To the Board of Directors
Great Oaks Institute of Technology and Career Development

We have reviewed the Independent Auditor's Report of the Great Oaks Institute of Technology and Career Development, Hamilton County, prepared by Clark, Schaefer, Hackett & Co., for the audit period July 1, 2001 through June 30, 2002. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Great Oaks Institute of Technology and Career Development is responsible for compliance with these laws and regulations.

A handwritten signature in black ink, appearing to read "Jim Petro".

Schedule of Prior Audit Findings

Year Ended June 30, 2002

The prior audit disclosed no instances of noncompliance that were required to be reported in accordance with *Government Auditing Standards* or noncompliance with requirements of major federal programs. In addition, no reportable conditions or material weaknesses with respect to internal controls over financial reporting or internal controls over compliance were reported in the prior year.

**REPORT ON COMPLIANCE AND INTERNAL CONTROL OVER FINANCIAL
REPORTING BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

To the Board of Directors
Great Oaks Institute of Technology & Career Development:

We have audited the financial statements of Great Oaks Institute of Technology & Career Development as of and for the year ended June 30, 2002, and have issued our report thereon dated October 4, 2002. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether Great Oaks Institute of Technology & Career Development's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered Great Oaks Institute of Technology & Career Development's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operations that we consider to be material weaknesses.

This report is intended for the information of management, the Board of Directors, and federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than those specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

To the Board of Directors
Great Oaks Institute of Technology & Career Development:

Compliance

We have audited the compliance of Great Oaks Institute of Technology & Career Development with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2002. Great Oaks Institute of Technology & Career Development's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the Institute's management. Our responsibility is to express an opinion on the Institute's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Great Oaks Institute of Technology & Career Development's compliance with those requirements, and performing such other procedures, as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the Institute's compliance with those requirements.

In our opinion, Great Oaks Institute of Technology & Career Development complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2002.

Internal Control Over Compliance

The management of Great Oaks Institute of Technology & Career Development is responsible for establishing and maintaining effective control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered Great Oaks Institute of Technology & Career Development's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts and grants that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over compliance and its operation that we consider to be material weaknesses.

We have audited the basic financial statements of Great Oaks Institute of Technology & Career Development as of and for the year ended June 30, 2002, and have issued our report thereon dated October 4, 2002. Our audit was performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements of Great Oaks Institute of Technology & Career Development. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended for the information of management, the Board of Directors, and federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than those specified parties.

Great Oaks Institute of Technology and Career Development

In the mid-1960's, Ohio established the system of joint vocational school districts to provide all public high school students with access to career-technical education programs that would prepare them for entry level jobs and/or postsecondary education upon high school graduation. While many comprehensive school districts had some career-technical programs in place, the creation of the joint vocational school districts – districts that would serve as the career-technical education department for several affiliated school districts – meant that students would have a wider range of programs available to them, and that this highly specialized education could be provided more efficiently and economically.

In October of 1968, the Hamilton County Joint Vocational School District, which would later become the Great Oaks Institute of Technology and Career Development, held its first meeting. Initially, 21 school districts participated in the jointure: except for Cincinnati Public Schools, Northwest Local School District and Princeton City School District, all districts in Hamilton County were included. In addition, Mason Local School District (Warren County) and Milford Exempted School District (Clermont County) were part of the jointure.

When citizens of the District passed a ten-year 1.85 mil dual-purpose levy in May, 1970, funds became available to build, equip and operate the District. Plans originally called for two career centers, one to be located on the western side of Hamilton County, and the other in central Hamilton County. However, before any facilities could be built, several additional school districts asked to become part of the jointure. By the end of 1971, the District had grown to include 35 affiliated districts. Thus the District became the largest of its type in the nation, covering 2,200 square miles and serving all or parts of twelve counties in southwestern Ohio. The governing body – a 35 member Board of Education – is also the largest school board in the nation. The District became known as the Great Oaks Joint Vocational School District in 1973. On July 1, 1993, the name was changed to the Great Oaks Institute of Technology and Career Development because the name more truly reflects the Great Oaks mission to provide quality programs and services to meet the needs of its customers.

Two of the District's facilities were provided by the U.S. Department of Health, Education and Welfare (H.E.W.). In the fall of 1970, only months after the initial levy was passed, H.E.W. provided 85.8 acres of land in Sharonville, Ohio. Currently located on this site are the Corporate Offices, Scarlet Oaks Career Development Campus, the Center for Employment Resources and the Instructional Resource Center. H.E.W. granted the former Clinton County Air Force Base, in Wilmington, to the District in June 1972. Along with the grant came the request that the facility be ready to open for educational purposes by the end of August. In less than three months, the former military base was converted and Laurel Oaks Career Development Campus was the first Great Oaks facility to become operational. Three more campuses – Diamond Oaks, in western Hamilton County, Scarlet Oaks, in Sharonville and Live Oaks, in Milford – opened a year later.

Providing high school career-technical education is Great Oaks' primary function, but in addition, Great Oaks has established a strong tradition of cooperating with and responding to the needs of area employers, agencies dealing with economic and human resource development and the community. As a result, various programs, services and facilities have evolved to fill those

needs. In addition to offering over 40 career-technical program options for high school students, the District offers a wide range of full- and part-time courses for adults; an adult literacy program that provides services in our own facilities, in community locations and in the workplace; and customized assessment and training services for business and industry. For FY '02, enrollment in Adult Workforce Development programs exceeded 70,000. The District's Public Safety Services Training Program is one of the largest in the nation: 11,423 students were served in FY '02. Area law enforcement personnel are served through the Great Oaks Police Academy, the Tri-State Regional Policing Institute and a state-of-the-art indoor firing range.

Enrollment in high school workforce development programs for 2001-02 was 2,942. Nearly 4,000 additional students were served through technical foundations programs and other services in the affiliated schools. Quality and viability of the programs offered are maintained by continually seeking information and ideas from business and industry through the Great Oaks Council of Technology and Career Development, the Business Partnership Council at each campus, craft advisory councils for each career-technical program, employers and others. This information guides the District as decisions are made regarding program implementation and disinvestment, curriculum development, equipment and material purchases, etc.

Recognized for Excellence

Aggressive pursuit of excellence, flexibility and innovation are some of the characteristics that have earned national and international recognition for Great Oaks as a premier career-technical organization. The District has been featured in newspaper and magazine articles, on national TV, and in an exhibit about America's system of career-technical education that was displayed in U.S. embassies throughout the world. In 1991, the National Center for Research in Vocational Education identified Great Oaks as one of 15 secondary and postsecondary exemplary career-technical education institutions in America.

In 2001, the National Dissemination Center for Career and Technical Education recognized four of the District's programs: the Culinary Arts and Hospitality Services program at Scarlet Oaks received an Exemplary Award, and the Animal Science and Management program at Live Oaks, the Great Oaks School of Practical Nursing and the Computerized Office Skills Training Program all received Promising Awards.

School Governance

Great Oaks is governed by a 35 member Board of Directors representing city, local and exempted village school districts located in suburban and rural areas. Twenty-nine of the affiliated districts have direct representation through board members who are elected to their home board and appointed to serve on the Great Oaks board for a one-year term. Representation of the remaining seven districts is accomplished through members of the county boards of education. One-year terms of office notwithstanding, most members of the Great Oaks Board of Directors serve for several years. Currently, the average length of service is just short of seven years.

The Reporting Entity and Services Provided

The Great Oaks Institute of Technology and Career Development CAFR includes all funds, account groups, agencies, boards, commissions and authorities that are controlled by or are dependent on the executive body, the Board of Directors. City, library and member schools' operations are not part of this report.

The Board of Directors serves as the taxing authority, contracting body and policy maker for the District. The Board adopts the annual operating budget and approves all expenditures of District monies.

The President/CEO is the chief administrative officer of the District, responsible for the total education and support operations. The CFO is the chief financial officer of the District, responsible for maintaining records of all financial matters, issuing warrants in payment of liabilities incurred by the District, acting as custodian of all District funds and investing idle funds as specified by Ohio Law. Other board appointed officials include the Vice President of Performance and Outcomes, the Vice President of Program Design and Development, the Vice President of Property and Assets, Deans and Directors of various educational and support services and career-technical supervisors.

The District provides a wide range of instruction and support services as mandated by state statute or public desires. The instruction provided by the District includes the activities dealing directly with the teaching of pupils and the interaction between teacher and pupils. Support services are essential to complete the education process. These services include administrative, technical (such as guidance and health), and to a lesser degree, community services. Proprietary fund types are limited to the intra-district services fund and an enterprise fund encompassing child care services.

Economic Conditions and Outlook

Great Oaks covers 12 counties and 36 school districts in southwest Ohio and as a result is less vulnerable to sudden shifts in revenue due to economic development moving from the immediate area.

The most comprehensive local economic report available is the Greater Cincinnati Chamber of Commerce's 2003 Economic Outlook "A Forecast for Greater Cincinnati and an Overview of the National Economy". The following paragraphs have been reproduced from this report, which was prepared by the Greater Cincinnati Center for Economic Education. We believe this is the best area economic document because currently we receive the majority of our tax revenue from this area.

Greater Cincinnati Outlook

The 2003 economic outlook for Greater Cincinnati shows that the slowing of the national economy has had a significant impact on the near-term local outlook. Due to the strong historical relationship between the growth of the Cincinnati economy and growth nationally, any turnaround for the local economy is dependent, to a great extent, on an improvement in prospects

nationally. This fundamental linkage between the national and local economies forms the basis for the local economic outlook.

Gross Regional Product

Gross Regional Product (GRP) provides an overall measure of economic activity for the region. The GRP of Greater Cincinnati tracks GDP of the United States well, because major exporting industries are affected by demand outside the region. Real GRP is expected to grow 2.9% in 2002 and 3.4% in 2003 as the national economy recovers.

Cincinnati Employment

Greater Cincinnati's employment growth rate has closely followed employment growth for the national economy. Over the last twenty-five years, employment in Greater Cincinnati has grown an average of 2.0 percent per year. However, slow population growth and a low unemployment rate have caused local employment growth to lag national employment growth.

The unemployment rate in Greater Cincinnati is expected to be 4.8 percent in 2002 and 4.7 percent in 2003. Local employment is projected to decline 0.8 percent in 2002 due to the recession and the aftershocks from September 11th. The rebound should begin towards the end of this year and continue through 2003 when employment is expected to grow 0.9 percent.

Manufacturing Employment

Manufacturing represents a greater proportion of the economy in the Cincinnati region than nationally. Today, manufacturing employment represents 15 percent of total employment in Greater Cincinnati (production in the manufacturing sector accounts for 23% of gross regional product).

Foreign investment in manufacturing facilities continues for many industries, especially those that provide parts for the Toyota facility in Boone County. Local employment in manufacturing is expected to decrease by 2.9 percent in 2002 and decrease by 0.5 percent in 2003 a result of the recession and continuing technological improvements. With the recent resurgence of Canada's economy, local manufacturing activity will begin to see some strength.

Construction

The local non-residential construction activity is low and not likely to accelerate soon. The recession has brought significant job cuts. Office space has a two-year supply due more to a reduction in demand, rather than over-building. Even warehousing has a multi-year supply available except in Northern Kentucky near the airport. Non-residential construction is estimated to be 11 million square feet in both 2002 and 2003.

Residential construction market activity continues at a steady pace. The expected amount of residential construction activity should continue on its steady path of 12,000 units in 2002 and

2003. Low interest rates have supported a consistent level of activity in the new market as well as sales of existing homes.

Cincinnati possesses the right ingredients for fostering growth in the technology sector, especially relatively inexpensive land and access to universities. Cincinnati needs to focus on developing the amenities that act as an attraction for employees of technology business.

Inflation and Interest Rates

Interest rates remain very low as the Federal Reserve continues to use monetary tools to support the economy.

Energy price increases could cause movement on the inflation rate, especially if war breaks out with Iraq or other tensions in the Middle East raise risks to the oil supply. Moreover, further deterioration in the current account deficit also could bring a rise in inflation if the dollar comes under pressure.

Part of the reason for the low interest rate is the lack of inflationary pressure. The inflation rate is expected to remain a moderate 1.60 percent during 2002, with slight increase to 2.00 percent in 2003 as the economy gains momentum. This low inflation should result in stable long-term interest rates, despite Federal Reserve pressures on short-term rates.

2001-2002 Business Retention Survey

The Regional Business Retention Committee of the Partnership of Greater Cincinnati conducts an annual survey to identify business needs. In the 2001-2002 fiscal year, the Committee contacted about 350 firms, mostly in the manufacturing, distribution and service sectors, and successfully interviewed 286 of them. With a response rate of over 80%, the survey findings offer valuable insights that are representative of the overall picture for Cincinnati area businesses.

Employment needs for Cincinnati businesses are projected to either increase or remain the same. Of the responders in the survey, 51% said their needs would remain stable while 44% said needs would increase. Only 5% expected their needs to decrease.

Labor Force Quality

When respondents were asked about the community's strengths and weaknesses as a place to do business, labor force quality (which is tied to training) was often mentioned. Of the 286 respondents, 52 had the opinion that qualified labor is a strength for the community to do business, and 38 of them said that the lack of qualified labor is a weakness. So, skilled or qualified labor is more often seen as a positive factor for the community as a place to do business. However, 22 believe lack of skilled labor to be a barrier to growth in this community. Among those who mentioned the cost of labor, 11 of the surveyed people had the opinion that low cost of labor is a strength, and 8 of them said that unions and cost of labor is a weakness. Cost is clearly less of an issue than quality (or training).

The overwhelming majority of the responders (81%) would consider the Cincinnati area for future expansion. Among the 19% who would not, lack of skilled labor and union/labor costs were each mentioned by 6% of respondents, as reasons for the community not to be considered for future expansion.

For assessing the strength of the workforce, the survey measured workforce availability, quality and stability, and productivity. A substantial majority of the responders rated all four factors from medium to high. Of these, productivity really stands out to be the most highly rated by the respondents. The table below shows the statistics for all four categories.

	(High) 5	4	3	2	1 (Low)
Availability of Workers	10%	34%	30%	20%	6%
Quality of Workforce	9%	38%	34%	16%	3%
Stability of Workforce	14%	40%	31%	12%	3%
Productivity	22%	47%	27%	3%	1%

The responses for the first three measures were similar to one another, with roughly half of the respondents rating them on the high side and one fourth or less rating them on the low side. For Availability of Workers 44% rated this measure in one of the top two boxes, compared with 26% in one of the bottom two boxes. Quality of Workforce received slightly better ratings, a top two score of 47% and a bottom two score of 19%. Stability of Workforce was better still, with 54% in the top two boxes and only 15% in the bottom two. Possibly as a result of the strengths of all of these factors, Productivity received the highest scores. For Productivity, 69% responded in the top two boxes, while only 4% scored it in the bottom two.

Recruiting and Training

Business experience with the number of unfilled position is mixed, with the majority of them (172, or 69%) saying it was stable. The remainder was evenly split, with 15% (38) reporting that unfilled positions are increasing and 16% (39) saying that they are decreasing.

Recruiting problems affect nearly half of all companies (46%), while the other 54% felt there was no problem. Among the 119 companies that reported a problem, the most common problem area, reported by 54 respondents, is with Professional positions. Other recruiting problems occurred with filling Skilled Labor positions (35) and Unskilled Labor positions (38). A Poor Work Ethic was reported as a problem in 13 cases. When asked whether these recruiting problems are related to their particular industry or to the community (i.e., Cincinnati's labor force characteristics), 54% said recruiting problems were related to the industry, 31% said they were due to the community and 15% answered that problems were a result of both the industry and the community.

Company investment in employee training is increasing for 42% of the responding companies and stable for 50%. Only 1% reported a decrease in their investment in training, and the remaining 7% indicated that they have no company training. An average of 67% of companies invest in new job skills training, and an average of 41% are required to invest in remedial skills training.

Major District Initiatives-Current Projects

Programs and Services

Consistent with the District's philosophy and in accordance with the District's mission and goals, Great Oaks provides instructional programs and related services that are necessary to enable high school youth, out-of-school youth and adults to achieve their educational and career goals. Each career-technical development program is driven by the needs of the local labor market and developed with advice from business, industry, labor and other appropriate agencies. Great Oaks has established a tradition of being future-oriented and flexible in meeting the needs of all stakeholders.

District Priorities

At Great Oaks, the focus is on rigor, relevance and results. Rigor - in academic skills and technical skills because students want to be well prepared for success in their future endeavors and because employers tell us that this is what they expect. Relevance - in curriculum so students never have to ask, "Why do I have to learn this?" Results - that continuously improve and permit the district to satisfy the needs of students, parents, employers, partners, the community and the economic system.

The District's initiatives enhance and support rigor, relevance and results. The following is an overview of major district initiatives.

Accreditation

The Great Oaks Institute of Technology and Career Development has been very aggressive in seeking accreditation from a wide variety of organizations with the highest standards. The accreditation process ensures quality programming because it allows the District and the specific division seeking accreditation to benchmark current practices and determine where there is room for improvement. Great Oaks is accredited by:

- Air Conditioning and Refrigeration Institute
- American Culinary Federation
- CARF (The Rehabilitation Accreditation Commission)
- National Board on Fire Service Professional Qualifications (NBFSPQ)
- The National League for Nursing
- North Central Association Commission on Accreditation and School Improvement

Articulation Agreements

As of June 2002, the Great Oaks Institute of Technology and Career Development had 89 articulation agreements in place with postsecondary institutions and apprenticeship organizations. By providing students with credit towards a college degree or apprenticeship for work that was done in high school, the agreements encourage students to pursue higher education and provide them with substantial savings in tuition costs.

Associate Development

The key to providing quality programs and services is a dedicated, well-prepared staff. Great Oaks associates' commitment to the organization and its goals is reflected in the 97% attendance rate and 96% retention rate for FY 2002. The emphasis in Associate Development programs has been on raising student achievement and technology training. Fifteen instructional associates received advanced degrees. Fifty-three earned new industry certifications including A+, CIW (Certified Internet Webmaster), MOUS (Microsoft Office User Specialist), SafeServ (food industry) and ONLA (Ohio Nursery and Landscape Association). Ninety-one classes to support the new technology curriculum were offered to staff. Staff members participated in 21,966 hours of board supported staff development beyond the regular school calendar. In 1999, Great Oaks established the Leadership Academy, which is designed to prepare certificated associates for leadership roles in the District. To date, six leadership academy graduates have assumed administrative or supervisory positions.

Continuous Improvement and School Reform

The concept of Continuous Improvement was formally introduced at Great Oaks in 1991. Since then, Continuous Improvement has become embedded in the District's culture, philosophy and operations. At the heart of the Great Oaks Continuous Improvement Plan are 11 goals that were developed with input from all stakeholders.

The goals address issues in the areas of student success; technology; program offerings; partnerships; meeting the needs of business, industry and labor; providing educational access for all learners; economic development; human resources development; promoting career and technical education; and fostering leadership development opportunities for associates.

The goals are linked to the Great Oaks Mission and Core Values and several initiatives that are tied to school reform. These include:

- High Schools That Work Key Practices, which are designed to improve student achievement by improving curriculum and instruction;
- North Central Association Transitions Endorsement Accreditation, which is designed to ensure that every student can go from high school to postsecondary education and/or the workplace with no remediation;
- Carl T. Perkins Legislation and Funding to Support Career and Technical Education, which provides funds that support programs focused on developing students' academic, vocational and technical skills;

- Ohio Department of Education Performance Measures, which ensure accountability in career and technical education; and
- Malcolm Baldrige Education Criteria, which provide the foundation for integrating key requirements within a results oriented framework.

The development of all of these initiatives is tied back to the Continuous Improvement Plan, which is carefully monitored and reviewed regularly.

Industry-Standard Certifications and Licenses

Curriculum in many programs is designed to prepare students to take industry-standard certification or licensing exams. Not only does this practice raise the bar for students, it ensures that graduates meet employers' needs and expectations for qualified employees. Following is a partial list of certifications or licenses that students (adult and/or high school) may prepare for:

- A+
- Access ACF (American Culinary Federation)
- APICS (American Production and Inventory Control Society)
- ASE (Automotive Service Excellence)
- BLS Health Care Provider
- CIW (Certified Internet Webmaster) Foundations/iNet+
- CIW Site Designer
- CNA (Certified Nurse Aide)
- Cosmetology (Ohio Board of Cosmetology Exam)
- CPR
- Dental Assisting
- Emergency Service Telecommunications Operators
- EMT Basic
- FAA Airframe
- FAA Powerplant
- FAA Professional Pilot
- Fire Safety Inspector
- Fire Service Instructor
- Fire Officer
- Firefighter
- MCSA (Microsoft Certified Systems Administrator)
- MCSE (Microsoft Certified Systems Engineer)
- MOUS (Microsoft Office User Specialist)
- NCLEX Exam (Practical Nursing)
- Network+
- Ohio Peace Officer
- ONLA (Ohio Nursery and Landscape Association) Certified Nursery Technician
- Sanitation and Safety
- Structured Query Language

Partnerships

Career and technical education programs and economic development programs cannot be effective if they are developed in isolation. Partnerships allow the parties involved to capitalize on each other's strengths and they provide for maximum creativity and flexibility in addressing stakeholders' needs. Throughout its 32-year history, Great Oaks has entered into partnerships that strengthen the district's programs and the communities we serve. Partners include business, industry and labor; postsecondary institutions and other educational organizations; agencies; and governmental entities. Listed below are a few of these successful partnerships:

- *Associate Degree Program with Hocking College*
The program provides individuals who have a journeyperson certificate in construction trades with the opportunity to earn up to 36 hours of advanced standing toward an associate's degree in construction management. A similar program allows individuals in the automotive field to earn advanced standing toward an associate's degree in automotive merchandising management for ASE (Automotive Service Excellence) certifications. The courses are available at Scarlet Oaks Career Development Campus.
- *AYES (Automotive Youth Educational Systems) with GM, Chrysler, Snap-On Tools and others*
Major automobile companies have partnered with schools to encourage students to pursue careers in the automotive industry. Currently, the Live Oaks automotive technology program is an AYES partner.
- *The Chamber Training Alliance with The Greater Cincinnati Chamber of Commerce and Cincinnati State Technical and Community College*
The Chamber's Workforce Solutions Group was created to address workforce development on a regional basis. Great Oaks and Cincinnati State are the key providers of training for this Chamber enterprise.
- *Carpentry: Qualified Framers Program with Greater Cincinnati Home Builders Association*
The members of the Greater Cincinnati Home Builders Association work closely with the instructor of this full-time adult program to provide hands-on learning opportunities for students. The Association also provides a stipend for students.
- *Oracle Internet Academy, Oracle Workforce Development Program with Oracle Corporation*
The Oracle Corporation has partnered with Great Oaks to provide the Oracle Internet Academy for high school students and the Oracle Workforce Development Program for adults.

- *Project SEARCH with Children's Hospital Medical Center, Clinton Memorial Hospital*
 Project SEARCH is a program that provides students with disabilities with the opportunity to explore and prepare for careers in healthcare. The program, which originated with a partnership between Great Oaks and Children's Hospital, has been replicated in other places and is the model used for the development of a similar program for the banking industry.
- *Tri-State Regional Community Policing Institute with the National Conference for Community and Justice (NCCJ), Cincinnati Police Division and the Ohio Crime Prevention Association*
 The Tri-State RCPI has had many successes and is considered by the U.S. Department of Justice, which provides funding, to be one of the top COPS (Community Oriented Policing Services) programs in the nation. Since the program was implemented in 1997, technical assistance and training have been provided to more than 28,000 individuals in law enforcement agencies, non-profit organizations, government agencies, citizens groups and business and industry. COPS services have been provided within the region and in many other states. Locally, they have provided assistance in Madisonville and Evanston (communities within the city of Cincinnati), working with groups to improve relations and conditions in those communities. They have also worked with members of the Evendale community (a suburb of Cincinnati) to help them resolve a community conflict situation.
- *Turning Point Applied Learning Center with 20 partners including Weastec, Ohio Rehabilitation Services Commission and Southern State Community College*
 The Turning Point Applied Learning Center prepares the hard-core unemployed for the workforce by providing academic instruction and real world, hands-on work experience.
- *Virtual Curriculum Writing Partnership with Auburn Career Center, Butler County Joint Vocational School District and Warren County Career Center*
 Instructors from these four districts are writing interactive curriculum for the Virtual High School in math, science, social studies and language arts. The 40 courses that are being developed will meet Ohio standards and will be more appealing to students than what is currently available. Educators in other states have expressed an interest in collaborating on this project. They want to have access to the courses that are developed in Ohio and will adapt them to meet the standards in their state. In return, they will develop courses in foreign languages and other subject areas and will make them available to Ohio.
- *Workforce Initiative Training Partnership with Cincinnati State Technical and Community College*
 This partnership provides workforce development services and programs to employers throughout the region. The WITP was selected to provide training to all of the employees at ZF Batavia (over 1,300) as the plant prepares to manufacture a

This Page is Intentionally Left Blank.

new type of transmission. The Ohio Department of Development provided a grant to help fund the project.

Performance Measures and Placement

The Ohio Department of Education has established Performance Measures for Career and Technical Planning Districts such as Great Oaks. The measures help the districts to continually improve their programs and services. Great Oaks achieved the following Performance Measures for FY 2001 and the Class of 2001, which is the most recent data available:

High School Attainment Rate	94.6%
Positive Post Program Placement	98.1%
Higher Education Enrollment	34.4%
Related Employment/Educational Experiences	77.8%

Great Oaks Council of Technology and Career Development

The Great Oaks Council of Technology and Career Development is charged with providing advice and guidance in these areas:

- Development and expansion of activities;
- Updating the programs and services offered by Great Oaks;
- Quality of the overall program;
- Promotion of the District.

Business Partnership Councils

A Business Partnership Council was established at each operational center during FY '99 to better serve local workforce development needs. Each council assists in studying, evaluating, advising and recommending the total program at the center it serves. Representatives from business, industry, labor, local government, agencies, affiliated school districts and the community serve as members of these councils. One member from each council serves as a representative to the Great Oaks Council of Technology and Career Development. Each of the councils has been actively involved in promoting the operational centers in the local community.

Great Oaks Foundation

The Great Oaks Foundation was established as a 501(c)(3) non-profit organization in FY '00. Its mission is to expand access to quality career-technical programs and services for youth and adults, and to enhance community awareness throughout the Great Oaks District. During FY '02, an annual giving campaign was launched. Funds will benefit many areas, including student scholarships and financial assistance, staff recognition, image building, awareness and community involvement.

Curriculum and Instruction

To better serve stakeholder needs, comply with state and federal requirements and operate as efficiently and effectively as possible, Great Oaks is continuously engaged in reviewing and improving the competency-based curriculum and the delivery system. During FY '02, major efforts included:

- Implementing the new Information Technology Cluster at the four campuses.
- Implementing a social studies credit for juniors to meet state graduation requirements.
- Expanding programs offered in the affiliated high schools to include 12 Technology Education programs and four Information Technology foundation programs.
- Improving the Virtual High School curriculum in math, science, social studies and language arts through the partnership with Auburn Career Center, Butler County JVS and Warren County Career Center.

Environment and Facilities

Providing a safe, secure learning environment in which associates and students are encouraged to do their best, and maintaining that environment have always been high priorities at Great Oaks. Major projects in FY '02 included:

- Completion of the Public Safety Services fire truck storage project.
- Razing Building 1 at Laurel Oaks.
- Beginning the HB 264 project to retrofit HVAC systems at the Center for Employment Resources, Corporate Office and out buildings at Diamond Oaks and Live Oaks.

Safe Schools Initiative

The Crisis Prevention and Management Plan was developed in FY '01 by the Great Oaks Task Force on Public Safety. Since then measures have been implemented to ensure a safe, positive atmosphere for learning and working. The Safe Schools Helpline was implemented and various security devices were installed at the operational centers. As of FY '01, all campuses have a School Resource Officer on board. These officers are members of the local police departments and work with staff and students on a variety of topics as well as providing for extra security.

Student Services

To enhance the learning environment and increase positive outcomes for students, new approaches were developed in the areas of student services/student readiness. Campuses continued to expand initiatives such as the Professional Development Day for Students, Student of the Month Recognition, etc. An Attendance Incentive program, first piloted in FY '01, was expanded in FY '02.

A marketing research project was conducted which resulted in a major redesign of student recruitment materials.

The role of Parent Liaison was created as a result of the market research. From the research we learned that parents discuss future career and educational goals with their child at an early age and that they influence their child's decision greatly. The individual who serves in this role will develop a program to communicate the benefits of career and technical education to parents of younger students.

Major District Initiatives-Future Projects

District-wide goals for FY '03 are based on the Great Oaks Continuous Improvement Plan and include:

- **Customer Service:** Provide quality services to all customers with 100% efficiency, improve customer transition rates as they enter the labor market, collect customer satisfaction data to improve services.
- **Professional Development:** Expand staff development opportunities for staff at all levels to improve performance, utilize technology to more effectively deliver professional development opportunities.
- **Student Achievement:** Capitalize on the High Schools That Work initiative to improve student achievement rates at all levels, provide expanded opportunities for youth to be successful in higher education arenas, utilize virtual systems to open up new delivery options.

Performance and Outcomes/Human Resources Goals

- Attract and retain a high quality and culturally diverse staff in a competitive marketplace by researching, developing and recommending a comprehensive compensation and benefit package.
- Achieve significant gains in staff outcomes as measured by staff attendance, retention, participation in professional development, staff members receiving industry credentials and certifications, staff members completing advanced degrees and additional licenses.
- Provide associate development to implement the District's prioritized technology projects. These include implementation of the Instructional Resource Center Search Engine and dissemination of IRC curriculum projects and materials.
- Provide associate development that will contribute to student success.
- Provide associate development that will contribute to the success of students with disabilities.
- Provide associate development in technology to meet specific needs that will contribute to student success.
- Provide associate development that will improve teaching strategies.
- Design the Associate Development Committees' objectives to meet the High Schools That Work blueprint goals with measurable outcomes.
- Provide professional development programs and services that will help associates transition into positions for which they are qualified and certified.
- Cultivate partnerships with colleges, universities and educational service centers to support programs and services for all associates.

Program Design and Development Goals

- Achieve significant gains in student achievement as measured by performance indicators that include continuing education, industry certifications and credentials, job placement, various

assessments, North Central credentialing, proficiency tests, attendance, participation in Career Technical Student Organizations, completion rate and rubrics.

- Analyze and measure the effectiveness of integrated technologies into all aspects of the teaching/learning process.
- Provide research and develop initiatives that positively impact the teaching/learning process.
- Collaborate with local, regional and state partners to effectively use human and technology resources to provide quality workforce development programs and services.

Technology Division Goals

- Develop, design, implement and support technology initiatives to meet the needs of internal and external customers.
- Develop and design technology initiatives to enhance the District's distance learning and audio/video capabilities.
- Develop and enhance the District's Information Technology Division.
- Revise and update the District's Technology Plan to meet the needs of internal and external customers.

Property and Assets Goals

- Provide the necessary program equipment/technology and a physical educational environment necessary to support increased learner outcomes.
- Continue to provide the necessary infrastructure and equipment to support the technological requirements for integrating technology into all aspects of the teaching/learning process.
- Implement or complete as scheduled current initiatives/projects including Energy Conservation Project #2, roofing projects, renovation of the Instructional Media Centers and the Live Oaks management area, Public Safety Service expansion, plumbing project phase 2, additional classroom space at Laurel Oaks, conduct air quality audit, conduct Safe Schools audit.
- Continue the planned improvements and maintenance in accordance with the ten-year financial analysis.
- Research and analyze the need for additional classroom space.
- Research and analyze cost saving opportunities through improved controls.

Financial Service Goals

- Provide basic accounting and financial functions to insure a quality financial office operation.
- Improve customer satisfaction and financial processes to insure sound operation.
- Support team members in working toward the goals and improvement of the District.

Student Service Goals

- Be proactive in providing all students appropriate educational support and guidance.
- Review student enrollment criteria based on student abilities, aptitudes and career interests.
- Provide placement services to assist learners in their efforts to achieve their career and educational goals.
- Maintain and protect student records.

Adult Workforce Development Goals

- Enhance economic development by exceeding business and industry, labor and government entities' workforce development needs and expectations.
- Advance Career Technical and Adult Education.

Department or Activity Services, Efforts and Accomplishments

Adult Workforce Development: Adults have access to many different programs and services:

- Full- and part-time classes are offered in many occupational areas. In many programs, flexible scheduling makes it easier for individuals to meet work and family responsibilities while attending school.
- ABLE (Adult Basic and Literacy Education) classes provide basic skills instruction at Great Oaks facilities as well as at community locations and through workplace literacy programs.

Apprenticeship, Internship and Early Placement: High school students who meet the grade and attendance requirements have the opportunity to begin work before high school graduation. Students have the added advantage of developing skills beyond those provided in the curriculum.

Competency-based Curriculum and Assessment: Critical skill competencies have been identified for each career major offered by the Great Oaks Institute of Technology and Career Development. Assessment instruments, including a mix of writings, projects, portfolio grading, and paper and pencil tests, are being developed to measure competency for each instructional module. WorkKeys and the Ohio Competency Assessment Program have been implemented to measure learning gains in the academic and occupational disciplines.

Employer Satisfaction: An Employer Satisfaction Study is conducted each year.

JROTC Programs: By the end of the 1995-96 school year, students at every campus had access to a Junior ROTC program. The Army JROTC program, which was implemented at Live Oaks at the beginning of the 1993-94 school year, was the first in the District. Today it serves students in a nearby affiliated high school as well as the students at Live Oaks. The following year, the Air Force JROTC program was implemented at Laurel Oaks, and in 1995-96, Marine and Navy JROTC programs were established at Diamond Oaks and Scarlet Oaks, respectively. JROTC complements career training and offers students the opportunity to develop citizenship and leadership skills. All units have been recognized for the quality of the respective programs.

Options and Services for At-Risk Youth: Great Oaks offers several programs designed to serve the needs of students who have dropped out of school or who are likely to do so. These include YOU (Youth Opportunities Unlimited), which serves students who are at least 16 years of age and two or more grade levels behind in school; New Directions, which serves students who have dropped out of school; Renewed Opportunities, which serves students who have truancy problems and are referred by the juvenile court system; and the Connections program, which provides assistance to at-risk students in the affiliated high schools.

Special Needs: Approximately 20% of the students served have special needs associated with their educational, mental, physical and/or social development. Special needs students are mainstreamed into career-technical programs and receive the support and assistance necessary to maximize their success in school and, in some instances, in the transition from school to work.

Career Technical Student Organizations: All students belong to a Career Technical Student Organization. This provides students with the opportunity to further develop leadership skills, responsibility and organizational skills.

Warranty Program: Great Oaks warranties students' skills. Students who do not meet their employer's expectations in verified competencies during their first year on the job will be retrained at no cost to the employer.

Work Values, Habits and Attitudes: Considerable attention is also given to helping students develop a work ethic that will serve them and their employers well. Attendance, safety, organizational skills, critical thinking skills, efficiency, productivity and team work are only a few of the personal qualities and concepts stressed across the District.

Other Services: The Great Oaks Center for Employment Resources, in Sharonville; the Center for Economic Opportunity, in Washington Court House; and the IDEA (Individual Development and Economic Advancement) Center, in Hillsboro, serve the training and assessment needs of business and industry. They also offer computer-related adult workforce development classes to the community.

Risk Management

Great Oaks Institute of Technology and Career Development has a blanket building, contents and miscellaneous property policy with the Cincinnati Insurance Company. The policy has a \$1,000 deductible.

Vehicles are covered under a business auto policy by the Cincinnati Insurance Company with a \$250 deductible on collision and \$50 on all other occurrences. All employees are covered under a District blanket liability policy with Nationwide Insurance Company. The limits of liability are \$1,000,000 each occurrence and \$1,000,000 aggregate. In addition, Great Oaks covers all employees under another District excess liability policy with American Alliance Insurance Company with \$4,000,000 each occurrence and \$4,000,000 aggregate.

The board members, President/CEO, CFO, all administrative team individuals and all employees who handle money are covered with perpetual position schedule bonds for \$20,000 by Cincinnati Insurance Company. All other Great Oaks employees are covered by a \$10,000 blanket bond.

Pension Plans

All District employees are covered by the state-wide School Employees Retirement System of Ohio (SERS) or the State Teachers Retirement System of Ohio (STRS). The District's employer contributions for both systems are based on a percentage of the employees' salaries. State law requires the District to pay the employer share as determined by each retirement system. The District's 2002 employer contributions to STRS and SERS, were approximately \$3,329,000 and \$778,000, respectively. See Note 8 to the basic financial statements for complete details.

Legal Compliance/Independent Audit

The financial statements of the Great Oaks Institute of Technology and Career Development have been audited by the firm of Clark, Schaefer, Hackett & Co. The audit has been conducted in accordance with auditing standards generally accepted in the United States of America including a review of internal accounting controls and tests of compliance with Federal and State laws and regulations. The Independent Auditors' Report is included in the Comprehensive Annual Financial Report.

Also, in accordance with *Government Auditing Standards*, the auditors have issued a separately bound report on the Great Oaks Institute of Technology and Career Development's internal control over financial reporting and its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of the audit.

Management's Discussion and Analysis of the financial statements begins on page F-3.

Certificate of Achievement

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to The Great Oaks Institute of Technology and Career Development for the year ending June 30, 2001. In order to be awarded a Certificate of Achievement, a governmental unit must publish a Comprehensive Annual Financial Report whose contents and format conform to program standards. A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

ASBO Certificate

The Association of School Business Officials International (ASBO) awarded a Certificate of Excellence in Financial Reporting to The Great Oaks Institute of Technology and Career Development for the year ending June 30, 2001. In order to be awarded a Certificate of Excellence in Financial Reporting, a school district must publish a Comprehensive Annual Financial Report which substantially conforms to the principles and standards of financial reporting as recommended and adopted by the Association of School Business Officials. The award is granted only after an intensive review of the financial report by an expert panel of certified public accountants and practicing school business officials. Management believes the Comprehensive Annual Financial Report for fiscal year ended June 30, 2002, which will be submitted to ASBO for review, will conform to ASBO's principles and standards.

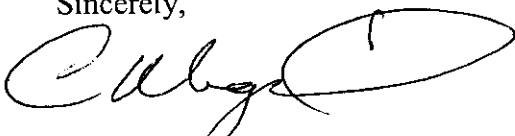

Acknowledgments

It is with great pride and pleasure that we submit this Comprehensive Annual Financial Report for review and wish to express appreciation to the members of the Board of Directors for supporting us in this endeavor and to the staff of the business office and various administrators and associates of the Great Oaks Institute of Technology and Career Development who contributed their time and effort to complete this project.

A note of appreciation is extended to Teeters Consulting and Research Service for their assistance in required research for this report.

A final thanks to the District's external auditors, Clark, Schaefer, Hackett & Co, for their effort in assisting with this report.

Sincerely,

Cliff A. Migal

INDEPENDENT AUDITORS' REPORT

To the Board of Directors
Great Oaks Institute of Technology and Career Development:

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Great Oaks Institute of Technology & Career Development (District) as of and for the year ended June 30, 2002, which collectively comprise the District's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the District's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Governmental Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of Great Oaks Institute of Technology & Career Development as of June 30, 2002, and the respective changes in financial position thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated October 4, 2002 on our consideration of the Great Oaks Institute of Technology and Career Development's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The introductory section, combining and individual nonmajor fund financial statements and statistical information are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual nonmajor fund financial statements have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated, in all material respects, in relation to the basic financial statements taken as a whole. The introductory section and statistical information have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

The Management's Discussion and Analysis and the budgetary information on pages F-3 to F-10 and F-40 to F-42, respectively, are not a required part of the basic financial statements but are supplementary information required by the Government Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Management's Discussion and Analysis
For the Fiscal Year Ended June 30, 2002
Un-audited

The Great Oaks Institute of Technology and Career Development management team is presenting the following discussion and analysis in order to provide an overall review of the School District's financial activities for the fiscal year ended June 30, 2002.

Financial Highlights

Major financial highlights for fiscal year 2002 are listed below:

- Total General Fund revenue increased from \$50,300,154 in fiscal year 2001 to \$55,819,381 in fiscal year 2002. This is a \$5,519,227 or a 11% increase.
- Total General Fund expenses increased from \$35,751,372 in fiscal year 2001 to \$37,688,156. This is a \$1,936,784 increase or just over 5.4 % increase.
- The fund balance of the General Fund increased from \$52,290,579 in fiscal year 2001 to \$63,087,214 in fiscal year 2002. This is a \$10,796,635 increase or a 20.6% increase.
- In total, net assets increased by \$14,425,996. All of the net asset increases were in governmental activities.
- The District had \$52.3 million in expenses related to governmental activities; only \$10.9 million of these expenses were offset by program specific charges for services, grants or contributions. General revenue of \$55.8 million, made up primarily of property taxes and State Foundation payments, were adequate to provide for these programs.

Reviewing the Comprehensive Annual Financial Report (CAFR)

This annual report consists of a series of audited financial statements, notes to those statements and un-audited statistical data. The Letter of Transmittal is written to support the reader in understanding the District from a historical perspective as well as what is currently happening in the District. In addition, the Letter explains the current economic situation in the Great Oaks regional area.

The audited statements are organized so the reader can understand Great Oaks Institute of Technology and Career Development as a financial whole, an entire operating entity. The statements then proceed to provide an increasingly detailed look at specific financial activities. The un-audited statistical section attempts to support the reviewer with a better understanding of the area the District serves as well as providing other data related directly to the District's operation.

The Statement of Net Assets and Statement of Activities provide information about the activities of the whole School District, and are an aggregate view of the District's finances. Fund financial statements provide the next level of detail. For governmental funds, these statements tell how services were financed in the short-term as well as what remains for future spending. The fund financial statements also look at the District's most significant funds with all other non-major funds presented in total in one column.

In the case of Great Oaks Institute of Technology and Career Development, the General Fund is by far the most significant fund. The Board of Directors and management team continuously

Un-audited

review the Adult Education Fund because of the dollar volume and the importance placed on this part of the District's business. A more detailed explanation of the District's financial statements can be found in the Notes to the Basic Financial Statements.

Reporting the School District as a Whole

Statement of Net Assets and the Statement of Activities

The District's Comprehensive Annual Financial Report contains financial information on all of the funds used by the District to provide programs and services. The Statement of Net Assets and the Statement of Activities look at the District as a whole presenting information that allows the reader to determine how the District has done in fiscal year 2002. These statements include all assets and liabilities using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies.

These two statements report the District's net assets and changes in those assets. The change in net assets is a way for anyone reading the statements to determine if the District as a complete entity has increased or decreased its financial position. There are many factors that can cause the net assets to change. Some of the factors are financial and some are non-financial. Non-financial factors include the District's property tax base, current property tax laws in Ohio restricting revenue growth, facility conditions and un-funded mandates that affect the District operation. The District does not classify any of its activities as business-type activities and therefore all expenses are reported as governmental activities.

Reporting the District's Most Significant Funds

Fund Financial Statements

The analysis of the District's major funds begins on page F-14. The fund financial reports provide information about the District's major funds. At Great Oaks there are over 28 different funds that account for the large amounts of financial transactions. The major fund financial statements focus on the District's most significant funds. The major funds are the General Fund, Vocational Adult Education Fund and the Capital Projects Fund.

All of the District's financial activities are reported in governmental funds, which focus on how money flows into and out of those funds and the balances that are left at year-end and are available for spending in future periods. These funds are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the District's general government operations and the basic services it provides. Governmental fund information helps the reader determine whether there are more or fewer financial resources that can be spent in the near future to finance educational programs. The relationship (or differences) between Governmental Activities (reported in the Statement of Net

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Management's Discussion and Analysis

Un-audited

Assets and the Statement of Activities) and Governmental Funds is reconciled in the Financial Statements.

The School District as a Whole

The Statement of Net Assets provides the perspective of the District as a whole.

Table 1 below provides a summary of the District's net assets for fiscal years ended 2002 and 2001:

Table 1	Fiscal Year 2002	Fiscal Year 2001	Increase/ Decrease
Assets			
Current and Other Assets	\$98,754,861	\$90,105,725	\$8,649,136
Capital Assets	36,448,464	31,620,485	4,827,979
Total Assets	135,203,325	121,726,210	13,477,115
Liabilities			
Long-Term Liabilities	8,619,628	9,267,790	(648,162)
Other Liabilities	32,453,338	32,754,057	(300,719)
Total Liabilities	41,072,966	42,021,847	(948,881)
Net Assets			
Invested in Capital Assets			
Net of Debt -	29,318,464	23,645,485	5,672,979
Restricted	2,707,970	5,323,150	(2,615,180)
Unrestricted (deficit)	62,103,925	50,735,728	11,368,197
Total Net Assets	94,130,359	79,704,363	14,425,996

Total Assets increased by \$13.5 million to \$135.2 million. Current and Other Assets increased by \$8.6 million to \$98.8; this increase is the result of being on the front end of a 10-year levy. Capital Assets total \$36.4 million and increased by \$4.8 million over last year. We record the capital assets into two categories: non-depreciable capital assets, which total \$2.6 million, and depreciable capital assets of \$33.9 million.

Total Liabilities decreased by \$949 thousand to \$41.1 million. The majority of this decrease was in Long-term Liabilities and was caused from the retiring of the current year portion of our Energy Conservation Bonds. When we look at Other Liabilities they decreased slightly to \$32.5 million. A significant amount of this is deferred revenue accounting for \$28 million.

Net Assets of the District's activities were \$94.1 million, a \$14.4 million increase. Of this \$62.1 is unrestricted for future use. Table 2 shows the changes in Net Assets for the fiscal year ended

This Page is Intentionally Left Blank.

Management's Discussion and Analysis
 For the Fiscal Year Ended June 30, 2002
 Un-audited

June 30, 2002. This shows that the District's current financial position is increasing. This increase in financial position is the direct result of being on the front end of a 2.7 mil ten-year tax levy that was passed in November 1998. In fiscal year 2002 the School District received the second full year of collection from this levy. The tax revenue collected made up 51.1% of all revenue received by the District in fiscal year 2002.

Table 2 Change in Net Assets For Governmental Activities

	Fiscal Year 2002	Fiscal Year 2001	Increase/ Decrease
Revenues			
Program Revenues:			
Charges for services and sales	\$5,081,642	\$5,091,360	(\$9,718)
Operating grants	5,823,338	6,937,307	(1,113,969)
General Revenues:			
Property taxes	34,224,860	29,748,922	4,475,938
Grants and entitlements	17,948,052	16,123,164	1,824,888
Other	3,633,190	4,468,455	(835,265)
Total Revenues	66,711,082	62,369,208	4,341,874
Program Expenses			
Instruction	29,372,330	31,215,028	(1,842,698)
Support Services:			
Pupil and Instructional staff	6,555,406	5,881,189	674,217
Bd. of Education, Fiscal, Administration and Business	5,286,718	5,601,652	(314,934)
Operating and Maintenance of plant	6,490,930	7,263,535	(772,605)
Pupil transportation and Central	2,564,389	2,757,983	(193,594)
Food service	716,292	700,593	15,699
Other	1,299,021	1,484,572	(185,551)
Total Expenses	52,285,086	54,904,552	(2,619,466)
Increase in Net Assets	\$14,425,996	\$7,464,656	\$6,961,340

The District expects that net assets will continue to increase during the first half of the levy and then decrease during the second half as the result of a lack of revenue growth associated with the levy. This lack of growth is due to the way property taxes are collected in Ohio and the fact that they don't necessarily increase solely as a result of inflation. For example, a homeowner with a home valued at \$100,000 and taxed at 2.0 mils would pay \$70.00 annually in taxes. If four years

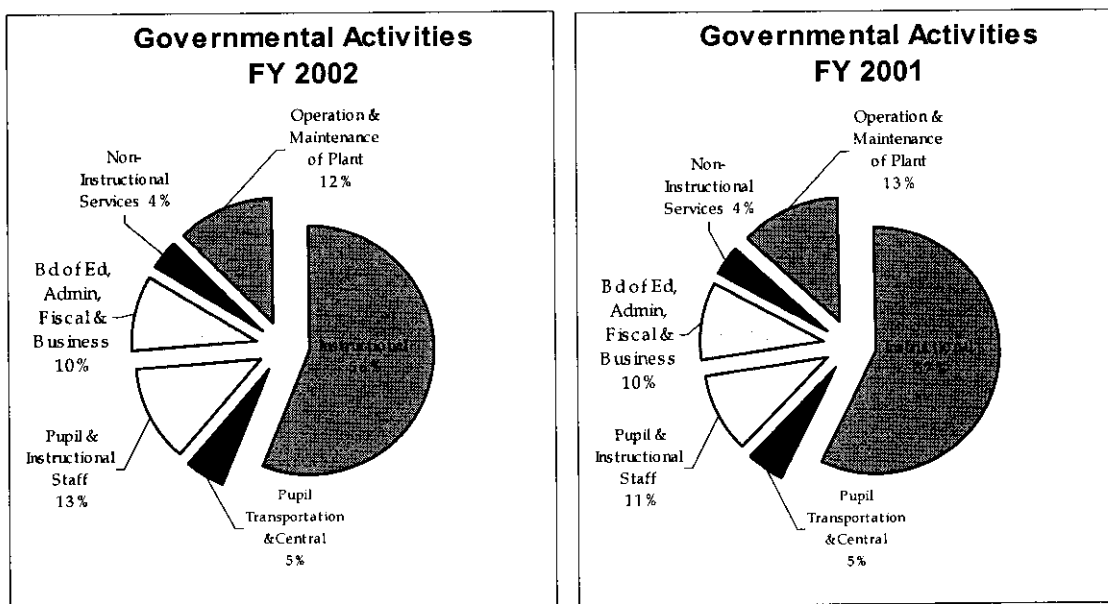

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Management's Discussion and Analysis
For the Fiscal Year Ended June 30, 2002
Un-audited

later the home were reappraised to \$200,000, the effective tax rate would become 1 mil and the owner would still pay \$70.00.

Thus the District is dependent upon its ten-year property tax levy and hampered by the lack of revenue growth from the levy. It is imperative that the District plan and budget effectively to assure that a surplus is budgeted in the early years of the levy to increase its net asset balance. This increased net asset balance will supplement the annual increase in expenses in the later years of the levy.

Table 2 also shows the different sources of revenue the District receives as a whole. The District had no revenue growth in the area of charges for services and sales stayed the same as the prior year at \$5.1 million. Most of this revenue comes from fees charged for the District's Adult Workforce Development classes and the other fees are received from high school students who live outside of the District (service fee students). Operating grants and contributions plus general revenue grants and entitlements increased approximately \$711,000, which accounted for \$23.8 million in revenue. Included in this total is the monthly State Foundation payment from the State of Ohio. The State Foundation payment is the amount that the State reimburses the District for the cost of educating the students. The total amount of State Foundation funding received in fiscal year 2002 was \$15.1 million. The biggest part of funding for the District, as mentioned earlier, is the \$34.2 million received from property taxes.

Table 2 and the two pie charts following show where the District expenditures occurred during the last two years.

Instructional expenditures made up over 56% of the Total Expenditures for the District; this is down 1% from the prior year. Instructional activities are designed primarily to prepare students to be productive workers in their chosen occupational field as well as effective family members

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

**Management's Discussion and Analysis
For the Fiscal Year Ended June 30, 2002
Un-audited**

and contributing members of society. Support Services Pupils and Instructional Staff accounted for 13% of all expenditures, a 2% increase from the prior year. Support Services Pupils are those activities that are designed to assess and improve the well being of pupils and to supplement the teaching process, while Support Services Instructional Staff are those activities associated with assisting the instructional staff with the content and process of providing learning experiences for pupils. A combination of a new HVAC system installed during fiscal year 2001 and a decrease in gas prices in fiscal year 2002 helped Operation and Maintenance of plant expenditures decrease 1% from the prior year. Support Services Operation and Maintenance of Plant are those activities concerned with keeping the physical plant open, comfortable and safe for use, and keeping the grounds, buildings and equipment in an effective working condition and state of repair. All other areas combined account for 19% of the Total Expenditures, same as in fiscal year 2001.

The District's Funds

A description of how the District's major funds preformed during the year begins on page F-14. These statements break out the major funds and are accounted for using the modified accrual basis of accounting. Total Governmental Revenue for All Funds was \$66.5 million and Total Expenditures were \$57.8 million. The General Fund by far changed the most, with an increase of \$10.7 million. Total net change for the District, as a whole was an \$8.9 million increase. As previously discussed, the increase in the General Fund is due to being on the front end of the ten-year 2.7 mil tax levy that was passed in November 1998.

General Fund Budgeting Highlights

The District's budget is prepared according to Ohio law and is based on accounting for certain transactions on a basis of cash receipts, disbursements and encumbrances. A more in-depth description of the budgeting process can be found in the Notes to the Basic Financial Statements.

A look at the General Fund, which is the District's most significant fund, shows that the original budget to final budget was very close. The original budget for revenues decreased by \$241 thousand, while the final actual revenue received was within \$333 thousand of the final budget. Significant increase in the revenue was due to intergovernmental revenue – High School That Work program revenue. Even though tax revenues were \$432 thousand less then what had been projected the total received was a total increase of \$480 thousand over the prior year. Tuition and fees increased slightly over the prior year amount. The budget for interest decreased by \$395 thousand from the prior year due to falling interest rates.

On the expense side, the District ended the year \$3.6 million under the final budgeted amounts. The District uses site-based budgeting and the budgeting systems are designed to tightly control total site budgets but provide flexibility for the campus management team. At the beginning of the school year, the District budgets for positions that are currently vacant but are intended to be filled during the year, and it also budgets for those positions where a retirement is likely to occur. Due to several positions not being filled until the later part of the year and others not being filled

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Management's Discussion and Analysis
For the Fiscal Year Ended June 30, 2002
Un-audited

at all, total salaries were several percentage points below the budgeted amount. The operation and maintenance of plant budget finished significantly below budget due to an increase in the utility budgets. This was based on the prior year increases for natural gas and having to consider the variance in winters in this area and the fact that natural gas prices dropped during the current year.

Vocational Adult Education

Actual revenue received for Vocational Adult Education activities was \$2 million below the final revenue estimates. The significant variance was in tuition and fees. This was a result of three major programs that did not reach potential as a result of local business and industry either reducing or totally cutting their training budgets.

Actual expenditures ended \$2.4 million below the final budgeted amount. These expenditures were planned to support the major programs mentioned above. The end result was expenditures were not incurred.

Capital Assets and Debt Administration

Capital Assets

At the end of fiscal year 2002 the District had \$36.4 million invested in land, buildings, machinery and equipment. We increased the value of our assets by \$4.8.

The chart below shows fiscal 2002 balances compared to 2001:

Debt

At June 30, 2002 the District had \$7,130,000 in energy conservation bonds outstanding, with \$890,000 due within one year. The bonds were issued for the purpose of financing the purchase

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

**Management's Discussion and Analysis
For the Fiscal Year Ended June 30, 2002
Un-audited**

and installation of new equipment, remodeling of buildings and other modifications in order to significantly reduce energy consumption costs. The bond issue sold at coupon rates from 4.40% to 5.25% with the effective E rates from 4.35% to 4.68%, and matures from June 1, 2001 to June 1, 2009.

The Future of Great Oaks

We are unique in that we have only one ten-year tax levy supporting the District and we do not have a permanent tax levy. In effect, if we cannot pass a levy near the end of our current ten-year period we would be forced to close the District. As a result of operating using this method, we must bank significant money in the early years to carry the District through the last few years of the ten-year levy.

It should be obvious to the reader of this financial report that currently our plan is working because we are building a balance that should sustain us in the future years. According to our ten-year Board approved planning document, Great Oaks will continue to build a balance until the fiscal year 2006 and at that time this balance will continue to be reduced leaving only a small balance in fiscal year 2009.

Great Oaks' second largest revenue line item is the State of Ohio's school foundation program. This revenue stream continues to be challenged by the suit mentioned in the Notes to the Basic Financial Statements on page F-39. This is the Supreme Court case charging that the State of Ohio has failed to provide the revenue necessary to provide for an "adequate or equitable funding system for schools in Ohio." This revenue, amounting to \$15.1 million, is of concern and could possibly have an impact on Great Oaks in funding the entire ten-year plan.

With all of this in mind, Great Oaks continues to monitor and review the ten-year planning document both at the Board of Director level and the Executive Management Team level.

Great Oaks uses the principles of Continuous Quality Management as a basis for managing the District and this continues to be demonstrated by the fact that we implemented GASB 34 two years early. In addition, we have received both the Government Finance Officers Association (GFOA) and the Association of School Business Officials (ASBO) Certificate of Excellence in Financial Reporting continuously since 1991.

District Contact Information

This Comprehensive Annual Financial Report is available to all of the citizens, taxpayers, investors and creditors that may have an interest in the finances of the Great Oaks Institute of Technology and Career Development. Anyone having questions regarding this report or desiring additional information may contact John R. Wahle, Chief Financial Officer at Great Oaks Institute of Technology and Career Development, 3254 East Kemper Rd., Cincinnati, OH, 45241 or email at wahlej@greatoaks.com.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

Note 1--Summary of Significant Accounting Policies

The financial statements of the Great Oaks Institute of Technology and Career Development ("the District") have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The District also applies Financial Accounting Standards Board (FASB) statements and interpretations issued on or before November 30, 1989, to its proprietary activities provided they do not conflict with or contradict GASB pronouncements. The more significant of the District's accounting policies are described below.

A. Reporting Entity

The District is a joint vocational school district organized under Section 3311.18 of the Ohio Revised Code. The District provides vocational education for 36 school districts serving the population of approximately 600,000 throughout 2,200 square miles of southwest Ohio. A 35-member Board of Directors governs the District, which is supported by a 2.70 mill operating levy assessed over a \$15.2 billion tax duplicate and by funds from the State of Ohio School Foundation Program. The District fosters cooperative relationships with business and industry, professional organizations, participating school districts and other interested, concerned groups and organizations to consider, plan and implement educational programs designed to meet the common needs and interests of students.

A reporting entity is comprised of the primary government, component units and other organizations that are included to ensure the financial statements are not misleading. The primary government consists of all funds, departments, boards, and agencies that are not legally separate from the District. Component units are legally separate organizations for which the District is financially accountable. Component units may also include organizations that are fiscally dependent on the District in that the District approves the budget, the issuance of their debt, or the levying of their taxes. The District has no component units.

The School District is associated with an organization, the Ohio School Boards Association Workers' Compensation Group Rating Program, which is an insurance purchasing pool. This organization is presented in Note 14 to the basic financial statements.

B. Fund Accounting

The District uses funds to report on its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain District functions or activities. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts. The funds of the District are grouped into the categories governmental and fiduciary.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

Governmental Funds focus on the sources, uses and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used. Current liabilities are assigned to the fund from which they will be paid. The difference between governmental fund assets and liabilities is reported as fund balance. The following are the District's major governmental funds:

General Fund - The general fund is used to account for all financial resources except those required to be accounted for in another fund. The general fund balance is available to the District for any purpose provided it is expended or transferred according to the general laws of Ohio.

Vocational Adult Education Special Revenue Fund - The vocational adult education fund accounts for revenues and expenditures involved in upgrading and retraining out-of-school youth and adults for the purpose of improving their skills and knowledge in their current or planned occupation.

Debt Service Fund - The debt service fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.

Capital Projects Fund - The capital projects fund is used to account for financial resources to be used for the acquisition or construction of major capital facilities other than those financed by trust funds.

Fiduciary Funds report on net assets and changes in net assets. The District's fiduciary funds consist of agency funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

C. Basis of Presentation

Government-wide Financial Statements The statement of net assets and the statement of activities display information about the District as a whole. These statements include the financial activities of the primary government except for fiduciary funds. The statements distinguish between those activities of the District that are governmental and those that are considered business-type activities. The District has no business-type activities.

The government-wide statements are prepared using the economic resources measurement focus, which differs from the manner in which the governmental fund financial statements are prepared. Therefore, the governmental fund financial statements include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements for governmental funds.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements

For the Fiscal Year Ended June 30, 2002

The government-wide statement of activities presents a comparison between direct expenses and program revenues for each function or program of the District's governmental activities. Direct expenses are those that are specifically associated with a service, program or department and are therefore identifiable to a particular function. Program revenues include charges paid by the recipient of the goods or services offered by the program and grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues which are not classified as program revenues are presented as general revenues of the District, with certain limited exceptions. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the District.

Fund Financial Statements- Fund financial statements report detailed information about the District. The focus of governmental financial statements is on major funds rather than reporting funds by type. Each major fund is presented in a separate column. Nonmajor funds are aggregated and presented in a single column. Fiduciary funds are reported by fund type.

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. All governmental fund types are accounted for using a flow of current financial resources measurement focus. With this measurement focus, only current assets and current liabilities are generally included on the balance sheet. Operating statements of these funds present sources (i.e., revenues and other financing sources) and uses (i.e., expenditures and other financing uses) of current financial resources.

D. **Basis of Accounting**

Basis of accounting refers to when revenues and expenditures are recognized in the accounts and reported in the financial statements and relates to the timing of the measurements made. Government-wide financial statements are prepared using the accrual basis of accounting. Governmental funds use the modified accrual basis of accounting.

Agency funds are custodial in nature (assets equals liabilities) and do not involve measurement of results of operations. Agency funds are accounted for using the accrual basis of accounting.

Revenues - Exchange and Non-exchange transactions Revenue resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on the accrual basis when the exchange takes place. On a modified accrual basis, revenues are recorded in the fiscal years in which they become both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current fiscal year or soon enough thereafter to be used to pay liabilities of the current fiscal year. The available period for the District is sixty days after fiscal year-end.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements

For the Fiscal Year Ended June 30, 2002

Non-exchange transactions, in which the District receives value without directly giving value in return, include property taxes, grants, entitlements and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes were levied. Revenue from grants, entitlements and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the fiscal year when use is first permitted; matching requirements, in which the District must provide local resources to be used for a specified purpose; and expenditure requirements, in which the resources are provided to the District on a reimbursement basis. On a modified accrual basis, revenue from non-exchange transactions must also be available before it can be recognized. Under the modified accrual basis, the following revenue sources are deemed both measurable and available: property taxes available for advance, interest, tuition, student fees and grants.

Deferred Revenue- Deferred revenues arise when a potential revenue does not meet both the measurable and available criteria recognition in the current period. In the subsequent period, when both revenue recognition criteria are met, the liability for deferred revenue is removed from the combined balance sheet and revenue is recognized. Property taxes measurable as of June 30, 2002 which are intended to finance fiscal year 2003 operations, and delinquent property taxes whose availability is indeterminable, have been recorded as deferred revenue. On governmental fund financial statements, receivables that will not be collected within the available period have also been reported as deferred revenue.

The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred, if measurable. Allocations of cost, such as depreciation and amortization, are not recognized in the governmental funds.

E. Budgetary Process

The budgetary process is prescribed by provisions of the Ohio Revised Code and entails the preparation of budgetary documents within an established timetable. The major documents prepared are the tax budget, the certificate of estimated resources, and the appropriation resolution, all of which are prepared on the budgetary basis of accounting. The certificate of estimated resources and the appropriations resolution are subject to amendment throughout the year with the legal restriction that appropriations cannot exceed estimated resources, as certified.

All funds, other than agency funds, are legally required to be budgeted and appropriated. The legal level of budgetary control has been established by the Board of Directors at the object level within each fund and function. Any budgetary modifications at this level may only be made by resolution of the Board of Directors.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

Tax Budget- Prior to January 15, the Superintendent and Treasurer submit to the Board of Directors a proposed operating budget for the fiscal year commencing the following July 1. The budget includes proposed expenditures and the means of financing for all funds. Public hearings are publicized and conducted to obtain taxpayers' comments. The express purpose of this budget document is to reflect the need for existing (or increased) tax rates. By no later than January 20, the Board-adopted budget is filed with the Hamilton County Budget Commission for rate determination.

Estimated Resources- Prior to April 1, the Board of Directors accepts, by formal resolution, the tax rates as determined by the County Budget Commission and receives the Commission's certificate of estimated resources, which states the projected revenue of each fund. Prior to June 30, the District must revise its budget so that total contemplated expenditures from any fund during the ensuing year will not exceed the amount stated in the certificate of estimated resources. The revised budget then serves as the basis for the appropriation measure. On or about July 1, the certificate is amended to include any unencumbered cash balances from the preceding year. The certificate may be further amended during the year if projected increases or decreases in revenue are identified by the District Chief Financial Officer. The amounts reported as the original budgeted amount in the required supplementary information budgetary schedules reflect the amounts in the certificate when the original appropriations were adopted. The amounts reported as the final budgeted amounts reflect the amounts in the final amended certificate issued during fiscal year 2002.

Appropriations- Upon receipt from the County Auditor of an amended certificate of estimated resources based on final assessed values and tax rates or a certificate saying no new certificate is necessary, the annual appropriation resolution is legally enacted by the Board of Directors. Prior to the passage of the annual appropriation measure, the Board may pass a temporary appropriation measure to meet the ordinary expenses of the District. The appropriate resolutions, by fund, must be within the estimated resources as certified by the County Budget Commission and the total of expenditures and encumbrances may not exceed the appropriation totals at any level of control. Any revisions that alter the total of any fund appropriation or alter total function appropriations within a fund, or alter object appropriations within functions, must be approved by the Board of Directors.

The Board may pass supplemental fund appropriations so long as the total appropriations by fund do not exceed the amounts set forth in the most recent certificate of estimated resources. The amounts reported as the original budgeted amounts in the required supplementary information budgetary schedules reflect the appropriation in the first complete appropriated budget, including amounts automatically carried over from prior years. The amounts reported as the final budgeted amounts represent the final appropriation amounts, including all supplemental appropriations. Formal budgetary integration is employed as a management control device during the year for all funds other than agency funds, consistent with statutory provisions. The Board passed supplemental appropriations during the fiscal year.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

**Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002**

Encumbrances- As part of formal budgetary control, purchase orders, contracts and other commitments for the expenditure of monies are recorded as the equivalent of expenditures on the non-GAAP budgetary basis in order to reserve that portion of the applicable appropriation and to determine and maintain legal compliance. On fund financial statements, encumbrances outstanding at fiscal year-end are reported as a reservation of fund balance for subsequent year expenditures for governmental funds. A reserve for encumbrances is not reported on the government-wide financial statements.

Lapsing of Appropriations- At the close of each fiscal year, the unencumbered balance of each appropriation reverts to the respective fund from which it was appropriated and becomes subject to future appropriation. Encumbered appropriations are carried forward to the succeeding fiscal year and are not reappropriated.

F. Cash and Cash Equivalents

Cash received by the District is pooled for investment purposes. Each fund's interest in the pool is presented as "Equity in Pooled Cash and Investments" on the balance sheet. During fiscal year 2002, investments were limited to STAROhio, commercial paper notes, repurchase agreements mutual funds and federal agency securities. Investments are reported at fair value, which is based on quoted market prices.

The School District has invested funds in the State Treasury Asset Reserve of Ohio (STAROhio) during fiscal year 2002. STAROhio is an investment pool managed by the State Treasurer's Office which allows governments within the State to pool their funds for investment purposes. STAROhio is not registered with the SEC as an investment company, but does operate in a manner consistent with Rule 2a7 of the Investment Company Act of 1940. Investments in STAROhio are valued at STAROhio's share price, which is the price the investment could be sold for on June 30, 2002.

Under existing Ohio statutes, all investment earnings accrue to the general fund except those specifically related to agency funds, and those other funds individually authorized by Board resolution. Interest earnings are allocated to these funds based on average monthly cash balance.

For presentation on the financial statements, investments with an original maturity of three months or less at the time they are purchased by the District are considered to be cash equivalents.

G. Prepaid Items

Payments made to vendors that will benefit periods beyond June 30, 2002, are recorded as prepaid items using the consumption method. A current asset for the prepaid amount is recorded at the time of the purchase and an expenditure/expense is reported in the year in which services are consumed.

H. Inventory

On the government-wide financial statements, inventories are presented at the lower of cost or market on a first-in, first-out basis and expensed when used.

On fund financial statements, inventories of governmental funds are stated at cost determined on a first-in, first-out basis. Inventories consist of expendable items and are recorded using the purchase method of reporting. Inventories on hand at year-end are reported as an asset with a corresponding reserve for inventory in fund balance.

I. Capital Assets

General capital assets are those assets not specifically related to activities reported in proprietary funds. These assets generally result from expenditures in the governmental funds. These assets are reported in the governmental activities column of the government-wide statement of net assets but are not reported in the fund financial statements.

All capital assets are capitalized at cost (or estimated historical cost) and updated for additions and retirements during the year. Donated fixed assets are recorded at their fair market values as of the date received. The District maintains a capitalization threshold of \$5,000. The District does not possess any infrastructure. Improvements are capitalized; the costs of normal maintenance and repairs that do not add to the value of the asset or materially extend an asset's life are not capitalized.

All reported capital assets except land are depreciated. Depreciation is computed using the straight-line method over the following useful lives:

Buildings and building improvements	25 years
Machinery and equipment other than vehicles	10 years
Vehicles	5 years

J. Interfund Balances

On fund financials, receivables and payables resulting from short-term interfund loans are classified as "interfund receivable/payable." These amounts are eliminated in the governmental activities column of the statement of net assets.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

K. Compensated Absences

Vacation benefits are accrued as a liability as the benefits are earned if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the District will compensate the employees for the benefits through paid time off or some other means. The District records a liability for accumulated unused vacation time when earned for all employees with more than one year of service.

Sick leave benefits are accrued as a liability using the vesting method. The liability includes the employees who are currently eligible to receive termination benefits and those the District has identified as probable of receiving payment in the future. The amount is based on accumulated sick leave and employees' wage rates at fiscal year-end, taking into consideration any limits specified in the District's termination policy.

The entire compensated absence liability is reported on the government-wide financial statements.

For governmental fund financial statements, a liability is recorded only for the portion of unpaid compensated absences that is expected to be paid using current available expendable financial resources.

L. Accrued Liabilities and Long-Term Obligations

All payables, accrued liabilities and long-term obligations are reported in the government-wide financial statements.

In general, governmental fund payables and accrued liabilities are reported as obligations of the funds regardless of whether they will be liquidated with current resources. However, compensated absences that will be paid from governmental funds are reported as a liability in the fund financial statements only to the extent that they will be paid with current available expendable financial resources.

M. Fund Balance Reserves

The District records reservations for portions of fund equity that are legally segregated for specific future use or which do not represent available expendable resources and therefore are not available for appropriation or expenditure. Unreserved fund balances indicates that portion of fund equity that is available for appropriation in future periods. Fund equity reserves are established for encumbrances, property taxes, inventories of materials and supplies, prepaids and budget reserve set-asides.

The reserve for property taxes represents taxes recognized as revenue under generally accepted accounting principles but not available for appropriations under State statutes.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

The reserve for budget stabilization represents money set-aside to protect against cyclical changes in revenues and expenditures.

N. Net Assets

Net assets represent the difference between assets and liabilities. Net assets invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Net assets are reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors or laws or regulations of other governments.

The District applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

O. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

Note 2--Fund Balance Deficits

At June 30, 2002, the following special revenue funds had deficit fund balances:

Food Services	\$14,575
Public School Preschool	\$37,593
Vocational Education Enhancement	\$4,576
Special Services	\$46,896
Adult Basic Education	\$66,252
Chapter 2	\$21,263
Child Care Services	\$4,875

The deficits were created by the application of generally accepted accounting principles. The General Fund provides transfers to cover deficit balances; however, this is done when cash is needed rather than when accruals occur.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

Note 3--Property Taxes

Property taxes are levied and assessed on a calendar year basis while the District's fiscal year runs from July through June. First half tax collections are received by the District in the second half of the fiscal year and second half distributions occur in the following fiscal year. The District currently operates under a 2.7 mill, 10-year tax levy that was passed in November 1998.

Property taxes include amounts levied against all real, public utility and tangible personal property located in the District. Property tax revenue received during calendar 2002 for real and public utility property taxes represents collections of calendar 2001 taxes. Property tax payments received during calendar 2002 for personal property is for calendar 2001 taxes.

Real property taxes are levied after April 1 on the assessed value listed as of the prior January 1, the lien date. Public utility property taxes attached as a lien on December 31 of the prior year, were levied April 1 and are collected with real property taxes. Assessed values for real property taxes are established by State law at 35% of appraised market value. All property is required to be revalued every six years. Public utility property taxes are assessed on tangible personal property at varying percentages of true value and on real property at 35% of true value. Tangible personal property taxes are levied after April 1 on the value listed as of December 31 of the current year. Tangible personal property assessments are 25% of true value.

Real property taxes are payable annually or semi-annually. If paid annually, payment is due December 31; if paid semi-annually, the first payment is due December 31 with the remainder payable by June 20. Under certain circumstances, State statute permits alternate payment dates to be established.

Tangible personal property taxes paid by multi-county taxpayers are due September 20. Single county taxpayers may pay annually or semi-annually. If paid annually, payment is due April 30; if paid semi-annually, the first payment is due April 30, with the remainder payable by September 20.

The District receives property taxes from the various counties in the District. The County Auditors periodically advance to the District its portion of the taxes collected. Second-half real property tax payments collected by the County by June 30, 2002, are available to finance fiscal year 2002 operations. The amount available to be advanced can vary based on the date the tax bills are sent.

Accrued property taxes receivables represents delinquent taxes outstanding and real property, tangible personal property and public utility taxes that became measurable as of June 30, 2002. Although total property tax collections for the next fiscal year are measurable, only the amount available as an advance at June 30 is intended to finance current fiscal year operations. The receivable is therefore offset by a credit to deferred revenue for that portion not intended to finance current year operations. The amount available as an advance at June 30, 2002, was \$7,947,100 in the General Fund.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

The assessed values upon which fiscal year 2002 taxes were collected are:

	<u>2001 Second- Half Collections</u>		<u>2002 First- Half Collections</u>	
	<u>Amount</u>	<u>Percent</u>	<u>Amount</u>	<u>Percent</u>
Agricultural/Residential and Other Real Estate	\$ 12,644,386,780	82.92%	13,001,955,520	84.10%

Tax rate per \$1,000 of assessed valuation	\$2.70		\$2.70	

Note 4--Deposits and Investments

State statutes classify monies held by the District into three categories.

Active deposits are public deposits necessary to meet current demands on the Treasury. Such monies must be maintained either as cash in the District Treasury, in commercial accounts payable or withdrawable on demand, including negotiable order of withdrawal (NOW) accounts, or in money market deposit accounts.

Inactive deposits are public deposits that the Board has identified as not required for use within the current two-year period of designation of depositories. Inactive deposits must either be evidenced by certificates of deposit maturing not later than the end of the current period of designation of depositories, or by savings or deposit accounts including, but not limited to, passbook accounts.

Interim deposits are deposits of interim monies. Interim monies are those monies that are not needed for immediate use but which will be needed before the end of the current period of designation of depositories. Interim deposits must be evidenced by time certificates of deposit maturing not more than one year from the date of deposit or by savings or deposit accounts including pass book accounts.

Protection of the District's deposits is provided by the Federal Deposit Insurance Corporation, by eligible securities pledged by the financial institution as security for repayment, by surety company bonds deposited with the Treasurer by the financial institution or by a single collateral pool established by the financial institution to secure the repayment of all public monies deposited with the institution.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements

For the Fiscal Year Ended June 30, 2002

Interim monies may be deposited or invested in the following securities:

1. United States Treasury notes, bills, bonds, or any other obligation or security issued by the United States Treasury or any other obligation guaranteed as to principal or interest by the United States;
2. Bonds, notes, debentures, or any other obligations or securities issued by the federal government agency or instrumentality, including but not limited to, the Federal National Mortgage Association, Federal Home Loan Bank, Federal Farm Credit Bank, Federal Home Loan Mortgage Corporation, Government National Mortgage Association and Student Loan Marketing Association. All federal agency securities shall be direct issuances of federal government agencies or instrumentalities;
3. Written repurchase agreements in the securities listed above provided that the market value of the securities subject to the repurchase agreement must exceed the principal value of the agreement by at least two percent and be marked to market daily, and that the term of the agreement must not exceed thirty days;
4. Bonds and other obligations of the State of Ohio;
5. No-load money market mutual funds consisting exclusively of obligations described in division (1) or (2) of this section and repurchase agreements secured by such obligations, provided that investments in securities described in this division are made only through eligible institutions;
6. The State Treasurer's investment pool (STAR Ohio);
7. Certain bankers' acceptances and commercial paper notes for a period not to exceed 180 days in an amount not to exceed 25 percent of the interim monies available for investment at any one time; and,
8. Under limited circumstances, corporate debt interests rated in either of the two highest rating classifications by at least two nationally recognized rating agencies.

Investments in stripped principal or interest obligations, reverse repurchase agreements and derivatives are prohibited. The issuance of taxable notes for the purpose of arbitrage, the use of leverage and short selling are also prohibited. An investment must mature within five years from the date of purchase unless matched to a specific obligation or debt of the District, and must be purchased with the expectation that it will be held to maturity. Investments may only be made through specified dealers and institutions. Payment for investments may be made only upon delivery of the securities representing the investments to the Treasurer or, if the securities are not represented by a certificate, upon receipt of confirmation of transfer from the custodian.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

The following information classifies deposits and investments by categories of risk as defined in GASB Statement 3, "Deposits with Financial Institutions, Investments and Reverse Repurchase Agreements".

Cash deposits and investments of the District as of June 30, 2002 are comprised of the following:

Investments:	
STAROhio	\$ 8,425,283
Repurchase agreement	1,022,347
Commercial Paper	3,740,241
U.S. Treasury Money Market	1,270
U.S. Government Obligations	<u>46,414,875</u>
	<u>59,604,016</u>
Deposits:	
Demand Deposit Accounts	<u>941,687</u>
Petty cash	<u>978</u>
Total	\$ <u>60,546,681</u>

Deposits: At year-end, the carrying amount of the District's deposits was \$941,687 and the bank balance was \$1,004,866. Of the bank balance, \$100,000 was covered by federal depository insurance and \$904,866 was covered by collateral held by third party trustees in single financial institution collateral pools, but not in the District's name, collateralizing all public funds on deposit with the specific depository institution. In accordance with Section 135.18 of the Ohio Revised Code, all deposits with eligible financial institutions must be collateralized in an amount equal to 110% of uninsured deposits.

Investments: The District's investments are categorized below to give an indication of the level of risk assumed by the District at year-end. Category 1 includes investments that are insured or registered or for which the securities are held by the District or its agent in the District's name. Category 2 includes uninsured and unregistered investments, which are held by the counter party's trust department or agent in the District's name. Category 3 includes uninsured and unregistered investments for which the securities are held by the counter party, or by its trust department or agent but not in the District's name.

The commercial paper, repurchase agreement and U.S. government obligations are categorized for credit risk purposes as Category 3. The District's investments in STAROhio and U.S. Treasury Money Market are unclassified because they are not evidenced by securities that exist in physical or book entry form.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

Note 5--Interfund Transactions

On the fund financial statements, the General Fund has a receivable of \$450,000 that consists of \$110,000 due from the Vocational Adult Education Fund and \$340,000 from non-major governmental funds. These interfund loans were made to provide operating capital.

Interfund transfers for the year ended June 30, 2002, consisted of the following:

Transfer to:	Transfer from:		Total
	General Fund	Non-major Governmental Funds	
General Fund	\$ -	17,747	17,747
Debt Service	1,216,130	-	1,216,130
Vocational Adult Education	1,229,600	-	1,229,600
Capital Projects Fund	4,750,000	-	4,750,000
Non-major Governmental Funds	407,500	-	407,500
Total	\$ 7,603,230	17,747	7,620,977

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due and (3) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

In the year ended June 30, 2002, the School District made a one-time transfer of \$17,747 from the JTPA Fund, which is a nonmajor special revenue fund, to the General Fund. In prior years, the General Fund transferred matching contributions to the JTPA Fund that were in excess of the amounts required by the program. Thus, the current year transfer repaid those excess contributions.

Depreciation expense was charged to governmental functions as follows:

Instruction:	
Vocational	\$ 1,021,032
Adult/continuing	9,739
Support services:	
Pupil	11,600
Administration	244,369
Fiscal	4,979
Operation and maintenance of plant	1,017,218
Pupil transportation	2,947
Central	<u>482,128</u>
Total depreciation expense	<u>\$ 2,794,012</u>

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements

For the Fiscal Year Ended June 30, 2002

Note 7--Risk Management

The District is exposed to various risks of loss related to torts; theft or damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The District has a blanket building, contents and miscellaneous property policy with a \$1,000 deductible. The limits of liability are \$1,000,000 each occurrence and \$1,000,000 aggregate. The District also covers all employees under another District excess liability policy with limits of \$4,000,000 each occurrence and \$4,000,000 aggregate. All policies are purchased from commercial insurance carriers. Settled claims have not exceeded this commercial coverage in any of the past three years. There have been no significant reductions in insurance coverage from the prior year.

The School District participates in the Ohio School Boards Association Workers' Compensation Group Rating Program (GRP), an insurance purchasing pool. The GRP is intended to reduce the School District's premium by virtue of its grouping and representation with other participants in the GRP. The workers' compensation experience of the participating school districts is calculated as one experience and a common premium rate is applied to all school districts in the GRP. Each participant pays its workers' compensation premium to the State based on the rate for the GRP rather than its individual rate. Total savings are then calculated and each participant's individual performance is compared to the overall savings percentage of the GRP. A participant will then either receive money from or be required to contribute to the "Equity Pooling Fund". This insures that each participant shares equally in the overall performance of the GRP. Participation in the GRP is limited to school districts that can meet the GRP's selection criteria. Gates McDonald & Co. provides administrative, cost control and actuarial services to the GRP.

Note 8--Defined Benefit Pension Plans

School Employees Retirement System

The District contributes to the School Employees Retirement System of Ohio (SERS), a cost-sharing multiple employer defined benefit retirement system administered by the School Employees Retirement Board. SERS provides basic retirement benefits, disability, survivor and health care benefits based on eligible service credit to members and beneficiaries. Benefits are established by Chapter 3309 of the Ohio Revised Code. SERS issues a publicly available financial report that includes financial statements and required supplementary information for SERS. The report may be obtained by writing to the School Employees Retirement System, 45 North Fourth Street, Columbus, Ohio 43215-3634.

Plan members are required to contribute 9% of their annual covered salary and the District is required to contribute at an actuarially determined rate. The current rate is 14% of annual covered payroll. The contribution requirements of plan members and employers are established and may be amended, up to statutory maximum amounts, by the SERS's Retirement Board. The District's required contributions to SERS for the fiscal years ended June 30, 2002, 2001, and 2000 were approximately \$778,000, \$735,000 and \$728,000, respectively. 100% of the required contributions have been made for all three years.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

**Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002**

State Teachers Retirement System

The District contributes to the State Teachers Retirement System of Ohio (STRS), a cost-sharing multiple employer defined benefit retirement system administered by the State Teachers Retirement Board. STRS provides basic retirement benefits, disability, survivor and health care benefits based on eligible service credit to members and beneficiaries. Benefits are established by Chapter 3307 of the Ohio Revised Code. STRS issued a publicly available financial report that includes financial statements and required supplementary information for STRS. The report may be obtained by writing to the State Teachers Retirement System, 275 East Broad Street, Columbus, Ohio 43215-3771.

Plan members are required to contribute 9.3% of their annual covered salary and the District is required to contribute 14%. Contribution rates are established by STRS, upon recommendation of its consulting actuary, not to exceed statutory maximum rates of 10% for members and 14% for employers. The District's required contributions to STRS for the fiscal years ended June 30, 2002, 2001, and 2000 were approximately \$3,329,000, \$3,227,000 and \$3,150,000, respectively. 100% of the required contributions have been made for all three years.

Note 9--Postemployment Benefits

The District provides comprehensive health care benefits to retired teachers and their dependents through the State Teachers Retirement System (STRS), and to retired non-certified employees and their dependents through the School Employees Retirement System (SERS). Benefits include hospitalization, physicians' fees, prescription drugs and reimbursement of Medicare premiums. Benefit provisions and the obligations to contribute are established by the Retirement Systems based on authority granted by state statute and are funded on a pay-as-you-go basis.

STRS has statutory authority over how much, if any, of the health care costs will be absorbed by STRS. Most benefit recipients pay a portion of the health care cost in the form of a monthly premium. By Ohio law, the cost of coverage paid from STRS funds shall be included in the employer contribution rate, currently 14% of covered payroll. For the year ended June 30, 2002, the Board allocated employer contributions equal to 4.50% of covered payroll to the Health Care Reserve Fund. For the District, this amount equaled approximately \$1,070,000 during fiscal year 2002. STRS pays health care benefits from the Health Care Reserve Fund. The balance in the fund was \$3.256 billion at June 30, 2001. For the year ended June 30, 2001, net health care costs paid by STRS were \$300.8 million and STRS had 102,132 eligible benefit recipients.

For SERS, coverage is made available to service retirees with 10 or more years of qualifying service credit, disability and survivor benefit recipients. Members retiring on or after August 1, 1989, with less than 25 years of service credit must pay a portion of their premium for health care. The portion is based on years of service up to a maximum of 75% of the premium. For this fiscal year, employer contributions to fund health care benefits were 9.80% of covered payroll.

In addition, SERS levies a surcharge to fund health care benefits equal to 14% of the difference between a minimum pay and the member's pay, pro-rated for partial service credit. For fiscal

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

year 2002, the minimum pay has been established at \$12,400. The surcharge rate added to the unallocated portion of the 14% employer contribution rate provides for maintenance of the asset target level for the health care fund.

The target level for the health care reserve is 150% of annual health care expenses. Expenses for health care for the year ended June 30, 2001 were \$161.4 million and the target level was \$242.2 million. At June 30, 2001, SERS' net assets available for payment of health care benefits was \$315.7 million. SERS has approximately 50,000 participants currently receiving health care benefits. For the District, this amount to fund health care benefits, including the surcharge, equaled approximately \$545,000 during the 2002 fiscal year.

Note 10--Employee Benefits

Compensated Absences

The criteria for determining vacation and sick leave components are derived from negotiated agreements and State laws. Classified employees earn 10 to 20 days of vacation per fiscal year, depending upon length of service. Accumulated, unused vacation time is paid to classified employees and administrators upon termination of employment. Teachers do not earn vacation time.

All teachers, administrators and classified employees earn sick leave at a rate based on their length of contract ranging from 15 days per year to 19 days per year. Sick leave may be accumulated to a maximum depending on the employees' contract. Upon retirement, payment is made for 32% of the employee's accumulated sick leave up to a maximum based on the length of the employee's contract ranging from 66 to 89 days.

Note 11--Long-Term Liabilities

The changes in the District's long-term obligations during fiscal year 2002 were as follows:

	Principal Outstanding 7/1/01	Additions	Reductions	Principal Outstanding 6/30/02	Amounts Due in One Year
<i>Governmental Activities</i>					
General Obligation Bonds:					
Energy Conservation	\$ 7,975,000	-	(845,000)	7,130,000	890,000
Compensated absences	1,292,790	1,172,214	(975,376)	1,489,628	74,500
Total	\$ 9,267,790	1,172,214	(1,820,376)	8,619,628	964,500

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to the Basic Financial Statements For the Fiscal Year Ended June 30, 2002

Energy Conservation Bonds - In July 2000, the District issued unvoted bonds in the amount of \$8,850,000 with coupon interest rates from 4.40% to 5.25% and a maturity of June 1, 2009. The proceeds of the bonds were used to implement building and equipment repair and improvements that provide energy savings. This project was approved by the Ohio Department of Education in accordance with House Bill 264.

Principal and interest requirements to retire the Energy Conservation Bonds outstanding at June 30, 2002, are as follows:

Fiscal Year Ending June 30,		Principal	Interest	Total
2003	\$	890,000	328,880	1,218,880
2004		930,000	289,720	1,219,720
2005		970,000	248,800	1,218,800
2006		1,015,000	205,635	1,220,635
2007		1,060,000	159,960	1,219,960
2008-2009		<u>2,265,000</u>	<u>172,630</u>	<u>2,437,630</u>
Total	\$	<u>7,130,000</u>	<u>1,405,625</u>	<u>8,535,625</u>

The District's voted legal debt margin was \$1,384,315,019 with an unvoted debt margin of \$8,330,500 at June 30, 2002.

Note 12--Contingencies

Grants

The District received financial assistance from federal and state agencies in the form of grants. The expenditure of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and is subject to audit by the grantor agencies. Any disallowed claims resulting from such audits could become a liability of the General Fund or other applicable funds. However, in the opinion of management, any such disallowed claims will not have a material adverse effect on the overall financial position of the District at June 30, 2002.

Litigation

The District is party to legal proceedings and is of the opinion that the ultimate disposition of claims will not have a material effect, if any, on the financial condition of the District.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT
Notes to the Basic Financial Statements
For the Fiscal Year Ended June 30, 2002

Note 13--Required Set-Asides

The District is required by State statute to annually set aside in the general fund an amount based on the statutory formula for the purchase of textbooks and other instructional materials and an equal amount for the acquisition and construction of capital improvements. Amounts not spent by year-end or offset by similarly restricted resources received during the year must be held in cash at year-end and carried forward to be used for the same purposes in future years. The following cash basis information describes the change in the year-end set aside amounts for textbooks, capital acquisition and budget stabilization. Disclosure of this information is required by State statute.

		<u>Textbooks</u>	<u>Capital Improvements</u>	<u>Budget Stabilization</u>
Set-aside balance as of June 30, 2001	\$	(241,203)	-	715,819
Current year set-aside requirement		384,883	384,883	-
Less qualifying disbursements and offsets		<u>(1,547,791)</u>	<u>(5,287,845)</u>	<u>(715,819)</u>
Total		<u>(1,404,111)</u>	<u>(4,902,962)</u>	<u>-</u>
Balance carried to FY2003		<u>(1,404,111)</u>	<u>-</u>	<u>-</u>
Cash balance as of June 30, 2002	\$	<u>-</u>	<u>-</u>	<u>-</u>

Since the District had offsets and qualifying disbursements during the year that reduced the set-aside amount for textbooks and instructional materials to below zero, these extra amounts may be used to reduce the set-aside requirements of future years. However, the excess qualifying disbursements of the capital improvement set-aside may not be used to reduce the capital improvement set-aside requirements of future years.

The Ohio General Assembly eliminated the requirement for the budget stabilization reserve and effective April 10, 2001, the Board of Directors could choose to eliminate the reserve with the exception of rebates received from the Bureau of Workers' Compensation. During the current fiscal year, the District disposed of the remaining budget stabilization reserve in accordance with statutory requirements.

Note 14--Insurance Purchasing Pool

The School District participates in the Ohio School Boards Association Workers' Compensation Group Rating Program (GRP), an insurance purchasing pool. The GRP's business and affairs are conducted by a three member Board of Directors consisting of the President, the President-Elect and the Immediate Past President of the OSBA. The Executive Director of the OSBA, or his designee, serves as coordinator of the program. Each year, the participating school districts pay an enrollment fee to the GRP to cover the costs of administering the program.

Note 15--School Funding Decision

On September 6, 2001, the Ohio Supreme Court issued its latest opinion regarding the State's school funding plan. The decision identified aspects of the current plan that require modification if the plan is to be considered constitutional, including:

- A change in the school districts that are used as the basis for determining the base cost support amount. Any change in the amount of funds distributed to school districts as a result of this change must be retroactive to July 1, 2001, although a time line for distribution is not specified.
- Fully funding parity aid no later than the beginning of fiscal year 2004 rather than fiscal year 2006.

The Supreme Court relinquished jurisdiction over the case based on anticipated compliance with its order.

The State of Ohio, in a motion filed September 17, 2001, asked the Court to reconsider and clarify the parts of the decision changing the school districts that are used as the basis for determining the base cost support amount and the requirement that changes be made retroactive to July 1, 2001. In November 2001, the Court granted the request for reconsideration, but also ordered the parties to participate in a settlement conference with a court appointed mediator. On March 21, 2002, the mediator issued his final report indicating that the conference was unable to produce a settlement. The case is now under reconsideration by the Court.

The School District is currently unable to determine what effect, if any, this decision will have on its future State funding and on its financial operations.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Notes to Required Supplementary Information

For the Fiscal Year Ended June 30, 2002

Note A Budgetary Basis of Accounting

While the District is reporting financial position, results of operations, and changes in fund balances on the basis of generally accepted accounting principles (GAAP), the budgetary basis as provided by law is based upon accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The Schedule of Revenues, Expenditures and Changes in Fund Balances - Budget and Actual (Non-GAAP Budgetary Basis) is presented on the budgetary basis to provide a meaningful comparison of actual results with the budget. The major differences between the budget basis and GAAP basis are that:

Revenues are recorded when received in cash (budget basis) as opposed to when susceptible to accrual (GAAP basis).

Expenditures are recorded when paid in cash (budget basis) as opposed to when the liability is incurred (GAAP basis).

Encumbrances are treated as expenditures for all funds (budget basis) rather than as a reservation of fund balance for governmental fund types (GAAP basis).

The following tables summarize the adjustments necessary to reconcile the excess of revenues and other sources over (under) expenditures and other uses on the GAAP statements and the budgetary basis schedule:

	<u>General</u>	<u>Vocational Adult Education</u>
GAAP basis	\$ 10,684,994	215,581
Revenue accruals	(137,005)	-
Expenditure accruals	(801,209)	107,803
Other sources	(252,000)	98,000
Encumbrances	<u>(206,120)</u>	<u>(20,544)</u>
Budgetary basis	\$ <u>9,288,660</u>	<u>400,840</u>

**COMBINING
STATEMENTS AND
INDIVIDUAL FUND
SCHEDULES**

General Fund

The **General Fund** accounts for those resources traditionally associated with the general governmental operations that are not required to be accounted for by another fund. The District uses the General Fund to account for income generated and expenditures incurred in connection with providing services to the public as part of the District's high school vocational educational programs. Further, the District accounts for operations that provide goods or services to other governmental units on a cost-reimbursement basis, such as workshops and building rentals, in the General Fund.

Special Revenue Funds

Special Revenue funds are established to account for revenue from specific sources, which are restricted, legally or otherwise, to expenditures for specific purposes. During the fiscal year ended June 30, 2002, the District utilized the following Special Revenue funds:

The **Food Services Fund** accounts for the financial transactions related to the food service operation of the School District.

The **Uniform School Supplies Fund** accounts for the purchase and sale of school supplies, such as workbooks and toolkits, as adopted by the Board of Directors for use in the District.

The **District Managed Student Activity Fund** accounts for those student activity programs which have student participation in the activity but do not have student management of the program.

The **Economic Education Fund** accounts for state monies received and expended in conjunction with Consumer Education projects funded by the State of Ohio, Ohio Department of Education, Consumer Education Unit.

The **Career Education Fund** accounts for state monies received and expended in conjunction with making students aware of employment opportunities. A portion of these monies flows through to the affiliate school districts.

The **Vocational Adult Education Fund** accounts for revenues and expenditures involved in upgrading and retraining out-of-school youth and adults for the purpose of improving their skills and knowledge in their current or planned occupation.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Description of Funds

The **Excellence in Education Fund** accounts for pupil competency assessment and instructional development in English Composition, Mathematics and Reading as required by the minimum standards for Ohio schools. This fund is also provided to account for examples related to the Ohio Science Olympics and to the International Science and Engineering Fair.

The **Management Information Systems Fund** is used to account for state funds provided to finance, in part, additional costs associated with state-legislated reporting requirements.

The **Public School Preschool Fund** accounts for state resources provided to assist the District with the cost of preschool programs for three- and four-year-old children.

The **SchoolNet Fund** accounts for wiring to all classrooms in the state and to provide a computer workstation and related technology for every classroom in Ohio's low-wealth school districts.

The **Data Communications Fund** accounts for money appropriated for Ohio Educational Computer Network Connections.

The **SchoolNet Professional Development Fund** accounts for a limited number of professional development subsidy grants.

The **Interactive Video Distance Learning Fund** accounts for State money used to finance the interactive distance learning project.

The **Vocational Education Enhancement Fund** accounts for Vocational Education Enhancements that: 1) expand the number of students enrolled in Tech Prep programs, 2) enable students to develop career plans, to identify initial educational and career goals, and to develop a career passport which provides a clear understanding of the student's knowledge, skills, and credentials to present to future employers, universities, and other training institutes and 3) replace or update equipment essential for the instruction of students in job skills taught as part of vocational program of programs approved for such instruction by the State Board of Education.

The **Special Services Fund** accounts for receipts and expenditures for special needs testing and placement.

The **Miscellaneous State Grants Fund** accounts for various monies received from state agencies which are not classified elsewhere.

GREAT OAKS INSTITUTE OF TECHNOLOGY AND CAREER DEVELOPMENT

Description of Funds

The **Adult Basic Education Fund** accounts for federal monies used to provide for instructional programs for persons 16 years of age and older who are not enrolled in school and who have less than a twelfth-grade education or its equivalent. Funds are expended for development of basic educational skills; increase of opportunities for useful employment; improvement of attitudes toward self, family and community.

The **J T P A Fund** accounts for revenues received from the Job Training Partnership Act, Ohio Rehabilitation Services Commission and local county governments to provide counseling and training to low income and disabled persons in the community and expenditures of such.

The **Title II (N D E A) Fund** accounts for funds for strengthening instruction in various subjects through acquisitions of laboratory and other special equipment and materials and through minor remodeling.

The **Vocational Education Amendment Fund** is used to account for the development of vocational education programs in the following categories: secondary, post-secondary, adult, disadvantaged and handicapped persons, exemplary programs, cooperative education, ancillary services, research, advisory committees, and work-study projects.

The **Federal Grants Thru State Fund** accounts for financial assistance to State and Local educational agencies to meet special needs of educational deprived children.

The **Chapter 2 Fund** accounts for transactions related to federal revenue which supports the implementation of a variety of programs such as computer education, gifted and talented programs, in-service training and staff development.

The **Miscellaneous Federal Grants Fund** accounts for various monies received directly from the federal government which are not classified elsewhere.

The **Child Care Services Fund** accounts for operations of child care for students and is financed partly through user charges.

Debt Service Fund

To account for the accumulation of resources for, and the payment of, general long-term debt principle and interest.

The **Debt Retirement Fund** accounts the accumulation of resources and payment of the general obligation bonds' principal and interest.

Capital Projects Fund

These funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary or trust funds.

The **Capital Projects Fund** was established and utilized to account for transactions related to the acquisition or construction of major capital facilities. Such projects which are financed by a proprietary fund are accounted for separately in that fund, rather than in the Capital Projects Fund.
