

Board of Trustees Wright State University 3640 Colonel Glenn Highway Dayton, Ohio 45435

We have reviewed the *Report of Independent Auditors* of the Wright State University, Greene County, prepared by Crowe Horwath LLP, for the audit period July 1, 2012 through June 30, 2013. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Wright State University is responsible for compliance with these laws and regulations.

Dave Yost Auditor of State

January 21, 2014

# Management's Discussion and Analysis Fiscal Year Ended June 30, 2013

Wright State University's Management Discussion and Analysis (MD&A) presents an overview of its financial condition and assists the reader in focusing on significant financial issues for the year ended June 30, 2013 with selected comparative information for the years ended June 30, 2012 and 2011. The discussion has been prepared by management and should be read in conjunction with the accompanying financial statements and footnotes. The financial statements, footnotes, and this discussion are the responsibility of management.

### **Financial and Other University Highlights**

- Wright State issued \$23.2 million of General Receipts Bonds during 2013, \$9 million of which is to help pay for construction costs of a student academic success center located within a new classroom building, a new multi-functional student commons building, and a grounds storage facility. In addition, \$14.2 million of the bonds were issued as an advance refunding of \$14.4 million outstanding Series 2004 General Receipts serial and term bonds, which will provide an economic gain to the University of \$1.3 million. During the year the University also entered into a Loan Agreement with the Ohio Air Quality Development Authority to fund a second phase of an energy conservation project. This resulted in the issuance of \$25.5 million in notes payable, supported by \$17.2 million of tax-exempt bonds and \$8.3 million of federally subsidized qualified energy conservation bonds (QECB). The issuance of the QECB enabled the University to realize an overall net effective interest rate after a federal rebate of only 1.51%.
- The energy conservation project referenced above is expected to reduce energy consumption by 40 percent through the funded energy conservation measures that include applying state-of-the-art technology to modernize heating/cooling plants across the University. The savings are estimated to exceed \$35 million over the next 15 years which considerably exceeds the debt service on the notes over the life of the debt.
- For the fourth consecutive year, Wright State was named to the President's Higher Education Community Service Honor Roll with Distinction, the highest federal recognition a college or university can receive for its commitment to volunteering, service-learning, and civic engagement. This award is given by the Corporation for National and Community Service. Only six Ohio schools were given the honor with distinction.
- Two different sources have named Wright State to their top "Military Friendly Schools" in recognition
  of the support the University provides for student veterans and students in the military. Both Victory
  Media and Military Advanced Education bestowed this honor on the University for the fourth year in a
  row. Victory Media honors the top 15 percent of more than 7,000 colleges, universities, and trade
  schools for doing the most to help America's veterans as students.
- Wright State's Model UN team continued its remarkable streak at the National Model United Nations Conference, receiving the highest recognition possible at the competition for the 34<sup>th</sup> year in a row. Competing against 149 universities from around the world, Wright State was one of 20 colleges to receive Outstanding Delegation recognition.
- Wright State celebrated its 45<sup>th</sup> anniversary as a university. Three university presidents appeared
  together during a celebration to salute the birth of the University and to forecast the future of higher
  education. The celebration examined Wright State's beginnings as an extension of two other Ohio
  public universities before it gained independent status as a university several years later.
- The University raised tuition by only 3.5% for all degree levels at both its campuses in 2013. This is identical with the 3.5% raise in undergraduate tuition rates in 2012. However, in 2012 graduate tuition

increased 4.5% while the Boonshoft School of Medicine (BSOM) and School of Professional Psychology tuition increased 5%. The University continues efforts to keep the cost of tuition affordable for students and their families despite the university's permanent loss of over \$13 million in state and federal appropriations since 2011. Wright State continues to maintain the fourth lowest instate undergraduate tuition rate among Ohio's thirteen four-year public institutions.

- Total state appropriations fell only \$0.3 million in 2013 from 2012 after removing the effect of OhioLINK (a statewide library initiative for which the University serves as fiscal agent). This follows 2012 when state appropriations fell \$0.4 million from 2011 after removing the effect of OhioLINK. With no real increase in state appropriations and only modest tuition increases, the University is learning to maintain and grow its operations even after the elimination of federal stimulus funds the State was passing through to the University in 2011 and 2010 to offset large decreases in state appropriations. This new funding model the University is utilizing includes generating new and alternative revenue streams and performing more resource or expense optimization. In 2013 the University was involved and helpful in defining a new formula for earning state subsidy that is based more upon degree and course completions. We also entered into a new comprehensive hospitality services contract that should expand and enhance revenue. In addition, the University has been in the midst of much business process reengineering that has resulted in the energy conservation measures, a re-design of our health care plans, and a discovery process for an enterprise print solution for the entire University. These types of expense optimization efforts are expected to continue for years to come.
- Net position decreased \$8.5 million in 2013 primarily in invested in capital assets largely due to the issuance of a net \$34.5 million of new bonds and notes payable this year. The majority of the expenditures on debt-funded projects have not yet been incurred. Net position decreased \$9.0 million in 2012, primarily in unrestricted net assets. This unrestricted decrease was the result of weak investment market performance that produced a \$0.2 million investment loss compared to the budgeted \$7.4 million for investment income. Tuition and fee revenue was also slightly lower than expected.
- Fall 2012 headcount was 17,930, which represented a 9.1% decrease from fall of 2011. Fall 2011 headcount was 19,721, slightly lower than the record enrollment of 19,793 from the fall of 2010. The decrease in the 2012 headcount is primarily attributable to the effort of students wanting to graduate before the fall of 2012 when the University converted from quarters to semesters. While this decrease had a negative impact on tuition revenue, it was offset by a pleasant outperformance of the budget in the investment market. This lower enrollment level will be the university's new baseline for enrollment growth. The University plans on being strategic and deliberate in managing a slow but steady increase in its student body.
- The University completed its first fiscal year utilizing the semester academic calendar for both the fall and spring terms during fiscal 2013. While the summer term of fiscal 2013 continued with the quarter system, the immediate transition to semesters in the subsequent fall term was considered a success. The three to four years of preparation and planning before Fall 2012 paid dividends as there were minimal transitional issues with students. This transition aligned Wright State's calendar with other universities' to better facilitate collaborative academic programs, student transfer and articulation.

### **Using the Annual Report**

This annual report includes three financial statements: the Statement of Net Position, the Statement of Revenues, Expenses and Changes in Net Position, and the Statement of Cash Flows. These financial statements are prepared in accordance with GASB Statement No. 35, Basic Financial Statements-and Management's Discussion and Analysis-For Public Colleges and Universities as amended by GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position. These financial statements focus on the financial condition of the University, the results of operations, and cash flows of the University as a whole. All comments and discussions included in this discussion and analysis relate only to Wright State University and not to the Wright State University Foundation unless specifically noted.

The three financial statements should help the reader of the annual report understand the university's overall financial condition and how it has changed as a result of the current year's financial activities. These financial statements present similar information to that disclosed in private sector (i.e. corporate) financial statements. The financial statements will also assist the reader in evaluating the ability of the University to meet its financial obligations. The Statement of Cash Flows presents information related to both cash inflows and cash outflows and is further categorized by operating, noncapital financing, capital and related financing, and investing activities.

#### **Statements of Net Position**

The Statement of Net Position, which reports all assets, liabilities, deferred inflows and deferred outflows of the University, presents the financial position of the University at the end of the fiscal year. Our net position is simply the residual after subtracting liabilities and deferred inflows from the sum of assets and deferred outflows. It should be noted the University had no deferred inflows or deferred outflows for the years ended June 30, 2013, 2012, and 2011. The change in net position during the fiscal year is an indicator of the change in the overall financial condition of the University during the year. A summary of the university's assets, liabilities, and net position as of June 30 is as follows:

|  |                                   | 2013                         | 2012                        | 2011                        |  |  |  |  |
|--|-----------------------------------|------------------------------|-----------------------------|-----------------------------|--|--|--|--|
|  | (All dollar amounts in thousands) |                              |                             |                             |  |  |  |  |
| Current assets Noncurrent assets:                            | \$                                | 133,336                      | \$ 87,757                   | \$ 86,001                   |  |  |  |  |
| Capital assets, net  |                                   | 305,024                      | 309,490                     | 304,459                     |  |  |  |  |
| Other  | _                                 | 150,115                      | 179,152                     | 140,790                     |  |  |  |  |
| Total assets   |                                   | 588,475                      | 576,399                     | 531,250                     |  |  |  |  |
| Current liabilities Noncurrent liabilities Total liabilities | •                                 | 76,668<br>117,767<br>194,435 | 83,975<br>89,874<br>173,849 | 78,999<br>40,717<br>119,716 |  |  |  |  |
| Net position:  |                                   | 205 500                      | 270 770                     | 272.400                     |  |  |  |  |
| Invested in capital assets Restricted                        |                                   | 265,509                      | 270,770                     | 272,468                     |  |  |  |  |
| Unrestricted   |                                   | 18,351                       | 19,730                      | 19,232                      |  |  |  |  |
| Total net position   | \$                                | 110,180<br>394,040           | 112,050<br>\$ 402,550       | 119,834<br>\$ 411,534       |  |  |  |  |

The university's net position decreased \$8.5 million in 2013, primarily in capital assets. Although the University was in the midst of a number of large and significant projects during 2013, there was a decline in net capital assets of \$5.2 million after the effect of depreciation. While progress was made on the second phase of the energy conservation projects, the Neuroscience and Engineering Collaboration (NEC) building, and the new classroom building; the preponderance of the work on those projects will be performed during the next two fiscal years. Only modest levels of other acquisitions and improvements were performed during 2013. Restricted net position fell \$1.4 million primarily as a result of the university's decision to reduce participation in a loan program and return loan funds to the federal government. In addition, unrestricted net position decreased by \$1.9 million as the University converted an internal loan fund into need based financial aid and awarded the aid during 2013. The university's net position decreased \$9.0 million in 2012 from 2011, primarily due to a downturn in investment earnings. Investment returns in 2012 were non-existent and created an unanticipated income shortfall of \$7.6 million, primarily causing the reduction in unrestricted net position.

Total assets increased \$12.1 million in 2013 over 2012. Current assets, comprised primarily of cash and operating investments, student and sponsor receivables, and prepaid expenses, increased by \$45.6 million in 2013 from 2012. This increase is the result of a number of items. Restricted cash and

investments increased by \$54.5 million during 2013 as a result of unspent proceeds from new borrowings for a number of capital projects. However, the total net increase in restricted cash and investments was only \$28.3 million, as there was a reduction in noncurrent restricted cash and investments of \$26.2 million. Operating cash and investments decreased \$18.6 million due primarily to a couple of items. First, the payroll payment schedule for academic faculty was accelerated due to the conversion of the academic calendar from the quarter system to the semester system. This resulted in approximately \$10.0 million more in cash outlays for payroll during 2013 than in 2012. In addition, accounts receivable increased \$12.9 million, which also contributed substantially to the decrease in operating cash and investments. This increase in accounts receivable is a result of several items. One of these was an effect of the conversion to semesters. Approximately \$4.0 million of student billings for Summer 2013 were processed before June 30, 2013 whereas in the prior year, comparable billings for Summer 2012 were not processed until after June 30, 2012. An additional \$1.7 million increase in other student receivables related largely to third party sponsor billings for international students. Sponsor receivables also increased \$6.2 million primarily due to the timing of billings for the Federal Direct Lending program for summer term and advances and billings to the affiliated Wright State Applied Research Corporation and its research related activities. Deferred charges primarily represent financial aid disbursed in the current year which will be applied to the upcoming year. This balance decreased \$1.8 million in 2013, as most of the aid was applied to 2013 due to the change from quarters to semesters. Prepaid expenses comprise another large share of current assets at \$12.4 million in 2013 and \$13.8 million in 2012. These assets are primarily composed of license agreements for the OhioLINK program for which the University is the fiscal agent. Current assets only increased \$1.8 million from 2011 to 2012.

Other noncurrent assets decreased \$29.0 million from \$179.1 million in 2012 to \$150.1 million in 2013. These assets are comprised of long-term investments, long-term student loans receivable, and long-term prepaid expenses and deferred charges. Long-term unrestricted investments represent the majority of the balance in both 2013 and 2012 at \$124.6 million and \$128.6 million, respectively, resulting in a three percent decrease of \$4.0 million. This decrease is a continued reflection of the aforementioned accelerated payroll schedule and increase in receivables mentioned with the *current assets* variances. Restricted investments, comprised of unspent bond and notes payable proceeds that will be spent over the next two to three years on various capital projects, also decreased from \$37.9 million in 2012 to \$11.7 million in 2013. This decrease, in conjunction with the increase in restricted cash and investments, is a reflection of the increased borrowings in 2013. Loans receivable comprise the balance of the noncurrent assets at \$12.0 million and \$12.1 million in 2013 and 2012, respectively. Long-term prepaids and deferred charges increased \$1.2 million primarily due to bond issuance costs.

Capital assets, net of depreciation decreased \$4.5 million from \$309.5 million in 2012 to \$305.0 million in 2013. The largest project activity in 2013 involved the second phase of the energy conservation project for which over \$4.5 million was spent. Other projects included improvements made to White Hall, a Welcome Center and Raider Connect student one-stop center in the Student Union, the completion of the water main project substantially performed in 2012, and the initial phases of the NEC building and new Student Classroom building. Capital assets increased \$5.0 million from 2011 to 2012. Major projects performed and/or completed in 2012 included the Rinzler Student Sports Complex, the Schuster Concert Hall, and the replacement of all Dayton campus main water lines. Also in 2012, the University received a \$5.8 million donation of software to be utilized by students. Annual depreciation expense rose from \$19.7 million in 2012 to \$21.4 million in 2013 as the large 2012 acquisitions experienced their first full year of depreciation, which contributed to the decrease in net capital assets.

Total assets of the Wright State University Foundation increased from \$110.3 million at June 30, 2012 to \$119.9 million at June 30, 2013. The \$9.6 million increase is largely related to increases in long-term investments and capital assets. Cash and cash equivalents and long-term investments comprise \$110.6 and \$103.8 million of the total assets balances at June 30, 2013 and 2012, respectively.

Current liabilities are comprised primarily of accounts payable and accrued liabilities; deferred revenues from both student fees and advance payments for contracts and grants; and the current portion of long-term liabilities. These liabilities decreased \$7.3 million from \$84.0 million at June 30, 2012 to \$76.7 million at June 30, 2013. The overall change in current liabilities is comprised of changes in several balances. Overall accounts payable remained relatively constant at \$13.1 million in both 2013 and 2012. Accrued

liabilities decreased \$6.4 million largely due to a decrease in the accrual of academic faculty payroll as of June 30, 2013 resulting from the change in academic calendar from quarters to semesters. Deferred revenue decreased \$3.5 million from \$38.9 million in 2012 to \$35.4 million in 2013. The two primary components of deferred revenue are income received in advance of expenditures from project sponsors on contracts and grants and summer quarter tuition and fees related to 2014 received before June 30, 2013. The \$3.5 million decrease resulted from a decrease of \$6.2 million in advanced sponsor payments, primarily from the OhioLINK program, partially offset by an increase of \$2.7 million in deferred student fees resulting from the additional student billings that occurred in 2013 due to the change in the academic calendar. The current portion of long-term liabilities increased \$2.2 million from \$11.4 million in 2012 to \$13.6 million in 2013. This is the result of the additional debt issued by the University in 2013 which in turn increased the current portion of Wright State's long-term liabilities.

Current liabilities increased \$5.0 million from \$79.0 million at June 30, 2011 to \$84.0 million at June 30, 2012. The bulk of the increase occurred in accounts payable which grew \$4.0 million from \$9.1 million in 2011 to \$13.1 million in 2012 primarily due to some large invoices received in June of 2012 for the OhioLINK program and increases in outstanding contractor payables for some of the university's on-going capital projects.

Noncurrent liabilities increased \$27.9 million from \$89.9 million at June 30, 2012 to \$117.8 million at June 30, 2013. This increase is the result of the University issuing \$34.5 million of new debt in 2013 less another year of debt service for all outstanding debt. Noncurrent liabilities increased \$49.2 million from \$40.7 million at June 30, 2011 to \$89.9 million at June 30, 2012. This increase is the result of the University issuing \$56.7 million of new debt in 2012 less another year of debt service for all outstanding debt.

*Net position* represents the remaining balance of the university's assets after adding deferred outflows and deducting liabilities and deferred inflows. A more detailed summary of the university's net position as of June 30 is as follows:

|                            | 2013       | 2012                              | 2011       |  |  |  |  |
|----------------------------|------------|-----------------------------------|------------|--|--|--|--|
|                            | (All doll  | (All dollar amounts in thousands) |            |  |  |  |  |
| Invested in capital assets | \$ 265,509 | \$ 270,770                        | \$ 272,468 |  |  |  |  |
| Restricted expendable      | 18,351     | 19,730                            | 19,232     |  |  |  |  |
| Unrestricted:              |            |                                   |            |  |  |  |  |
| Designated                 | 112,253    | 114,789                           | 118,935    |  |  |  |  |
| Undesignated               | (2,073)    | (2,739)                           | 899        |  |  |  |  |
| Total net position         | \$ 394,040 | \$ 402,550                        | \$ 411,534 |  |  |  |  |

Invested in capital assets represents the university's capital assets after subtracting accumulated depreciation and the principal amount of outstanding debt attributable to the acquisition, construction or improvement of those assets. During 2013, the University constructed a Welcome Center at the front entrance of the Student Union, completed the student Raider Connect Center, began work on the new NEC building and new Classroom building, made substantial progress on the second phase of the energy conservation project, and performed a number of other improvements to the university's facilities. During 2012 the University replaced water mains on the Dayton campus, renovated and created the Schuster Concert Hall and provided additional athletic center facilities by constructing the Rinzler Student Sports Complex. In addition, the University received donated equipment and software of approximately \$5.8 million during 2012.

Restricted expendable represents funds externally restricted to specific purposes, such as student loans or sponsored projects. The decrease of \$1.4 million is primarily the result of the university's decision to discontinue the use of a federal loan program, which resulted in the return of funds. \$17.7 million at June 30, 2013 and \$18.9 million at June 30, 2012 of the restricted expendable fund balances represent funds restricted for student loans.

Unrestricted net position represents funds the University has at its disposal to use for whatever purposes it determines appropriate. While these funds are not subject to external restrictions, the University has designated these funds internally for various academic, research, student aid, and capital purposes. Colleges and divisions are permitted to retain their own budgeted funds that are not spent at the close of each fiscal year. The University believes this practice permits the units to manage their resources more effectively, allowing them to hold them for higher priorities in later years. This policy also benefits the University as a whole by encouraging the accumulation of reserves that provide financial stability during periods of fiscal stress and that generate investment income that supplements other revenue sources. Unrestricted net position decreased \$1.9 million in 2013, from \$112.1 million in 2012 to \$110.2 million in 2013. The \$1.9 million decrease can be primarily attributed to the conversion of a university loan fund to a need based financial aid scholarship program. This amount was awarded and spent during 2013. The university's plan is to strengthen the unrestricted undesignated fund balance through enrollment growth and retention of students.

### Statements of Revenues, Expenses and Changes in Net Position

The Statement of Revenues, Expenses and Changes in Net Position presents the results of operations for the University. A summary of the university's revenues, expenses and changes in net position for the year ended June 30 is as follows:

|                                     | 2013                              | 2011              |               |  |  |  |  |  |
|-------------------------------------|-----------------------------------|-------------------|---------------|--|--|--|--|--|

Interpretation of the university's Statements of Revenues, Expenses, and Changes in Net Position is complicated by the fact that Wright State University serves as the fiscal agent for the statewide library program known as OhioLINK. This program's revenues from state appropriations, federal pass-through

grants (grants and contracts) and from other college and university libraries (grants and contracts) and expenses are all included in our financial statements. At certain points in this analysis, we present information net of OhioLINK revenues or expenditures.

The total revenues and expenses attributable to OhioLINK are as follows:

### OhioLINK Revenues and Expenses For the Year Ended June 30

|                      | 2013          | 2012          | Difference | Percent<br>Increase<br>(Decrease) |
|----------------------|---------------|---------------|------------|-----------------------------------|
| Revenues:            |               |               |            |                                   |
| Grants and contracts | \$ 31,987,124 | \$ 31,178,164 | \$ 808,960 | 2.6%                              |
| State appropriations | 6,086,889     | 6,510,387     | (423,498)  | (6.5)%                            |
| Total revenues       | \$ 38,074,013 | \$ 37,688,551 | \$ 385,462 | 1.0%                              |
| Expenses:            |               |               |            |                                   |
| Total OhioLINK       | \$ 38,074,013 | \$ 37,688,551 | \$ 385,462 | 1.0%                              |
|                      |               |               |            |                                   |

The University continues to rely upon state appropriations and student tuition and fees as its primary revenue sources for its core programs and university operations. In addition to these two revenue sources, which amounted to over 56 percent of the university's total 2013 revenues, another 32 percent of 2013 revenues were in the form of grants and contracts, a restricted revenue source received from external sponsors of specific projects. Although the accounting standards classify state appropriations as a nonoperating revenue source in the financial statements, the University continues to manage state funding as an operating revenue item, as it relies upon state funding as a significant (although declining) funding source for ongoing operations. After the recent few years of rising or steady enrollments, Wright State enrollments declined nine percent in 2013 compared to 2012. The University believes the largest contributor to this downturn was the strong desire of students to graduate prior to the switch in the academic calendar from quarters to semesters. This was demonstrated by the record number of graduates at Wright State in the Spring term of 2012. The 2013 decrease in enrollment, in conjunction with modest increases in tuition rates, provided only a slight increase in net tuition revenue of approximately 0.4 percent. The State of Ohio's funding actually decreased in 2013, net of OhioLINK, by \$0.3 million. Therefore the trend of increasing tuition and decreasing state appropriations as a percent of total revenues experienced for at least the last three decades continued into 2013, although by a much smaller margin due to the downturn in enrollment. The pattern and trend of students and their families paying an ever increasing share of the cost of education continues.

The State of Ohio has been making strides at improving its own budgetary position. One outcome of this effort was collaborating with Ohio's public higher education institutions and redefining how state subsidy is earned. Beginning in 2014, rather than subsidy being earned primarily based upon enrollments, subsidy will be earned primarily based upon degree and course completions. While there are other influences and factors affecting the actual allocation of the subsidy, this change will have the effect of promoting the importance of the academic success of the student, which is parallel with the university's priorities. Wright State views the changes to the subsidy allocation model as very positive for both the students and the University.

Internally, the University continues its efforts to develop and implement a new resource allocation model that focuses on strategic incentives for revenue growth and review of current academic programs and administrative processes as opposed to an allocation based on simple expense reductions. In addition, the University has been successful in expanding its applied research portfolio, partnering with our neighboring Wright Patterson Air Force Base as well as regional commercial enterprises to help drive and create economic development and jobs in the area. These initiatives have the potential to enhance revenues for the University and should help offset some of the decline in our more traditional revenue sources such as state appropriations. Trends have shown the amount of state appropriations allocated to

Wright State University and higher education in general have not kept pace with overall enrollment growth and have in fact been shrinking, requiring the University to raise tuition at rates higher than desired. While the University is hopeful more state resources will be invested in higher education as we move forward, we cannot rely upon that hope and therefore we must develop alternative revenue sources and reengineer our business model.

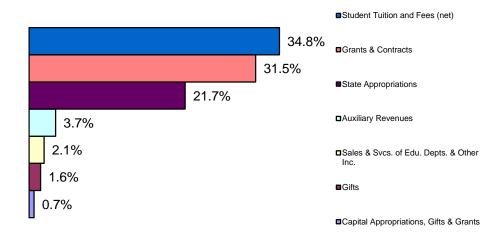

The table below depicts how declining state funding in the past three decades has forced universities to shift the burden for funding the cost of higher education to students and their families.

State Appropriations per Dollar of Gross Tuition

|             |                  |           | State          | Net State      |
|-------------|------------------|-----------|----------------|----------------|
|             |                  | /         | Appropriations | Appropriations |
|             |                  |           | net of         | per Dollar of  |
| Fiscal Year | Gross Tuition    |           | OhioLINK       | Gross Tuition  |
| 1980        | \$<br>13,833,157 | \$<br>; _ | 29,604,813     | \$<br>2.14     |
| 1990        | 40,939,473       |           | 63,889,505     | 1.56           |
| 2001        | 74,956,371       |           | 86,874,854     | 1.16           |
| 2005        | 121,717,222      |           | 84,724,080     | 0.70           |
| 2010        | 161,383,354      |           | 97,498,261     | 0.60           |
| 2011        | 174,830,992      |           | 96,735,697     | 0.55           |
| 2012        | 180,670,354      |           | 83,138,572     | 0.46           |
| 2013        | 183,505,881      |           | 82,854,498     | 0.45           |

The table above communicates a very strong continuing trend that regardless of efforts and intentions on the part of the State, the University must find ways to generate substantial amounts of revenue from sources other than state appropriations if it wishes to lessen the financial burden that has been placed upon students and their families. State funding has not kept up with the growth and increased diversity of higher education. Universities are serving a broader role in the educational process not only providing academic programs but also an array of research, community engagement, and job creation in addition to other activities. This has necessitated placing a greater share of the total costs of education on the students themselves over the years. In an attempt to reverse this trend the University continues to pursue supplements to its revenue sources. Research continues to be a focus, as does a strong emphasis on fundraising. Even though the University has raised its tuition in almost all years when allowed by state law, the University continues to maintain its position in the State with a lower than average level of tuition and fees relative to other Ohio four-year public institutions. This has been the case for at least a decade now. Wright State still ranks as the fourth lowest (out of 13) of the four-year public institutions with respect to undergraduate student tuition rates. It should be noted that two of the lower three universities receive special state funding for the purpose of subsidizing tuition that Wright State does not receive.

Below is a graphic illustration of revenues by source for the year ended June 30, 2013.

State appropriations decreased from \$89.6 million in 2012 to \$88.9 million in 2013, a decrease of \$0.7 million. OhioLINK appropriations decreased from \$6.5 million in 2012 to \$6.1 million in 2013. When accounting for the change in the OhioLINK funding, state appropriations actually fell \$0.3 million in 2013. Therefore, state appropriations were relatively flat. While the University does not expect any dramatic changes in the level of funding, it is optimistic that the recent changes in the method of allocation of state appropriations will provide some modest increase in funding in future years. State appropriations were \$88.0 million in 2011, resulting in a \$1.6 million increase in 2012. After removing the effect of a \$2.0 million increase in OhioLINK funding in 2012, there was a \$0.4 million decrease.

Net student tuition and fees were \$142.5 million, \$141.9 million, and \$134.0 million, in 2013, 2012, and 2011, respectively which provided an increase of .4% from 2012 to 2013 and 5.9% from 2011 to 2012. In 2013, tuition increased 3.5% for all levels and both campuses. Despite a large decrease in student FTE in 2013, the 3.5% tuition increase and more summer term revenue recognized in 2013 as a result of the conversion from quarters to semesters resulted in a net increase of 0.4% in tuition and fee revenue, net of scholarship allowances (financial aid applied against a student's tuition bill). The increase is 1.6% prior to the application of the scholarship allowances. In 2012, tuition increased 3.5% at the undergraduate and 4.5% at the graduate level and 5.0% for Boonshoft School of Medicine, School of Professional Psychology, and the Doctor of Nursing Practice. Due to the mix of students and student credit hours, the gross tuition increase was only 3.3% before applying the scholarship allowance.

Grants and contracts were \$129.0 million in 2013, increasing \$3.4 million from the 2012 level of \$125.6 million. The 2011 level was \$130.1 million. The \$3.4 million increase primarily resulted from an increase in revenues from the private colleges and universities for the OhioLINK program and increases in revenues for billings related to the Wright State Applied Research Corporation. These increases totaled approximately \$4.2 million. In addition, the federal PELL financial aid awards decreased by \$1.2 million in 2013. The 2012 decrease was primarily the result of a decrease in externally funded financial aid.

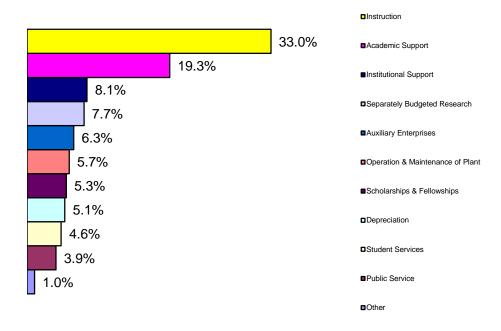

Auxiliary revenues were \$15.2 million, \$16.3 million, and \$17.1 million, for the years ended June 30, 2013, 2012, and 2011, respectively. Auxiliary enterprises are comprised of residence services, bookstores, food services, vending, parking and transportation, intercollegiate athletics, the Student Union, and the Nutter Center. The \$1.1 million decrease in revenues in 2013 occurred largely as a result of a decline in enrollment as food services and residence services revenues fell substantially and other revenues such as vending and bookstore also saw a decline. The 2012 decline was primarily as a result of the University switching from a self-operated bookstore at its Celina Campus to a commission based contractor model whereby the University no longer recorded all gross sales but rather a commission income stream.

Sales and services, which are primarily revenues generated from specific departmental sales activities to organizations external to the University, were \$6.4 million, \$7.4 million, and \$6.9 million, for the years ended June 30, 2013, 2012, and 2011, respectively. The largest amounts of revenue are generated from the Boonshoft School of Medicine in the form of clinical income and other services as well as computing and telecommunications revenues. The \$1.0 million decrease in 2013 was led by a drop in the clinical income within the Boonshoft School of Medicine as well as a decrease in telecommunications income from lower residence hall occupancy.

Investment income was \$15.8 million, a loss of \$0.2 million and \$20.8 million in 2013, 2012, and 2011, respectively. The 2013 income exceeded budget by \$7.5 million. This was a welcome result, as investment returns helped offset the lack of revenue growth in tuition and fees due to the 2013 drop in enrollment from 2012. The investment markets were strong and the university's investment returns were consistent with the average market indices for the various market sectors. While investment returns have been mixed in recent years, the University regularly reviews its investment policy and investigates ways to diversify risk and enhance returns. As a result of these endeavors in 2012 and 2013 the University diversified its portfolio by placing a small share into private equity, commodity funds, and other diversifying strategies. We plan to continue pressing for new opportunities for income generation, especially as the need for new revenue sources intensifies. The 2012 loss was disappointing but was consistent with the overall market. Investment income was almost \$8.0 million less than planned, and was the primary contribution to the decrease in unrestricted net assets in 2012. The \$20.8 million investment return in 2011 was the largest in the university's history.

Capital Appropriations, Gifts and Grants were \$2.8 million in 2013, a decrease of \$6.1 million from the \$8.9 million realized in 2012. The primary reason for the decrease was a non-recurring \$5.8 million gift of software for use by students in 2012. Capital appropriations from the State of Ohio also decreased \$0.4 million in 2013. Remaining capital appropriations were simply for annual routine capital renovations. Major gifts received in 2013 included contributions for the Medical Education Skills Assessment Lab, baseball field turf replacement, Schuster Concert Hall renovation, and the Fritz and Delores Russ Engineering Center atrium renovation. Routine funding for capital grants was also received. Major gifts in fiscal 2012 included the \$5.8 million gift of software as well as gifts for projects including the Schuster Concert Hall renovation.

The following is a graphic illustration of expenses by function for the year ended June 30, 2013.

Total operating expenses were \$414.5 million in 2013 as compared to \$402.3 million and \$392.1 million in 2012 and 2011, respectively. The \$12.2 million increase in 2013 represents only a 3.0% increase in operating expenses. Salaries and benefits increased \$5.4 million from 2012 to 2013 which represents only a 2.2% increase. Almost half of that increase, \$2.5 million, was the result of converting to semesters from quarters. This change in the academic calendar resulted in a greater share of the summer 2013 term being taught in fiscal 2013 and therefore additional payroll expense was incurred in 2013. Subtracting that portion of the increase, salaries and benefits only increased \$2.9 million or 1.2%. This is a reflection of low average wage increases in 2013 (0%-2%) and the result of lower than expected health care claims costs. In addition, the University implemented a hiring initiative that critically reviewed vacant positions and provided for only those deemed strategically important to be filled. Many positions remained vacant throughout much of 2013. Additional expense optimization efforts included our energy conservation project, healthcare plan re-designs, early stages of an enterprise print management solution, and continued improvements with strategic contract management. These all contributed to holding down costs and moving into future years in a more efficient and cost effective manner. Also in 2013 the University returned \$1.4 million in federal loan funds as part of a deliberate decision to reduce participation in the program. The remaining \$5.4 million increase, only 1.3%, is for other operating expenses. The increase in 2012 over 2011 was \$10.2 million with \$6.6 million attributable to salaries and benefits and the remaining \$3.6 million to other operating expenses.

#### **Statements of Cash Flows**

The Statement of Cash Flows also provides information about the university's financial health by reporting the cash receipts and cash payments of the University during the year ended June 30, 2013. A summary of the Statements of Cash Flows is as follows:

|   | 2013                              | 2012         | 2011         |  |  |  |  |
|---|-----------------------------------|--------------|--------------|--|--|--|--|

| Cash provided (used) by:                    |                                   |              |              |  |  |  |  |
| Operating activities                        | \$ (145,633)                      | \$ (121,065) | \$ (107,871) |  |  |  |  |
| Noncapital financing activities             | 124,389                           | 127,213      | 140,040      |  |  |  |  |
| Capital and related financing activities    | 11,280                            | 30,981       | (15,473)     |  |  |  |  |
| Investing activities                        | 12,364_                           | (44,763)_    | (22,309)     |  |  |  |  |
| Net (decrease) in cash and cash equivalents | 2,400                             | (7,634)      | (5,613)      |  |  |  |  |
| Cash and cash equivalents-beginning of year | 19,611_                           | 27,245_      | 32,858_      |  |  |  |  |
| Cash and cash equivalents-end of year       | \$ 22,011                         | \$ 19,611    | \$ 27,245    |  |  |  |  |

Total cash and cash equivalents increased \$2.4 million in 2013. Cash flows from operating activities decreased \$24.6 million from 2012. Operating contracts and grants cash flows decreased by \$6.5 million as receivables from various sponsors rose. Cash outflows for salaries and benefits rose \$9.3 million as well. These two factors combined with \$6.1 million increased payments to suppliers and flat tuition revenue to create the decrease in operating cash flows. Cash from noncapital financing activities only decreased \$2.8 million primarily as a result of the timing of the awarding of federal loans for the summer term and the collection of those loan amounts from the federal government. Cash from capital and related financing activities decreased \$19.7 million from 2012 to 2013 as there were approximately \$21.0 million less in borrowings in 2013, net of refundings. The net cash provided by investing activities of \$12.4 million in 2013 is the net result of all investment activities: purchases, sales, and interest earnings. This compares to \$44.8 million net cash used in 2012. The cash provided in 2013 is primarily the result of additional realized investment income and more active trading of securities. The decrease of \$7.6 million from 2011 to 2012 was a combination of an increase in operating expenditures, a loss of federal stimulus funds, offset somewhat by new borrowings net of amounts invested in the bond trust fund.

### **Capital Assets and Debt**

### Capital Assets

The University had approximately \$305.0 million invested in capital assets, net of accumulated depreciation of \$263.6 million at June 30, 2013. Capital assets were \$309.5 million, net of accumulated depreciation of \$244.4 million at June 30, 2012. Depreciation expense for the years ended June 30, 2013 and 2012 was \$21.4 million and \$19.7 million, respectively. A summary of net capital assets for the year ended June 30 is as follows:

|  | 2013 2012                         |         |    |         |    | 2011    |  |  |  |
|--|-----------------------------------|---------|----|---------|----|---------|--|--|--|
|  | (All dollar amounts in thousands) |         |    |         |    |         |  |  |  |
| Land, land improvements and infrastructure | \$                                | 35,916  | \$ | 32,508  | \$ | 27,048  |  |  |  |
| Buildings                                  |                                   | 224,384 |    | 227,314 |    | 227,149 |  |  |  |
| Machinery and equipment                    |                                   | 22,335  |    | 29,156  |    | 29,168  |  |  |  |
| Library books and publications             |                                   | 17,014  |    | 17,597  |    | 18,083  |  |  |  |
| Construction in progress                   | _                                 | 5,375   | _  | 2,915   | _  | 3,011   |  |  |  |
| Total capital assets - net                 | \$                                | 305,024 | \$ | 309,490 | \$ | 304,459 |  |  |  |

Land, land improvements, and infrastructure increased \$3.4 million as a result of a few projects. One project continuing from 2012 was the replacement of all of the Dayton campus' main water lines. The lines had developed random leaks from the age of the pipes. Therefore, the University determined it best to replace all of the lines rather than continually fix them. This project was finished in 2013. In addition, \$2.7 million was spent for the second phase of the energy conservation project. Construction in Progress rose \$2.5 million in 2013 as work began on the NEC building and the new classroom building. The net asset values of buildings and machinery and equipment decreased as depreciation expense exceeded all 2013 acquisitions and improvements. Major capital activity in 2012 included \$2.6 million related to the main water lines, \$2.5 million for a portion of the Rinzler Student Sport Complex and related Raider Road extension, renovation and creation of the Schuster Concert Hall with a cost of just over \$4.0 million, along with a \$5.8 million donation of software for student use in the classroom.

### Debt

In November 2012, the University issued \$23.2 million in General Receipts bonds. The bonds were sold at a premium of \$2.1 million. These bonds have an effective interest rate of 2.87% and consist of \$21.4 million serial bonds and a \$1.8 million term bond. Of the total bonds, \$9.0 million were issued to pay the associated bond issuance costs and to finance construction of a student academic success center to be located within a new classroom building, a new multi-functional student commons building, and relocation of a grounds storage facility. The remaining \$14.2 million Series 2012 bonds were issued as an advance refunding of \$14.4 million outstanding Series 2004 General Receipts serial and term bonds. The advance refunding resulted in an economic gain to the University of \$1.3 million and a savings of \$1.6 million in debt service payments over the next 17 years. The University received an A1 bond rating from Moody's Investors Service on this issue.

In February 2013, the University entered into a \$25.5 million Loan Agreement with the Ohio Air Quality Development Authority to fund the second phase of an energy conservation project. This debt was issued as a Series A note backed by a \$17.2 million tax exempt revenue bond and a Series B note backed by an \$8.3 million tax exempt revenue bond (QECB). The Series A note carries an interest rate of 1.78% and the Series B note carries an interest rate of 4.16%. The QECB qualifies for a large federal rebate that brings the effective interest rate down to .94%. The weighted average interest rate of the entire \$25.5 million Loan Agreement is 1.51%. Wright State expects to reduce energy consumption by nearly 40 percent through the funded energy efficiency investments that include applying state-of-the-art technology to modernize heating/cooling plants in buildings across its Dayton and Celina campuses. The project

promises to save the University over \$35 million over the next 15 years which well exceeds the debt service on the notes.

In November 2011, the University issued \$55.2 million General Receipts Series 2011A Bonds to fund construction of a new classroom building, replacement of main water lines, renovation of the Student Union, renovation of the Schuster Concert Hall, improvement and addition of the Rinzler Student Sports Complex, construction of a new building for a neuroscience and engineering collaboration, expansion of the Creative Arts Center, replacement of the Nutter Center scoreboard, construction of parking lots and acquisition of a parcel of land adjacent to main campus. Series 2011 B bonds, totaling \$1.5 million, were also issued as an advance refunding of \$1.4 million outstanding Series 2003 General Receipts serial and term bonds. The bonds were sold at a premium of \$3.4 million for a total issue of \$60.0 million. The average coupon rate of the Series A bonds is 4.82%, but the effective interest rate is only 4.13%. The University received a bond rating for this issue from Moody's Investors Service of A1.

Outstanding debt was \$114.4 million, \$84.4 million, and \$32.7 million at June 30, 2013, 2012, and 2011, respectively. The 2013 balance of \$114.4 million includes \$88.7 million of outstanding bonds, \$25.5 million of outstanding notes, and \$0.2 million of equipment leases. The 2012 balance of \$84.4 million includes \$84.1 million of outstanding bonds and equipment leases of \$0.3 million.

### **Concluding Thoughts**

Each year brings with it difficult challenges, some recurring and some new. One recurring challenge seems to be the continued migration of the funding burden for the cost of higher education from the State of Ohio to the student. Each year a greater percent of the cost is born by the student. The dollar level of support provided by the State has shrunk as has the share of costs it supports. While a new funding formula for state subsidy has been developed that should be mutually beneficial to both the student and the University in future years, the overall financial enhancement to Wright State is not expected to be significant. This new funding model places a greater emphasis on student success by rewarding institutions for degree completion and successful course completions. This will provide additional motivation and incentive to work closely with students and keep them on a successful path of progress towards a degree and ultimately a job in the workforce. Unfortunately, the amount of funding available for higher education in Ohio is not growing much and therefore regardless of the success of the students, the university's funding will simply be a proportional share of a fixed pool of dollars. Nonetheless, the University is committed to helping each one of its students succeed both academically and in their endeavors after graduation.

Another challenge facing the University is a recent decline in enrollment. While much of that can be attributed to our transition to semesters, we are taking a critical review of other factors that can be improved to make a positive impact on enrollment. As the University considers the most recent enrollment to be its new baseline, we will be developing strategic methods to foster further enrollment growth for the different types of enrolling students. Much of this focus would be on direct from high school students, transfer students, international students, as well as graduate and professional school students, for example. Analyzing these groups individually and strategically as an independent revenue stream should help better identify successful strategies for optimizing both student success as well as enrollment. Other economic factors that are now less certain or predictable than in prior years include investment markets, governmental funding at all levels, the direction of technology, as well as health care costs.

The University is aggressively addressing its financial challenges. During 2013 the University continued efforts it started several years earlier by beginning yet another series of energy conservation measures to significantly reduce the cost of energy at the University. We have identified measures that will improve efficiencies and will result in savings greater than the cost of the projects. Additionally, the University transitioned its food service operations to a full hospitality services model which is expected to enhance profitability by \$0.6 million annually. The transition provided other non-financial improvements such as student and community satisfaction enjoyed through stakeholder engagement and defined final outcomes. Although the University has also enjoyed the benefit of relatively flat health care claims costs in 2013, it has proactively re-bid its healthcare administration services. Working with a third party consultant and with faculty and staff input, the University will be making plan platform and other plan

design changes that are expected to keep health care costs flat in 2014. The University is in the midst of many other efforts to control costs and promote revenue growth. Projects such as potentially implementing a campus wide enterprise print solution, promoting and expanding the use of a separate research corporation to enhance its research portfolio, consistently reviewing ways to enhance its investment returns, and continuing development of a budget model that focuses more on strategic priorities and opportunities as well as continual review of operations are just a few other projects in motion. In general, the University is becoming more entrepreneurial as it moves forward. It is imperative that we think and act differently than in the past in order to succeed financially and to increase our students' success both academically and as contributing members of society.

The University is excited to move forward and face upcoming challenges and opportunities. We believe we can continue to be successful both as financial stewards and as a positive influence in our students' lives and in the communities we serve. We have a lot of work to do, but we believe we have accomplished a lot over the last year. We will endure by carrying forward the momentum we have developed into 2014 and beyond.

#### INDEPENDENT AUDITOR'S REPORT

To the Board of Trustees of Wright State University Dayton, Ohio

### **Report on the Financial Statements**

We have audited the accompanying financial statements of the business-type activities of Wright State University (the "University"), a component unit of the State of Ohio, and its discretely presented component unit (Wright State University Foundation, Inc.) as of and for the years ended June 30, 2013 and 2012, and the related notes to the financial statements, which collectively comprise the University's basic financial statements as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

(Continued)

### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the business-type activities of the University and its discretely presented component unit, as of June 30, 2013 and 2012, and the changes in financial position and, where applicable, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### Other Matters

### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis (MD&A) on pages 2 to 15 be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the University's financial statements. The accompanying schedule of expenditures of federal awards as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations is* presented for purposes of additional analysis and are not a required part of the financial statements.

The schedule of expenditures of federal awards is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditures of federal awards is fairly stated, in all material respects, in relation to the financial statements as a whole.

### Report on Other Legal and Regulatory Requirements

In accordance with *Government Auditing Standards*, we have also issued our report dated the same date as this report on our consideration of the University's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the University's internal control over financial reporting and compliance.

### WRIGHT STATE UNIVERSITY

#### Notes to Financial Statements

Year Ended June 30, 2013

### (1) Organization and Summary of Significant Accounting Policies

### Organization and Basis of Presentation

Wright State University (the University) is a state-assisted institution of higher education created in 1967. The University has an enrollment of approximately 18,000 undergraduate, graduate, and professional students on its two campuses. The financial statements include the university's eight colleges, three schools, and other individual departments. The university's Board of Trustees approves policies and procedures by which the University is governed.

The University is a political subdivision of the State of Ohio and accordingly, its financial statements are discretely presented in the State of Ohio's Comprehensive Annual Financial Report in accordance with Governmental Accounting Standards Board (GASB) Statement No. 14, and amended by GASB Statement Nos. 39 and 61. These statements provide additional guidance to determine whether certain organizations for which the University is not financially accountable should be reported as a component unit of the University based upon the nature and significance of their relationship to the University. Although the Wright State University Foundation (the Foundation) is a legally separate, tax-exempt entity, it has been determined that it does meet the criteria for discrete presentation within the university's financial statements. The Foundation is the primary fund-raising organization for the University and contributions to the Foundation are primarily restricted to the activities of the University. These contributions are relied upon for the on-going operations of the University. No other affiliated organization, such as the Alumni Association, meets the requirements for inclusion in the university's financial statements. Complete financial statements for the Foundation can be obtained by sending a request to the Wright State University Foundation Bldg., 3640 Colonel Glenn Highway, Dayton, OH 45435.

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America, as prescribed by GASB.

### Summary of Significant Accounting Policies:

#### Basis of Accounting

The financial statements of the University have been prepared using the economic resources measurement focus and on the full accrual basis of accounting, whereby revenue is recognized in the period earned, or in the case of advances from other governments, when all eligibility requirements are met in accordance with GASB Statement No. 33, *Accounting and Financial Reporting for Nonexchange Transactions*. Expenses are recognized when the related liabilities are incurred.

### Financial Statements

The University reports as a business-type activity, as defined by GASB Statement No. 35, *Basic Financial Statements-and Management's Discussion and Analysis - for Public Colleges and Universities*. Business-type activities are those that are financed in whole or in part by fees charged to external parties for goods or services.

Beginning with the fall term of 2013, the University transitioned from a 10 week quarter based academic term to a 15 week semester based academic term. This had the consequence of affecting the comparability of certain assets and liabilities between 2012 and 2013 due to a change in the timing of the occurrence of expenses and revenues.

# Notes to Financial Statements (Continued)

### New Accounting Standards Adopted

In fiscal year 2013, the University adopted the following new accounting standards as follows: GASB Statement No. 62, Codification of Accounting and Financial Reporting Guidance Contained in Pre- November 30, 1989 FASB and AICPA Pronouncements (GASB 62), incorporates into the GASB's authoritative literature certain accounting and financial reporting guidance included in FASB pronouncements, which does not conflict with or contradict GASB pronouncements, and eliminates the criteria to apply post-November 30, 1989 FASB pronouncements that do not conflict with or contradict GASB pronouncements.

GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position (GASB 63), establishes a new statement of net position format that reports separately all assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position (which is the net residual amount of the other elements). The statement requires deferred outflows of resources and deferred inflows of resources to be reported separately from assets and liabilities. The financial reporting impact resulting from the implementation of GASB 63 in the university's financial statements was the renaming of "Net Assets" to "Net Position", including changing the name of the financial statement from "Statement of Net Assets" to "Statement of Net Position". In addition, because the University had no deferred outflows or deferred inflows at June 30, 2013 and 2012, we have elected not to present these captions on the Statement of Net Position.

### Net position

Net position is classified as follows:

- Invested in capital assets comprises total investment in capital assets, net of accumulated depreciation, reduced by the outstanding balances of bond, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets or related debt.
- Restricted net position consists of restricted assets reduced by liabilities and deferred inflow of resources related to those assets.
  - Nonexpendable restricted net position is comprised primarily of gifts which are subject to external restrictions requiring that the principal be invested in perpetuity and that only the cumulative earnings be utilized.
  - Expendable restricted net position represents resources in which the University is legally or contractually obligated to spend resources in accordance with restrictions imposed by external third parties such as guarantors.
- Unrestricted net position represents the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position. These net assets are not subject to external restrictions. Management or the Board of Trustees designates most of the unrestricted net assets for specific purposes in research, academic, capital acquisition, or other initiatives.

It is the university's policy to first apply restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

### Recent Accounting Pronouncements

As of June 30, 2013, the GASB has issued the following statements not yet implemented by the University.

GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*, issued March 2012. The provisions of this Statement are effective for periods beginning after December 15, 2012. This Statement establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources or deferred inflows of resources, certain items that were previously reported as assets and liabilities and recognizes, as outflows of resources or inflows of resources, certain items that were previously reported as assets and liabilities.

# Notes to Financial Statements (Continued)

In June 2012, the GASB issued Statement No. 68, Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27. This statement replaces the requirements of Statement No. 27, Accounting for Pensions by State and Local Governmental Employers as it relates to pension accounting and reporting for the University. The provisions of this statement are effective for financial statements for fiscal years beginning after June 15, 2014.

Management has not yet determined the effect these statements will have on the university's financial statements.

### Cash and Cash Equivalents

Cash and cash equivalents include amounts held in the State Treasury Asset Reserve of Ohio (STAROhio). In addition, several of the external investment managers maintain balances in a money market fund. These balances are included as cash equivalents due to their high liquidity and short-term nature. Other investments purchased with three months or less to maturity are also considered cash equivalents.

### Investments

Investments of publically traded securities are reported at fair value, as established by the major securities markets. Money market investments (U.S. Treasury and Agency obligations) that have a remaining maturity of one year or less at the time of purchase are reported at amortized cost and approximate fair value. If contributed, investments are valued at fair value at the date of donation. Investment income is recognized on an accrual basis. Purchases and sales of investments are accounted for on the trade date basis. Investment trade settlements receivable and payable represent investment transactions occurring on or before June 30, which settle after such date. Realized and unrealized gains and losses are reported as investment income or loss.

All securities purchased by external investment managers in the university's "liquidity" and "diversified" investment pools, with the exception of money market purchases and redemptions, are considered investments regardless of maturity date, as these investment pools are designed more for capital appreciation and have average durations of at least two years. Investments with maturities of less than one year are considered short-term or current.

Alternative investments are carried at estimated fair value provided by the fund's management. Alternative investments are generally less liquid than publically traded securities and include private equity, investments in real assets, and other strategies. These alternative investments are intended to reduce market risk, credit risk and interest rate risk. The University believes the carrying amounts of these holdings are reasonable estimates of the fair values as of year-end. Because these investments are not readily marketable, the estimated value is subject to uncertainty, and therefore, may differ from the value that would have been used had a ready market for the investment existed. Such difference could be material.

### Inventories

Inventories, which consist principally of publications, general merchandise and other goods, are stated at the lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method.

### Capital Assets and Collections

Capital assets include land, land improvements, infrastructure, buildings, machinery, equipment, software, library books, publications and construction in progress. They are recorded at cost at the date of acquisition, or fair market value at the date of donation in the case of gifts. Building renovations that materially increase the value or extend the useful life of the structure are also capitalized. Normal repairs and maintenance are expensed in the year in which the expenses are incurred. The threshold for capitalizing movable equipment with an estimated useful life of more than one year is \$5,000. Using the straight-line method, capital assets are depreciated over their

# Notes to Financial Statements (Continued)

estimated useful lives; generally, 40 years for buildings, 30 years for land improvements and infrastructure, 15 years for library books and publications, and 5 to 10 years for machinery and equipment. The University does not capitalize works of art or historical treasures that are held for exhibition, education, research, and public service. These collections are not encumbered or sold for financial gain. Consequently, such collections are not recognized in the financial statements.

### Compensated Absences

Compensated absences is comprised of vacation and sick leave benefits. Vacation benefits are accrued as a liability as the benefits are earned if the employee's right to receive compensation is attributable to service already rendered and it is probable that the employer will compensate the employee for the benefits through paid time off or some other means. Sick leave benefits are accrued as a liability using the vesting method. The liability will include employees currently eligible to receive termination benefits and those identified as probable of receiving payment in the future.

#### Deferred Revenue

Deferred revenue consists primarily of the amounts received in advance from grant and contract sponsors that have not yet been earned under the terms of the agreement and amounts received in advance for tuition and fees not yet earned. These deferrals were \$19.8 million and \$14.8 million, respectively, for the year ended June 30, 2013 and \$26.1 million and \$12.1 million, respectively, for the year ended June 30, 2012.

### Revenues and Expenses

Revenues and expenses are classified as operating or nonoperating. Operating revenues are resources primarily from exchange transaction activities. These include payments received for services, such as tuition and fees, and most grants and contracts. Nonoperating revenues are from non-programmatic sources and have the characteristics of nonexchange transactions. They include state appropriations, some federal and state grants, gifts, and investment income. Nearly all of the university's expenses are a result of exchange transactions, and therefore classified as operating expenses. The major recurring nonoperating expenses are net losses on the disposition of capital assets and interest expense on capital assets-related debt.

### **OhioLINK**

Wright State University serves as the fiscal agent for the statewide library program known as OhioLINK. This program's revenues from state appropriations, federal pass-through grants and from other college and university libraries and expenses are all included in the statements of revenues, expenses, and changes in net position. The total revenues and expenses attributable to OhioLINK were \$38,074,013 and \$37,688,551 for the years ended June 30, 2013 and 2012, respectively. As a result of actions taken by the State of Ohio to streamline operations and improve efficiency, the role of fiscal agent for OhioLINK will be transitioning elsewhere in the State during the year ending June 30, 2014.

### Scholarship Allowances

Scholarship allowances represent aid awarded to the student in the form of reduced tuition and are computed and reported in the financial statements under the alternate method as prescribed by the National Association of College and University Business Officers (NACUBO). Financial aid in the form of a cash payment to the student is reported as scholarship and fellowship expense in the financial statements. Third party loans such as Stafford loans and certain aid awarded to the students by third parties are credited to the student's account as if the student made the payment.

### Income Taxes

The University is exempt from federal income taxes under Section 115 of the Internal Revenue Code. However, certain revenues are considered unrelated business income and are taxable under Internal Revenue Code Sections 511 through 513.

# Notes to Financial Statements (Continued)

### Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### (2) Cash, Cash Equivalents and Investments

The classification of cash, cash equivalents and investments in the financial statements is based on criteria set forth in GASB Statement No. 9. Cash equivalents are defined to include investments with original maturities of three months or less. Consistent with this definition, university funds on deposit in the State Treasury Asset Reserve of Ohio are classified as cash equivalents in the statements of net position. However, for GASB Statement No. 3 disclosure purposes (see below), the funds in the State Treasury Asset Reserve of Ohio are classified as investments.

### Deposits

Under state law, the university's deposits must be secured by federal deposit insurance and collateralized for amounts in excess of FDIC coverage. Collateral may be pledged or pooled. Pooled collateral may be held on the financial institution's premises or held by its trust department or agent on its behalf. The fair value of the pledged securities plus the federal deposit insurance must at all times equal one hundred five percent of the total amount of public deposits to be secured by the pooled securities. These securities may be held in the name of the University or the pledging bank by a holding or custodial bank that is mutually acceptable to both parties. The University does not have a deposit policy for custodial credit risk.

As of June 30, 2013 and 2012, the university's bank balances are \$24,318,877 and \$21,418,759, respectively. Of these balances, \$20,534,845 and \$17,464,466, respectively, are uninsured with collateral held by pledging banks not in the university's name.

At June 30, the carrying amount of deposits (book balances) is as follows:

|                    | <br>2013             | 2012       |
|--------------------|----------------------|------------|
| Petty cash         | \$<br>41,636 \$      | 54,471     |
| Demand deposits    | 19,541,179           | 16,849,010 |
| Money market funds | <br>2,287,242        | 2,068,717  |
| Total              | \$<br>21,870,057 \$_ | 18,972,198 |

The difference in the carrying amount and bank balances is caused by items in-transit (primarily outstanding checks) and by cash on hand.

### Investments

The university's investment policy provides for the prudent investment of the university's assets in a manner which will meet three main objectives: safety, liquidity and return on investment. The investment policy parallels state law which requires an amount equal to at least twenty five percent of the university's investment portfolio be invested in securities of the United States government or one of its agencies or instrumentalities, the treasurer of the State of Ohio's pooled investment program, obligations of the State of Ohio, or any political subdivision of the State of Ohio, certificates of deposit of any national bank located in the State of Ohio, written repurchase

# Notes to Financial Statements (Continued)

agreements with any eligible Ohio financial institution that is a member of the federal reserve system or federal home loan bank, money market funds or bankers' acceptances maturing in two hundred seventy days or less which are eligible for purchase by the federal reserve system.

The fair value of investments at June 30 is as follows:

|   |     | Fair Value     |             |  |  |
|---|-----|----------------|-------------|--|--|
| Description                             |     | 2013           | 2012        |  |  |
|   |     |                |             |  |  |
| U.S. Treasury securities                | \$  | 4,984,713 \$   | 2,877,054   |  |  |
| U.S. Agency securities                  |     | 59,923,465     | 48,813,656  |  |  |
| Stock and traded securities             |     | 618,405        | 605,722     |  |  |
| Corporate bonds and notes               |     | 5,161,567      | 4,772,394   |  |  |
| State Treasury Asset Reserve of Ohio    |     | 140,828        | 638,827     |  |  |
| Private equity and Limited Partnerships |     | 12,645,363     | 500,000     |  |  |
| Equity funds                            |     | 71,278,094     | 74,992,125  |  |  |
| Bond funds                              |     | 28,480,344     | 55,951,572  |  |  |
| Negotiable Certificates of Deposit      |     | 8,837,462      |             |  |  |
| Other                                   |     | 3,200          | 3,200       |  |  |
|   |     |                |             |  |  |
| Total                                   | \$_ | 192,073,441 \$ | 189,154,550 |  |  |

The various investments in stocks, securities, mutual funds and other investments are exposed to a variety of uncertainties, including interest rate, market and credit risks. Due to the level of risk associated with certain investments, it is possible that changes in the values of these investments could occur in the near term. Such changes could materially affect the amounts reported in the financial statements of the University. In June 2012, the University entered into a commitment with a private equity fund for \$5,000,000. As of June 30, 2013 and 2012, the University has an outstanding commitment of \$4,000,000 and \$4,500,000, respectively.

### Interest Rate Risk

The university's investment policy minimizes the risk of the loss of value due to changing interest rates through the use of target durations for each of the university's investment pools. The Cash Pool is maintained to meet the daily obligations of the University and consists of highly liquid instruments with little to no risk of loss of principal. The maximum weighted average maturity for the Cash Pool is less than one year. The Liquidity Pool provides a source of funds in the event the Cash Pool is insufficient to meet the university's cash needs and maintains a weighted average life of less than five years. The Diversified Investment Pool provides the University an opportunity to earn a higher rate of return through investments with longer durations. Equity managers are limited to a beta (volatility) of no more than 1.2 – 1.4 times the relevant benchmark. Duration for fixed income managed accounts must be within twenty percent of that of the Barclays Capital Aggregate Bond Index.

# Notes to Financial Statements (Continued)

The maturities of university investments at June 30 are as follows:

|                                    |     | 2013 Investment Maturities (in years) |            |    |               |               |         |
|------------------------------------|-----|---------------------------------------|------------|----|---------------|---------------|---------|
|                                    |     |                                       | Less       |    |               |               | More    |

| Total                              | \$_ | 112,414,676_\$                        | 22,037,510 | \$ | 66,854,456 \$ | 22,926,504 \$ | 596,206 |

The University invests in mortgage pass-through securities issued by FNMA, GNMA and FHLMC and commercial banking organizations which are included above in the amounts listed as U.S. Agency Securities. Prepayment options embedded in these securities cause them to be highly sensitive to interest rate changes. Generally when interest rates fall, more mortgages are prepaid. This eliminates the interest income that would have been received under the original amortization schedule. As of June 30, 2013 and 2012, the total value of mortgage pass-through securities is \$1,799,068 and \$2,050,103, respectively.

### Credit Risk

Credit risk is the risk that the issuer or other counterparty to an investment will not fulfill its obligation. The university's investment policy limits exposure to credit risk by limiting purchases of fixed income securities to no lower than AA for the Cash Pool accounts and no lower than BBB for the Liquidity Pool accounts. At least fifty percent of the Cash Pool must be invested in U.S. Treasuries or Agencies. In addition, maximum exposure to high yield bonds cannot exceed fifteen percent of a Diversified Investment Pool Fixed Income account. All Commercial Paper must have a minimum rating of A1/P1.

# Notes to Financial Statements (Continued)

The university's credit risk at June 30 is as follows:

The University invests in Government National Mortgage Association (GNMA), or Ginnie Mae, securities which are included above in the amounts listed as U.S. Agency Securities. Ginnie Mae is a wholly-owned government corporation. As such, securities issued by Ginnie Mae are explicitly guaranteed by the U.S. government. As of June 30, 2013 and 2012, the University holds GNMA securities with a total value of \$39,147 and \$76,793, respectively.

As of June 30, 2013, the University holds \$8,837,462 in Negotiable Certificates of Deposits. These certificates are held in the project trust account for the Series 2012 Bonds. Although the certificates are not rated, each certificate is issued by a member of the Federal Deposit Insurance Corporation and is held in an amount covered by this insurance.

#### Custodial Credit Risk

For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the University will not be able to recover the value of its investments or collateral securities in the possession of an outside party. As of June 30, 2013 and 2012, \$78,907,207 and \$56,463,104, respectively, is held by the investment's counterparty, not in the name of the University, but internally designated as held for the University. As of June 30, 2013 and 2012, \$66,379,504 and \$44,039,062 of the investments held by the counterparty are held in trust accounts for the proceeds related to the Series 2011 and 2012 Bond Funds and the 2013 Notes Payable.

# Notes to Financial Statements (Continued)

The university's investment policy minimizes custodial credit risk by limiting the amount invested in any bank certificate of deposit unless the investments are fully collateralized by U.S. Treasury or Agency securities. In addition, bank certificates of deposit and bankers' acceptances must be issued by members of the Federal Deposit Insurance Corporation.

### Concentration of Credit Risk

Concentration of credit risk is the risk associated with a lack of diversification. It is the risk of loss attributed to the magnitude of the university's investment in a single issuer. Investment managers are required by the investment policy to limit exposure for any one single issue to no more than five percent of the portfolio, at cost. This limit does not apply to investments in U.S. securities. Equity and fixed income managers are required to limit exposure to any one economic sector to forty percent of the portfolio. Cash Pool managers must limit Commercial Paper in any one issuer to no more than five percent of the manager's portfolio.

As of June 30, 2013 and 2012, sixteen percent (\$30,290,011) and fourteen percent (\$26,568,003), respectively, of the university's portfolio is held in various Federal Home Loan Bank securities. Of these securities, \$30,230,841 are restricted and held in debt related project funds as of June 30, 2013, as compared to \$26,220,410 held in project funds as of June 30, 2012. As of June 30, 2013 and 2012, eleven percent (\$21,021,896) and eight percent (\$15,320,013), respectively, of the university's portfolio is held in various Federal Home Loan Mortgage Corp. securities. Of these securities, \$19,643,074 are restricted and held in debt related project funds as of June 30, 2013, as compared to \$13,876,801 held in debt related project funds as of June 30, 2012.

### Foreign Currency Risk

Foreign currency risk relates to the possible adverse effects changes in exchange rates can have on the fair value of investments. According to the university's investment policy, international managers are expected to maintain an appropriate diversification with respect to currency and country exposure. All other managers are not permitted to invest in non-dollar denominated securities. As of June 30, 2013 and 2012, the university's exposure to foreign currency is limited to its investment in international mutual funds of \$25,621,664 and \$22,476,678, respectively.

### Unspent Debt Proceeds

The university's unspent debt proceeds at June 30 are as follows:

|              |                  |                | Amount Unspent |            |  |  |  |  |
|--------------|------------------|----------------|----------------|------------|--|--|--|--|
| Debt         | Date Issued      | Amount Issued  | 2013           | 2012       |  |  |  |  |
| Series 2009  | December 2009 \$ | 11,420,000 \$  | \$             | 4,685      |  |  |  |  |
| Series 2011A | November 2011    | 55,240,000     | 42,176,593     | 45,274,345 |  |  |  |  |
| Series 2012A | November 2012    | 23,195,000     | 9,771,262      |            |  |  |  |  |
| 2013 Notes   |                  |                |                |            |  |  |  |  |
| Series A & B | February 2013    | 25,500,000     | 21,666,389     |            |  |  |  |  |
|              |                  |                |                |            |  |  |  |  |
| Total        | \$               | 115,355,000 \$ | 73,614,244 \$  | 45,279,030 |  |  |  |  |

The unspent proceeds are held in Project Fund trust accounts as provided for in the bond resolutions approved by the Board of Trustees. The bond resolutions also require the bond proceeds to be held by a bank or trust company which is a member of the Federal Deposit Insurance Corporation. The Bank of New York Mellon acts as the trustee of the bond project funds for the Series 2009, 2011, and 2012. The Huntington National Bank acts as the trustee of the bond project fund for the Series 2013. As of June 30, 2013 and 2012, \$7,234,740 and \$1,239,968, respectively, of the bond proceeds are classified as restricted cash and cash

# Notes to Financial Statements (Continued)

equivalents in the statements of net position. The remaining unspent proceeds are classified as restricted short-term and restricted noncurrent investments in the statements of net position.

For disclosure purposes the unspent proceeds as of June 30 are classified as follows:

|                                    |    | Year Ended June 30 |         |            |  |  |

# Notes to Financial Statements (Continued)

Interest expense incurred on indebtedness for the years ended June 30, 2013 and 2012 was \$3,723,349 and \$2,620,264, respectively. In 2013, interest expense on construction related debt of \$265,208, net of \$215,600 interest earned on invested funds, was capitalized to the related projects. There was no capitalized interest in 2012.

In November 2012, the University issued \$23,195,000 in General Receipts bonds. The bonds have an effective interest rate of 2.87% and consist of \$21,400,000 serial bonds and a \$1,795,000 term bond. Of the total bonds, \$8,965,000 were issued to pay the associated bond issuance costs and to finance construction of a Student Academic Success Center to be located within a new classroom building, a new multi-functional student commons building, and a grounds storage facility for physical plant.

The remaining \$14,230,000 Series 2012 bonds were issued as an advanced refunding of \$14,425,000 outstanding Series 2004 General Receipts serial and term bonds which have interest rates ranging from 4.5% to 5.0%. The Series 2004 bonds will be called and bondholders will be paid in May 2014. A portion of the proceeds of the Series 2012 bonds (after payment of issuance expenses) were used to purchase U.S. government securities which were deposited in an irrevocable trust with an escrow agent to provide for all future debt service payments on the refunded Series 2004 bonds. As a result, the \$14,425,000 Series 2004 bonds are considered to be defeased and the liability for those bonds has been removed from long-term debt. The balance of the defeased debt in the escrow account at June 30, 2013 is approximately \$14.4 million.

The advance refunding of the Series 2004 bonds resulted in decreased total debt service payments of \$1,614,376 over the next 17 years. Refunding the Series 2004 bonds also resulted in an economic gain (the difference between the present values of the debt service payments on the old and new debt) of \$1,310,170. Following the refunding, \$4,065,000 of Series 2004 bonds remained outstanding, as they were not eligible to be called. Of this balance, \$1,995,000 was paid in May 2013.

In February 2013, the University entered into a Loan Agreement with the Ohio Air Quality Development Authority (OAQDA) to fund a second phase of an energy conservation project. The Loan Agreement provided for two notes with the OAQDA: a Series A Note and a Series B Note. Pursuant to the Series A Note with OAQDA, the University received the proceeds from the sale of a \$17,187,300 OAQDA Tax Exempt Revenue Bond (Wright State University, Campuswide Energy Conservation Project), 2013 Series A. The Series A Note bears the 1.78% interest rate of the related bond with annual principal payments in May 2014 through May 2024. Pursuant to the Series B Note, the University received the proceeds from the sale of a \$8,312,700 OAQDA Tax Credit Revenue Bond (Wright State University, Campuswide Energy Conservation Project), 2013 Series B (Qualified Energy Conservation Bond-Direct Payment). The Series B Note bears the 4.16% interest rate of the related bond with annual principal payments in May 2024 through May 2028. As discussed further below, the Series B Note is eligible for a large federal rebate which reduces the effective net interest rate to .94%.

All general receipts of the University, except for state appropriations, are pledged for payment of all outstanding bonds. The Series A and Series B Notes evidence the university's obligation to make loan payment from Available Receipts. The Notes are subordinated to the university's obligations to pay debt service on all General Receipts Obligations.

The Series 2009 Bonds are Federally Taxable – Build America Bonds. The University is eligible for a 35 percent rebate of interest expense paid for the Series 2009 Bonds in the form of a federal subsidy. The Series 2013B Bond is a Qualified Energy Conservation Bond eligible for a 70 percent federal rebate based on the Qualified Tax Credit Rate as of the bond sale date (4.60 percent). The benefit of the rebate has been assigned to the University. The rebates received for the years ended June 30, 2013 and 2012 were \$167,909 and \$133,834, respectively. The rebates were reported as Other Nonoperating Revenues and do not reduce the amount reported

### Notes to Financial Statements (Continued)

as interest expense for the year. Likewise, the amounts reported above for future interest expense have not been reduced by the federal rebates anticipated for future years. The University expects to receive \$3,975,764 in future federal rebates through 2028.

#### (6) Operating Leases

The University leases certain properties and equipment under operating lease agreements. Facilities and equipment under these agreements are not recorded on the statements of net position. Rent expenses for the year ended June 30, 2013 and 2012 were \$2,745,892 and \$2,946,264, respectively.

Future minimum payments for all material operating leases as of June 30, 2013, are as follows:

| 2014                         | \$<br>1,561,473 |
|------------------------------|-----------------|
| 2015                         | 1,047,384       |
| 2016                         | 623,000         |
| 2017                         | 188,502         |
| 2018                         | <br>35,563      |
| Total minimum lease payments | \$<br>3,455,922 |

#### (7) Retirement Plans

University faculty participate in either the State Teachers Retirement System of Ohio (STRS) or an alternative retirement plan (ARP). Substantially all other employees participate in either the Ohio Public Employees Retirement System (OPERS) or the ARP. Both STRS and OPERS are statewide cost-sharing multiple employer plans. Both plans provide retirement and disability benefits, annual cost of living adjustments, and death benefits to plan members and beneficiaries. Authority to establish and amend benefits for both STRS and OPERS is provided by state statute per the Ohio Revised Code.

Both STRS and OPERS issue stand-alone financial reports. Interested parties may obtain a copy by making a written request to STRS at 275 East Broad Street, Columbus, Ohio 43215-3771 or by calling (614) 227-4090 or making a written request to OPERS at 277 East Town Street, Columbus, Ohio 43215-4642 or by calling (614) 466-2085.

Plan participants are required to contribute 10 percent and the University 14 percent of the employees' covered compensation for both STRS and OPERS. Effective July 1, 2013, the plan participants' contribution percentage for STRS will increase to 11 percent of employees' covered compensation. The Ohio Revised Code provides statutory authority for both employee and employer contributions. The university's contributions to STRS were \$8,813,581, \$8,930,944, and \$8,769,990, and to OPERS were \$8,381,947, \$8,327,165, and \$8,320,220, for the years ended June 30, 2013, 2012, and 2011, respectively, equal to the required contributions for each year.

Certain full-time university faculty and staff have the option to choose the ARP in place of STRS or OPERS. The ARP is a defined contribution plan which provides employees with the opportunity to establish individual retirement accounts with a defined group of investment options, with each participant having control of the assets and investment options associated with those assets. The administrators of the plan are the providers of the plan investment options. Authority to establish and amend benefits and contribution requirements for the ARP is provided by state statute per the Ohio Revised Code.

# Notes to Financial Statements (Continued)

Under the provisions of ARP, the required contribution rate for plan participants is 10 percent of employees' covered compensation for employees who would otherwise participate in STRS or Effective July 1, 2013, the plan participants' contribution percentage for those who would otherwise participate in STRS will increase to 11 percent. The university's contributions to a participating faculty member's account and to STRS are 10.5 percent and 3.5 percent of a participant's compensation, respectively. Effective July 1, 2013, the university's contributions to a participating faculty member's account and to STRS will change to 9.5 percent and 4.5 percent of a participant's compensation, respectively. The university's contributions to a participating staff member's account and to OPERS are 13.23 percent and .77 percent of a participant's compensation, respectively. Plan participants' contributions were \$5,353,406, \$4,906,353, and \$4,654,491, and the university's contributions to the plan providers amounted to \$6,384,440. \$5,718,262, and \$5,421,393 for the years ended June 30, 2013, 2012, and 2011, respectively. In addition, the amounts contributed to STRS by the University on behalf of ARP participants were \$1,250,936, \$1,072,697, and \$1,003,976, respectively, for the years ended June 30, 2013, 2012, and 2011. The amount contributed to OPERS by the University on behalf of ARP participants was \$152,637, \$145,362, and \$171,328 for the years ended June 30, 2013, 2012, and 2011, respectively.

#### (8) Other Postemployment Benefits (OPEB)

The Ohio Revised Code provides the statutory authority for public employers to fund postretirement health care through their contributions to STRS Ohio and OPERS.

#### State Teachers Retirement System of Ohio

STRS Ohio provides access to health care coverage to eligible retirees who participated in the Defined Benefit or Combined Plans. Coverage under the current program includes hospitalization, physicians' fees, prescription drugs and reimbursement of monthly Medicare Part B premiums. Pursuant to Chapter 3307 of the Ohio Revised Code, the Retirement Board has discretionary authority over how much, if any, of the associated health care costs will be absorbed by STRS Ohio. All benefit recipients, for the most recent year, pay a portion of the health care costs in the form of a monthly premium.

Under Ohio Law, funding for postemployment health care may be deducted from employer contributions. Of the 14% employer contribution rate, 1% of the covered payroll was allocated to postemployment health care for 2013, 2012, and 2011. The portion of the university's 2013, 2012, and 2011 contributions to STRS Ohio used to fund postemployment benefits was \$629,542, \$637,925, and \$626,428 for the years ended June 30, 2013, 2012, and 2011, respectively.

#### Ohio Public Employees Retirement System

OPERS provides postemployment health care coverage to age-and-service retirees with 10 or more years of qualifying Ohio service credit. Health care coverage for disability benefit recipients and qualified survivor benefits is available. The Ohio Revised Code permits, but does not mandate, OPERS to provide OPEB to its eligible members and beneficiaries. Authority to establish and amend benefits is provided in Chapter 145 of the Ohio Revised Code.

OPERS' Post Employment Health Care plan was established under, and is administered in accordance with, Internal Revenue Code 401(h). Each year, the OPERS Retirement Board determines the portion of the employer contribution rate that will be set aside for funding of postemployment health care benefits. The portion of employer contributions allocated to health care for members in the Traditional Plan was an effective rate of 2.5%, 4.0%, and 4.5% for the years ended June 30, 2013, 2012, and 2011, respectively. The portion of the university's 2013, 2012, and 2011 contributions to OPERS used to fund postretirement benefits was \$1,496,776, \$2,379,190, and \$2,674,357. The OPERS Retirement Board is also authorized to establish rules for the payment of a portion of the health care benefits provided, by the retiree or their surviving

# Notes to Financial Statements (Continued)

beneficiaries. Payment amounts vary depending on the number of covered dependents and the coverage selected.

#### (9) State Support

The University is a state-assisted institution of higher education which receives a student subsidy from the State of Ohio primarily based upon the number of successful degree and course completions. This subsidy is calculated annually by the Ohio Board of Regents, Ohio's higher education advising and coordinating board.

In addition to student subsidies, the State of Ohio provides funding for construction of major plant facilities. The funding is obtained from the issuance of general obligation bonds by the Ohio Public Facilities Commission (OPFC), which in turn results in construction and subsequent transfer of the facility to the University by the Ohio Board of Regents. Costs incurred during construction are included in construction in progress and recognized as capital appropriations. Upon completion of a facility, the Ohio Board of Regents turns control over to the University.

University facilities are not pledged as collateral for the revenue bonds. Instead, the bonds are supported by a pledge of monies in the Higher Education Bond Service Fund established in the custody of the Treasurer of State. If sufficient monies are not available from this fund, a pledge exists to assess a special student fee uniformly applicable to students in state-assisted institutions of higher education throughout the State. As a result of the above described financial assistance provided by the State to the University, outstanding debt issued by OPFC is not included in the university's financial statements.

#### (10) Commitments and Contingencies

At June 30, 2013, the University is committed under contractual obligations for:

| Capital expenditures   | \$ | 22,958,795 |
|--|----|------------|
| Non-capital goods and services                                 | -  | 11,801,053 |
| Total contractual commitments                                  | \$ | 34,759,848 |
| These commitments are being funded from the following sources: |    |            |
| State appropriations requested and approved                    | \$ | 2,662      |
| University funds   | -  | 34,757,186 |
| Total sources  | \$ | 34,759,848 |

The University is presently involved as a defendant or codefendant in various matters of litigation. The university's administration believes that the ultimate disposition of these matters would not have a material adverse effect upon the financial statements of the University.

The University receives significant assistance from numerous federal and state agencies in the form of grants. The disbursement of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and are subject to audit by the grantor agencies. Any disallowed claims resulting from such audits could become a liability. Management believes that any potential disallowance of claims would not have a material effect on the financial statements.

# Notes to Financial Statements (Continued)

The University maintains comprehensive insurance coverage with private carriers for real property, building contents and vehicles. Vehicle policies include liability coverage for bodily injury and property damage. The University also carries professional coverage for employees and its Board of Trustees. Over the past three years, settlement amounts related to these insured risks have not exceeded the university's coverage amounts. There has been no significant change in coverage from last year.

The University is self-insured for all employee health care benefits with Anthem and Express Scripts, Delta Dental, and Vision Service Plan as the third party administrators. Under the terms of the policy, the University is billed for actual claims on a weekly or monthly basis. In addition, liabilities for estimates of outstanding claims and claims incurred but not reported under self-insurance programs have been recorded in accrued liabilities. Changes in the self-insured health care liabilities for the past three fiscal years are as follows:

|  | _  | 2013         | 2012         | 2011         |
|--|----|--------------|--------------|--------------|
| Liability at beginning of fiscal year              | \$ | 1,800,000 \$ | 1,600,000 \$ | 1,500,000    |
| Current year claims including changes in estimates |    | 27,392,159   | 27,825,820   | 25,418,952   |
| Claim payments                                     | _  | (27,592,159) | (27,625,820) | (25,318,952) |
| Liability at end of fiscal year                    | \$ | 1,600,000 \$ | 1,800,000 \$ | 1,600,000    |

Health insurance claims are based upon estimates of the claims liabilities. Estimates are based upon past experience, medical inflation trends, and current claims outstanding, including year-end lag analysis. Differences between the estimated claims payable and actual claims paid are reported in the statements of revenues, expenses and changes in net position.

#### (11) Selected Disclosures of the Wright State University Foundation (a component unit)

The University is the sole beneficiary of the Wright State University Foundation, Inc., a separate, not-for-profit entity governed by a separate Board of Trustees, organized for the purpose of promoting educational and research activities. Assets of the Foundation totaled approximately \$119,900,000 and \$110,300,000 at June 30, 2013 and 2012. Such assets relate principally to donor restricted funds and are discretely presented in the accompanying financial statements. Amounts transferred to the University from the Foundation are recorded as nonoperating "gifts" and "capital grants and gifts" in the accompanying financial statements. Following are selected disclosures from the Wright State University Foundation, Inc. financial statements.

#### A. Summary of Significant Accounting Policies

In accordance with generally accepted accounting principles as applied to not-for-profit organizations, the financial statements of the Foundation have been prepared on the accrual basis of accounting. The Financial Accounting Standards Board ("FASB") is the accepted standards setting body for establishing accounting principles generally accepted in the United States ("GAAP"). The following is a summary of the Foundation's significant accounting and reporting policies presented to assist the reader in interpreting the financial statements and other data in this report.

#### Cash and Cash Equivalents

The Foundation considers all highly liquid investments with maturities of three months or less when purchased to be cash equivalents.

# Notes to Financial Statements (Continued)

#### Pledges Receivable

Unconditional pledges are recorded in the period that the pledges are received. Conditional pledges are recorded in the period in which the conditions have been met. Payments on pledges to be collected in future years are recorded at net present value. All pledges are presented net of an allowance for doubtful collections.

#### Gifts Receivable from Trusts Held by Others

Irrevocable trusts which will benefit the Foundation are recognized as gift revenue and as a receivable in an amount equal to the present value of the estimated future benefits to be received when trust assets are distributed. Adjustments to the receivable to reflect revaluation of the present value of the estimated future payments to the donor-designated beneficiaries and changes in actuarial assumptions during the term of the trust will be recognized as changes in the value of the asset.

#### Investment in Securities

Investments are stated at fair value. The fair values of investments are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments. Investments are initially recorded at their acquisition cost if they were purchased and at fair value if they are received through a contribution or exchange transaction. Securities traded on a national exchange are valued at their last reported sales price on the exchange on which they are traded.

Alternative investments, such as hedge funds, private equity and venture capital instruments, for which there is no ready market, are valued at fair value as estimated by management. To estimate fair value, management may rely on valuations reported by the general partners of such investments in unaudited financial reports and/or the Foundation's independent investment advisor. The Foundation believes the carrying amount of these financial instruments is a reasonable estimate of fair value. Because of the inherent uncertainty of valuation in the absence of readily ascertainable market values, the estimated values of those investments may differ from the values that would have been used had a ready market existed for such investments or if the investments were realized, and the differences could be material.

Realized gains or losses are included in the statement of activities. Unrealized gains or losses are based on the differences between cost and fair value of each classification of security and are reported in the statement of activities.

#### Annuity Assets/Payable

Under charitable gift annuity agreements, the Foundation has recorded the donated assets at fair value and the liabilities to the donor and/or his/her beneficiaries at the present value of the estimated future payments to be distributed by the Foundation to such individuals. The amount of the gift is the difference between the asset and liability and is recorded as gift revenue.

#### Capital Assets

Expenditures for property and equipment and items that substantially increase the useful lives of existing assets are capitalized at cost. It is the policy of the Foundation to capitalize additions with an original cost of \$5,000 or more. Assets acquired by gift are valued at fair value as of the date donated. The Foundation provides for depreciation using the straight-line method at rates designed to depreciate the costs of assets over estimated useful lives as follows:

# Notes to Financial Statements (Continued)

|                         | Years |
|-------------------------|-------|
| Land improvements       | 10-25 |
| Buildings               | 20-65 |
| Machinery and equipment | 5-10  |

#### Deposits Held in Custody for Others

These assets represent resources received and held by the Foundation as custodian. The assets are placed in the Foundation's investment portfolio and receive a pro-rata share of investment earnings.

#### Net Assets

The Foundation's net assets are classified into three categories: (1) unrestricted net assets, which include no donor-imposed restrictions, (2) temporarily restricted net assets, which include donor-imposed restrictions that will be satisfied in the future and (3) permanently restricted net assets, which include donor-imposed restrictions that the assets be maintained permanently.

The unrestricted net assets consist of operating funds available for any purpose authorized by the board of trustees. Included in unrestricted net assets are funds that have been designated as endowments by the board (quasi-endowments). The board may elect to reverse the decision to designate unrestricted net assets.

Temporarily restricted net assets consist of funds arising from a gift in which the donor has stipulated, as a condition of the gift, restrictions on how or when the gift may be spent. Temporarily restricted net assets also include unspent gains on donor-restricted gifts by virtue of the Foundation's spending. This policy, which was approved by the board of trustees, aims to protect the Foundation's donor-designated endowments from the effects of inflation by reinvesting a portion of the earnings on these funds as if they were endowment funds. Since the reinvestment of earnings from endowments was not explicitly designated by the donors, the reinvested earnings cannot be classified as permanently restricted under GAAP.

Quasi-endowment funds may also be established by request of a University college or department in accord with the Foundation's quasi-endowment policy. The objective of this policy is to allow significantly large temporarily restricted funds to generate earnings that may be used by the requesting unit for the purpose(s) specified by the donor.

Permanently restricted net assets consist of funds arising from a gift or bequest in which the donor has stipulated, as a condition of the gift, that the principal be maintained in perpetuity and only the investment income from investment of the funds be expended. Certain donor endowments also specify that a portion of the earnings from the investment be reinvested as principal, or that all income earned over a period of time be reinvested. Amounts are also transferred for specific uses from time to time, as requested by the donor.

#### Gifts and Contributions

Gifts and contributions are recorded at their fair market value on the date of receipt. All contributions are considered to be available for unrestricted use unless specifically restricted by the donor. Gifts received that are designated for future periods or restricted by the donor for specific purposes are reported as temporarily restricted or permanently restricted support that increases those net asset categories.

Contributed property is recorded at fair value at the date of donation. If donors stipulate how long the assets must be used or restrict the use of such assets for a specific purpose, the

# Notes to Financial Statements (Continued)

contributions are recorded as restricted support. In the absence of such stipulations, gifts of property are recorded as unrestricted support.

#### Investment Earnings

Interest and dividends from endowment investments are credited to temporarily restricted funds and spent in compliance with donor stipulations and the Foundation's spending policy. Interest and dividends from non-endowment investments are credited to the unrestricted fund for expenditure at the discretion of the Foundation's board of trustees. Realized gains or losses are determined based on the average cost method.

#### Net Assets Released from Restrictions

When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statement of activities as net assets released from restrictions.

#### Federal Income Taxes

The Foundation has been approved under the Internal Revenue Code Section 501(c)(3) as a nonprofit organization exempt from federal taxes on its normal activities.

GAAP prescribes recognition thresholds and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. Management has concluded that they are unaware of any tax benefits or liabilities to be recognized at June 30, 2013 or 2012, respectively.

The Foundation is no longer subject to examination by taxing authorities for years before 2010. The Foundation does not have any tax benefits recorded at June 30, 2013, and does not expect that position to significantly change in the next year. The Foundation would recognize interest and/or penalties related to income tax matters in income tax expense, if applicable, and there were no amounts accrued for interest and penalties at June 30, 2013 or 2012.

#### Fair Value of Financial Instruments

Fair value is defined as the price that would be received for an asset or paid to transfer a liability (an exit price) in the Foundation's principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The carrying value of the Foundation's financial instruments, which include cash and cash equivalents, pledges receivable, investments, accounts payable, annuity agreements and long-term debt, approximate fair value.

#### Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### Reclassifications

Certain reclassifications have been made to data in the accompanying prior year financial statements to conform to the current year's presentation. These reclassifications had no effect on net assets or the change in net assets.

# Notes to Financial Statements (Continued)

#### B. Business and Concentrations of Credit Risk

The Foundation's financial instruments that are exposed to various risks, such as interest rate, market and concentrations of credit risk consist primarily of cash and investments. The Foundation deposits its cash in federally insured banks. These deposits are generally in excess of the Federal Deposit Insurance Corporation's insurance limit.

Investments are managed by a professional investment management company utilizing the "manager of managers" model of portfolio administration. The investment manager is subject to the Foundation's investment policy, approved by the board of trustees, which contains objectives, guidelines and restrictions designed to provide for preservation of capital with an emphasis on providing current income and achieving long-term growth of the funds without undue exposure to risk. Certain funds have been pooled for ease of management and to achieve greater diversification in investments. Due to the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible the changes in risks in the near term would result in material changes in the fair value of long-term investments and net assets of the Foundation.

#### C. Fair Value of Financial Instruments

Fair value is the price that would be received for an asset or paid to transfer a liability (an exit price) in the Foundation's principal or most advantageous market on the measurement date.

The fair value hierarchy established by U.S. GAAP requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1: Quoted prices for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

In many cases a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of significant input determines the placement of the entire fair value measurement in the hierarchy.

# Notes to Financial Statements (Continued)

Assets measured at fair value on a recurring basis are summarized below and on the following page for the years ended June 30, 2013 and 2012:

|   | Fair Value Measurements at June 30, 2013 Using |                   |    |             |    |              |    |             |
|---|--|-------------------|----|-------------|----|--------------|----|-------------|
|   |  | Quoted Prices     |    | Significant |    |              |    |             |
|   |  | In Active Markets |    | Other       |    | Significant  |    |             |
|   |  | for Identical     |    | Observable  |    | Unobservable |    |             |

The fair value of gifts receivable from trusts held by others is based on a valuation model that calculates the present value of estimated residual trust value. The valuation model incorporates assumptions that market participants would use in estimating future investment earnings. Management determines the fair value based on best information available (Level 3 inputs).

Investments in securities consist primarily of mutual fund shares managed by a professional investment management company utilizing the "manager of managers" model of portfolio administration. The fair value of money markets and bonds are based on quoted prices in active markets (Level 1 inputs).

For hedge funds, private equity and commercial loans, for which there is no active market, information such as historical and current performance of the underlying assets, cash flow projections, liquidity and credit premiums required by a market participant, and financial trend analysis with respect to the individual fund manager, are utilized in determining individual security valuations. Due to current market conditions as well as the limited trading activity of

# Notes to Financial Statements (Continued)

these securities, the market value of the securities is highly sensitive to assumption changes and market value volatility (Level 3 inputs).

Approximately one half of the Foundation's hedge fund allocation is invested in a "fund of funds" vehicle structured as an offshore company that invests all of its capital in private placement funds. The fund's investment objective is to seek to achieve a return somewhere between historical market equity and fixed income returns with a moderate level of risk undertaken. The fund is broadly diversified and invests in multiple hedge fund strategies including convertible bond hedging, credit hedging, distressed debt, equity market neutral, equity long/short, merger arbitrage, short biased and sovereign debt and mortgage hedging. The fund generally invests in 30-40 hedge funds and the fund of funds manager requires full transparency of each of the underlying funds' investment positions. The Foundation is no longer subject to the fund's initial one-year lock-up period and may, therefore, request liquidation at net asset value on a quarterly basis with 65 days prior notification (Level 2 inputs). At June 30, 2013, the Foundation has no significant unfunded commitments to its hedge fund allocation.

The balance of the Foundation's hedge fund allocation is also invested in a "fund of funds" structured as an offshore company. The fund's investment objective is to seek to achieve high returns balanced against an appropriate level of volatility and directional market exposure over a full market cycle. The fund is broadly diversified and invests in various private funds such as hedge funds that pursue hedged or other alternative investment strategies, private equity funds, hybrid funds and any other alternative investment funds, while also opportunistically investing directly in any other securities and financial instruments. The fund generally invests in 15-20 funds and the fund of funds manager requires full transparency of each of the underlying funds' investment positions. The Foundation is subject to the fund's initial two-year lock-up period, which will end in January of 2015. Once the lock-up period has ended, the Foundation may request liquidation on a semi-annual basis with 95 days prior notification. At June 30, 2013, the Foundation has no significant unfunded commitments to this hedge fund allocation.

The private equity fund investment is structured as a domestic partnership in which the Foundation is a limited partner. The fund seeks to invest the capital contributed to it in a diversified pool of long-term investments in non-publically traded companies. Diversification is accomplished by investing 40-60% of committed capital in underlying funds focused on the United States, 20-40% on Europe and 0-30% on emerging markets. Capital commitments of the limited partners are payable to the partnership in installments over a 3-5 year period. At June 30, 2013, the Foundation's total capital commitment of \$3,500,000 was 54.6% (\$1,910,908) funded. Due to the long-term commitment of capital and the unpredictability of capital calls and partnership distributions, the fund is generally considered illiquid. It is also not unusual for private equity funds to experience losses in the early years of their existence. The valuation of this investment is based on net asset value using the market approach (Level 3 input).

The Foundation's investment in commercial loans is in the form of a fund that invests in a diversified portfolio of structured credit instruments, the majority of which are Collateralized Debt Obligation (CDO) equity and mezzanine notes. CDOs are structured finance securities that hold a diversified pool of income-generating collateral that is financed through the issuance of debt securities. CDO investors assume the first level of default risk. These notes are lowly correlated to traditional and other alternative investments, have minimal interest rate risk, and are highly transparent. The Foundation's investment in this asset class was fully funded at June 30, 2013. The Foundation is no longer subject to the investment's two year lockup period and may, therefore, request liquidation on a quarterly basis with 69 days prior notice (Level 2 input).

Valuation of limited partnership shares reported as "other investments" are derived from reports issued by the general partners adjusted for capital contributions and withdrawals throughout the fiscal year. Although the fund custodians provide annual audited financial

# Notes to Financial Statements (Continued)

statements for each of the funds, the value of the underlying securities is difficult to ascertain as there is no active market associated with these ownership interests. Thus, the partnership interests are classified as valued based upon Level 3 inputs using the market approach.

Valuation of annuity assets (and related liabilities) is based on a "Default Level Matrix" developed by the custodian. Mutual funds and other instruments are classified based on analysis and review of FASB standards, together with input from securities pricing service companies, broker/dealers and investment managers regarding their pricing methodologies; discussions with clients and independent accounting firms regarding various market inputs used to determine fair value and participation in industry forums. Management believes that this custodian-developed matrix accurately interprets applicable FASB guidance with respect to the level classification defined therein.

#### D. <u>Pledges Receivable</u>

Pledges receivable at June 30, 2013 and 2012, by fund type, are as follows:

|                                     |              | 2               | 201 | 13          |     |             |

The fair value of pledges receivable was determined using discount rates applicable to the year in which the pledge was established. Rates ranged from .72% to 4.92%.

# Notes to Financial Statements (Continued)

#### E. Gifts Receivable From Trusts Held By Others

The Foundation is a party to charitable gift trusts. Third party trustees maintain trust assets in irrevocable trusts for the benefit of the Foundation. The fair values of the trusts are estimated based upon the fair value of the assets contributed by the donor less the present value of the payment expected to be made to other beneficiaries. The present value is calculated using discount rates the year in which the trust was established, in this case, 4.92%. The balances at June 30, 2013 and 2012, are \$1,277,300 and \$1,414,100, respectively, and are included in Temporarily Restricted net assets.

#### F. <u>Investment in Securities</u>

The cost and fair value of the Foundation's investments, at June 30, 2013 and 2012, are as follows:

|                    | _  | 2013        | 2012              |
|--------------------|----|-------------|-------------------|
| Mutual funds:      | -  | _           | _                 |
| Equity             | \$ | 50,824,891  | \$<br>41,945,823  |
| Fixed income       |    | 40,911,330  | 40,551,777        |
| Alternative assets | _  | 15,884,957  | 18,047,909        |
| Totals             | \$ | 107,621,178 | \$<br>100,545,509 |

Net realized gains (losses) on sales of investments were \$1,064,618 and \$628,998 for the years ended June 30, 2013 and 2012, respectively. Calculation of net realized gains on sales of investments is based on original cost. Net unrealized gains (losses) amounted to \$5,663,769 and (\$1,916,362) for the years ended June 30, 2013 and 2012, respectively.

#### G. Capital Assets

Capital assets activity for the year ended June 30, 2013 is summarized as follows (the Foundation possessed no capital assets during the year ended June 30, 2012):

|                                |    |                      |                 |    | 2013       |           |                   |
|--------------------------------|----|----------------------|-----------------|----|------------|-----------|-------------------|
|                                | -  | Beginning<br>Balance | Additions       |    | Reductions | Transfers | Ending<br>Balance |

# Notes to Financial Statements (Continued)

Due to increasing demand for academic space on its main campus, the University has encouraged non-academic units to secure off-campus space to free up currently utilized facilities. In accord with this request, the Foundation purchased an existing building adjacent to campus on November 1, 2012. The purchase will allow all Advancement operations, with the exception of Alumni Relations, to consolidate in a single location. The building is currently occupied by one non-University tenant and it is anticipated that the University will lease a portion of the building for administrative office space. Shortly after the purchase was consummated, contractors were hired to renovate and refurbish the building prior to occupancy. The anticipated cost of the renovation project, which was on-going at the end of the fiscal year, is \$1,500,000. Occupancy is expected to occur during September, 2013.

#### **H. Debt Guaranties**

During fiscal year 2011, the Foundation entered into agreement with Dayton Regional STEM Schools, Incorporated ("STEM") guarantying payments on a lease (and such other obligations imposed by the lease) related to the purchase and renovation of an existing building that is utilized by the School in fulfillment of its corporate purposes. STEM is one of ten Ohio schools offering students a relevant, real world educational experience that will prepare them for college and opportunities in the work world. Wright State University has acted as STEM's fiscal agent as well as providing space, supplies and personnel in support of its operations. The agreement pledges unrestricted net assets of the Foundation in an amount not to exceed \$3 million and the designation of unrestricted net assets in the amount of one year of maximum debt service (\$600,000) on bonds associated with the project. Since the guarantee may expire without being drawn upon, the total guarantee does not necessarily represent future cash requirements. As of June 30, 2013, no amounts have been recognized as a liability under the financial guaranty in the Foundation's statement of financial position as the likelihood that STEM would be unable to fulfill its obligation in full or in part under the debt agreement is not considered to be probable.

Also during fiscal year 2011, the Foundation entered into an agreement with Wright State Physicians, Incorporated ("WSP") guarantying the debt service payments on \$13.5 million worth of bonds issued to finance construction of a three-story medical office building on Wright State's main campus that will be used to fulfill WSP's corporate purposes. WSP is the faculty practice plan for Wright State's Boonshoft School of Medicine ("BSOM"), which functions to recruit and retain clinicians and scientists in support of the clinical, educational, research and community service activities of BSOM. The agreement pledges the remaining proceeds of a large donation to BSOM made in fiscal year 2005. As of June 30, 2013, the market value of this gift, segregated in a separate portfolio, was \$20,497,558. Since the guarantee may expire without being drawn upon, the total guarantee does not necessarily represent future cash requirements. As of June 30, 2013, no amounts have been recognized as a liability under the financial guaranty in the Foundation's statement of financial position as the likelihood that WSP would be unable to fulfill its obligation in full or in part under the debt agreement is not considered to be probable.

# NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS YEAR ENDED JUNE 30, 2013

#### A. BASIS OF PRESENTATION

The accompanying Schedule of Expenditures of Federal Awards (the "Schedule") has been prepared using the accrual basis of accounting in accordance with the format as set forth in Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations,* issued by the United States Office of Management and Budget. The Schedule reflects the expenditures of Wright State University under programs financed by the U.S. government for the year ended June 30, 2013.

For purposes of the Schedule, expenditures of federal awards include the following:

- Direct federal awards
- Federal Direct Student Loans processed by the University
- Outstanding Balances of federal loan programs administered by the University
- Pass-through funds received from non-Federal organizations made under federally sponsored programs conducted by those organizations.

Awards are classified into major program and non-major program categories in accordance with the provisions of the Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Catalog of Federal Domestic Assistance (CFDA) Numbers or Primary Grant Numbers are presented for those programs for which such numbers are available.

#### **B. FEDERAL DIRECT STUDENT LOANS**

The University is responsible only for the performance of certain administrative duties with respect to the Federal Direct Student Loan program (CFDA Number 84.268).

#### C. FEDERAL LOAN PROGRAMS

Total loan expenditures and disbursements of the Department of Health and Human Services student financial assistance loan programs for the fiscal year are identified below:

|                              | CFDA             |    |              |
|------------------------------|------------------|----|--------------|
|                              | Number Disbursen |    | isbursements |
| Federal Perkins Loan Program | 84.038           | \$ | 2,246,466    |
| Nursing Student Loan Program | 93.364           |    | 412,061      |
| Nurse Faculty Loan Program   | 93.264           |    | 68,976       |

### D. Subrecipients

Of the federal expenditures presented in the Schedule, the University provided federal awards to subrecipients as follows:

| Subrecipient Name                        | CFDA<br>No.  | Program Title  | Expenditures |

# INDPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Trustees of Wright State University Dayton, Ohio

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of the business-type activities and discretely presented component unit of Wright State University as of and for the year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise Wright State University's basic financial statements, and have issued our report thereon dated the same day as this report.

#### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered Wright State University's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Wright State University's internal control. Accordingly, we do not express an opinion on the effectiveness of Wright State University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether Wright State University's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

#### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

### INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM; REPORT ON INTERNAL CONTROL OVER COMPLIANCE

To the Board of Trustees of Wright State University Dayton, Ohio

#### Report on Compliance for Each Major Federal Program

We have audited Wright State University's compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of Wright State University's major federal programs for the year ended June 30, 2013. Wright State University's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

#### Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

#### Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of Wright State University's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Wright State University's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of Wright State University's compliance.

#### Opinion on Each Major Federal Program

In our opinion, Wright State University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2013.

(Continued)

#### **Report on Internal Control Over Compliance**

Management of Wright State University is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered Wright State University's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of Wright State University's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

### INDEPENDENT ACCOUNTANTS' REPORT ON THE APPLICATION OF AGREED-UPON PROCEDURES

Dr. David Hopkins, President Wright State University Dayton, Ohio

We have performed the procedures enumerated below, which were agreed to by management of Wright State University (the "University"), solely to assist the University in evaluating whether the accompanying Statement of Revenues and Expenses of the University is in compliance with the National Collegiate Athletic Association (NCAA) Constitution 3.2.4.16 for the year ended June 30, 2013. Management of the University is responsible for the Statement of Revenues and Expenses (the "Statement") and the Statement's compliance with those requirements. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accounts. The sufficiency of these procedures is solely the responsibility of those parties specified in this report. Consequently, we make no representations regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

#### Agreed-Upon Procedures Related to the Statement of Revenues and Expenses

The procedures that we performed and our findings are as follows:

#### <u>Procedures Related to the Accounting Records</u>

- 1. We obtained the Statement of Revenues and Expenses (the "Statement") of the Intercollegiate Athletics Department (the "Athletics Department") for the year ended June 30, 2013, as prepared by management and as shown on page 5. Additionally, we obtained the supporting worksheets, recalculated totals, and agreed each of the revenue and expense amounts on the Statement to management's worksheets, noting no exceptions.
- 2. We agreed all amounts on management's worksheets to the University's June 30, 2013 general ledger, noting no exceptions.
- 3. We compared revenues and expenses appearing on the Statement to budgeted amounts and prior year amounts and obtained explanations for all variances greater than \$50,000 and 10 percent. All variances were explained by management. We have read the schedule and explanations provided by management at the Athletic Department and the University's Controller's Office for the 20 items that met the criteria.
- 4. We scanned the supporting schedules provided by the University and identified one contribution of cash, services or goods that was received directly by the University's Athletics Department and that constituted 10 percent or greater of all contributions received by the University's Athletics Department. In addition, we haphazardly selected a sample of 9 more contributions and agreed to check copies or other supporting documentation maintained by the University, noting no exceptions.

- 5. We haphazardly selected a sample of 10 other operating revenue receipts and agreed the revenue receipts to check copies and/or other supporting documentation maintained by the University, noting no exceptions.
- 6. We haphazardly selected one home men's basketball game and one home women's basketball game and recalculated revenue totals related to tickets sold and agreed the ticket revenue to the general ledger, noting no exceptions. We recalculated totals of complimentary tickets and unsold tickets appearing on the ticket office sales reports, noting no exceptions.
- 7. We haphazardly selected a sample of 5 away games and 5 home games and agreed all related revenues and expenditures to the signed agreements, and the Statement, noting no exceptions.
- 8. We agreed the Federal Work Study support recorded by the Athletics Department with federal appropriations. We haphazardly selected a sample of 5 Federal Work Study transactions and agreed the transactions to supporting documentation, noting no exceptions.
- 9. We agreed the University's direct support recorded by the Athletics Department to the University's authorizations, noting no exceptions.
- 10. We obtained and inspected 10 agreements related to the University's participation in revenues from tournaments during the year ended June 30, 2013 to gain an understanding of the relevant terms and conditions. We agreed the related tournament revenues to the check copies, where applicable, as well as to the general ledger and Statement, noting no exceptions.
- 11. We obtained and inspected the agreements related to the University's participation in revenues from advertisements and sponsorships. We haphazardly selected 10 revenue transactions and agreed them to the check copies, where applicable, as well as the total to the general ledger and the Statement, noting no exceptions.
- 12. There was no information provided by the University to perform the agreed-upon procedures on sports camp contracts between the University and external parties. Management indicated all sports camps are conducted by the coaches employed by the University. We haphazardly selected 10 sports-camp participant cash receipts and agreed the revenue to check copies and camp application forms, as well as to the general ledger and the Statement, noting no exceptions.
- 13. We haphazardly selected 10 sports-camp expenses and agreed the expense to the supporting documentation and agreed that the expense was for camp related activity, noting no exceptions.
- 14. We haphazardly selected a sample of 10 student athletes who received institutional athletic aid during the fiscal year ended June 30, 2013 and agreed the award amount per the student's account detail to the related award letter, noting no exceptions.
- 15. We obtained a listing of coaches employed by the University. We haphazardly selected one men's and one women's basketball coach and a selection of eight other coaches and obtained the related contracts. We agreed the financial terms and conditions to the related coaches' salaries, benefits and bonuses to the amounts recorded by the University in the Statement, noting no exceptions.
- 16. We obtained the W-2's for the coaches selected above and agreed amounts appearing in the W-2's to the related expenses in the Statement. Because the W-2's are for the year ended December 31, 2012, and the salaries and benefit expense per the Statement are for the fiscal year ended June 30, 2013, the total compensation per the W-2's did not agree with the salaries and benefits expense per the Statement.

- 17. We obtained a listing of administrative employees of the Athletics Department and other third parties that are not included in the University's general ledger. We haphazardly selected 10 administrative employees of the Athletics Department and obtained the W-2's for the employees selected and agreed the amounts appearing in the W-2's to the related expenses in the Statement. Because the W-2's are for the year ended December 31, 2012, and the salaries and benefit expense per the Statement are for the fiscal year ended June 30, 2013, the total compensation per the W-2's did not agree with the salaries and benefits expense per the Statement.
- 18. We agreed the salaries, benefits and bonuses paid by the University for the administrative employees selected above to the related expense recorded by the University in the Statement noting no exceptions. Management indicated there were no other third party administrative employees.
- 19. Management indicated that there were no severance payouts during the year as all of the coaches are employed per an employment contract and all contracts were fulfilled and or renewed.
- 20. We obtained copies of the University's recruiting and travel policies. We read the policies and agreed them to the NCAA policies, noting no inconsistencies.
- 21. We haphazardly selected a sample of 10 program sales, concessions, novelty sales and parking revenue transactions and agreed to supporting documentation maintained by the University, noting no exceptions.
- 22. We haphazardly selected a sample of 10 equipment, uniform and/or supplies expense transactions, and agreed the expense transaction to supporting documentation maintained by the University, noting no exceptions.
- 23. We reviewed contracts for fundraising, marketing and promotional activities for the Athletics Department. We haphazardly selected a sample of 10 fundraising, marketing and/or promotion expense transactions and agreed them to supporting documentation, noting no exceptions.
- 24. We haphazardly selected a sample of 10 medical and medical insurance expense transactions and agreed them to supporting documentation, noting no exceptions.
- 25. We haphazardly selected a sample of 10 memberships and dues expense transactions and agreed them to supporting documentation, noting no exceptions.
- 26. We haphazardly selected a sample of 10 other operating expense transactions and agreed the expense to supporting documentation maintained by the University, noting no exceptions.
- 27. There was no information provided by the University to perform the agreed-upon procedures on student fees, compensation and benefits provided by a third-party, indirect facilities and administrative support, endowment or investment, coaches employed by third parties, or participation in revenues from broadcast, television, radio and internet rights. Management indicated there were no such transactions during the reporting period.
- 28. For the remaining operating expense category reported in the Statement and not individually listed above, we haphazardly selected a sample of 10 transactions from the supporting schedules provided by the University and agreed to related supporting documentation, noting no exceptions.

#### **Procedures Related to the Internal Accounting Controls**

29. We obtained an understanding of the University's procedures for gathering information on the nature and extent of the affiliated and outside organization's activities for or on behalf of the University's intercollegiate athletic programs. We found that the University receives internal reports of the outside organization's activities on a monthly basis and an external audited report on an annual basis.

#### **Procedures Related to the Wright State University Foundation**

- 30. We obtained the list of outside programs and related financial activities for the year ended June 30, 2013, which is included on page 6 of this report.
- 31. We confirmed with the athletic business manager that the information referred to in step 30 above is a complete list of programs outside the University's financial reporting system, which conducted financial transactions for or on behalf of the University's intercollegiate athletic programs during the year ended June 30, 2013.
- 32. We confirmed directly with officers of the Foundation that the data to be contained in step 30 above represented a complete and accurate summary of all business transacted for or on behalf of the University's intercollegiate athletic programs during the year ended June 30, 2013.

#### **Procedures Related to the Athletics Assets**

- 33. We obtained a schedule of intercollegiate athletics capitalized assets, additions and improvements of facilities summarized by type.
- 34. We agreed the schedule to the institution's general ledger.
- 35. We identified four capitalized additions made by the University during the reporting period. Three individual additions constituted 10 percent or greater of total capital additions by the University's Athletics Department. We agreed the capitalized addition to supporting documentation, noting no exceptions.

We were not engaged to and did not conduct an examination, the objective of which would be the expression of an opinion on compliance of the accompanying statement of revenues and expenses of Wright State University intercollegiate athletics operations with the NCAA Constitution 3.2.4.16. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the University management and governing boards, and is not intended to be and should not be used by anyone other than these specified parties.
