2021 balance sheet represents the full and final amount refunded to the Federal Government in 2022.

Note 1 - Net Pension Liability

Ohio Public Employees Retirement System Changes in Benefit Terms and Assumptions

Changes in assumptions:

2021-2020: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions for this period.

2019: OPERS Board adopted a change in the investment return assumption, reducing it from 7.50% to 7.20%.

2018: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions.

2017: The following were the most significant changes of assumptions that affected total pension liability since the prior measurement date

- Reduction in actuarial assumed rate of return from 8.00% to 7.50%
- Decrease in wage inflation from 3.75% to 3.25%
- Change in future salary increases from a range of 4.25%-10.02% to 3.25%-10.75%

2016-2014: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions.

Changes in benefit terms:

2021-2014: There were no changes in benefit terms for this period.

Note 2 - Net Benefit Postemployment Benefits other than Pensions (OPEB) Liability (Asset)

Ohio Public Employees Retirement System Changes in Benefit Terms and Assumptions

Changes in assumptions:

2021: The following were the most significant changes of assumptions that affected the total OPEB liability since the prior measurement date:

- The single discount rate increased from 3.16 percent to 6.00 percent.
- The municipal bond rate decreased from 2.75 percent to 2.00 percent.
- The initial health care cost trend rate decreased from 10.5 percent to 8.5 percent.

2020: The following were the most significant changes of assumptions that affected the total OPEB liability since the prior measurement date:

- The single discount rate decreased from 3.96 percent to 3.16 percent.
- The municipal bond rate decreased from 3.71 percent to 2.75 percent.
- The initial health care cost trend rate increased from 10.0 percent to 10.5 percent.

Paulding County Hospital
A Component Unit of Paulding County, Ohio
Notes to the Required Supplementary Information
For Period Ending December 31, 2021

2019: The following were the most significant changes of assumptions that affected the total OPEB liability since the prior measurement date:

- The single discount rate increased from 3.85 percent to 3.96 percent.
- The investment rate of return decreased from 6.5 percent to 6 percent.
- The municipal bond rate increased from 3.31 percent to 3.71 percent.
- The initial health care cost trend rate increased from 7.5 percent to 10 percent.

2018: The single discount rate changed from 4.23 percent to 3.85 percent.

Changes in Benefit Terms:

2021: There were no changes in benefit terms for the period.

2020: On January 15, 2020, the Board approved several changes to the health care plan offered to Medicare and pre-Medicare retirees in efforts to decrease costs and increase the solvency of the health care plan. These changes are effective January 1, 2022, and include changes to base allowances and eligibility for Medicare retirees, as well as replacing OPERS-sponsored medical plans for pre-Medicare retirees with monthly allowances, similar to the program for Medicare retirees.

2019-2018: There were no changes in benefit terms for the period.

NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

NOTE A -- SIGNIFICANT ACCOUNTING POLICIES

The accompanying schedule of expenditures of federal awards includes the federal grant activity of the Paulding County Hospital and is presented on the cash basis of accounting. The information in this schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). The Hospital did not elect to use the 10-percent de minimis indirect cost rate as allowed under the Uniform Guidance.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS REQUIRED BY *GOVERNMENT AUDITING STANDARDS*

Board of Trustees
Paulding County Hospital
Paulding, Ohio

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Paulding County Hospital (Hospital), a component unit of Paulding County, Ohio, as of and for the year ended December 31, 2021 and the related notes to the financial statements, and have issued our report thereon dated January 31, 2023.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Hospital's internal control over financial reporting (internal control) as a basis for designing the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control. Accordingly, we do not express an opinion on the effectiveness of the Hospital's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. *A material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Hospital's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH REQUIREMENTS
APPLICABLE TO EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL
OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE**

Board of Trustees
Paulding County Hospital
Paulding, Ohio

Report on Compliance for Each Major Federal Program

Opinion on Each Major Federal Program

We have audited the Paulding County Hospital's (the Hospital), a component unit of Paulding County, Ohio, compliance with the types of compliance requirements identified as subject to audit in the *OMB Compliance Supplement* that could have a direct and material effect on each of the Hospital's major federal programs for the year ended December 31, 2021. The Hospital's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, the Hospital, complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended December 31, 2021.

Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the Hospital and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of the Hospital's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules, and provisions of contracts or grant agreements applicable to the Hospital's federal programs.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the Hospital's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the Hospital's compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the Hospital's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of the Hospital's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of the Hospital's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control over Compliance

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.
