Connecting Members to the **Future**

Annual Comprehensive Financial Report for the year ended December 31, 2021

Ohio Public Employees Retirement System

Prepared by OPERS Finance Division Staff

88 East Broad Street Columbus, Ohio 43215 IPAReport@ohioauditor.gov (800) 282-0370

Board of Trustees Ohio Public Employees Retirement System 277 East Town Street Columbus, Ohio 43215

We have reviewed the *Independent Auditor's Report* of the Ohio Public Employees Retirement System, Franklin County, prepared by Plante & Moran, PLLC, for the audit period January 1, 2021 through December 31, 2021. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Ohio Public Employees Retirement System is responsible for compliance with these laws and regulations.

Keith Faber Auditor of State Columbus, Ohio

This page intentionally left blank.

Employer composition and membership information

For actuarial purposes, participating employers are divided into State, Local, Law Enforcement and Public Safety divisions. A complete description of the OPERS membership is contained in the Plan Statement Section of this document, beginning on page 213.

Annual report organization

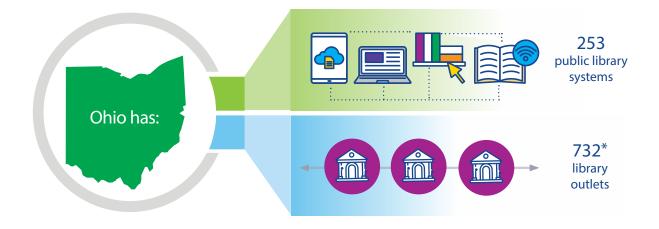

This annual report is divided into six sections, listed as each appears in this document:

- 1 Introductory Section—with the Letter of Transmittal, organizational chart, and recognition awards garnered in 2021
- 2 Financial Section—with the Independent Auditors' Report, Management's Discussion and Analysis, the financial statements of the System, Required Supplementary Information and Additional Information
- 3 Investment Section—with the Chief Investment Officer's report on investment activity, Independent Investment Consultant's Report, investment policies, investment results, and various investment schedules
- 4 Actuarial Section—with the Actuary's Certification Letter and the most recent results of the annual actuarial valuations for pension and health care
- 5 Statistical Section—with significant data pertaining to the System
- 6 Plan Statement—with membership information and details about the retirement plans offered through OPERS

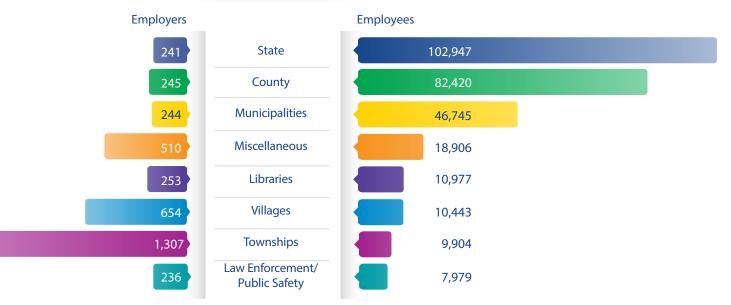

Introductory Understanding the importance of pensions

Pensions have long been recognized as an important recruiting and retention tool for public employees. Public employees contribute to the quality of life, economic landscape and overall health of all Ohio residents. Those quality-of-life contributions to residents start at birth and continue throughout every cycle of life.

Connecting members to the future: Employees of Ohio's 253 library systems are OPERS members during working careers, and still have the opportunity to enjoy the library offerings as retirees. Every county has library services providing retirees with access to multiple types of media, socialization, educational programs, AND, for some retirees, a healthy lifestyle walk to their library branch.

Employees by employer type

Section 1

Board of Trustees as of January 2022

Front Row (left to right): James Kunk, Governor-Appointed Investment Expert; James Tilling, General Assembly Appointed Investment Expert; Kathleen Madden, Director—Department of Administrative Services (Statutory Member); Richard Hollington, Jr., Treasurer-Appointed Investment Expert

Back Row (left to right): Julie Albers, Representative for County Employees; Tim Steitz, Representative for Retirees; Chris Mabe, Representative for State Employees and Board Chair; Steve Toth, Representative for Retirees; Ken Thomas, Representative for Municipal Employees and Board Vice Chair

Not Shown in Photo: Randy Desposito, Representative for Non-Teaching College/University Employees; Stewart Smith, Representative for Miscellaneous Employees (appointed to Board in March 2022)

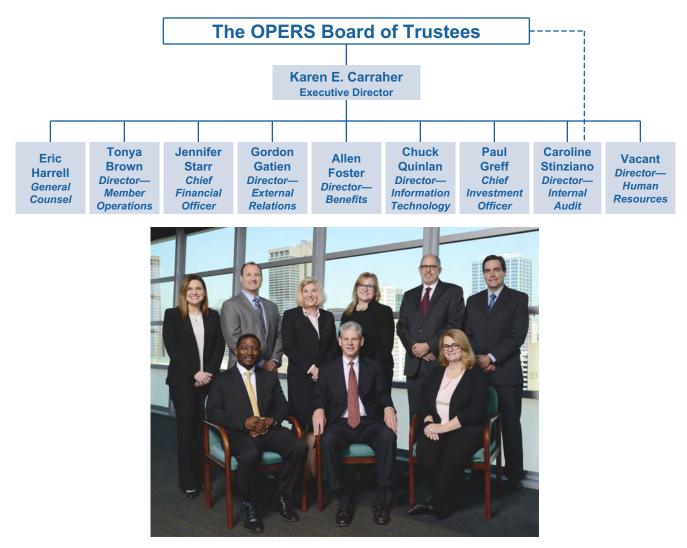

The 11-member Board of Trustees is the governing body of the Ohio Public Employees Retirement System (referred to as OPERS, System or Fund). The Board is ultimately responsible for the administration and management of all OPERS activities including oversight of investment activities.

The Board is comprised of seven individuals who are elected by the specific stakeholder group each represents: college/university employees, state employees, miscellaneous employees, county employees, municipal employees, and two retiree elected representatives. Three individuals with investment expertise are appointed by Ohio's Governor, Treasurer and jointly by the Ohio Legislature. The Board is completed by the Director of the Ohio Department of Administrative Services who serves on the Board by virtue of office.

The Board appoints the Executive Director, an actuary, and other advisors necessary for the transaction of business. By law, the Treasurer of the state of Ohio is custodian of the OPERS funds.

The Board typically meets monthly and receives no compensation, but is reimbursed for necessary expenses.

Ohio Public Employees Retirement System

277 East Town Street Columbus, Ohio 43215-4642 1-800-222-7377 www.opers.org

May 9, 2022

Dear Chairman and Members of the Board of Trustees:

On behalf of all management and staff, it's our pleasure to present you with the 2021 Annual Comprehensive Financial Report (annual report). This document reflects the results of activities undertaken by the Ohio Public Employees Retirement System (OPERS or System) for the fiscal year ended December 31, 2021.

Our theme—*Connecting Members to the Future* reflects our continued commitment to maintaining a strong system that delivers to all our members now and in the future. We take our responsibility for providing pension benefits for our members and maintaining access to affordable health care seriously and we believe we have reflected that through our actions. In concert with our members, we have made changes to the pension plans and health care programs, and we are now seeing the results in a stronger system.

We had hoped that 2021 would usher in a return to normal, however that did not happen. Instead, the year was a continuation of many of the issues from 2020 with the addition of some new ones. The pandemic continued with both surges in the spread of the virus and periods of lower infection rates resulting in the need for continued flexibility in the delivery of service. While much of the world is adapting and modifying to accommodate the long-term existence of the virus, the one issue with an increasing impact on businesses everywhere is the labor shortage.

We are all experiencing the impact of the labor shortage and OPERS is no exception. We have been preparing for the large volume of retirements of the baby boomer generation by investing in technology to allow more efficient use of staff. However, no one anticipated the labor shortage following the pandemic which has impacted our staff and the staff of the vendors we use to service our members. We especially felt this strain during the recent health care transition and open enrollment. We will continue to work in concert with our vendors to develop new strategies in response to the ongoing labor shortage.

The investment market continued strong despite the ongoing pandemic. Total investment returns for 2021 were 15.34% for the Defined Benefit portfolio and 14.34% for the Health Care portfolio. These returns exceeded both our benchmarks and our actuarial expectations. The 2021 returns reflect the third year of double-digit returns. The Defined Benefit portfolio returned 12.02% in 2020 and 17.23% in 2019 while the Health Care portfolio returned 10.96% in 2020 and 19.59% return in 2019. This makes a combined return of 51.47% for the Defined Benefit portfolio and 51.74% for the Health Care portfolio during the three-year period from 2019-2021. This translated into over \$45.3 billion in net investment earnings during that time period. While we cannot expect these investment market returns every year and realize the market will eventually experience a downturn, we want to acknowledge our appreciation for the strong investment years.

On a global front, we are deeply saddened and concerned about the events in the Ukraine. We realize that these recent global events will have an impact on the investment markets in 2022 which will impact our System, however these are minimal compared to the challenges of the Ukrainian people.

The 2021 strong investment returns combined with the pension plan and health care changes from prior years have resulted in significant improvement in the overall funding status of OPERS. As of December 31, 2021, the date of the latest actuarial valuation, OPERS was 84.1% funded which is an improvement over the prior year's 81.5% funded level. It is important that we recognize and celebrate the successes and note these strong results are a culmination of the shared commitment of all our members.

As we work to address challenges, we remain grounded by five overarching plan goals designed to help us evolve. Specifically, the goals:

- Provide a stable pension for all OPERS retirees
- · Continue to provide a meaningful retiree health care program
- Minimize drastic plan design changes by making incremental changes
- · Ensure OPERS is financially positioned to react to market volatility
- · Maintain intergenerational equity

The activities reported here for 2021 illustrate our focus and progress on the path to move OPERS forward in continuing to deliver on our promise of providing a secure retirement for our members—present and future.

Overview of OPERS

OPERS was established and exists solely for the purpose of providing retirement, disability and survivor benefits to Ohio's public employees. Created by legislation in 1933, OPERS began operations January 1, 1935, prior to the Social Security Administration. In 1974, OPERS added access to health care—an element of significant importance to retirees yet is neither mandated nor guaranteed. In 2003, OPERS increased the pension plan options offered to three distinct plans. More information on current benefits can be found in the Plan Statement starting on page 213.

As of year-end 2021, OPERS served approximately 1,210,000 members, including 219,000 retirees and beneficiaries. In addition, the System works with approximately 3,700 public employers. With a net asset base of \$127.0 billion, OPERS is the largest public pension system in Ohio and the 13th largest public pension system in the nation. These numbers clearly demonstrate OPERS' importance as an economic driver for the state of Ohio.

Investments

Investment results are an important focus for us since investment returns provide approximately two-thirds of the funding for a retiree's ultimate pension. The key components of investment management of a portfolio such as OPERS' is asset allocation and diversification, both of which are regularly reviewed.

As noted above, fiscal year 2021 was a very positive year for the investment markets. Overall, the total OPERS portfolio for 2021 returned 15.20%. OPERS' total portfolio is made up of underlying portfolios that fund pension benefits and the health care program. These

underlying portfolios have different asset allocations based on their funding and liquidity needs, thus their investment returns will vary. Investment returns presented are based on year-to-date, time-weighted returns.

The underlying investment portfolios include: the Defined Benefit portfolio, the Defined Contribution portfolio, and the Health Care portfolio. By portfolio, the 2021 returns were:

- Defined Benefit portfolio returned 15.34%, exceeding both the benchmark return of 15.28%, and the anticipated actuarial funding plan rate of 6.90%.
- The Defined Contribution portfolio returned 13.99%, compared to the benchmark return of 13.91%.
- The Health Care portfolio returned 14.34%, also exceeding both the benchmark return of 13.76% and the anticipated actuarial funding plan rate of 6.00%.

Despite the exuberance we may feel about the strong 2021 investment returns as well as the preceding two years, it is important to remember that it reflects only a few year's results. OPERS long-term investment goal is to attain a return over the long-term that will provide adequate funding for the benefits. We recognize that yearly returns will vary with the market volatility and thus we expect years with positive returns above our expectations and also negative years with returns below our expectations. The goal is to structure an investment portfolio that will provide long-term returns. This long-term approach is balanced keeping in mind the short-term liquidity needs and liability due dates.

A complete discussion of investment returns, activities, asset allocation strategy, safeguards, and policies governing those activities can be found in the Investment Section, beginning on page 89. Additionally, information on investment fees and commissions can be found beginning on page 102.

Pension Funding

To achieve the required funding necessary to provide the pension benefits and health care coverage, OPERS collects member and employer contributions and invests those assets. The investment assets are expected to earn a targeted investment return over the long-term. As the System has matured, the investment earnings have become the largest source of funding for the benefits.

As noted above, the December 31, 2021, actuarial valuation reflected that OPERS was 84.1% funded which is an improvement over the prior year's 81.5% funded level. The improved funding position results from a combination of the strong investment returns over the last three years combined with the increasing impact from the pension changes of 2013. Since those pension changes were phased in, we are now seeing a greater portion of the liability reflect those members that were subject to more of the pension changes which is reducing the liability.

The funded ratio is a key measure of the System as it reflects OPERS has accumulated 84% of the assets necessary to fund the liability for both active and retired members. By law, OPERS is obligated to pay the benefits that have commenced with retirees. To make these payments each year, OPERS transfers funds from the active member funding (the Employers' Accumulation Fund) to the retired member funding (the Annuity and Pension Reserve Fund and the Survivors' Benefit Fund). Thus, the Traditional Pension Plan active member funding is 55% as of December 31, 2021, after this annual transfer. The amortization period reflects how

long it will take to fund remaining liabilities based on the current actuarial assumptions. The OPERS amortization period decreased from 21 years, post-experience study results, to 16 years.

One of the keys to the success of OPERS pension funding rests with the establishment of good assumptions. These assumptions should reflect the expected forward-looking actual results. The assumptions are reviewed annually, but in addition every five years OPERS' actuaries conduct a detailed analysis referred to as an experience study. The goal of the experience study is to assess the adequacy of the assumptions and adjust them as necessary.

In 2021, OPERS completed the five-year experience study for the period 2016 through 2020 and adjusted various assumptions following that study. One of the assumptions adjusted was the forward-looking long-term investment earnings assumption or discount rate. OPERS lowered this rate from 7.20% down to 6.90% effective 2020. This reduction in the investment earnings assumption increased the amortization period from 18 years (preliminary 2020 results prior to the study) to 21 years. Similarly, the funded ratio decreased from 82.9% to 81.5% following the change. As noted above, the positive investment returns from 2021 combined with the increasing impact of the 2013 pension plan changes resulted in a funded ratio of 84.1% and an amortization period of 16 years.

The Actuarial Section, beginning on page 135, provides complete schedules of funding progress for pension and health care.

Health Care Funding—Health Care Preservation Plan 3.1

Although health care is neither mandated nor guaranteed, the Board, management and staff, recognize the importance to our members of providing access to meaningful health care as it is a significant component of a secure retirement. This dedication to maintaining access to meaningful health care has become increasingly expensive as OPERS retirees, similar to national trends, have increased in number, have longer life expectancies, and health care costs continue to increase significantly faster than inflation.

OPERS faces two major issues to providing health care. First, we anticipate that health care expenses will continue to increase based on the combination of the growing number of retirees, their increasing life expectancies and overall increases in the cost of health care due to medical advances especially in the prescription drug component. Second, the funding status of the pension requires that all contributions be allocated to improve the pension funding. Thus, until the pension funding improves there is no funding available for health care for the foreseeable future.

As a result, OPERS adopted changes to the health care program referred to as Health Care Preservation Plan 3.1 (or HCPP 3.1). A high-level summary of changes to the health care program are described in the Plan Statement on page 213.

Incorporating the results from HCPP 3.1, as of December 31, 2020, the date of the most recent health care valuation, the health care assets accumulated to fund the liabilities exceeded the liabilities by \$1.2 billion resulting in a funded ratio of 110.4%. Based on the combination of level of health care expenditures and that OPERS is currently unable to fund the health care fund, the current trust fund is expected to last approximately 25 years, a significant improvement over the prior year's solvency period.

OPERS actuaries also completed an experience study for the health care fund and the longterm investment return assumption for health care remained unchanged at 6.0%. The health care portfolio long-term investment earnings assumption is lower than the pension portfolio as the health care portfolio has a shorter duration and thus has more liquid assets and excludes the illiquid assets that provided relatively higher returns for the pension portfolio.

Key Activities in 2021

Health Care

OPERS implementation of the most recent changes to the health care program were a major focus of the organization's 2021 activities. The most significant portion of the changes was the elimination of the current group health care plan for non-Medicare retirees. Similar to the changes made in 2015 for the Medicare retirees, OPERS will no longer offer a group plan but rather will provide eligible non-Medicare retirees with funding in a health reimbursement arrangement (HRA) account. OPERS provides non-Medicare retirees an OPERS vendor to help members select their own plan on the open market or through the federal subsidy program (the OPERS subsidy will not be provided to those retirees that select and receive the federal subsidy). These changes are effective beginning in 2022. The amount of HRA would vary based on the member's age and years of service. In addition, HCPP 3.1 includes changes to the base allowance and reductions in the grandfathering protection. These changes are being implemented and will be effective January 1, 2022. A complete description of the changes is included in the Plan Statement on page 213.

Combined and Member-Directed Plan Changes

Beginning in 2022, the Combined Plan will be consolidated under the Traditional Pension Plan (defined benefit plan) and the Combined Plan option will no longer be available for new hires beginning in 2022. This component is being implemented and will be effective January 1, 2022.

Mainframe Replacement

OPERS staff embarked on a project to replace the mainframe computer system and migrate the various applications to a new system. The multi-year project involves transferring the coding language to a new language and migrating the applications to the new platform with appropriate testing.

Outreach and Education

Customer service is always a high priority and education is critical during times of anticipated change. We work to ensure all stakeholders—especially current retirees and our members— the retirees of tomorrow, understand the challenges, can provide feedback on options and ultimately understand the outcome. In 2021, we increased our outreach to ensure members and retirees understood the health care changes and their impact and worked with the retirees during open enrollment to successfully enroll them in a new plan.

Report Contents and Structure

This annual report is designed to comply with the reporting requirements of the Governmental Accounting Standards Board (GASB) and in accordance with the Governmental Accounting Standards Best Practices. The responsibility for the accuracy of the data presented here, as well as the completeness and fairness of the presentation, rests with OPERS management.

The management of OPERS is responsible for internal accounting controls designed to provide reasonable assurance for the safeguarding of assets and the reliability of financial records. The concept of reasonable assurance recognizes the relationship between the cost of a control and the benefit likely to be derived, based on the judgment of management. We believe the established internal accounting controls are adequate to meet the purpose for which they were intended.

The financial statements presented in this report, supporting schedules, and statistical tables are presented fairly in all material aspects. These assertions can be made because OPERS has established a comprehensive internal control framework designed to protect assets from loss and to compile sufficient reliable information for the preparation of the OPERS financial statements in conformity with generally accepted accounting principles. Even effective internal controls may not prevent or detect misstatements and can provide only a reasonable assurance with respect to financial statement preparation.

The System's external auditors, Plante & Moran, PLLC, conducted an independent audit of the financial statements in accordance with U.S. generally accepted government auditing standards. This audit and the financial statements are described in the Financial Section, beginning on page 15.

Additionally, readers are encouraged to refer to the Investment Section for information on investment policies and strategies, safeguards on investments, and yield.

2021 Financial Highlights

Retirement Contributions: Employee contributions, employer contributions, and income from investments provide the funds necessary to finance retirement benefits. Approximately two-thirds of OPERS revenue from which benefits are paid is generated from investment returns. The remaining funding comes from employee and employer contributions. The System reports a total of \$1.6 billion in member and \$2.2 billion in employer contributions for the year ended December 31, 2021. Total net position is \$127.0 billion as of December 31, 2021.

Expenses: Expenses (including pension benefit payments, health care coverage payments and account refunds) for fiscal year 2021 were \$8.2 billion. In 2021, OPERS paid \$6.8 billion in pension benefits and \$0.9 billion in health care to more than 219,000 OPERS retirees and their beneficiaries. Because approximately 90% of all OPERS retirees remain in Ohio, this represents a significant driver for Ohio's economy.

Administrative Costs: OPERS management remains diligent in monitoring and, where possible, reducing or containing expenses. Administrative costs are paid through investment returns generated; our goal is always to be responsible stewards of public funds. Administrative costs in 2021 were \$122.2 million, including investment expenses.

Complete details of all administrative expenses are included in the Financial Section, on page 88. In addition, the Management's Discussion and Analysis, beginning on page 19, has a more detailed discussion of the OPERS funded status and provides a complete analysis of the additions and deductions to Plan Net Position.

Professional Services

Professional services are provided to OPERS by consultants appointed by the Board. Actuarial services are provided by Gabriel, Roeder, Smith & Company, Southfield, Michigan. The investment advisor to the Board for all the plans is NEPC, LLC, Cambridge, Massachusetts. The financial records of the System are audited by Plante & Moran, PLLC, Certified Public Accountants, Cleveland, Ohio under contract with the Ohio Auditor of State.

Acknowledgments

This annual report is the result of the combined teamwork of the System's staff under the direction of the Board. Our sincere appreciation is extended to all who assisted in and contributed toward the completion of this document.

This annual report is designed to provide complete and reliable information for transparent communication and to serve as a resource. We take our fiscal responsibility very seriously. We are effective and diligent managers of the assets held in trust for members of this System.

As stewards of the trust funds, we must take actions and make the responsible decisions that will carry this organization forward so that we can deliver on an important component of financial retirement security for all generations in our membership. This organization is led by a dedicated and diligent Board that works tirelessly with OPERS management and staff to help position us for the future. We all have a fiduciary responsibility to make decisions in the best interest of all one million members. We have a responsibility to be prudent stewards and to look forward and prepare for the challenges we see, not wait for them to occur. We are pleased to report the activities of 2021. We will continue to take responsible actions to position OPERS to be a strong pension system and we will do this working with members, retirees and stakeholders. We will continue to provide uncompromised service despite the challenges and continue to take actions to move the System forward. We are honored to be associated with, appreciate and acknowledge the efforts of all involved as, together, we prepare for and step into the future.

Respectfully Submitted,

Kaun E Caucher

Karen E. Carraher, CPA Executive Director

Jeniefn H. Stan

Jennifer H. Starr, CPA Chief Financial Officer

Karen Carraher (seated) and Jennifer Starr (standing)

Fiduciary Responsibilities

The Board and executive management of OPERS are fiduciaries of the pension and health care trust funds. Fiduciaries are charged with the responsibility of assuring that the assets of OPERS are used exclusively for the benefit of plan participants and their beneficiaries.

Request for Information

This financial report is designed to provide the Board, our membership, taxpayers, investment managers, and creditors with an overview of OPERS finances and accountability for the money received. Questions concerning any of the information provided in this report or requests for additional information should be addressed to:

Ohio Public Employees Retirement System Chief Financial Officer 277 East Town Street Columbus, Ohio 43215-4642

Introductory Section

Awards and Recognition

OPERS has been recognized by national financial experts and organizations for commitment to the highest possible fiscal standards. We are honored to have been recognized with the following awards:

• 2020 Certificate of Achievement for Excellence in Financial Reporting—For the 38th consecutive year, the Government Finance Officers Association of the United States and Canada (GFOA) awarded OPERS a Certificate of Achievement for Excellence in Financial Reporting for its annual comprehensive financial report for the fiscal year ended December 31, 2020. In order to be awarded a certificate of achievement, a government organization must publish an easily readable and efficiently organized annual comprehensive financial report that satisfies both generally accepted accounting principles and applicable legal requirements.

• 2021 Public Pension Standards Award— Issued by the Public Pension Coordinating Council, this award recognizes OPERS for demonstrating a high level of plan design, funding, member communications and administrative practices. The standards serve as a benchmark by which all public defined benefit plans are managed.

 2020 Award for Outstanding Achievement in Popular Annual Financial Reporting—For the 11th consecutive year, OPERS has received the GFOA Award for Outstanding Achievement in Popular Annual Financial Reporting for its popular annual financial report for the fiscal year ended December 31, 2020. This award is a prestigious national award recognizing conformance with the highest standards of creativity, presentation, understandability, and reader appeal for preparation of governmental popular reports. OPERS has received this award for each year we have produced a popular annual financial report.

Financial Infrastructure works for all Ohioans

Only through ongoing economic opportunity can Ohio continue to grow—meaning the importance of publicsector employees who provide a strong infrastructure for public and private employers must also continue to grow. Public-sector employees contribute to the economic foundation and quality of life for all Ohio residents. Consider this: Throughout the towns and cities in Ohio, public-sector employees ensure public transportation is available to all Ohioans—getting Ohio residents to and from work, health care, and to an array of leisure-time activities.

Connecting members to the future: OPERS members help keep Ohioans on the move. Approximately 6,200 public transit employees who work with 34 of the 61 transit agencies in Ohio are OPERS members. In fact, nearly 3% of the entire OPERS active membership are transit employees. These individuals provide more than 115 million rides each year to keep Ohioans moving to publicand private-sector jobs, shopping, recreational activities, and health care appointments.

Independent Auditors' Report

Plante & Moran, PLLC Suite 1250 1111 Superior Ave. Cleveland, OH 44114 Tel: 216.523.1010 Fax: 216.523.1025 plantemioran.com

Independent Auditor's Report

To the Board of Trustees Ohio Public Employees Retirement System and the Honorable Keith Faber, Auditor of State

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of Ohio Public Employees Retirement System (OPERS) as of and for the year ended December 31, 2021 and the related notes to the financial statements, which collectively comprise OPERS' basic financial statements, as listed in the table of contents. We have also audited the Traditional Pension Plan, the Combined Plan, the Member-Directed Plan, and the 115 Health Care Trust of Ohio Public Employees Retirement System as of and for the year ended December 31, 2021, as displayed in OPERS' basic financial statements.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the fiduciary net position of Ohio Public Employees Retirement System, as well as the Traditional Pension Plan, the Combined Plan, the Member-Directed Plan, and the 115 Health Care Trust of OPERS, as of December 31, 2021 and the respective changes in fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of OPERS and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about OPERS' ability to continue as a going concern for 12 months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

PRAXITY

To the Board of Trustees Ohio Public Employees Retirement System and the Honorable Keith Faber, Auditor of State

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and Government Auditing Standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of OPERS' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about OPERS' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplemental Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplemental information, as identified in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplemental information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

To the Board of Trustees Ohio Public Employees Retirement System and the Honorable Keith Faber, Auditor of State

Supplemental Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Ohio Public Employees Retirement System's basic financial statements. The other supplemental information, as identified in the table of contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental information is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the Annual Comprehensive Financial Report. The other information comprises the introductory, investment, actuarial, and statistical sections, as listed in the table of contents, but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements or whether the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 9, 2022 on our consideration of Ohio Public Employees Retirement System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Ohio Public Employees Retirement System's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Ohio Public Employees Retirement System's internal control over financial reporting and compliance.

Alente 1 Moran, PLLC

May 9, 2022

Financial Section

Management's Discussion and Analysis (unaudited)

The management of the Ohio Public Employees Retirement System (OPERS or System) offers readers of the System's financial statements this narrative overview of the financial activities of OPERS for the year ended December 31, 2021. This narrative is intended to supplement the System's financial statements. Readers are encouraged to consider the information presented here in conjunction with the financial statements that begin on page 32.

The OPERS Annual Comprehensive Financial Report (annual report) presents financial statements for the most recent year end. Users of this annual report can refer to the Statistical Section, beginning on page 159, for historical financial information.

Overview of the Financial Statements

The following discussion and analysis are intended to serve as an introduction to the OPERS financial statements. The basic financial statements include:

- 1. Combining Statement of Fiduciary Net Position
- 2. Combining Statement of Changes in Fiduciary Net Position
- 3. Notes to Combining Financial Statements

As required, this annual report also contains the following schedules, referred to as Required Supplementary Information:

- 1. Schedules of Changes in Net Pension Liability and Related Ratios—Traditional Pension Plan, Combined Plan and Member-Directed Plan
- 2. Schedules of Employer Contributions—Traditional Pension Plan, Combined Plan and Member-Directed Plan
- 3. Schedule of Investment Returns—Defined Benefit Portfolio
- 4. Schedule of Changes in Net OPEB Liability/(Asset) and Related Ratios—Health Care
- 5. Schedule of Employer Contributions—Health Care
- 6. Schedule of Investment Returns-Health Care Portfolio
- 7. Notes to Required Supplementary Information

Expenses associated with administering the System are presented immediately following the Notes to Required Supplementary Information in the following Additional Information schedules:

- 1. Administrative Expenses
- 2. Schedule of Investment Expenses

The financial statements contained in this annual report disclose financial data for each of the benefit plans and the health care trust described below. Please refer to the Plan Statement, beginning on page 213, for a summary description of the plan structures and benefits. These plans are established as separate legal entities in accordance with Internal Revenue Service (IRS) regulations and Ohio law and are summarized below.

• The Traditional Pension Plan

The Traditional Pension Plan is a defined benefit plan in which a member's retirement benefits are calculated on a formula that considers years of service and final average salary (FAS). The pension benefits are funded by both member and employer contributions, and investment gains or losses on those contributions.

19

Management's Discussion and Analysis

The Combined Plan

The Combined Plan is a hybrid defined benefit/defined contribution plan. Under the Combined Plan, members earn a formula benefit similar to, but at a factor less than, the Traditional Pension Plan benefit. This defined benefit is funded by employer contributions and associated investment earnings. Additionally, member contributions are deposited into a defined contribution account in which the member self-directs the investment. Upon retirement or termination, the member may choose a defined contribution retirement distribution that is equal in amount to the member's contributions to the plan and investment gains or losses on those contributions. Members may also elect to annuitize their defined contribution account balances. Effective January 1, 2022, members may no longer select this plan.

• The Member-Directed Plan

The Member-Directed Plan is a defined contribution plan in which members self-direct the investment of both member and employer contributions. The retirement distribution under this plan is equal to the sum of member and vested employer contributions, plus investment gains or losses on those contributions. Employer contributions and associated investment gains or losses vest over a five-year period at a rate of 20% per year.

Upon retirement or termination, the member may choose a defined contribution retirement distribution, or may elect to use their defined contribution account balance to annuitize their benefit.

• 115 Health Care Trust

The 115 Health Care Trust (115 Trust or Health Care Trust) was established in 2014, under Section 115 of the Internal Revenue Code (IRC). The initial purpose of the 115 Trust was to fund health reimbursement arrangement (HRA) accounts for Medicare-enrolled retirees in conjunction with the implementation of the OPERS Medicare Connector (Connector) in 2016. This type of arrangement was not permissible by the IRS under OPERS' former health care trust structure. In 2016, OPERS received favorable rulings from the IRS allowing OPERS to consolidate all health care assets into the 115 Trust. As a result, the 401(h) Health Care Trust, which held funding for Traditional Pension Plan and Combined Plan health care, and the Voluntary Employees' Beneficiary Association Trust (VEBA), which held funding for Member-Directed Plan health care, closed on June 30, 2016 and the net positions transferred to the 115 Trust on July 1, 2016.

From 2016 forward, the 115 Trust includes the funds for retiree health care for the Traditional Pension, Combined and Member-Directed plans. Medicare-enrolled retirees in the Traditional Pension and Combined plans may have an allowance deposited into an HRA account to be used toward the health care program of their choice selected with the assistance of an OPERS vendor. Through December 31, 2021, non-Medicare retirees in the Traditional Pension and Combined plans received an allowance to offset the premium of OPERS-sponsored health care coverage. Effective January 1, 2022, non-Medicare retirees converted to a Connector arrangement similar to the Medicare-enrolled retirees, and are no longer participating in OPERS provided self-insured group plans.

Upon separation or retirement of Member-Directed Plan participants, participants may use the vested funds in their retiree medical account for qualified health care expenses. Vesting requirements for Member-Directed health care have changed over the life of the plan. The plan originally required 10 years of participation to fully vest in the contributions and interest earned on the account. Effective January 1, 2009, contributions and interest vested with the participant over a five-year period. Effective July 1, 2015, new participants to the plan are required to participate for 15 years to become fully vested. Additional details on the OPERS health care program and the Member-Directed Plan health care vesting schedule can be found in the Plan Statement beginning on page 213.

Financial Section

Financial activity for each of the pension plans and the health care trust is reported in the basic combining financial statements described below.

Combining Statement of Fiduciary Net Position

The Combining Statement of Fiduciary Net Position is a point-in-time snapshot of fund balances at fiscal year-end for pension and health care. It reflects assets available to pay future benefits to retirees, and any liabilities owed as of the statement date. The resulting Net Position (equal to Assets less Liabilities and Deferred Inflows) represents the value of assets restricted for pension benefits and health care. (See Combining Statement of Fiduciary Net Position as of December 31, 2021 on page 32 of this report.)

Combining Statement of Changes in Fiduciary Net Position

The Combining Statement of Changes in Fiduciary Net Position displays the effect of financial transactions that occurred during the fiscal year, where Additions less Deductions equal Net Increase (or Net Decrease) in net position. This Net Increase or Decrease in net position reflects the change in the value of fiduciary net position that occurred between the current and prior year. (See Combining Statement of Changes in Fiduciary Net Position for the year ended December 31, 2021 on page 33 of this report.)

Notes to Combining Financial Statements

The Notes to Combining Financial Statements provide additional information that is essential for a comprehensive understanding of the data provided in the financial statements and is an integral part of the financial statements. These notes describe the accounting and administrative policies under which OPERS operates, and provide additional levels of detail for selected financial statement items. (See Notes to Combining Financial Statements, December 31, 2021 on pages 34-70 of this report.)

The financial statements described are prepared in accordance with Governmental Accounting Standards Board (GASB) pronouncements. Information on the significant accounting policies and recent GASB standards reviewed and adopted in the preparation of the financial statements can be found in Note 2 in the Notes to Combining Financial Statements beginning on page 42.

Because of the long-term nature of most pension plans, financial statements alone cannot provide sufficient information to properly reflect the ongoing plan perspective. Therefore, in addition to the financial statements, this annual report includes additional Required Supplementary Information (RSI) schedules and required notes. The RSI includes schedules of changes in net pension liability and net other post-employment benefit (OPEB), or health care, liability or asset, investment returns for the defined benefit portion of the pension plans and for the health care trust, and schedules of employer contributions for both defined benefit pension plans and health care. The schedules of funding progress for defined benefit pension plans and health care have been included in the Actuarial Section of this document. Each of the schedules includes historical-trend information when required by standards, except when historical information is unavailable prior to the implementation of GASB Statement No. 67 (GASB 67), *Financial Reporting for Pension Plans*, and GASB Statement No. 74 (GASB 74), *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*.

• Schedules of Changes in Net Pension Liability and Related Ratios—Traditional Pension Plan, Combined Plan and Member-Directed Plan

The Schedules of Changes in Net Pension Liability and Related Ratios (pages 72-79) include actuarial information regarding the increase (or decrease) of each element of the net pension liability between the beginning and end of the year for the OPERS defined benefit pension plans. The information reported in these schedules was calculated using the assumptions and requirements defined in GASB 67 (also referred to as the Accounting Basis throughout this document). The calculation method defined in GASB 67 requires different assumptions from those used to calculate the funded status of a plan (also referred to as the Funding Basis throughout this document). The key difference is the Accounting Basis schedule uses the fair value of assets rather than the smoothed value of assets used for the Funding Basis (refer to page 25 for additional information on actuarial smoothing techniques). Therefore, the GASB 67 Accounting Basis net pension liability results differ from the Funding Basis unfunded actuarial accrued liability results provided in the Schedule of Funding Progress included on page 25 of this section and in the Actuarial Section of this document beginning on page 151. GASB 67 breaks the link between accounting and funding. Although these changes affect the accounting information disclosed in the Notes to Combining Financial Statements and RSI, they do not have an effect on the actuarial methods and assumptions used by OPERS to determine the employer contributions needed to fund the plans.

Historical information is not available prior to the GASB 67 implementation in 2014. The schedules will be expanded each subsequent year until they contain the required 10-year presentation.

Schedules of Employer Contributions—Traditional Pension Plan, Combined Plan and Member-Directed Plan

The Schedules of Employer Contributions (pages 80-81) provide historical-trend information regarding the value of total annual contributions required to be paid by employers for the employees participating in each plan, and the actual amounts remitted. The information contained in these schedules also reflects the required contributions based on the contribution rates approved by the OPERS Board of Trustees. The Member-Directed Plan is a defined contribution plan with the option for retirees to annuitize their benefit, which converts the retiree's benefit to a defined benefit. The employer contributions deposited to the defined benefit portion of the Member-Directed Plan are included in these schedules.

• Schedule of Investment Returns—Defined Benefit

The Schedule of Investment Returns (page 82) provides information regarding the annual moneyweighted rates of return on pension plan investments in the Defined Benefit portfolio, as required by GASB 67. Historical information is not available prior to the GASB 67 implementation in 2014. The schedule will be expanded each subsequent year until it contains the required 10-year presentation.

• Schedule of Changes in Net OPEB Liability/(Asset) and Related Ratios—Health Care

The Schedule of Changes in Net OPEB Liability/(Asset) and Related Ratios (page 83) includes actuarial information regarding the increase (or decrease) of each element of the net OPEB liability/(asset) between the beginning and end of the year for OPERS defined benefit health care plans. The values included in this schedule were calculated using the assumptions and requirements defined in GASB 74 (also referred to as the Accounting Basis throughout this document, similar to GASB 67). The calculation method defined in GASB 74 requires different assumptions from those used to calculate the funded status of a plan (also referred to as the Funding Basis throughout this document). Similar to

Financial Section

Management's Discussion and Analysis

GASB 67, the Accounting Basis requires the use of fair value of assets versus the smoothed value of assets used for the Funding Basis (refer to page 25 for additional information on actuarial smoothing techniques). Therefore, the GASB 74 Accounting Basis net OPEB liability/(asset) results differ from the Funding Basis unfunded actuarial accrued health care liability results provided in the Schedule of Funding Progress included on page 26 of this section and in the Actuarial Section of this document on page 153. Also similar to GASB 67, GASB 74 breaks the link between accounting and funding. While these changes will affect the accounting information disclosed in the Notes to Combining Financial Statements and RSI, they do not have an effect on the actuarial methods and assumptions used by OPERS to determine the employer contributions needed to fund the plans.

Historical information is not available prior to the GASB 74 implementation in 2017. The schedule will be expanded each subsequent year until it contains the required 10-year presentation.

• Schedule of Employer Contributions—Health Care

The Schedule of Employer Contributions (page 84) presents historical-trend information regarding the value of actuarially determined health care contributions, and the actual amounts remitted. The information contained in this schedule also reflects the required contributions based on the contribution rates approved by the Board. Based on the provisions of GASB 74, all OPERS health care plans are considered to be defined benefit other post-employment plans. Therefore, the information contained in this schedule includes health care funding for the Traditional Pension Plan, the Combined Plan and the Member-Directed Plan.

Schedule of Investment Returns—Health Care

The Schedule of Investment Returns (page 84) provides information regarding the annual moneyweighted rates of return on investments in the Health Care portfolio, calculated and presented as required by GASB 74. Historical information is not available prior to the GASB 74 implementation in 2017. The schedule will be expanded each subsequent year until it contains the required 10-year presentation.

• Notes to Required Supplementary Information

The Notes to Required Supplementary Information (pages 85-87) provides background information, a summary of the actuarial assumptions used in determining contribution rates for valuation of the pension plans and health care, and explanatory detail to help in understanding the required supplementary schedules.

The following schedules are provided as Additional Information regarding the expenses associated with administering the System:

Administrative Expenses

The Administrative Expenses schedule reflects the total operating costs of managing the System, by major expense category (page 88).

Schedule of Investment Expenses

The Schedule of Investment Expenses summarizes the costs incurred in managing the investment assets of the System (page 88). These costs are reported as Investment Administrative Expenses in the Combining Statement of Changes in Fiduciary Net Position, and are reflected as a reduction in net investment income or loss.

Management's Discussion and Analysis

Financial Highlights

- OPERS net income from investing activity for the year ended December 31, 2021 totaled \$17.1 billion, a total gain of 15.20%, compared to a total gain of 11.95% in 2020. The total portfolio is divided into three sub-portfolios: the Defined Benefit portfolio, the Health Care portfolio, and the Defined Contribution portfolio. Investment returns presented for each portfolio within this Management's Discussion and Analysis are based on year-to-date, time-weighted returns. Net income from investing activity for the Defined Benefit portfolio comprised \$15.0 billion of this total, or a gain of 15.34% in 2021, compared to a gain of 12.02% in 2020. The Health Care portfolio reported net income from investing activity of \$1.8 billion, or a gain of 14.34% in 2021, compared to a gain of 10.96% in 2020. The Defined Contribution portfolio reported net income from investing activity of \$0.3 billion, or a gain of 13.99% in 2021, compared to a gain of 14.96% in 2020. As with all mature retirement systems, OPERS' primary source of funding benefit payments in the future is investment income.
- Net position increased by \$12.7 billion to \$127.0 billion as of December 31, 2021, compared to \$114.3 billion in 2020. Table 1 presents a two-year comparative history of Changes in Fiduciary Net Position.

Changes in Fiduciary Net Position (for the years ended December 31, 2021 and 2020) Table 1					
	2021	2020	Amount Increase/ (Decrease) from 2020 to 2021	Percent Increase/ (Decrease) from 2020 to 2021	
Member and Employer Contributions	\$3,754,477,128	\$3,641,917,896	\$112,559,232	3.1%	
Contract Receipts and Other Income	131,986,381	124,121,294	7,865,087	6.3	
Net Income from Investing Activity	17,131,577,656	12,030,115,041	5,101,462,615	42.4	
Total Additions	21,018,041,165	15,796,154,231	5,221,886,934	33.1	
Benefits, Health Care and Account Refunds	8,217,201,683	7,726,118,716	491,082,967	6.4	
Administrative and Other Expenses	113,191,600	115,806,257	(2,614,657)	(2.3)	
Total Deductions	8,330,393,283	7,841,924,973	488,468,310	6.2	
Net Increase in Fiduciary Net Position	12,687,647,882	7,954,229,258	4,733,418,624	59.5	
Net Position, Beginning of Year	114,269,154,929	106,314,925,671	7,954,229,258	7.5	
Net Position, End of Year	\$126,956,802,811	\$114,269,154,929	\$12,687,647,882	11.1%	

- In 2021, the Board's actuarial consultants conducted an experience study for the period 2016 through 2020. The experience study incorporates both a historical review and forward-looking projections to determine the appropriate set of assumptions to keep the plan on a path toward full funding. As a result of the study, OPERS updated both demographic and economic assumptions, with the most notable being a reduction in the actuarial assumed rate of return for pension from 7.2% to 6.9%. The net impact of all actuarial assumption changes was to increase the pension liability by approximately \$1.9 billion. The information in Table 2 reflects the preliminary 2020 valuation results prior to the experience study assumption changes and 2020 valuation results revised to reflect the change in assumptions approved by the Board based on the experience study results. Refer to the Actuarial Section, beginning on page 135, for more information on actuarial assumption changes based on the 2020 experience study.
- Table 2 provides the current pension funding as of December 31, 2021. The health care funding
 presented in Table 3 is a year in arrears as the most recent health care funding information is as of
 December 31, 2020. The health care table also includes the preliminary 2020 valuation results prior to
 completion of the experience study and revised 2020 valuation results to reflect changes in
 assumptions approved by the Board based on experience study results.

chedule of Funding Progress—Funding Basis (\$ in millions)			Defined Benefit Plans ¹ —Table 2		
Valuation Year	Actuarial Accrued Liabilities (AAL)	Valuation Assets	Unfunded Actuarial Accrued Liabilities (UAAL)	Ratio of Assets to AAL	Funding Years

^b Results from original valuation prior to restatement after completion of experience study.

^c Results reflecting the provisions of Senate Bill 343.

^d Results prior to the provisions of Senate Bill 343.

^e Results after change in discount rate from 7.5% to 7.2%.

¹ Defined Benefit Plans include the Traditional Pension Plan, the defined benefit portion of the Combined Plan and purchased annuities in the Member-Directed Plan.

- To fully understand the funding status of a retirement system, it is advisable to view actuarial data in conjunction with financial data. Both Tables 2 and 3 are presented on the Funding Basis. Under the Funding Basis, value of assets is based on the actuarial value of assets which smooths market gains and losses over a rolling four-year period, subject to a 12% market corridor. This differs from the Accounting Basis (or GASB 67 and GASB 74 basis), which calculates the funding status using the market value of assets.
- As a result of actuarial smoothing techniques, the fair value of assets may be significantly different from the funding value (actuarial value) of assets at a given point in time. This means that in periods of extended market decline the fair value of assets will usually be less than the funding, or actuarial value, of assets. Conversely, during periods of extended market gains, the fair value of assets will usually be greater than the funding, or actuarial value, of assets.
- To ensure the funding value of assets and the market value of assets remain within reasonable proximity of each other, OPERS uses a 12% market corridor in conjunction with its four-year smoothing. This policy ensures that the funding value of assets is within 88% to 112% of the market value of the assets. At the end of 2020, the market value of assets was higher than the funding value by \$4.9 billion. At the end of 2021, the market value of assets was higher than the funding value by \$10.5 billion.
- By law, OPERS is obligated to pay certain benefits that have commenced with retirees. To make these
 payments each year, and to account for benefits that have commenced with retirees, OPERS transfers
 funds from the active member (the Employers' Accumulation Fund) to the retiree funds (the Annuity and
 Pension Reserve Fund and the Survivors' Benefit Fund). Thus, the Traditional Pension Plan active
 member funding is 55% and 52% as of December 31, 2021 and 2020, respectively, after this annual
 transfer.

Management's Discussion and Analysis

• As of December 31, 2021, the date of the latest actuarial valuation, the funded ratio for defined benefit pensions was 84.1%. In general, this means that for each dollar of future pension liability, OPERS has accumulated approximately \$0.84 to meet that obligation. The funded ratio increased from 2020 (post-experience study) to 2021 by 2.6%, due to the combination of investment gains of 2021 and the realization of the impact of changes from 2013 pension legislation. The 2020 post-experience study funded ratio decreased compared to the pre-experience study funded ratio due to the change in assumptions, most notably the reduction in the long-term investment rate of return assumption from 7.2% to 6.9%. If current assumptions are met, OPERS would accumulate sufficient assets to pay all pension liabilities for active members and retirees within 16 years on a Funding Basis compared to 21 years for 2020 post-experience study.

chedule of Funding Progress—Funding Basis (\$ in millions) Health Care—Ta				Ith Care—Table	
Valuation Year	Actuarial Accrued Liabilities (AAL)	Valuation Assets	Unfunded Actuarial Accrued Liabilities (UAAL)	Ratio of Assets to AAL	Solvency Years ¹
2020 ^a	\$11,215	\$12,385	(\$1,170)	110.4%	25

2013	19,784	12,031	7,753	60.8	Indefinite
2012	19,182	12,193	6,989	63.6	Indefinite
2011	31,020	12,115	18,905	39.1	10

^a Revised actuarial assumptions based on experience study.

^b Results from original valuation prior to restatement after completion of experience study.

^c Results after change in discount rate from 6.5% to 6.0%.

^d Results reflect health care program changes effective January 2022, approved by the Board in January 2020.

¹ Solvency Years represents an estimate of the number of years the fund will be able to provide health care under the intermediate actuarial assumptions. Indefinite indicates funds are expected to be sufficient to fund future health care needs.

- The funding objective is to meet long-term pension benefit obligations and, to the extent possible, fund post-employment health care. As of December 31, 2020, the date of the latest health care actuarial valuation, under the Funding Basis, the post-experience study actuarial liability for health care was \$11.2 billion and the System had accumulated assets of \$12.4 billion for that obligation, an excess of \$1.2 billion. This compares to the 2019 excess assets of \$0.5 billion. The funded ratio increased from 104.2% at the end of 2019 to 110.4% in 2020 (post-experience study) due to a combination of investment gains from 2021 and the realization of the impact from changes to the plan. The 2020 post-experience study funded ratio increased compared to the pre-experience study funded ratio due to the change in actuarial assumptions, including the reduction in the wage inflation assumption from 3.25% to 2.75%, and a reduction in long-term expected price inflation from 2.50% to 2.35%.
- Health care coverage is not statutorily guaranteed and is subordinate to pension funding. Since 2018, based on pension funding status, OPERS has allocated all of the 14% employer contribution rate to funding pension for both the Traditional Pension and Combined plans with no funding to health care. This allocation is expected to continue until the pension funding improves. The portion of the 14% employer contribution rate allocated to health care for the Member-Directed Plan remains at 4%.

Financial Section

Management's Discussion and Analysis

• The funding progress of health care is measured in terms of solvency years, or the number of years funds are projected to be available to pay health care expenses under the current plan design before health care would be reduced to a pay-as-you-go basis. As of December 31, 2020, the date of the latest health care actuarial valuation under the Funding Basis, health care funding is expected to remain solvent for 25 years, compared to 23 years in 2019. Refer to Table 3 for a comparative history of actuarial liabilities and solvency years for health care.

Analysis of Financial Activities

The OPERS funding objective is to meet long-term benefit obligations with investment income and contributions. The following discussion provides an analysis of the current-year financial activities. Comparative data is presented, where appropriate.

Additions to Fiduciary Net Position (Revenues)

The reserves needed to finance retirement benefits are accumulated primarily through the collection of member and employer contributions and investment income (net of investment expense). Revenues (Additions to Fiduciary Net Position) for the year 2021 were \$21.0 billion, and include member and employer contributions of \$3.8 billion, net income from investment activities of \$17.1 billion and other income totaling approximately \$0.1 billion. Other income consists of purchased service agreements, employer interest and penalty charges, vendor performance guarantees, settlements, interplan activities, and miscellaneous other income or expense. Interplan Activity in Table 4 represents transactions between plans that are additions to plan assets. Additions to plan net position for the year 2020 were \$15.8 billion, comprised of \$3.6 billion in contribution revenues, \$12.0 billion in net income from investment activities, and other income totaling approximately \$0.2 billion. Refer to Table 4 for a comparative history of Additions to Fiduciary Net Position.

Additions to Fiduciary Net Position (Revenues) (for the years ended December 31, 2021 and 2020)				
	2021	2020	Amount Increase/ (Decrease) from 2020 to 2021	Percent Increase/ (Decrease) from 2020 to 2021
Member Contributions	\$1,564,633,333	\$1,517,737,361	\$46,895,972	3.1%
Employer Contributions	2,189,843,795	2,124,180,535	65,663,260	3.1
Contract and Other Receipts	91,249,363	79,934,979	11,314,384	14.2
Other Income, net	490,886	1,336,808	(845,922)	(63.3)
Interplan Activity	40,246,132	42,849,507	(2,603,375)	(6.1)
Net Income from Investing Activity	17,131,577,656	12,030,115,041	5,101,462,615	42.4
Total Additions	\$21,018,041,165	\$15,796,154,231	\$5,221,886,934	33.1%

Member and employer contributions for 2021 increased by \$112.6 million, or 3.1%, compared to 2020. Member and employer contributions include amounts paid by active members and their employers for future retirement benefits. In general, as wages rise, the retirement contributions from active members, and their employers, also increase. These contributions can also be influenced by the number of active members that move to retirement, as retirees are typically replaced with less-tenured or entry-level staff. The 2021 increase in contributions of 0.1%. The 2020 slight increases, and is greater than the 2020 slight increase in contributions of 0.1%. The 2020 slight increase reflected the impact of the global pandemic, which resulted in lower wage increases and reductions in work force.

Management's Discussion and Analysis

Contract and Other Receipts represents funds received for member purchase of service contracts, employer early retirement incentive programs, and funds received from other Ohio retirement systems for members with service credit at more than one retirement system. These receipts totaled \$91.2 million in 2021, compared to \$79.9 million received in 2020. This net increase of \$11.3 million is comprised of an increase of \$16.5 million in retirement transfers from other Ohio retirement systems for members selecting a joint retirement option, offset by a \$2.6 million decrease in early retirement incentive payments, a \$1.0 million decrease of service and a \$0.9 million decrease in voluntary contributions for additional annuities. The remaining \$0.7 million decrease in this line item relates to decreases in employer penalties and alternative retirement plan contributions.

Other Income, net, is comprised of miscellaneous proceeds, gains or losses on the disposal of capital assets and litigation settlements activity. Other income for 2021 was \$0.5 million, compared to \$1.3 million in 2020. This activity typically fluctuates from year-to-year. In 2021, other income was comprised of rental income of \$0.5 million, which remained flat compared to 2020.

Interplan Activity represents transfers to record activity occurring between the plans. This activity includes members changing from one plan to another. Interplan Activity in 2021 resulted in a net inflow of \$40.2 million, compared to \$42.8 million in 2020. Since this activity represents payments between plans, there is a corresponding interplan expense activity of the same amount in each year. (Refer also to the Deductions from Fiduciary Net Position discussion beginning below.)

Net Income from Investing Activity represents total investment income net of external management fees and investment administrative expenses. Investment income includes dividends, interest, gains or losses on the sale of investments, and change in fair value of investments. OPERS reflects both income and management fees from external managers in this category.

Investment Administrative Expenses includes investment-specific expenses such as staff wages, professional services contracted by the Board, legal services and a share of the OPERS facility and operational costs. For a discussion on current-year activity within Net Income from Investing Activity, refer to the Financial Highlights section beginning on page 24.

Deductions from Fiduciary Net Position (Expenses)

OPERS was created to provide retirement, survivor, and disability benefits to qualified members and their beneficiaries. The cost of such programs includes recurring benefit payments, elective refunds of contributions to members who terminate employment with a participating employer, and the cost of administering the System.

Expenses (Deductions from Fiduciary Net Position) for 2021 were \$8.3 billion, an increase of \$0.5 billion, or 6.2%, compared to 2020. Pension benefits and health care expenses comprised \$7.6 billion and \$7.2 billion in 2021 and 2020, respectively. Included within health care costs were \$221.1 million and \$253.4 million in 2021 and 2020, respectively, in health care-related receipts netted against health care expenses. Pension benefits and health care expenses paid on behalf of current retirees and their beneficiaries comprised approximately 91.5% of the total expenses reported. Refunds of member contributions, including interest and additional payments on withdrawal where required by statute, fluctuate each year, and were \$591.1 million in 2021, or 22.3% higher than 2020. Non-investment related administrative expenses remained flat at \$72.9 million and represented 0.9% of the total expenses. The remaining expenses were comprised of interplan activity transactions representing the expenses associated with members changing from one plan to another. Refer to Table 5 for a comparative history of Deductions from Fiduciary Net Position.

Deductions from Fiduciary Net Position (Expenses) (for the years ended December 31, 2021 and 2020) Table \$				
	2021	2020	Amount Increase/ (Decrease) from 2020 to 2021	Percent Increase/ (Decrease) from 2020 to 2021
Benefits—Pension	\$6,772,996,281	\$6,517,424,253	\$255,572,028	3.9%
Benefits—Health Care Expenses	853,113,419	725,265,912	127,847,507	17.6
Refunds	591,091,983	483,428,551	107,663,432	22.3
Administrative Expenses	72,945,468	72,956,750	(11,282)	(<0.1)
Interplan Activity	40,246,132	42,849,507	(2,603,375)	(6.1)
Total Deductions	\$8,330,393,283	\$7,841,924,973	\$488,468,310	6.2%

Pension benefits totaled \$6.8 billion in 2021, an increase of \$0.3 billion, or 3.9%, over 2020 benefits. The increase in 2021 reflects the combination of a net growth of 1.2% in the total number of retirees and beneficiaries receiving benefits, an annual simple cost-of-living adjustment granted on the retiree's benefit anniversary, and demographic changes in the retiree population. Total pension benefits will continue to increase as the retiree population increases and wage growth and price inflation increase pension benefit amounts. The cumulative increase associated with the cost-of-living adjustments was \$1.6 billion at the end of 2021. Refer to the Schedules of Average Benefits on page 201 of the Statistical Section for details related to the new retiree populations by year. Refer to the Plan Statement beginning on page 213 for details on pension benefits.

Total health care expenses increased in 2021 by \$127.8 million, or 17.6%, to \$853.1 million, compared to 2020. Health care receipts, or payments, from retirees and health care vendors to OPERS, including retiree-paid health care premiums, prescription rebates and federal subsidies, offset the related health care expenses incurred by OPERS during the year by \$221.1 million, compared to \$253.4 million in 2020. The majority of the increase in health care expenses reflects the rising cost of health care and increased activity compared to 2020. Increases in HRA claims for the Medicare-enrolled retiree population represent \$88.2 million of the overall increase in this line item from 2020 to 2021. The remaining increase relates to non-Medicare recipients health care expenses in medical, dental, vision and disease management, an increase of \$41.3 million from 2020 to 2021.

Refunds of member accounts are at the discretion of the member and vary from year-to-year. Members may refund their account if they have been separated from OPERS-covered employment for at least two months, representing disbursements of inactive member accounts. In 2021, member-elected refunds totaled \$591.1 million, compared to \$483.4 million in 2020. While the number of refunded accounts decreased in 2021 compared to 2020, the average member balance refunded in 2021 increased to approximately \$25,100 from approximately \$19,500 in 2020.

OPERS has consistently managed its administrative expense budget with no material variances in either 2021 or 2020. Administrative Expenses shown in Table 5 do not include investment administrative expenses. Administrative Expenses totaled \$72.9 million in 2021, compared to \$73.0 million in 2020. Administrative Expenses have remained lower than previous years in both 2020 and 2021 as a result of decreased travel and other operating expenses in response to the ongoing global pandemic, along with savings resulting from the implementation of more efficient software systems.

Management's Discussion and Analysis

Net Position Summary

Net position may serve over time as a useful indicator of OPERS' financial status. At the close of calendar years 2021 and 2020, the net positions of OPERS totaled \$127.0 billion and \$114.3 billion, respectively. Net position is available to meet OPERS ongoing obligations to plan participants and their beneficiaries, and to the extent possible, OPERS post-employment health care.

Net Position (as of December 31, 2021 and 2020) Table 6				
	2021	2020	Amount Increase/ (Decrease) from 2020 to 2021	Percent Increase/ (Decrease) from 2020 to 2021
Current and Other Assets	\$892,178,613	\$895,442,892	(\$3,264,279)	(0.4%)

Net Position, Beginning of Year	114,269,154,929	106,314,925,671	7,954,229,258	7.5
Net Increase in Net Position	\$12,687,647,882	\$7,954,229,258	\$4,733,418,624	59.5%

Summary

OPERS remains dedicated to keeping this System strong today and well into the future. OPERS continues to manage the System in a manner that proactively addresses issues and trends; thus contributing to the strength of the System. The funding levels and 2021 results are found, in detail, and by category, in this annual report.

1. Description of OPERS

a. Organization—The Ohio Public Employees Retirement System (OPERS or System) is a cost-sharing, multiple-employer public employee retirement system comprised of three separate pension plans: the Traditional Pension Plan, a defined benefit plan; the Combined Plan, a hybrid defined benefit/defined contribution plan; and the Member-Directed Plan, a defined contribution plan. Effective January 1, 2022 the Combined Plan is no longer available for member selection. OPERS is a qualified governmental plan under Section 401(a) of the Internal Revenue Code (IRC). OPERS is administered in accordance with Chapter 145 of the Ohio Revised Code (ORC). All state and local governmental employees in Ohio, except those covered by one of the other state or local retirement systems in Ohio, are members of OPERS. New public employees (those who establish membership in OPERS on or after January 1, 2003) have 180 days from the commencement of employment to select membership in one of the pension plans. Contributions to OPERS are effective with the first day of the member's employment. Contributions made prior to the member's plan selection are maintained in the Traditional Pension Plan and later transferred to the plan elected by the member, as appropriate.

The OPERS health care plans are reported as cost-sharing, multiple-employer other postemployment benefit plans (OPEB) based on the criteria established by the Governmental Accounting Standards Board (GASB). Periodically, OPERS modifies the health care program design to improve the ongoing solvency of the plans. Eligibility requirements for access to the OPERS health care options has changed over the history of the program for Traditional Pension Plan and Combined Plan members. At inception of the health care plan in 1976, five or more years of service were required to qualify for health care coverage. In 1986, the years of service requirement changed to 10 or more years. Beginning January 1, 2015, generally, members must be at least age 60 with 20 years of qualifying service credit to qualify for health care coverage or 30 years of qualifying service at any age. Beginning 2016, eligible Traditional Pension Plan and Combined Plan retirees enrolled in Medicare A and B were able to participate in the OPERS Medicare Connector (Connector). The Connector, a vendor selected by OPERS, assists eligible retirees in the selection and purchase of Medicare supplemental coverage through the Medicare market. Eligible retirees who purchase supplemental coverage through the Connector may receive a monthly allowance in their health reimbursement arrangement (HRA) account that can be used to reimburse eligible health care expenses. Upon termination or retirement, Member-Directed Plan participants can use vested retiree medical account (RMA) funds for reimbursement of gualified medical expenses. Members who elect the Member-Directed Plan after July 1, 2015 will vest in the RMA over 15 years at a rate of 10% each year starting with the sixth year of participation. Members who elected the Member-Directed Plan prior to July 1, 2015 vest in the RMA over a five-year period at a rate of 20% per year. Health care coverage is neither guaranteed nor statutorily required. Please see the Plan Statement beginning on page 213 for additional details.

OPERS maintains one health care trust, the 115 Health Care Trust (115 Trust), which was established in 2014 to initially provide a funding mechanism for the HRA, as the prior trust structure, the 401(h) Health Care Trust (401(h) Trust) and the Voluntary Employees' Beneficiary Association Trust (VEBA Trust), could not legally support the HRA. In March 2016, OPERS received two favorable rulings from the Internal Revenue Service (IRS) allowing OPERS to consolidate health care assets into the 115 Trust. The 401(h) Trust was a pre-funded trust that provided health care funding for eligible members of the Traditional Pension Plan and the Combined Plan through December 31, 2015, when plans funded through the 401(h) Trust were terminated. The VEBA Trust accumulated funding for RMAs for participants in the Member-Directed Plan through June 30, 2016. The 401(h) Trust and the VEBA Trust were closed as of

Notes to Combining Financial Statements

June 30, 2016 and the net positions transferred to the 115 Trust on July 1, 2016. Beginning 2016, the 115 Trust, established under IRC Section 115, is the funding vehicle for all health care plans.

The accompanying financial statements comply with the provisions of GASB Statement No. 14, The Financial Reporting Entity, and with the provisions of GASB Statement No. 39, Determining Whether Certain Organizations Are Component Units—an amendment of GASB Statement No. 14. These statements require that financial statements of the reporting entity include all the organizations, activities, functions and component units for which the reporting entity is financially accountable. Financial accountability is defined as the appointment of a voting majority of the component unit's board of directors and either (1) the reporting entity's ability to impose its will over the component unit, or (2) the possibility that the component unit will provide a financial benefit to, or impose a financial burden on, the reporting entity. OPERS does not have financial accountability over any entities.

OPERS is not part of the state of Ohio financial-reporting entity, nor is OPERS a component unit of the state of Ohio. Responsibility for the organization is vested in the OPERS Board of Trustees; there is no financial interdependency with the state of Ohio. The Board is the governing body of OPERS, with responsibility for administration and management. Of the Board, seven members are elected by the group they represent: the retirees (two representatives), employees of the state, employees of counties, employees of municipalities, non-teaching employees of state colleges and universities, and miscellaneous employees. The remaining four members are appointed or designated by position. The Governor, General Assembly and the Treasurer of the state of Ohio each appoint an investment expert Board member. The Director of the Ohio Department of Administrative Services completes the Board.

The Board appoints the Executive Director, an actuary, investment consultants and other consultants necessary for the transaction of business. The Board typically meets monthly and receives no compensation, but is reimbursed for necessary expenses.

Plan membership—All state and local governmental employees, except those covered by another state retirement system in Ohio or the Cincinnati Retirement System, are required to become contributing members of OPERS when they begin public employment unless they are exempted or excluded as defined by the ORC. For actuarial purposes, employees who have earned sufficient service credit (five years) are entitled to a future retirement benefit from OPERS. Employer, member and retiree data as of December 31, 2021 is found below.

⁴ Effective December 31, 2021, OPERS no longer provided self-insured group health care or prescription drug plans for non-Medicare retirees or their eligible dependents. Retirees and Primary Beneficiaries currently receiving benefits in the table above includes Medicare retirees as of December 31, 2021 and 29,697 retirees newly enrolled in the Connector program as of January 1, 2022.

Notes to Combining Financial Statements

- b. Benefits—All benefits of the System, and any benefit increases, are established by the legislature pursuant to ORC Chapter 145. The Board, pursuant to ORC Chapter 145, has elected to maintain funds to provide health care coverage to eligible Traditional Pension Plan and Combined Plan retirees and survivors of members. Health care coverage does not vest and is not required under ORC Chapter 145. As a result, coverage may be reduced or eliminated at the discretion of the Board.
 - Age-and-Service Defined Benefits—Effective January 7, 2013, Senate Bill (SB) 343 modified components of the Traditional Pension Plan and Combined Plan. Members were impacted (to varying degrees) by the changes based on their transition group. Three transition groups (A, B and C) were designed to ease the transition for key components of the pension plan changes. Members who were eligible to retire under law in effect prior to SB 343, or were eligible to retire no later than five years after January 7, 2013, comprise transition Group A. Members who had at least 20 years of service credit prior to January 7, 2013, or will be eligible to retire no later than 10 years after January 7, 2013, are included in transition Group B. Group C included those members who are not in either of the other groups and members who were hired on or after January 7, 2013. Please see the Plan Statement for additional details.

Benefits in the Traditional Pension Plan for State and Local members are calculated on the basis of age, final average salary (FAS), and service credit. State and Local members in transition Groups A and B are eligible for retirement benefits at age 60 with five years of service credit or at age 55 with 25 or more years of service credit. Group C for State and Local is eligible for retirement benefits at age 57 with 25 years of service or at age 62 with five years of service. For Groups A and B, the annual benefit is based on 2.2% of FAS multiplied by the actual years of service for the first 30 years of service credit and 2.5% for years of service in excess of 30 years. For Group C, the annual benefit applies a factor of 2.2% for the first 35 years and a factor of 2.5% for the years of service in excess of 35. FAS represents the average of the three highest years of earnings over a member's career for Groups A and B. Group C is based on the average of the five highest years of earnings over a member's career. Refer to the age-and-service tables located in the Plan Statement beginning on page 213 for additional information regarding the requirements for reduced and unreduced benefits. Members who retire before meeting the age-and-years of service credit requirement for unreduced benefits receive a percentage reduction in the benefit amount. The amount of a member's pension benefit vests upon receipt of the initial benefit payment.

Effective January 1, 2001, House Bill 416 divided the OPERS Law Enforcement Program into two separate divisions: Law Enforcement and Public Safety. Both groups of members, as defined in ORC Chapter 145, and updated in House Bill 520, are eligible for special retirement options under the Traditional Pension Plan and are not eligible to participate in the Member-Directed Plan or Combined Plan. Public Safety members may file an application for full retirement benefits at age 48 or older with 25 or more years of credited service or 52 or older with 15 or more years of credited service for Groups A and B. Public Safety Group C is eligible for benefits at age 52 or older with 25 years or at age 56 or older with 15 years. Those members classified as Law Enforcement officers are eligible for full retirement at age 52 or older with 15 or more years of credited service for Group A. Law Enforcement Group B is eligible at age 48 or older with 25 years or at age 52 or older with 15 years of service. Law Enforcement Group C is eligible at age 48 or older with 25 years of service or at age 56 with 15 years of service. Annual benefits under both divisions are calculated by multiplying 2.5% of FAS by the actual years of service for the first 25 years of service credit, and 2.1% of FAS for each year of service over 25 years. These options also permit early retirement under qualifying circumstances as early as age 48 with a reduced benefit.

37

Prior to 2000, payments to OPERS benefit recipients were limited under Section 415(b) of the IRC. OPERS entered into a Qualified Excess Benefit Arrangement (QEBA) with the IRS to allow OPERS benefit recipients to receive their full statutory benefit even when the benefit exceeds IRC 415(b) limitations. Monthly QEBA payments start when the total amount of benefits received by the recipients exceeds the IRC limit each year. The portion of the benefit in excess of the IRC 415(b) limit is paid out of the QEBA and taxed as employee payroll in accordance with IRS regulations.

Benefits in the Combined Plan consist of both an age-and-service formula benefit (defined benefit) and a defined contribution element. The defined benefit element is calculated on the basis of age, FAS, and years of service. Eligibility regarding age and years of service in the Combined Plan is the same as the Traditional Pension Plan. The benefit formula for the defined benefit component of the plan for State and Local members in transition Groups A and B applies a factor of 1.0% to the member's FAS for the first 30 years of service. A factor of 1.25% is applied to years of service in excess of 30. The benefit formula for transition Group C applies a factor of 1.0% to the member's FAS for the first 35 years of service and a factor of 1.25% is applied to years in excess of 35. Persons retiring before age 65 with less than 30 years of service credit receive a percentage reduction in benefit.

- Defined Contribution Benefits—Defined contribution plan benefits are established in the plan documents, which may be amended by the Board. Member-Directed Plan and Combined Plan members who have met the retirement eligibility requirements may apply for retirement benefits. The amount available for defined contribution benefits in the Combined Plan consists of the member's contributions plus or minus the investment gains or losses resulting from the member's investment selections. Combined Plan members wishing to receive benefits must meet the requirements for both the defined benefit and defined contribution plans. Member-Directed participants must have attained the age of 55, have money on deposit in the defined contribution plan and have terminated public service to apply for retirement benefits. The amount available for defined contribution benefits in the Member-Directed Plan consists of the members' contributions, vested employer contributions and investment gains or losses resulting from the members' investment selections. Employer contributions and associated investment earnings vest over a five-year period, at a rate of 20% each year. At retirement, members may select one of several distribution options for payment of the vested balance in their individual OPERS accounts. Options include the annuitization of their benefit account (which includes joint and survivor options and will continue to be administered by OPERS), partial lump-sum payments (subject to limitations), a rollover of the vested account balance to another financial institution, receipt of entire account balance (net of taxes withheld), or a combination of these options. When members choose to annuitize their defined contribution benefit, the annuitized portion of the benefit is reclassified to a defined benefit.
- *Early Retirement Incentive Plan (ERIP)*—Employers under OPERS may establish an early retirement incentive plan by purchasing service credit for eligible employees. To be eligible, employees must be able to retire under existing plan provisions after the purchase of the additional credit. Electing employers must contribute all such additional costs as are actuarially determined to fund the benefit. Such a plan, if adopted by an employer, must be offered to a minimum of 5% of covered employees, and may provide for the purchase of up to five years of service credit, limited to a maximum of 20% of the member's total service credit. Members electing to participate in the employer's plan must retire within 90 days of receiving notice of the purchased service or the service is withdrawn and refunded to the employer. Employers offering an ERIP pay the full cost of the additional benefits at the time the plan is adopted and the required contributions are recognized in full by OPERS.

Notes to Combining Financial Statements

- **Disability Benefits**—OPERS administers two disability plans for participants in either the Traditional Pension Plan or Combined Plan. Members in the plan as of July 29, 1992, could elect, by April 7, 1993, coverage under either the original plan or the revised plan. All members who entered the System after July 29, 1992 are automatically covered under the revised plan. Under the original plan, a member who becomes disabled before age 60 and has completed five years of total service is eligible for a disability benefit. Benefits are funded by the member and employer contributions and terminate if the member is able to return to work. The revised plan differs in that a member who becomes disabled at any age with five years of total service will be eligible for disability benefits until a determined age. The benefit is funded by reserves accumulated from employer contributions. After the disability benefit ends, the member may apply for a service retirement benefit or a refund of contributions, which are not reduced by the amount of disability benefits received. Law Enforcement officers are immediately eligible for disability benefits if disabled by an on-duty illness or injury. Members participating in the Member-Directed Plan are not eligible for disability benefits.
- Survivor Benefits—Dependents of deceased members who participated in either the Traditional Pension Plan or the Combined Plan may qualify for survivor benefits if the deceased member had at least one and a half years of service credit with the plan, and at least one quarter year of credit within the two and one-half years prior to the date of death. ORC Chapter 145, updated by House Bill 520, and the corresponding Combined Plan document specify the dependents and the conditions under which they qualify for survivor benefits. Qualified survivors of Law Enforcement and Public Safety officers are eligible for survivor benefits immediately upon employment.
- *Health Care Coverage*—The ORC permits, but does not require, OPERS to offer postemployment health care coverage. The ORC allows a portion of the employers' contributions to be used to fund health care coverage.

At the inception of the health care plan in 1976, the System provided comprehensive health care coverage to retirees with five or more years of qualifying service credit. In 1986, the years of service requirement changed to 10 or more years. Beginning January 1, 2015, the service eligibility criteria for health care coverage increased from 10 years to 20 years with a minimum age of 60, or, generally, 30 years of qualifying service at any age. Beginning with January 2016 premiums, eligible Medicare-enrolled retirees could select supplemental coverage through the Connector, and may be eligible for monthly allowances deposited to an HRA to be used for reimbursement of eligible health care expenses. Coverage for eligible non-Medicare retirees included hospitalization, medical expenses and prescription drugs through December 31, 2021. The System determined the amount, if any, of the associated health care costs that were absorbed by the System and attempted to control costs by using managed care, case management and other programs. Effective January 1, 2022, eligible non-Medicare retirees are part of a Connector program, similar to Medicare-enrolled retirees. Additional details on health care coverage can be found in the Plan Statement beginning on page 213.

Participants in the Member-Directed Plan are not eligible for health care coverage offered to benefit recipients in the Traditional Pension Plan and Combined Plan. A portion of employer contributions for these participants is allocated to an RMA. Upon separation or retirement, participants may be reimbursed for qualified medical expenses from these accounts.

An additional RMA was also established several years ago when three health care coverage levels were available to retirees. These RMA balances were transferred to the HRA for retirees with both types of accounts. OPERS initiated an automatic claims payment process for reimbursements for retiree health care costs paid through pension deduction. This process

reimbursed members for eligible health care premiums paid to OPERS through pension deduction, up to the member's available RMA balance, through December 31, 2021.

- Other Benefits—Once a benefit recipient retiring under the Traditional Pension Plan has received benefits for 12 months, the member is eligible for an annual cost-of-living adjustment. This cost-of-living adjustment is calculated on the member's original base retirement benefit at the date of retirement and is not compounded. Members retiring under the Combined Plan receive a cost-of-living adjustment on the defined benefit portion of their retirement benefit. For those who retired prior to January 7, 2013, the cost-of-living adjustment is 3%. For those retiring on or after January 7, 2013, beginning in 2019, the adjustment is based on the average percentage increase in the Consumer Price Index (CPI), capped at 3%. A death benefit of \$500-\$2,500, determined by the number of years of service credit of the retiree, is paid to the beneficiary of a deceased retiree or disability benefit recipient under the Traditional Pension Plan and Combined Plan. Death benefits are not available to beneficiaries of Member-Directed Plan participants.
- *Money Purchase Annuity*—Age-and-service retirees from any of the three pension plans who become re-employed in an OPERS-covered position must contribute the regular contribution rates, which are applied towards a money purchase annuity. The money purchase annuity calculation is based on the accumulated contributions of the retiree for the period of re-employment, and an amount of the employer contributions determined by the Board. Upon termination of service, members over the age of 65 can elect to receive a lump-sum payout or a monthly annuity. Members under age 65 may leave the funds on deposit with OPERS to receive an annuity benefit at age 65, or may elect to receive a refund of their member contributions made during the period of re-employment, plus interest.
- **Refunds**—Members who have terminated service in OPERS-covered employment may file an application for refund of their account. The ORC and applicable plan documents require a two-month waiting period after service termination before the refund may be paid. The acceptance of a refund payment cancels the individual's rights and benefits in OPERS.

Refunds processed for Traditional Pension Plan members include the member's accumulated contributions, interest, and any qualifying employer funds, as determined by the Board. A Combined Plan member's refund may consist of member contributions for the purchase of service plus interest, qualifying employer funds, as determined by the Board, and the value of the account in the defined contribution plan consisting of member contributions adjusted by the gains or losses incurred based on their investment selections. Refunds paid to participants in the Member-Directed Plan include member contributions and vested employer contributions adjusted by the gains or losses incurred based on their investment selections.

c. **Contributions**—The OPERS funding policy provides for periodic member and employer contributions to all three pension plans at rates established by the Board, subject to limits set in statute. The rates established for member and employer contributions were approved based upon the recommendations of the System's actuary. All contribution rates were within the limits authorized by the ORC.

Member and employer contribution rates, as a percent of covered payroll, were the same for each covered group across all three plans for the year ended December 31, 2021. Within the Traditional Pension Plan and Combined Plan, member and employer contributions (employer contributions only for the Combined Plan) and an actuarially determined rate of return are adequate to accumulate sufficient assets to pay defined benefits when due. Member contributions within the Combined Plan are used to fund the defined contribution benefits and are not used to fund the defined benefit retirement allowance. Employer contribution rates as a level percent of

payroll dollars are determined using the entry age actuarial funding method. This formula determines the amount of contributions necessary to fund: (1) the current service cost, representing the estimated amount necessary to pay for defined benefits earned by the members during the current service year; and (2) the prior service cost for service earned prior to the current year and subsequent benefit increases. These contributions represent the amount necessary to fund accrued liabilities for retirement allowances and survivor benefits over a period of time. The annual employer contributions reported for the Traditional Pension Plan for 2021 were \$2,035,845,218. Employer contributions for the Combined Plan for 2021 were \$64,192,623. Employers satisfied 100% of the contribution requirements.

The following table displays the member and employer contribution rates as a percent of covered payroll for each division for 2021. With the assistance of the System's actuary and Board approval, a portion of each employer contribution to OPERS may be set aside for the funding of post-employment health care coverage. For 2021, no portion of the employer contribution rate was allocated to health care for the Traditional Pension Plan and the Combined Plan. The employer contribution as a percent of covered payroll deposited for Member-Directed Plan health care accounts for 2021 was 4.0%.

Board of Trustees—Approved Contribution Rates—All Plans						
	2021 Member Rate	2021 Employer Rate				
State Division	10.0%	14.0%				
Local Division	10.0	14.0				
Law Enforcement Division	13.0	18.1				
Public Safety Division	12.0	18.1				

The member and employer contribution rates for the State and Local divisions are currently set at the maximums authorized by the ORC of 10.0% and 14.0%, respectively. The Public Safety and Law Enforcement employer rates are also set at the maximum authorized rate of 18.1%. The member rate for Public Safety is determined by the Board and has no maximum rate established by the ORC. The member rate for Law Enforcement is also determined by the Board, but is limited by the ORC to not more than 2.0% greater than the Public Safety rate.

ORC Chapter 145 assigns authority to the Board to amend the funding policy. As of December 31, 2021, the Board adopted the contribution rates that were recommended by the actuary. The contribution rates were included in a funding policy adopted by the Board in October 2013, and are certified periodically by the Board as required by the ORC.

As of December 31, 2021, the date of the last pension actuarial study, the funding period for all defined benefits of the System was 16 years.

d. Commitments and Contingencies—OPERS has committed to fund various private equity and real estate investments totaling approximately \$10.3 billion as of December 31, 2021. The expected funding dates for these commitments extend through 2027. OPERS is a party in various lawsuits relating to plan benefits and investments. While the final outcome cannot be determined at this time, management is of the opinion that the liability, if any, for these legal actions will not have a material adverse effect on OPERS' financial position.

2. Summary of Significant Accounting Policies

The following are the significant accounting policies followed by OPERS for all pension and health care plans:

a. Basis of Accounting—The financial statements are prepared using the economic resources measurement focus and accrual basis of accounting under which deductions are recorded when the expense is incurred and revenues are recognized when earned. Pension benefit payments are due the first day of the month following the retirement of a member, and the first of each month thereafter. Health care payments are considered an expense and recognized as a liability in the Combining Statement of Fiduciary Net Position when a present obligation exists and a condition that requires the event creating the liability has taken place. Therefore, OPEB plan expenses are recognized when the benefits are currently due and payable in accordance with the benefit terms, as clarified in GASB Statement No. 74 (GASB 74), Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans. GASB 74 also requires health care expenses be reported net of certain health care receipts. Beginning with the implementation of GASB 74 in 2017, the presentation of retiree-paid health care premiums, federal subsidy and rebates previously included in Contract and Other Receipts, has been revised and these health care receipts are now included in health care expenses in Benefits under Deductions in the Combining Statement of Changes in Fiduciary Net Position. Previously, these receipts were reflected in the Additions section of the statement. Health care liabilities contain estimates on incurred but not reported amounts for the current year.

OPERS notionally funds and tracks member balances in the HRA, Member-Directed health care accounts and wellness RMAs. As of December 31, 2021, the notional member balances in the HRAs were \$390.4 million and the amount recognized as currently due for 2021 claims based on estimates was \$107.6 million. As of December 31, 2021, the notional member balances in the Member-Directed health care accounts and wellness RMAs were \$306.8 million and \$0.8 million, respectively. The claim amounts currently due as of December 31, 2021 were estimated at \$1.0 million and less than \$0.1 million, respectively. As previously noted, the Member-Directed health care accounts were originally funded through the VEBA Trust, prior to the 115 Trust, and the VEBA Trust was historically reported separately in the combining financial statements. Although all health care activity is now reflected in the 115 Trust, OPERS internally accounts for health care activity separately. Total net position reported for the 115 Trust as of December 31, 2021 was \$14.2 billion, which includes a net position of \$450.7 million related to funds accumulated for the Member-Directed health care plan.

Refunds, for any member who makes a written application to withdraw their contributions, are payable two months after termination of the member's OPERS-covered employment. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Additions to the plans consist of contributions (member and employer), other contracts and receipts, interplan activities, net investment income, and other miscellaneous income. Contributions are recorded in the period the related salaries are earned and become measurable pursuant to formal commitments, statutory or contractual requirements. Accordingly, both member and employer contributions for the year ended December 31, 2021 include year-end accruals based upon estimates derived from subsequent payment activity and historical payment patterns. Member and employer contributions are due 30 days after the month in which salaries are earned based on pay period end date. Health care reimbursements are recognized when they become measurable and due to OPERS based on contractual requirements. Therefore, health care reimbursements contain estimates based on information received from health care vendors and other sources. Plan changes, or interplan activity, are recorded as an addition or deduction based

on the nature of the transaction, when the transaction occurs. Investment purchases and sales are recorded as of their trade date.

The accounting and reporting policies of OPERS conform to accounting principles generally accepted in the United States (referred to as GAAP) as applicable to government organizations. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and to disclose contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

OPERS reviews the requirements of all new GASB pronouncements and their impact on the financial statements. For the fiscal year ended December 31, 2021, there was no material impact to the OPERS financial statements resulting from the implementation of new accounting pronouncements.

In June 2020, GASB issued Statement No. 97, *Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans—an amendment of GASB Statements No. 14 and No. 84, and a supersession of GASB Statement No. 32.* Certain objectives of this standard were effective immediately and had no impact on OPERS. The effective date of the remaining objectives of this standard is fiscal years beginning after June 15, 2021. One of the primary objectives of this standard is to enhance the relevance, consistency, and comparability of the accounting and financial reporting for IRC Section 457 deferred compensation plans that meet the definition of a pension plan and for benefits provided through those plans. OPERS is currently evaluating the remaining objectives of this statement.

b. Investments—OPERS is authorized by ORC Section 145.11 to invest under a prudent person standard and does so through an investment policy established by the Board. ORC 145.11 states:

The Board and other fiduciaries shall discharge their duties with respect to the funds solely in the interest of the participants and beneficiaries; for the exclusive purpose of providing benefits to participants and their beneficiaries and defraying reasonable expenses of administering the public employees retirement system; with care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with these matters would use in the conduct of an enterprise of a like character and with like aims; and by diversifying the investments of the system so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so.

Member-Directed Plan participants self-direct the investment of both member and employer contributions. Contributions must be invested with an investment manager approved by the Board. Similarly, participants in the Combined Plan self-direct the investment of member contributions. The investment assets for all other plans and the health care trust are invested under the direction of the OPERS Investment staff in conformance with policies approved by the Board.

Investments are generally reported at fair value. Fair value is the amount that a plan can reasonably expect to receive for an investment in a current sale between a willing buyer and a willing seller, that is, other than in a forced or liquidation sale. All investments, with the exception of real estate, private equity, risk parity and hedge funds, are valued based on closing market prices or broker quotes. Securities not having a quoted market price have been valued based on yields currently available on comparable securities of issuers with similar credit ratings. The fair value of some real estate investments, private equity, risk parity and hedge funds is based on a

net asset value, which is established by the fund or by the fund's third-party administrator. Refer to Note 3i for additional information on valuation of investments.

Net increase/(decrease) in the fair value of investments is determined by calculating the change in the fair value of investments between the end of the year and the beginning of the year, less purchases of investments at cost, plus sales of investments at fair value. Interest income is recorded on the accrual basis and dividends are recorded on the ex-dividend date. Commissions paid to brokers are considered a part of the investment asset cost and are, therefore, not reported as expenses of the System. Brokerage commissions for 2021 were \$8,469,646. Investment administrative expenses consist of custodial banking fees and those expenses directly related to OPERS internal investment operations, and include a proportional amount of allocated overhead.

- c. Capital Assets—OPERS maintains two categories of capital assets: tangible capital assets and intangible right-to-use assets.
 - **Tangible Capital Assets**—Tangible capital assets are recorded at cost and do not meet the definition of an investment under GASB Statement No. 72, *Fair Value Measurement and Application*. OPERS has adopted a capitalization threshold used to identify whether assets purchased by the System are classified as capital assets or operating expenses. Building enhancements, furniture and equipment with a cost equal to or greater than \$5,000 and computer software purchases of \$25,000 or more are recorded as tangible capital assets and depreciated based on the useful life of the asset.

Depreciation for tangible capital assets is computed using the straight-line method over the estimated useful lives of the related assets according to the following schedule:

Useful Lives of Tangible Capital Assets			
	Years		
Buildings and Building Improvements	50		
Furniture and Equipment	3-10		
Computer Software	3-10		

Intangible Right-to-use Assets—Intangible right-to-use assets are recorded under GASB Statement No. 87 (GASB 87), Leases, and GASB Statement No. 96, Subscription-Based Information Technology Arrangements (SBITA). The intangible right-to-use assets and the related liabilities are recorded at the commencement date of the related contract. The lease or subscription liabilities, included within Accounts Payable and Other Liabilities on the Combining Statement of Fiduciary Net Position, are measured at the present value of expected payments over the contract term. The intangible right-to-use assets are based on the initial measurement of the liability, plus any payments made to the vendor at or before the commencement of the contract term. OPERS has adopted a capitalization threshold of \$5,000 for lease assets and \$25,000 for subscriptions assets. Intangible right-to-use assets are amortized over the shorter of the term of the contract or the useful life of the underlying asset. Interest expense is recognized ratably over the contract term.

The table below is a schedule of the capital asset account balances as of December 31, 2020 and 2021, with changes to those account balances during the year ended December 31, 2021:

Capital Asset Account Balances					
	Land	Building and Building Improvements	Furniture and Equipment	Intangible Right-to-use Assets	Total Capital Assets
Cost					
Balances December 31, 2020	\$3,734,813	\$110,510,542	\$149,580,878	\$19,191,760	\$283,017,993
Additions	—	—	11,111,728	1,201,212	12,312,940
Disposals		(68,224)	(561,515)	(924,970)	(1,554,709)
Balances December 31, 2021	3,734,813	110,442,318	160,131,091	19,468,002	293,776,224
Accumulated Depreciation and Amortization					
Balances December 31, 2020	—	43,263,487	100,156,010	2,446,898	145,866,395
Depreciation and Amortization Expense	_	2,314,563	10,082,735	4,901,537	17,298,835
Disposals		(28,168)	(558,976)	(859,886)	(1,447,030)
Balances December 31, 2021		45,549,882	109,679,769	6,488,549	161,718,200
Net Capital Assets December 31, 2021	\$3,734,813	\$64,892,436	\$50,451,322	\$12,979,453	\$132,058,024

- d. Lessor Obligations—OPERS recognizes a lease receivable and a deferred inflow of resources (lessor obligation) at the commencement of the lease term. The lease receivable and lessor obligation are measured at the present value of lease payments expected to be received during the lease term, as defined by GASB 87. The lease receivable is recognized as additions to net position over the term of the lease.
- e. Vacation and Sick Leave—Employees who resign or retire are entitled to full compensation for all earned but unused vacation balances up to three times their annual accrual rate at the time of separation. Unused sick leave is forfeited upon termination. However, employees who retire with more than 10 years of service with OPERS are entitled to receive payment for 50% of unused sick leave up to a maximum of 2,000 hours, or payment of 1,000 hours. As of December 31, 2021, \$9,511,701 is accrued within Accounts Payable and Other Liabilities for unused vacation and sick leave for employees.
- **f. Federal Income Tax Status**—OPERS is a qualified plan under Section 401(a) of the IRC and is exempt from federal income taxes under Section 501(a).
- **g. Funds**—In accordance with the ORC and IRS regulations, various funds have been established to account for the reserves held for future and current payments. Statutory and IRS-mandated funds within each of the three pension plans are described below:

Traditional Pension Plan

The Employees' Savings Fund—represents member contributions held in trust pending refund or transfer to a benefit disbursement fund. Upon a member's refund or retirement, such member's account is credited with an amount of interest (statutory interest) on the member's contributions based on a Board-approved rate, which currently ranges from 1% to 4%. Members eligible for a refund also receive additional funds from the Employers' Accumulation Fund, if qualified. ORC Chapter 145 requires statutory interest to be compounded annually.

45

- **The Employers' Accumulation Fund**—accumulates employer contributions to provide the reserves required for transfer to the Annuity and Pension Reserve Fund as members retire or become eligible for disability benefits, and to the Survivors' Benefit Fund for benefits due to dependents of deceased members.
- The Annuity and Pension Reserve Fund—is the fund from which retirement benefits that do not exceed the IRC 415(b) limitations and health care coverage are paid. By law, OPERS is obligated to pay certain benefits that have commenced with retirees. In order to make these payments each year and hold sufficient assets in this fund to pay the vested benefits of all retirees and beneficiaries as of the actuarial valuation date, OPERS transfers funds from the active member employer fund (the Employers' Accumulation Fund) to the pension funds (the Annuity and Pension Reserve Fund and the Survivors' Benefit Fund). Thus, the active member funding was 55% as of December 31, 2021.
- **The Survivors' Benefit Fund**—is the fund from which benefits due to beneficiaries of deceased members of the System that do not exceed the IRC 415(b) limitations are paid. Refer to the description under the Annuity and Pension Reserve Fund for additional information.
- **Qualified Excess Benefit Arrangement (QEBA) Fund**—is the fund from which annuity, disability and survivors' benefits are paid when the recipient exceeds the IRC 415(b) limits. This reserve is funded by employer contributions.
- **The Income Fund**—is the fund credited with all investment gains or losses and miscellaneous income. Annually, the balance in this fund is transferred to other funds to aid in the funding of future benefit payments and administrative expenses.
- **The Expense Fund**—provides for the payment of administrative expenses with the necessary monies allocated to it from the Income Fund.

Member-Directed Plan

- **The Defined Contribution Fund**—represents member and employer contributions held in trust pending refund or commencement of benefit payments. Members self-direct the investment of these funds. The member vests in employer contributions over a five-year period at a rate of 20% per year.
- **The Annuity and Pension Reserve Fund**—is the fund from which purchased annuity benefits are paid. Upon retirement, Member-Directed participants may elect to liquidate their defined contribution accounts to purchase a defined benefit annuity. The value of the annuity is based on the value of the defined contribution account at the time of liquidation.
- **The Income Fund**—is the fund credited with all investment gains or losses, account fees, and miscellaneous income. The balance in this fund is used to fund the gains or losses incurred by participants and to fund the administrative expenses of the Member-Directed Plan.
- **The Expense Fund**—provides for the payment of administrative expenses with the necessary monies allocated to it from the Income Fund.
- *The Employers' Accumulation Fund*—is related to the annuitization of defined contribution accounts and death refunds.

Combined Plan

• **The Defined Contribution Fund**—represents member contributions held in trust pending refund or commencement of benefit payments. Members self-direct the investment of these funds.

Notes to Combining Financial Statements

- **The Employees' Savings Fund**—represents member deposits for the purchase of service credit held in trust pending refund or transfer to the plan Annuity and Pension Reserve Fund. Upon a member's refund or retirement, accounts are credited with an amount of interest (statutory interest) on the member's deposits based on a Board-approved rate. The interest rate has been 1% since January 1, 2003.
- **The Employers' Accumulation Fund**—accumulates employer contributions to provide the reserves required for transfer to the Annuity and Pension Reserve Fund as members retire. Disability and survivor benefits are funded by transfers to Traditional Pension Plan funds, which pay such benefits.
- *The Annuity and Pension Reserve Fund*—is the fund from which retirement benefits and health care coverage are paid.
- **The Income Fund**—is the fund credited with all investment gains or losses, account fees and miscellaneous income. The balance in this fund is transferred to other funds, to credit member accounts and to aid in the funding of future benefit payments and administrative expenses.
- **The Expense Fund**—provides for the payment of administrative expenses with the necessary monies allocated to it from the Income Fund.

115 Health Care Trust

• The Employers' Accumulation Health Care Fund (IRC 115)—accumulates Traditional Pension Plan and Combined Plan employer contributions to provide the reserves required for transfer to the Annuity and Pension Reserve and Survivors' Benefit funds. These funds are for health care coverage for paid for non-Medicare retirees and eligible dependents of deceased members and monthly deposits to an HRA for Medicare-enrolled retirees and eligible dependents of deceased members under the Connector program. The Employers' Accumulation Health Care Fund is also used to accumulate a portion of employers contributions into an RMA for Member-Directed Plan members.

The statutory funds defined by ORC Chapter 145 and the IRC-required funds are not mutually exclusive. The Combining Statement of Fiduciary Net Position and the Combining Statement of Changes in Fiduciary Net Position are presented based on IRC requirements. The following schedule provides the values of the statutory funds and how they are distributed among the various retirement plans and the health care trust administered by the System. In total, these funds will equal the net position of the System. To support the net position for each plan and trust included in the statements, the schedule has been expanded to include the value of the statutory funds as they relate to each plan and trust.

Statutory and IRC Fund Balances (as of December 31, 2021)								
	Traditional Pension Plan	Combined Plan	Member- Directed Plan	115 Health Care Trust	Total			
Employees' Savings Fund	\$15,805,938,389	\$4,460,844	\$120,042		\$15,810,519,275			
Employers' Accumulation Fund	24,275,334,232	898,593,935	16,877,087	\$14,225,339,304	39,416,144,558			
Annuity and Pension Reserve Fund	67,020,947,720	54,798,574	26,431,330		67,102,177,624			
Survivors' Benefit Fund	1,983,653,527				1,983,653,527			
Defined Contribution Fund		861,752,559	1,658,769,268		2,520,521,827			
Income Fund	121,768,141				121,768,141			
Expense Fund	2,017,859				2,017,859			
Total	\$109,209,659,868	\$1,819,605,912	\$1,702,197,727	\$14,225,339,304	\$126,956,802,811			

Statutory and IRC Fund Balances as of December 31, 2021 were as follows:

h. Risk Management—OPERS is exposed to various risks of loss related to theft of, damage to, or destruction of assets; injuries to employees; and court challenges to fiduciary decisions. To cover these risks, OPERS maintains commercial insurance and holds fidelity bonds on employees. There were no reductions in coverage nor have there been any settlements exceeding insurance coverage. As required by state law, OPERS is registered and insured through the state of Ohio Bureau of Workers' Compensation for injuries to employees. OPERS is self-insured for employee health care coverage. The only outstanding liabilities as of December 31, 2021 were \$0.5 million accrued within Accounts Payable and Other Liabilities related to the employee health care coverage.

3. Cash and Investments

A summary of cash, cash equivalents and investments held as of December 31, 2021 was as follows:

Summary of Cash, Cash Equivalents and Investments (as of December 31, 2021)				
	Fair Value			
Cash and Cash Equivalents				
Cash	\$67,157,120			
Cash Equivalents

--	--	-------------------

¹ Includes hedge funds and derivative instruments.

- a. Custodial Credit Risk, Deposits—Custodial credit risk for deposits is risk that, in the event of the failure of a depository financial institution, OPERS will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The total amount of cash balances reported was \$67,157,120 at December 31, 2021. Balances on deposit are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000. The remaining bank deposits are covered by collateral held in the name of OPERS' pledging financial institution, as required by the ORC. OPERS has not experienced any losses in accounts and the System is not exposed to significant credit risk on its cash. OPERS has no formal policy specific to custodial credit risk. These assets are under the custody of the Treasurer of the state of Ohio.
- b. Custodial Credit Risk, Investments—Custodial credit risk for investments is the risk that, in the event of the failure of the custodian, OPERS will not be able to recover the value of its investment or collateral securities that are in the possession of the custodian. The Treasurer of the state of Ohio, as custodian, selects the custodian in the name of OPERS or its nominee; thus, OPERS investments are not exposed to custodial credit risk.
- c. Credit Risk—Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This risk is measured by ratings assigned by a nationally recognized statistical rating organization.

The OPERS Public Fixed Income Policy limits non-investment grade securities to within 15% of the market value percentage of non-investment grade securities in the Fixed Income Aggregate Benchmark within the Defined Benefit portfolio, the Health Care portfolio, fixed income components of any target date funds and fixed income funds offered directly to OPERS members. Limitations on holdings of non-investment grade securities are included in portfolio guidelines.

d. Interest Rate Risk—Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. OPERS monitors the interest rate risk inherent in its portfolio by measuring the weighted-average duration of its portfolio. Duration is a measure of a debt investment's exposure to fair value changes arising from changing interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price. The effective duration measures the sensitivity of the market price to parallel shifts in the yield curve. The OPERS Fixed Income Policy limits the average option-adjusted duration of the defined benefit and health care fixed income assets to within 20% of the option-adjusted duration of the benchmark.

This page has no content

The following table presents the credit quality ratings and effective durations of OPERS fixed income assets, including short-term investments, as of December 31, 2021:

2021 Average Credit Quality and Exposure Levels of Guaranteed Investments								
Fixed Income Security Type	Fair Value	Percent of All Fixed Income Assets	Weighted Average Duration to Maturity (years)	AAA	AA			
Commercial Paper	\$1,484,925,559	4.03%	0.06		\$149,999,250

- e. Concentration of Credit Risk—Concentration of credit risk is the risk of loss that may be attributed to the magnitude of an investment in a single issuer. As of December 31, 2021, the portfolio has no single-issuer exposure that comprises 5% or more of the overall portfolio, excluding investments issued or explicitly guaranteed by the U.S. government and investments in mutual funds, external investment pools, and other pooled investments. Therefore, no concentration of credit risk exists.
- f. Foreign Currency Risk—Foreign currency risk is the risk that changes in exchange rates will adversely impact the local currency value of an investment. The OPERS foreign currency exposures primarily reside within non-U.S. investment holdings. The OPERS investment policy allows external managers to decide what action to take within approved portfolio guidelines for their respective portfolios' foreign currency exposures using forward-currency contracts. See table on the next page for foreign currency detail.

Notes to Combining Financial Statements

g. Securities Lending—ORC and Board policy permits OPERS to maintain a securities lending program. OPERS uses its discretion to determine the type and amount of securities lent under the program. Under this program, securities are loaned to brokers through a third-party securities lending agent and OPERS global custodian. In return, OPERS receives cash collateral or collateral securities considered liquid and agrees to return the collateral for the same securities in the future. Securities loaned are collateralized at a minimum of 102% of the fair value of loaned U.S. securities and 105% of the fair value of loaned international securities. Collateral is marked-to-market daily. These collateral requirements minimize OPERS' credit risk exposure to borrowers.

Cash collateral from securities loaned is, simultaneous to the loan, reinvested in repurchase agreements and other highly liquid short-term securities. OPERS does not have the ability to pledge or sell reinvested collateral securities during the term of a loan absent a broker default. OPERS has the ability to pledge or sell collateral securities from securities loaned. If the fair value of the collateral held falls below the required levels, additional collateral is provided. Since loans are terminable at will, their duration does not generally match the duration of the reinvested collateral securities. As of December 31, 2021, the weighted average maturity of the reinvested collateral securities is 86 days.

As of December 31, 2021, the fair value of securities on Ioan was \$8,002,012,047. Associated collateral totaling \$8,216,926,869 was received, of which \$7,757,413,256 was reinvested cash collateral and \$459,513,613 was securities collateral. The fair market value of reinvested collateral was \$8,215,168,629 as of December 31, 2021, which includes net unrealized losses on securities lending activity totaling \$4,284,350.

Net securities lending income/(loss) is composed of four components: gross income, broker rebates, agent fees and unrealized gains/(losses) on collateral. Gross income is equal to earnings on cash collateral received in a securities lending transaction. A broker rebate is the cost of using that cash collateral. Agent fees represent the fees paid to the agent for administering the lending program. Unrealized gains/(losses) result from the change in fair value of the reinvested cash collateral. Net securities lending income/(loss) is equal to gross income less broker rebates, agent fees, and unrealized gains/(losses) on collateral. Securities lending income for 2021 was recorded on an accrual basis.

- h. Derivative Instruments—Derivative instruments are generally defined as contracts whose values depend on, or are derived from, the value of an underlying asset, reference rate or index. OPERS has classified the following as derivative instruments:
 - Forward-Currency Contracts—OPERS enters into various forward-currency contracts to manage exposure to changes in foreign currency exchange rates on its foreign portfolio holdings. The System may also enter into forward-currency exchange contracts to provide a quantity of foreign currency needed at a future time at the current exchange rates, if rates are expected to change dramatically. A forward-exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Risk associated with such contracts includes movement in the value of foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. The contracts are valued at forward-exchange rates, and the changes in value of open contracts are recognized as net increase/decrease in the fair value of investments in the Combining Statement of Changes in Fiduciary Net Position. The forward-currency purchases are recognized in Investment Commitments Payable on the Combining Statement of Fiduciary Net Position and the forward-currency contracts represent the difference between the value of the original contracts and the closing value of such contracts and are included as net increase/decrease in the fair value of investments and are included as net increase/decrease in the fair value of provide.

Combining Statement of Changes in Fiduciary Net Position. The net realized and unrealized loss on forward-currency contracts for the year 2021 was \$7,011,229.

The fair values of forward-currency contracts and contracts hedged were as follows:

Fair Value of Forward-Currency and Hedged Contracts (as of December 31, 2021)		
Forward-currency purchases \$61,488,379		
Forward-currency sales	(\$102,789,454)	
Unrealized gain \$125,949		

• *Futures Contracts*—OPERS enters into various futures contracts to manage exposure to changes in equity, fixed income and currency markets and to take advantage of movements on an opportunistic basis. A stock index future is a futures contract that uses a stock index as its base, and which is settled by cash or delivery of the underlying stocks in the index. Financial futures represent an off balance sheet obligation, as there are no balance sheet assets or liabilities associated with those contracts; however, the realized and unrealized gains and losses on futures are recorded in the Combining Statement of Changes in Fiduciary Net Position. Futures contracts differ from forward-currency contracts by their standardization, exchange trading, margin requirements, and daily settlement (marking-to-market). Risk associated with stock index futures contracts includes adverse movements in the underlying stock index. The following table shows the futures positions held by OPERS as of December 31, 2021. The net realized and unrealized gain on futures contracts for the year 2021 was \$452,253,445.

Futures Positions Held (as of December 31, 2021)					
Futures Contracts	Number of Contracts	Contract			
	Contracts	Principal			
U.S. Equity Index Futures purchased long	926	\$184,797,175			
U.S. Treasury Futures purchased long	14,461	\$2,126,969,215			
U.S. Treasury Futures purchased short	381	(\$76,763,735)			
Non-U.S. Equity Index Futures purchased long	15,339	\$1,243,745,185			
Commodities Futures purchased long					

- **Total Return Swaps**—OPERS may manage market exposure through the use of total return swaps. A total return swap is an agreement in which one party commits to pay a fee in exchange for a return linked to the market performance of an underlying security, group of securities, index or other asset (reference obligation). Risks may arise if the value of the swap acquired decreases because of an unfavorable change in the price of the reference obligation or in the counterparty's ability to meet the terms of the contract. OPERS held total return swaps with a notional value of \$3,625,980,128 as of December 31, 2021. There was no unrealized gain or loss as of December 31, 2021. The net realized gain in total return swaps for the year 2021 was \$940,138,365.
- **Credit Default Swaps**—OPERS may manage credit exposure through the use of credit default swaps or credit default swap indices. A credit default swap is a contract whereby the credit risk associated with an investment is transferred by entering into an agreement with another party, who, in exchange for periodic fees, agrees to make payments in the event of a default or other predetermined credit event. A credit default swap allows for exposure to credit risk while limiting exposure to other risks, such as interest rate and currency risk. OPERS held credit default

swaps with a notional value of \$500,000,000 as of December 31, 2021. The net realized and unrealized loss in credit default swaps for the year 2021 was \$6,140,405.

- **Options**—Options give buyers the right, but not the obligation, to buy or sell an asset at a predetermined strike price over a specified period. The option premium is usually a small percentage of the underlying asset value. When writing an option, OPERS receives a premium initially and bears the risk of an unfavorable change in the price of the underlying asset during the option life. When OPERS purchases an option, it pays a premium to a counterparty that bears the risk of an unfavorable change in the price of the underlying asset during the option life. OPERS did not hold any option positions as of December 31, 2021. The net realized and unrealized gain in options contracts for the year 2021 was \$745,642.
- i. Fair Value Leveling—Generally accepted accounting principles specify a hierarchy of valuation classifications based on whether the inputs to the valuation techniques used in each valuation classification are observable or unobservable. These classifications are summarized in the three broad levels listed below:
 - Level 1—Unadjusted quoted prices for identical instruments in active markets.
 - Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and, model-derived valuations in which all significant inputs and significant value drivers are observable.
 - Level 3—Valuations derived from valuation techniques in which significant inputs or significant value drivers are unobservable.

Inputs used to measure fair value might fall in different levels of the fair value hierarchy; in which case OPERS defaults to the lowest level input that is significant to the fair value measurement in its entirety. These levels are not necessarily an indication of the risk or liquidity associated with the investments.

57

The following tables present fair value as of December 31, 2021:

		Fair Value Measurements Using		
	Ecir Volue	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs (Loval 2)	Significant Unobservable Inputs (Level 3)

Investments classified as Level 1 in the previous tables are comprised of common stock, international equity and exchange-traded funds.

Investments classified as Level 2 are primarily comprised of investments in U.S. corporate notes and bonds, international debt, U.S. mortgage-backed securities and U.S. government and agency securities, including Federal Home Loan Mortgage Corporation (Freddie Mac) securities, Federal National Mortgage Association (Fannie Mae) securities, Government National Mortgage Association (Ginnie Mae) securities, U.S. Treasury notes and bonds, U.S. Treasury floating rate notes, U.S. and commercial mortgage trusts, and derivative instruments, including foreign exchange contracts and swaps.

Investments classified as Level 3 are comprised of common stock, U.S. corporate notes and bonds, U.S. mortgage-backed securities, international equity, international debt and direct-owned real estate.

Changes in the significant unobservable inputs may result in a materially higher or lower fair value measurement.

In certain instances, debt and equity securities are valued on the basis of prices from an orderly transaction between market participants provided by brokers/dealers or pricing services (Level 1 in the tables). In determining the value of a particular investment, pricing services may use information with respect to transactions in such investments, including broker quotes, pricing matrices, market transactions in comparable investments and various relationships between investments. As part of its independent price verification process, OPERS selectively performs detailed reviews of valuations provided by brokers/dealers or pricing services.

Foreign exchange contracts are valued by interpolating a value using the spot foreign exchange rate and forward points (based on the spot rate and currency interest rate differentials), which are all inputs that are observable in active markets (Level 2 in the tables).

In the absence of observable market prices, OPERS values its investments using valuation methodologies applied on a consistent basis (Levels 2 or 3 in the tables). For some investments, little market activity may exist; management's determination of fair value is then based on the best information available in the circumstances, and may incorporate management's own assumptions and involves a significant degree of judgement, taking into consideration a combination of internal and external factors. Such investments are evaluated on a quarterly basis, taking into consideration any changes in key inputs and changes in economic and other relevant conditions, and valuation models are updated accordingly. The valuation process also includes a review by the OPERS internal valuation committee, comprised of senior members from various departments within OPERS. The valuation committee provides independent oversight of the valuation policies and procedures.

The fair values in certain investments are based on the net asset value (NAV) per share (or its equivalent) provided by the investee or third-party administrator, as applicable, and are considered to be alternative investments. Investments categorized according to NAV include hedge funds, risk parity funds, some real estate, and private equity limited partnership interests. These represent OPERS' collective ownership interests in limited partnership vehicles that invest in non-registered funds which are valued based on the net asset values of the underlying investments.

Notes to Combining Financial Statements

Unlike more traditional investments, alternative investments generally do not have readily obtainable market values and take the form of limited partnerships. OPERS values these investments based on the partnerships' audited financial statements, typically as of calendar year-end. If December 31 statements are available, those values are used for these statements. However, some partnerships have fiscal years ending on dates other than December 31. If December 31 valuations are not available, the value is progressed from the most recently available valuation on the financial statements, taking into account subsequent calls and distributions.

Risk parity and hedge funds are most often established as private investment limited partnerships open to a limited number of accredited investors. Investments in these funds may be illiquid as investors in certain funds may be required to keep their investment in the fund for a year or longer, and withdrawals may be limited to intervals such as monthly, quarterly, annually or bi-annually. OPERS monitors liquidity provisions of each individual fund investment and reports characteristics of the asset classes.

Real estate investments typically do not trade on organized exchanges, but rather through privately negotiated transactions between a buyer and a seller, and transactions are predicated on the availability of capital, and a willing buyer and seller. Investments in direct-owned real estate assets are classified as Level 3 and other real estate assets are categorized under NAV in the tables.

The nature of the private equity investments is that distributions are received through the liquidation of the underlying assets of the fund, rather than through redemptions, and these assets are not sold in the secondary market.

Private Equity	10 to 12 years
Closed-End Real Estate	10 to 12 years
Open-End Real Estate	Quarterly
Direct-owned Real Estate	3 to 10 years
Hedge Funds	In Liquidation
Risk Parity Funds	Monthly

The expected liquidation period for alternative investments is as follows:

As of December 31, 2021, the alternative investments are not expected to be sold at an amount different from the NAV per share (or its equivalent) of the System's ownership interest in partners' capital.

The following table presents the unfunded commitments, redemption frequency (if currently eligible), and the redemption notice period for OPERS' alternative investments measured at the NAV as of December 31, 2021:

Investments Measured at the Net Asset Value (NAV) (as of December 31, 2021)				
	Net Asset Value	Unfunded Commitments	Redemption Frequency (If Currently Eligible)	Redemption Notice Period
Real Estate				
Closed-End Private Real Estate ¹	\$1,249,981,639	\$1,141,509,480	N/A	N/A

U.S. Government and Agencies	51,261,008	N/A	Daily	Daily
International Equities	562,788,507	N/A	Daily	Daily
Total Investments Measured at the NAV	\$30,704,966,407			

- ¹ Closed-End Private Real Estate—Closed-end private real estate includes finite-life, commingled or fund of one, private-market investment vehicles that are typically structured as limited partnerships, where the investors are limited partners (LPs) and the fund sponsor/manager is the general partner (GP). The LPs have limited control and limited liability. Real estate closed-end funds typically invest in value add and opportunistic private market real estate assets. The valuations are based on manager-provided net asset values, located in quarterly capital account statements, that are cash flow adjusted to the end of the reporting period.
- ² Open-End Private Real Estate—Open-end private real estate holds infinite-life, commingled, privatemarket investment vehicles that typically invest in stabilized properties in major metropolitan areas. Open-end commingled funds provide liquidity to investors quarterly, subject to each fund's ability to honor investment and redemption requests. The valuations are based on manager-provided net asset values, located in quarterly capital account statements, that are cash flow adjusted to the end of the reporting period.
- ³ Private Equity—Private equity invests through closed-end, finite-life, commingled funds or fund of one that are typically structured as limited partnerships, where the investors are LPs and the fund sponsor/manager is the GP. The LPs have limited control and limited liability. Private equity closed-end funds typically invest in corporate finance, venture capital and special situations (secondary fund-of-funds and distressed debt

strategies). The valuations are based on manager-provided net asset values, located in quarterly capital account statements, that are cash flow adjusted to the end of the reporting period.

- ⁴ Risk Parity—Risk parity strategies invest in multiple asset types and leverage exposures to global markets in order to obtain the desired risk-aware mix. The risk parity allocation is structured to achieve roughly balanced risk exposure across equities, nominal fixed income, and inflation sensitive assets, targeting a total volatility level. The valuations are based on manager-provided net asset values, located in monthly capital account statements, that are adjusted for estimated performance.
- ⁵ Other Investments—Includes hedge funds.
- ⁶ Event-driven—Event-driven managers maintain positions in companies currently or prospectively involved in various corporate transactions including, but not limited to, mergers, restructurings, financial distress, tender offers, shareholder buybacks, debt exchanges, security issuance or other capital structure adjustments. Security types can range from most senior in the capital structure to most junior or subordinated, and frequently involve additional derivative instrument securities. Event-driven exposure includes a combination of sensitivities to equity markets, credit markets and company-specific developments. The valuations are based on manager-provided net asset values located in the monthly capital account statements, that are adjusted for estimated performance.
- ⁷ Multi-strategy—Multi-strategy managers combine several strategies within the same fund to provide diversification benefits to reduce return volatility and decrease asset-class and single-strategy risks. These funds typically add incremental returns through active allocation adjustments based on market opportunities. Risk is managed through a combination of quantitative and qualitative constraints including, but not limited to, active risk, liquidity risk, currency risk, manager risk, derivative instruments risk, and leverage risk. The valuations are based on manager-provided net asset values located in the monthly capital account statements, that are adjusted for estimated performance.
- ⁸ Relative Value—Relative value managers maintain positions in which the investment thesis is predicated on the realization of a valuation discrepancy in the relationship between multiple securities. Managers employ a variety of fundamental and quantitative techniques to establish investment insights, and security types range broadly across equity, fixed income, derivative instrument or other security types. Fixed Income strategies are typically quantitatively driven to measure the existing relationship between instruments and, in some cases, identify attractive positions in which the risk-adjusted spread between these instruments represents an attractive opportunity. The valuations are based on manager-provided net asset values located in the monthly capital account statements, that are adjusted for estimated performance.
- ⁹ Commingled Mutual Funds—The commingled mutual funds seek to outperform the Bloomberg Barclays U.S. Aggregate Bond Index, MSCI All Country World x U.S. Net Index, and MSCI Emerging Markets Small Cap Index (net). The valuations are based on manager-provided net asset values located in the monthly capital account statements.
- ¹⁰ Defined Contribution Commingled Mutual Funds—The defined contribution funds, other than the Stable Value Fund, not included in this activity, are index-managed, meaning they seek to mirror investment results of broadly based and publicly quoted market indices. They are not intended to outperform such indices. The valuations are based on manager-provided net asset values located in the monthly capital account statements.

4. Deferred Compensation Plan

OPERS does not sponsor a deferred compensation program. OPERS employees are eligible to participate in the deferred compensation plan sponsored by the state of Ohio (Ohio Public Employees Deferred Compensation Program). The state-sponsored plan was created in accordance with IRC Section 457. The plan is available to all OPERS employees and permits them to defer a portion of their salary until future years. Deferred compensation assets are not available to employees until termination, retirement, death, or unforeseeable emergency.

IRC Section 457 requires that the amount of compensation assets deferred under a plan, all property and rights, and all income attributable to those amounts, property or rights, be held in trust for the benefit of the participants. This insulates IRC Section 457 benefits from the claims of an employer's general creditors. The Ohio Public Employees Deferred Compensation Program does not qualify as a fiduciary activity of OPERS under GASB Statement No. 84, *Fiduciary Activities*. Accordingly, OPERS does not include the deferred compensation assets or liabilities of this program in its financial statements.

5. Schedule of Required Contributions

All employees of OPERS are eligible for membership in the benefit plans of the System. The employer contributions paid on behalf of these employees are funded by revenues in the Income Fund, arising from investment activity and other income. The annual required pension and health care contributions for employees for the year ended December 31, 2021 are as follows:

Annual Required Pension and Health Care Contributions					
	Pen	sion	Health	n Care	
	Annual Required	Percent	Annual Required	Percent	
Year Ended	Contributions	Contributed	Contributions	Contributed	
2021	\$6,163,343	\$6,163,343 100% \$594,257 100%			

In accordance with accounting rules, internal payroll related to the implementation of capital projects and SBITA is capitalized as part of the capital asset cost. The capitalized cost includes salary and wages, as well as the corresponding employer-paid Medicare and retirement contribution expenses. The portion of the 2021 Annual Required Contributions included in capital assets for capital projects and SBITA was \$472,752 for pension and \$45,538 for health care.

6. Net Pension Liability

The components of the net pension liability of the defined benefit portion of the pension plans as of December 31, 2021 are as follows:

Net Pension Liability/(Asset) (\$ in millions)				
As of December 31, 2021	All Plans	Traditional Pension Plan	Combined Plan ¹	Member-Directed Plan ¹
Total Pension Liability	\$118,499	\$117,910	\$564	\$25
Plan Fiduciary Net Position	110,211	109,210	958	43
Net Pension Liability/(Asset)	\$8,288	\$8,700	(\$394)	(\$18)
Plan Fiduciary Net Position as a Percentage of Total Pension Liability	93.01%	92.62%	169.88%	171.84%

¹ The Combined Plan and Member-Directed Plan information in the Net Pension Liability/(Asset) includes only the defined benefit portion of these plans to comply with GASB-reporting standards and does not include the defined contribution portion. The Combining Statements of Fiduciary Net Position and Changes in Fiduciary Net Position present the combined defined benefit and defined contribution portions of the Combined Plan and Member-Directed Plan.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial-reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation. The total pension liability was determined by an actuarial valuation as of December 31, 2021, using the following key actuarial assumptions and methods applied to all prior periods included in the measurement in accordance with the requirements of GASB 67. In 2021, the Board's actuarial consultants conducted an experience study for the period 2016 through 2020, comparing assumptions to actual results. The experience study incorporates both a historical review and forward-looking projections to determine the appropriate set of assumptions to keep the plan on a path toward full funding. Information from this study led to changes in both demographic and economic assumptions, with the most notable being a reduction in the actuarially assumed rate of return from 7.2% to 6.9%, for the defined benefit investments. Key actuarial assumptions and methods used in the latest actuarial valuation, reflecting experience study results, are presented below.

inpuons used in valuation of I	otal Pension Liability

Pre-retirement mortality rates are based on 130% of the Pub-2010 General Employee Mortality tables (males and females) for State and Local Government divisions and 170% of the Pub-2010 Safety Employee Mortality tables (males and females) for the Public Safety and Law Enforcement divisions. Post-retirement mortality rates are based on 115% of the PubG-2010 Retiree Mortality Tables (males and females) for all divisions. Post-retirement mortality rates for disabled retirees are based on the PubNS-2010 Disabled Retiree Mortality Tables (males and females) for all divisions. For all of the previously described tables, the base year is 2010 and mortality rates for a particular calendar year are determined by applying the MP-2020 mortality improvement scales (males and females) to all of these tables.

The discount rate used to measure the total pension liability was 6.9% for the Traditional Pension Plan, Combined Plan and Member-Directed Plan. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and those of the contributing employers are made at the contractually required rates, as actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments for the Traditional Pension Plan, Combined Plan and Member-Directed Plan was applied to all periods of projected benefit payments to determine the total pension liability.

The allocation of investment assets within the Defined Benefit portfolio is approved by the Board as outlined in the annual investment plan. Plan assets are managed on a total return basis with a long-term objective of achieving and maintaining a fully funded status for the benefits provided through the defined benefit pension plans. The long-term expected rate of return on defined benefit investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adjusted for inflation. Best estimates of geometric real rates of return were provided by the Board's investment consultant. For each major asset class that is included in the Defined Benefit portfolio's target asset allocation as of December 31, 2021, these best estimates are summarized in the following table:

	Target Allocation as of	Weighted Average Long-Term Expected Real Rate of Return
Asset Class	December 31, 2021	(Geometric)
Fixed Income	24.00%	1.03%
Domestic Equities	21.00	3.78
Real Estate	11.00	3.66
Private Equity	12.00	7.43
International Equities	23.00	4.88
Risk Parity	5.00	2.92
Other Investments	4.00	2.85
TOTAL	100.00%	4.21%

During 2021, OPERS managed investments in three investment portfolios: the Defined Benefit portfolio, the Health Care portfolio and the Defined Contribution portfolio. The Defined Benefit portfolio contains the investment assets of the Traditional Pension Plan, the defined benefit component of the Combined Plan and the annuitized accounts of the Member-Directed Plan. Within the Defined Benefit portfolio, contributions into the plans are all recorded at the same time, and benefit payments all occur on the first of the month. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. The annual money-weighted rate of return expressing investment

performance, net of investment expenses and adjusted for the changing amounts actually invested, for the Defined Benefit portfolio was a gain of 15.3% for 2021.

The following table presents the net pension liability or asset calculated using the discount rate of 6.9%, and the expected net pension liability or asset if it were calculated using a discount rate that is 1.0% lower or 1.0% higher than the current rate.

Sensitivity of Net Pension Liability/(Asset) to Changes in the Discount Rate (\$ in millions)			
Net Pension Liability/(Asset) As of December 31, 2021	1% Decrease 5.9%	Current Discount Rate 6.9%	1% Increase 7.9%
All Plans	\$22,629	\$8,288	(\$3,640)
Traditional Pension Plan	\$22,939	\$8,700	(\$3,148)
Combined Plan	(\$294)	(\$394)	(\$472)
Member-Directed Plan	(\$16)	(\$18)	(\$20)

The funding status of the three pension plans and their Schedules of Funding Progress may be found in the Actuarial Section of this document on pages 151-152. The Member-Directed Plan is a defined contribution pension plan allowing members at retirement to have the option to convert their defined contribution account to a defined benefit annuity. The defined contribution annuitized balances under this plan were included in this annual report from a GASB 67 perspective.

7. Net OPEB Liability/(Asset)—Health Care

The components of the net OPEB liability or asset of the defined benefit health care plans as of December 31, 2021 are as follows:

Net OPEB Liability/(Asset) (\$ in millions)			
As of December 31, 2021			
Total OPEB Liability	\$11,093		
Plan Fiduciary Net Position	14,225		
Net OPEB Liability/(Asset)	(\$3,132)		
Plan Fiduciary Net Position as a Percentage of Total OPEB Liability	128.23%		

The total OPEB liability was determined by an actuarial valuation as of December 31, 2020, rolled forward to the measurement date of December 31, 2021, by incorporating the expected value of health care cost accruals, the actual health care payments, and interest accruals during the year for the defined benefit health care plans. In accordance with GASB Statement No. 75 (GASB 75), *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, the Member-Directed Plan health care is a defined benefit health care plan, although the pension plan is defined contribution. Interest is credited to member accounts based on the investment performance of the OPERS Stable Value Fund, not to exceed 4.0%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and cost trends. Actuarially determined amounts are subject to continual review or modification as actual results are compared with past expectations and new estimates are made about the future.

Projections of health care costs for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of coverage

Notes to Combining Financial Statements

provided at the time of each valuation and the historical pattern of sharing of costs between the System and plan members. In 2021, the Board's actuarial consultants conducted an experience study for the period 2016 through 2020, comparing historical assumptions to actual results. The experience study incorporates both a historical review and forward-looking projections to determine the appropriate set of assumptions to fund the plan. The demographic and economic assumptions have been updated to reflect the results of the experience study.

The actuarial valuation used the following key actuarial assumptions and methods, reflecting experience study results, applied to all prior periods included in the measurement in accordance with the requirements of GASB 74:

Key Methods and Assumptions Used in Valuation of Total OPEB Liability				
Actuarial Information				
Actuarial Valuation Date	December 31, 2020			
Rolled-Forward Measurement Date	December 31, 2021			
Experience Study	5-Year Period Ended December 31, 2020			
Actuarial Cost Method	Individual entry age			
Actuarial Assumptions				
Single Discount Rate	6.00%			
Investment Rate of Return	6.00%			
Municipal Bond Rate	1.84%			
Wage Inflation	2.75%			
Projected Salary Increases	2.75%-10.75% (includes wage inflation at 2.75%)			
Health Care Cost Trend Rate	5.50% initial, 3.50% ultimate in 2034			

Pre-retirement mortality rates are based on 130% of the Pub-2010 General Employee Mortality tables (males and females) for State and Local Government divisions and 170% of the Pub-2010 Safety Employee Mortality tables (males and females) for the Public Safety and Law Enforcement divisions. Post-retirement mortality rates are based on 115% of the PubG-2010 Retiree Mortality Tables (males and females) for all divisions. Post-retirement mortality rates for disabled retirees are based on the PubNS-2010 Disabled Retiree Mortality Tables (males and females) for all divisions. For all of the previously described tables, the base year is 2010 and mortality rates for a particular calendar year are determined by applying the MP-2020 mortality improvement scales (males and females) to all of these tables.

A single discount rate of 6.00% was used to measure the total OPEB liability on the measurement date of December 31, 2021. Projected benefit payments are required to be discounted to their actuarial present value using a single discount rate that reflects (1) a long-term expected rate of return on OPEB plan investments (to the extent that the health care fiduciary net position is projected to be sufficient to pay benefits), and (2) a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the contributions for use with the long-term expected rate are not met). This single discount rate was based on the actuarial assumed rate of return on the health care investment portfolio of 6.00% and a municipal bond rate of 1.84%. The projection of cash flows used to determine this single discount rate assumed that employer contributions will be made at rates equal to the actuarially determined contribution rate. Based on these assumptions, the health care fiduciary net position and future contributions were sufficient to finance health care costs through the year 2121. As a result, the actuarial assumed long-term expected rate of return on health care investments was

applied to projected costs through the year 2121, the duration of the projection period through which projected health care payments are fully funded.

The allocation of investment assets within the Health Care portfolio is approved by the Board as outlined in the annual investment plan. Assets are managed on a total return basis with a long-term objective of continuing to offer a sustainable health care program for current and future retirees. The System's primary goal is to achieve and maintain a fully funded status for benefits provided through the defined benefit pension plans. Health care is a discretionary benefit. The long-term expected rate of return on health care investment assets was determined using a building-block method in which best-estimate ranges of expected future real rates of return are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return were provided by the Board's investment consultant. For each major asset class that is included in the Health Care portfolio's target asset allocation as of December 31, 2021, these best estimates are summarized in the following table:

	Target Allocation as of	Weighted Average Long-Term Expected Real Rate of Return
Asset Class	December 31, 2021	(Geometric)
Fixed Income	34.00%	0.91%
Domestic Equities	25.00	3.78
REITs	7.00	3.71
International Equities	25.00	4.88
Risk Parity	2.00	2.92
Other Investments	7.00	1.93
TOTAL	100.00%	3.45%

During 2021, OPERS managed investments in three investment portfolios: the Defined Benefit portfolio, the Health Care portfolio and the Defined Contribution portfolio. The Health Care portfolio includes the assets for health care expenses for the Traditional Pension Plan, Combined Plan and Member-Directed Plan eligible members. Within the Health Care portfolio, contributions into the plans are assumed to be received continuously throughout the year based on the actual payroll payable at the time contributions are made, and health care-related payments are assumed to occur mid-year. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. The annual money-weighted rate of return expressing investment performance, net of investment expenses and adjusted for the changing amounts actually invested, for the Health Care portfolio was a gain of 14.3% for 2021.

The following table presents the net OPEB liability or asset calculated using the single discount rate of 6.00%, and the expected net OPEB liability or asset if it were calculated using a discount rate that is 1.0% lower or 1.0% higher than the current rate.

Sensitivity of Net OPEB Liability/(Asset) to Changes in the Discount Rate (\$ in millions)						
As of December 31, 2021 1% Decrease 5.00% Single Discount Rate 1% Increase 7.00%						
Net OPEB Liability/(Asset) (\$1,842) (\$3,132) (\$4,203)						

Notes to Combining Financial Statements

Changes in the health care cost trend rate may also have a significant impact on the net OPEB liability or asset. The following table presents the net OPEB liability or asset calculated using the assumed trend rates, and the expected net OPEB liability or asset if it were calculated using a health care cost trend rate that is 1.0% lower or 1.0% higher than the current rate.

Sensitivity of Net OPEB Liability/(Asset) to Changes in the Health Care Cost Trend Rate (\$ in millions)					
As of December 31, 2021	1% Decrease	Current Health Care Cost Trend Rate Assumption	1% Increase		
Net OPEB Liability/(Asset) (\$3,166) (\$3,132) (\$3,092)					

Retiree health care valuations use a health care cost trend assumption with changes over several years built into that assumption. The near-term rates reflect increases in the current cost of health care; the trend starting in 2022 is 5.50%. If this trend continues for future years, the projection indicates that years from now virtually all expenditures will be for health care. A more reasonable alternative is the health care cost trend will decrease to a level at, or near, wage inflation. On this basis, the actuaries project premium rate increases will continue to exceed wage inflation for approximately the next decade, but by less each year, until leveling off at an ultimate rate, assumed to be 3.50% in the most recent valuation.

The funding status of health care and the Schedule of Funding Progress are found in the Actuarial Section of this document on page 153.

Required Supplementary Information (unaudited)

Defined Benefit Pension Plans

The Schedules of Changes in Net Pension Liability/(Asset) and Related Ratios display the components of the total pension liability and plan fiduciary net position for each pension plan with a defined benefit component, calculated in conformity with the requirements of GASB 67. Covered Payroll represents the collective total of the OPERS eligible wages of all OPERS employers within each plan. GASB 67 requires that data be reported for 10 years; however, data prior to 2014 is not available.

The Combined Plan defined benefit pension is funded only from the employer contributions, with the member contributions deposited to a defined contribution account. The Member-Directed Plan is a defined contribution plan with the option for retirees to annuitize their benefit, which converts the retiree's benefit to a defined benefit. The employer contributions deposited to the defined benefit portion of the Member-Directed Plan are included in these schedules. Employer contributions are used to determine the proportionate share for employers of this actuarial liability and related activity. The following tables display the actuarially determined contributions for employers of the defined benefit pension plans based on the actuarially determined rate, and the amount of these contributions paid by the employers each year.

¹ The Board has approved all contribution rates recommended by the actuary. Actuarially determined contributions exclude funds deposited for purchase of service, employer-paid retirement incentive programs, interest and penalties. These deposits are included in Contract and Other Receipts in the Combining Statement of Changes in Fiduciary Net Position.

² Covered Payroll was calculated based on actual information obtained from OPERS-contributing employers during the fiscal year.

³ Covered Payroll calculated in conjunction with GASB 67 implementation in 2014. Information not available prior to 2014 implementation.

During 2021, OPERS managed its investments in three investment portfolios: the Defined Benefit portfolio, the Health Care portfolio and the Defined Contribution portfolio. The Defined Benefit portfolio contains the investment assets of the Traditional Pension Plan, the defined benefit component of the Combined Plan, and the annuitized accounts of the Member-Directed Plan. Within the Defined Benefit portfolio, with the exception of Member-Directed annuitized accounts, contributions into the plans are all recorded at the same time, and benefit payments all occur on the first of the month. Accordingly, the money-weighted rate of return is considered the same for all plans within the portfolio. GASB 67 requires that data be reported for 10 years; however, data prior to 2014 is not available.

Schedule of Investment Returns	Defined Benefit Portfolio
Year	Annual Money-Weighted Rate of Return Net of Investment Expenses
2021	15.3%
2020	11.7%
2019	17.2%
2018	(2.9%)
2017	16.8%
2016	8.3%
2015	0.4%
2014	7.0%

Post-employment Health Care Coverage or OPEB

The Schedule of Changes in Net OPEB Liability/(Asset) and Related Ratios displays the components of the total OPEB liability and plan fiduciary net position for the defined benefit health care plans, calculated in conformity with the requirements of GASB 74. Covered Payroll represents the collective total of the OPERS eligible wages of all OPERS employers within each pension plan. GASB 74 requires that data be reported for 10 years; however, data prior to 2017 is not available.

¹Other includes Contract and Other Receipts and Other Income.

² Refer to the Notes to Required Supplementary Information, Factors Significantly Affecting Trends in Reported Amounts, for additional information.

With the assistance of the System's actuary, the Board may approve a portion of each employer contribution to OPERS to be set aside for the funding of post-employment health care coverage. No employer contributions were allocated to health care in 2021 for the Traditional Pension Plan or Combined Plan. The employer contribution as a percent of covered payroll deposited for the Member-Directed Plan participants' health care accounts for 2021 was 4.0%. Interest is credited to member accounts based on the investment performance of the OPERS Stable Value Fund, not to exceed 4.0%.

The table below displays the actuarially determined contributions for employers allocated to health care based on the actuarially determined rate, and the amount of these contributions paid by the employers each year based on the allocations determined by the Board. Due to the discretionary nature of health care funding and the potential for frequent changes in allocations, including not having funding available to allocate to health care for some plans, the calculation of proportionate shares of employers is based on total employer contributions, as disclosed in the Schedules of Employer Contributions within the Defined Benefit Pension Plans section of the Required Supplementary Information.

Schedule of Emplo	Schedule of Employer Contributions					
Year Ended December 31	Actuarially Determined Contributions	Contributions Paid	Contribution Deficiency/ (Excess)	Covered Payroll ¹	Contributions as a Percent of Covered Payroll	
2021	\$212,713,761	\$25,631,727	\$187,082,034	\$15,463,730,018	0.2%	
2020	987,819,505	24,489,938	963,329,567	14,998,065,952	0.2	
2019	855,315,505	24,318,141	830,997,364	14,987,616,732	0.2

^a In 2016, IRS guidance allowed OPERS to consolidate all health care funding into the 115 Trust. Based on criteria in GASB 74, all OPERS health care plans are reported as defined benefit OPEB. Therefore, beginning in 2016, the total employer contributions presented includes the contributions for all health care plans.

¹Covered Payroll was calculated based on actual information obtained from OPERS-contributing employers during the fiscal year, which differs from the Covered Payroll in the funding valuation. Covered Payroll used in the funding valuation is based on the annualized pay rate of all pension plan active members as of the valuation date.

During 2021, OPERS managed investments in three investment portfolios: the Defined Benefit portfolio, the Health Care portfolio and the Defined Contribution portfolio. The Health Care portfolio includes the assets for health care expenses for the Traditional Pension Plan, Combined Plan and Member-Directed Plan eligible members. Within the Health Care portfolio, contributions into the plan are assumed to be received continuously through the year based on the actual payroll payable at the time contributions are made, and health care-related payments are assumed to occur mid-year. Accordingly, the money-weighted rate of return is considered to be the same for all plans within the portfolio. GASB 74 requires that data be reported for 10 years; however, data prior to 2017 is not available.

Schedule of Investment Returns	Health Care Portfolio
Year	Annual Money-Weighted Rate of Return Net of Investment Expenses
2021	14.3%
2020	10.5%
2019	19.7%
2018	(5.6%)
2017	15.3%

Defined Benefit Pension Plans

Actuarial Assumptions and Methods Used in Determining Contribution Rates

Actuarially determined contributions are constrained by contribution limits established by statute. The actuarial assumptions and methods used to determine contribution rates for the year ended December 31, 2021 are based on the December 31, 2018 pension actuarial valuation and are described below.

- Valuation Method—Individual entry age actuarial cost method of valuation is used in determining benefit liabilities and normal cost. Differences between assumed and actual experience (the actuarial gains and losses) become part of the actuarial accrued liability.
- Asset Valuation Method—For actuarial purposes, assets are valued utilizing a method that recognizes assumed total investment returns each year. Differences between actual and assumed investment returns are phased in over a closed four-year period. This funding value is not permitted to deviate from fair value by a corridor of plus or minus 12.00%.
- Amortization Method—Level percent of payroll, closed amortization period, for the Traditional Pension and Combined plans; Level dollar, closed amortization period, for the Member-Directed Plan.
- Investment Return—An investment rate of return of 7.20% compounded annually (net after investment administrative expenses) was assumed.
- Wage Inflation—The active member payroll was assumed to increase 3.25% annually, which is the portion of the individual pay increase assumption attributable to inflation and overall productivity.
- Salary Scale—Wage inflation plus additional projected salary increases ranged up to 7.50% per year depending on age, attributable to seniority and merit, or 3.25% to 10.75%, including inflation.
- Cost-of-living Adjustments—Pre-January 7, 2013 retirees: 3.0% simple; post-January 7, 2013 retirees: 3.0% simple through 2019, then 2.15% simple.
- Multiple Decrement Tables-Mortality—Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

Post-employment Health Care Coverage or OPEB

Actuarial Assumptions and Methods Used in Determining Contribution Rates

The Actuarial Determined Employer Contribution for the year ended December 31, 2021 is based on the December 31, 2019 health care actuarial valuation. The actuarial assumptions and methods used to determine contribution rates are described below.

- Valuation Method—Individual entry age actuarial cost method of valuation is used in determining health care liabilities and normal cost. Differences between assumed and actual experience (the actuarial gains and losses) become part of the total actuarial accrued liability.
- Asset Valuation Method—For actuarial purposes, assets are valued utilizing a method that recognizes assumed total investment returns each year. Differences between actual and assumed investment returns are phased in over a closed four-year period. This funding value is not permitted to deviate from fair value by a corridor of plus or minus 12.00%.
- > Amortization Method—Level percent of payroll, open 15 year amortization period.
- Investment Return—An investment rate of return of 6.00% compounded annually (net after investment administrative expenses) was assumed.
- Wage Inflation—The active member payroll was assumed to increase 3.25% annually, which is the portion of the individual pay increase assumption attributable to inflation and overall productivity.
- Salary Scale—Wage inflation plus additional projected salary increases ranged up to 7.50% per year depending on age, attributable to seniority and merit, or 3.25% to 10.75%, including inflation.
- Multiple Decrement Tables-Mortality—Pre-retirement mortality rates are based on the RP-2014 Employees mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates are based on the RP-2014 Healthy Annuitant mortality table for males and females, adjusted for mortality improvement back to the observation period base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Post-retirement mortality rates for disabled retirees are based on the RP-2014 Disabled mortality table for males and females, adjusted for mortality improvement back to the observation base year of 2006. The base year for males and females was then established to be 2015 and 2010, respectively. Mortality rates for a particular calendar year are determined by applying the MP-2015 mortality improvement scale to all of the above described tables.

Factors Significantly Affecting Trends in Reported Amounts

Listed below is a summary of the key changes during the time period presented:

In 2021, a five-year experience study was completed for the period January 1, 2016 through December 31, 2020. The Board adopted changes to the demographic and economic assumptions for pension and health care as a result of the study. One key trend in the demographic portion of the study is the continued reduction in disability rates resulting from the changes in the disability program that encourage disabled participants to seek rehabilitation and return to work. The most notable changes in economic assumptions were a reduction in the long-term pension investment return assumption from 7.2% to 6.9%, a reduction in the long-term expected wage inflation from 3.25% to 2.75%, and a reduction in long-term expected price inflation from 2.50% to 2.35%. The new assumptions included in the 2021 actuarial valuation are disclosed in the Actuarial Section beginning on page 135.

On January 15, 2020, the Board approved several changes to the health care plan offered to Medicare and non-Medicare retirees in efforts to decrease costs and increase the solvency of the health care plan. These changes are effective January 1, 2022 and include changes to base allowances and eligibility for Medicare retirees, as well as replacing the OPERS-sponsored self-insured medical plans for non-Medicare retirees with monthly allowances, similar to the program for Medicare retirees. These changes are not reflected in the current year financial statements, however, they are reflected beginning in the December 31, 2020 measurement date health care valuation. These changes significantly decreased the total OPEB liability for the measurement date December 31, 2020. For more information on these changes, see the Plan Statement beginning on page 213.

Strategic asset allocation reviews for the Defined Benefit and Health Care portfolios were completed in 2019 and 2020, respectively. Also in 2020, the Board approved the elimination of the allocation to the Hedge Fund asset class in both portfolios. To reduce the Hedge Funds allocation, transitional allocation targets were approved for both portfolios. These reviews resulted in several changes, after the elimination of Hedge Funds, to both portfolios.

There was also a change in the investment rate of returns for pension and health care in a non-experience study year. Conditions are monitored and assumptions are reviewed annually to ensure that the assumptions remain reasonable until the next scheduled experience study. If conditions change materially, it may become necessary to review and update assumptions in advance of the next scheduled experience study. In 2018, the Board adopted changes to further reduce the long-term pension investment return assumption from 7.5% to 7.2% and the long-term health care investment return assumption from 6.5% to 6.0%.

In 2016, a five-year experience study was completed on the period January 1, 2011 through December 31, 2015. The Board adopted changes to the demographic and economic assumptions for pension and health care as a result of the study. The most notable change in demographic assumptions was an increased life expectancy for members. The most notable change in economic assumptions was a reduction in the long-term pension investment return assumption from 8.0% to 7.5%.

In 2016, OPERS, in conjunction with the Board's investment consultants, also completed an asset liability study for pension and health care. Periodically, the System engages in a more comprehensive study that examines the nature of the pension liabilities we will ultimately pay and the characteristics of the asset allocation projections and the associated level of risk. As a result of this study, OPERS modified the asset allocation slightly, but not substantively.

Annually, the single discount rate used to measure the total OPEB liability is determined based upon several factors, including the long-term health care investment return assumption and a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating. Additionally, the total OPEB liability is impacted by the assumed health care cost trend rate. The changes in these rates, in particular the decreases in the single discount rate noted within the Investment Rates by Portfolio table found on page 132 in the Investment Section, had significant impacts to the calculation of the total OPEB liability in 2017 and 2019.

Investment How pensions are funded

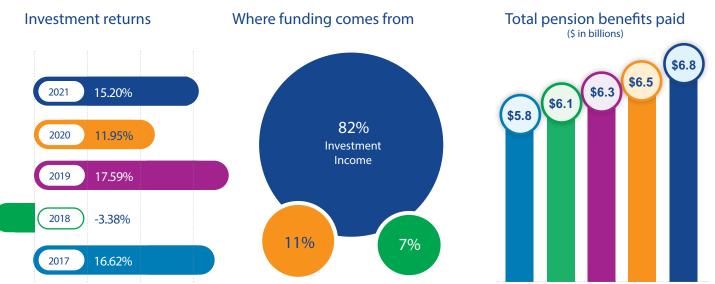

Public employees contribute a percent of each pay into an OPERS retirement account. Employee contributions, together with employer contributions, are strategically invested throughout the public employee's working career. At the time of retirement, those core contributions, invested in both good and volatile economies, have grown to provide members (now retirees) financial security in retirement.

Section 3

Connecting members to the future: Although the actual percent varies by year investment income provides approximately 80% of each retiree's annual income.

Report from the Chief Investment Officer

Ohio Public Employees Retirement System

277 East Town Street Columbus, Ohio 43215-4642 1-800-222-7377 www.opers.org

To My Fellow Members:

I am extremely proud of the performance delivered by the Investment staff in 2021. Without a doubt, the past year was unique in many ways with continued coordinated global central bank stimulation, reopening of economies and the emergence of inflation not seen in decades. Despite this volatile macroeconomic background, the OPERS Defined Benefit Fund returned 15.34%, above both the portfolio benchmark return of 15.28% and the actuarial target of 6.9%. The Health Care Fund returned 14.34%, which also exceeded both the portfolio benchmark return of 13.76% and the actuarial target of 6.0%.

A Review of 2021

In 2021, major investment themes revolved around the global recovery and the re-opening of economies aided by a dovish Federal Reserve and other developed central bank policies stimulating demand. In the U.S., market participants, economists, pundits, nearly everyone debated whether inflationary conditions would be transitory or structural. A new administration and U.S. Congress deliberated over multiple stimulus measures and other ongoing responses to the pandemic. The consumer balance sheet was in good shape helped by stimulus checks that propelled a consumption-driven economic rebound. The combined effect benefited stock markets, pushing the S&P 500 Index to an all-time high of 4,793 on December 29, 2021. On the other side of the globe, the Chinese government intervened into key sectors of its economy such as technology, education, and housing to achieve its goal of reducing wealth inequality and producing "common prosperity." This intervention triggered a selloff in many significant Chinese large cap stocks which led emerging market indices to underperform developed and U.S. markets.

2021 Initiatives

Each year, the Investments Division undertakes significant initiatives to enhance the capabilities and performance of our program. The following strategic initiatives were completed in 2021:

• We successfully completed the project to outsource the Defined Contribution Plan Target Date Funds. After a competitive search, BlackRock, Inc. was selected to oversee the program beginning in 2022.

- Staff explored diversification and risk mitigation strategies that would complement the existing asset class lineup. Staff's internal Global Equity Committee approved the recommendation to implement a Gold portfolio in the Opportunistic Asset Class in 2022 as an inflation protection measure.
- A review of both the Commodity and Non-U.S. Equity sub-asset classes and benchmarks was initiated, and the staff received approval to modify the commodity portfolio and benchmark to the Bloomberg Commodity Index. The review of the Non-U.S. Equity portfolio and benchmark resulted in no recommended changes.
- A portfolio and risk system review was completed. A competitive search was completed to
 evaluate service providers for a system to uniformly analyze risk across all plan assets
 including public equity, fixed income, cash, and alternatives (both public and private). The
 new system will interface seamlessly with existing services and replace several other
 products currently used for individual asset classes as well as the current system used
 for the total plan.
- Staff completed a review of Staff's internal committee structure to determine if operational efficiencies could be gained. Staff decided to combine five internal investment committees into two: a Private Alternatives and a Public Markets committee.

Key 2022 Initiatives

Our key initiatives for 2022 include:

- Install the total plan risk system that was selected in 2021. The installation is expected to be completed by April 1, 2022.
- Continue our annual review of certain sub-asset class portfolios and benchmarks and determine if they are still appropriate and representative of the desired risk and return characteristics. The review will include benchmarks in two sub-asset classes, High Yield and Private Equity. The benchmark for the Stable Value allocation in the Defined Contribution Plan will also be evaluated.
- Implement a new portfolio benchmarked against the Bloomberg Gold Commodity Index in the Defined Benefit and Health Care Funds.
- Research the return enhancing and risk diversifying characteristics of the alternative subasset classes of Infrastructure and Private Credit. These portfolios would be expected to produce additional income and price appreciation to the Defined Benefit Plan as well as potential inflation protection.

Looking Ahead

This year looks set to be as challenging a macro environment as 2021. Some major headwinds include geopolitical stress, surging inflation, and a Fed intent on normalizing interest rates sooner rather than later. Furthermore, a popular market indicator that measures the yield spread between the ten-year Treasury and two-year Treasury suggests that a recession could occur in the near future. Regardless of what comes our way, the OPERS Investment team will remain vigilant in protecting OPERS capital as well as exploiting any opportunities that arise in this volatile market.

As always, the OPERS Board of Trustees is recognized and thanked. This governing body carefully evaluates investment strategies, reviews the allocations and monitors the ongoing performance. Working with OPERS leadership, changes were executed efficiently by the OPERS Investment Division. This teamwork, between Staff and OPERS Board, produced the strong results achieved in 2021. While not all years will be as robust as 2021, I remain confident my team—with guidance and insight from our Board—will continue to deliver long-term results for our current and future members.

Paul Greff Chief Investment Officer April 8, 2022

Note: The returns presented throughout the Investment Section are the result of the returns generated by Defined Benefit, Health Care and Defined Contribution portfolio investments, based on a combination of time-weighted and market value-weighted calculations. The returns presented are net of external manager fees, overdraft charges, debit interest, registration expenses, stamp duties and taxes spent on foreign securities. In addition, securities lending money market returns are net of custodial fees, transfer agent expenses and professional fees.

Board Investment and Fiduciary Duties

- (A) The members of the public employees retirement board shall be the trustees of the funds created by section 145.23 of the Revised Code. The board shall have full power to invest the funds. The board and other fiduciaries shall discharge their duties with respect to the funds solely in the interest of the participants and beneficiaries; for the exclusive purpose of providing benefits to participants and their beneficiaries and defraying reasonable expenses of administering the public employees retirement system; with care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with these matters would use in the conduct of an enterprise of a like character and with like aims; and by diversifying the investments of the system so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so.
- (B) In exercising its fiduciary responsibility with respect to the investment of the funds, it shall be the intent of the board to give consideration to investments that enhance the general welfare of the state and its citizens where the investments offer quality, return, and safety comparable to other investments currently available to the board. In fulfilling this intent, equal consideration shall also be given to investments otherwise qualifying under this section that involve minority owned and controlled firms and firms owned and controlled by women either alone or in joint venture with other firms.

April 18, 2022

Board of Trustees Ohio Public Employees Retirement System 277 East Town Street Columbus, OH 43215-4642

As an independent investment advisor to the Ohio Public Employees Retirement System ('OPERS') and the Board of Trustees (the 'Board'), NEPC, LLC is providing an opinion on the reporting of OPERS investment results, investment policies, internal compliance procedures and the Board's oversight of the Retirement System's investments.

Investment Results

To the best of NEPC's knowledge and belief, OPERS investment results, as presented in this Annual Comprehensive Financial Report (ACFR), accurately represent the performance of the Retirement System's Defined Benefit, Health Care and Defined Contribution assets. All measurements shown have been calculated using standard performance evaluation methods and are presented in a manner that is consistent with investment industry standards.

Investment Policies

OPERS investment policies can be accessed online at https://www.opers.org/investments/inv-plans.shtml and are organized as follows: Part I: Investment Objectives and Asset Allocation Policies; Part II: Asset Class and Sub-Asset Class Policies; Part III: Investment-Wide Policies; and Part IV: Corporate Governance and Proxy Voting Policies.

In NEPC's opinion, OPERS assets are managed under a set of transparent investment policies and guidelines. These policies and guidelines adequately highlight the strategic performance objectives of the Ohio Public Employees Retirement System and emphasize the dual importance of maintaining robust risk controls and program diversification.

Internal Compliance

The constant testing of Fund portfolios and the continuous review of the compliance function itself is considered to be best practice within the investment industry. While serving as OPERS generalist investment consultant, NEPC has witnessed Staff's consistent and ongoing efforts to improve the effectiveness of their internal compliance procedures. NEPC also believes that the Investment Division's support of the CFA® Institute's Code of Ethics and Standards of Professional Conduct, as well as the guidelines and procedures that are set forth in the OPERS Code of Ethics and OPERS Personal Trading Policies, are consistent with industry best practice for investment professionals.

www.NEPC.com | 617.374.1300

Prudent Oversight

The daily management of the OPERS assets has been clearly delegated to the Retirement System's investment Staff. In NEPC's opinion, this clear delegation of accountability helps the Board maintain effective oversight of the OPERS Defined Benefit, Health Care and Defined Contribution Funds through quarterly performance reviews, regular oversight of Staff's activities and monthly meetings with Staff, the investment consultants and other independent service providers.

Best Regards,

Craing lumber

Introduction

The total OPERS investment portfolio, as reflected in the Combining Statement of Fiduciary Net Position, page 32, is comprised of Defined Benefit, Health Care, and Defined Contribution portfolio assets. The Defined Benefit portfolio assets originate from Traditional Pension Plan member and employer contributions, employer contributions to the Combined Plan, and funds from defined contribution accounts for annuities. The investment of these assets is the responsibility of the Investment staff, adhering to the policies approved by the OPERS Board of Trustees.

The Health Care portfolio assets are segregated from the pension portfolio and invested with a more conservative, and shorter term, asset-allocation strategy. The Health Care portfolio is comprised of assets set aside to provide post-employment health care for the retirees of the Traditional Pension Plan, Combined Plan and Member-Directed Plan. The investment of these assets is the responsibility of the Investment staff, adhering to the policies approved by the Board. Prior to 2017, heath care assets were included in two trusts established under Internal Revenue Code Sections 115 and 401(h). Accordingly, historical information reported in this section reflects both the 401(h) Health Care Trust portfolio and the more recent 115 Health Care Trust portfolio. The 401(h) Health Care Trust portfolio was transferred to the 115 Health Care Trust portfolio on July 1, 2016, resulting in one health care portfolio. Historical information in this section reflects the different health care portfolios in place for the time periods reported.

Defined Contribution portfolio assets originate from member contributions to the Combined Plan and both member and employer contributions to the Member-Directed Plan. The investment of Defined Contribution portfolio assets is self-directed by members of the Combined and Member-Directed plans, but is limited to investment options approved by the Board and the self-directed brokerage account window.

Investment Summary

The Total Investment Summary (beginning on the next page) relates to System-wide investments and includes the assets of all three portfolios as of December 31, 2021. The balance of information in this Investment Section is organized as follows: Defined Benefit portfolio investments (pages 107-111) relating exclusively to defined benefit assets; Health Care portfolio investments (pages 113-117) relating exclusively to health care assets; and Defined Contribution portfolio investments (pages 119-121) relating exclusively to defined contribution assets. The Investment Objectives and Policies and Asset Class Policies (pages 123-131) provide information on the System investment policies and performance objectives.

The returns presented throughout the Investment Section are the result of the returns generated by Defined Benefit, Health Care and Defined Contribution portfolio investments, based on a combination of time-weighted and market value-weighted calculations. The returns presented throughout this Investment Section are net of external manager fees, overdraft charges, debit interest, registration expenses, stamp duties, and taxes spent on foreign securities. In addition, securities lending money market returns are net of custodial fees, transfer-agent expenses, and professional fees.

A list of assets held as of December 31, 2021 is available upon request.

Investment Section

The table below reflects the total investment portfolio, which includes three component portfolios, as of December 31, 2021: the Defined Benefit portfolio, the Health Care portfolio and the Defined Contribution portfolio.

Investments are generally reported at fair value. Short-term investments are reported at cost, which approximates fair value. Securities traded on a national or international exchange are valued at the last-reported sales price at current exchange rates. Performance results and fair values for the real estate and private equity asset classes are typically reported on a quarter lag basis, adjusted for cash flow activity during the fourth quarter. If any significant market gains or losses occur in the fourth quarter, these asset classes are adjusted for financial reporting purposes to reflect the estimated fair value at year end. The investment results reported for these asset classes in the Investment Section reflect this practice. The table below displays the fair values of investment assets consistent with the presentation in the financial statements on page 32.

Summary of Cash, Cash Equivalents and Investments (as of December 31, 2021)				
	Fair Value	Percent of Total Fair Value		
Cash and Cash Equivalents				
Cash	\$67,157,120	0.05%

¹Assets summarized on performance basis.

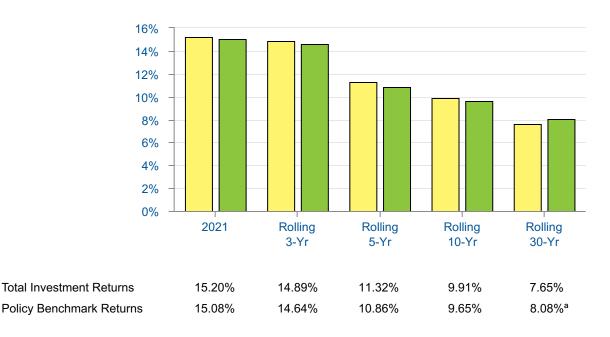

² Includes hedge funds and derivative instruments.

Investment Section

Total Investment Returns—Annual Rates of Return¹

^a The benchmark returns for 1996 and prior years were estimated.

¹ Annual Rates of Return—The returns are the result of the returns generated by Defined Benefit, Health Care and Defined Contribution portfolio investments, based on a combination of time-weighted calculations and market value-weighted calculations. The policy benchmark is derived by a market value-weighted calculation of the Defined Benefit, Health Care, and Defined Contribution investment policy benchmarks while all other returns throughout the remainder of this section are derived from a time-weighted calculation. All returns presented throughout the Investment Section are net of external manager fees, overdraft charges, debit interest, registration expenses, stamp duties, and taxes spent on foreign securities. In addition, the securities lending money market returns are net of custodial fees, transfer-agent expenses, and professional fees.

^a Returns are six-month cumulative returns as of June 30, 2016 in the 401(h) Health Care Trust. The 401(h) Health Care Trust and the Voluntary Employees' Beneficiary Association (VEBA) Trust were closed as of June 30, 2016. Prior to July 1, 2016, the VEBA Trust assets were included in the Defined Benefit portfolio. On July 1, 2016, the 401(h) Health Care Trust and VEBA Trust assets were transferred to the 115 Health Care Trust portfolio. The combined return on the total health care assets for the year ended December 31, 2016 was 7.55%. The number disclosed in the 115 Health Care Trust column, 5.11%, represents the return for the 115 Health Care Trust portfolio assets.

^b The 115 Health Care Trust was established September 2014. Returns are two-month cumulative returns in 2014 since funding of the 115 Health Care Trust portfolio began November 2014.

¹ Prior to 2005, the 401(h) Health Care Trust assets were included in the Defined Benefit portfolio. In 2005, the 401(h) Health Care Trust assets were segregated from the Defined Benefit portfolio into a separate portfolio with portfolio-specific asset allocation and investment policies. Accordingly, Defined Benefit returns for 2004 and prior represent a composite of the Defined Benefit and 401(h) Health Care Trust assets.

² Defined Contribution plans commenced January 1, 2003, with a separate portfolio established in 2004.

Brokerage commissions do not include commissions paid by external investment managers using commingled fund structures. OPERS maintains a commission recapture program with several of its non-U.S. Equity managers. Capital Institutional Services Inc. and Frank Russell Securities Inc. perform record-keeping services for the commission recapture program.

The total commissions schedule includes \$66,836 in commissions paid that were part of a commission sharing agreement (CSA). CSA funds are held by the participating brokers and may be used to purchase qualifying investment research services. During 2021, \$120,238 of investment research services were purchased using CSA funds.

Schedule of Fees to External Asset Managers by Portfolio (for the year ended December 31, 2021)						
	Defined Benefit	Health Care	Defined Contribution	Total

Investment Section

As noted previously, the Investment Division manages the total investment portfolio by dividing it into three sub-portfolios. These portfolios are: the Defined Benefit portfolio, the Health Care portfolio, and the Defined Contribution portfolio. All information prior to this point has been reported on the OPERS total investment portfolio; however, all following information will be presented at the specific portfolio level.

Investment Returns

The Defined Benefit portfolio reported an investment return of 15.34% in 2021. The overall portfolio return is compared to a composite benchmark return that could be achieved by a portfolio that is passively invested in the broad market, with percentage weights allocated to each asset class as specified in the *OPERS Statement of Investment Objectives and Policies*. The return of the policy benchmark for 2021 was 15.28%.

^a The benchmark returns for 1996 and prior years were estimated.

¹ Annual Rates of Return—The Defined Benefit portfolio return is based on a time-weighted calculation. The policy benchmark is derived by a market value-weighted calculation of the Defined Benefit investment policy benchmarks. All returns are net of external manager fees, overdraft charges, debit interest, registration expenses, stamp duties, and taxes spent on foreign securities.

² The 401(h) Health Care Trust portfolio was segregated from the Defined Benefit portfolio in 2005; thus, the 30-year rolling return information reflects both the Defined Benefit and 401(h) Health Care Trust portfolios.

Investment returns for the Defined Benefit portfolio underlying asset class composites and the respective benchmarks are shown below:

Schedule of Investment Results (for the year ended December 31, 2021) Defined Benefit Pol

Footnotes for Schedule of Investment Results—Defined Benefit Portfolio

The footnotes below provide definitions for the asset class composite benchmark indices as of December 31, 2021:

- ¹ Russell 3000 Stock Index—A capitalization-weighted stock index consisting of the 3,000 largest publicly traded U.S. stocks by capitalization. This index is a broad measure of the performance of the aggregate domestic equity market.
- ² Custom Opportunistic Benchmark—Market value weight of the underlying portfolio benchmarks.
- ³ Bloomberg Barclays U.S. Aggregate Bond Index—A market value-weighted index consisting of Bloomberg Barclays corporate, government and mortgage-backed indices. This index is the broadest available measure of the aggregate U.S. fixed income market.
- ⁴ Custom Securitized Debt Benchmark—As of December 31, 2021, blend was 50% Bloomberg Barclays Non-Agency Investment Grade CMBS: BBB Total Return Index Unhedged USD, 50% Bloomberg Barclays Non-Agency CMBS Agg Eligible Total Return Index Value Unhedged USD.
- ⁵ Custom Non-U.S. Equity Benchmark (net)—As of December 31, 2021, blend was 55% MSCI World Index x U.S. Standard (net), 31% MSCI Emerging Markets Standard Index (net), 10% MSCI World Index x U.S. Small Cap (net), and 4% MSCI Emerging Markets Small Cap Index (net).
- ⁶ Custom Real Estate Benchmark—NCREIF Fund Index Open-End Diversified Core Equity (NFI-ODCE) net of fees plus an annual premium of 85 bps is a capitalization-weighted index consisting of 24 open-end commingled funds pursuing a core investment strategy.
- ⁷ State Street Private Equity Index (SSPEI)—Evaluates the performance of actively managed private equity portfolios. SSPEI includes venture capital, buyout, and distressed debt funds within the U.S.
- ⁸ Bank of America Merrill Lynch (BofAML) U.S. 3-Month Treasury Bill Index—The three-month Treasury Bill return as measured by Bank of America Merrill Lynch.
- ⁹ Bloomberg Barclays U.S. Corporate High Yield Bond Index—Covers the universe of fixed rate, non-investment grade debt.
- ¹⁰ Custom Emerging Markets Debt Benchmark—As of December 31, 2021, blend was 50% J.P. Morgan EMBI Global Bond Index, and 50% J.P. Morgan GBI-Emerging Markets Global Diversified USD Index.
- ¹¹ Bloomberg Commodity Index Total Return—Consists of futures contracts and reflects the returns on a fully collateralized investment in Bloomberg Commodity Index (BCOM). BCOM Index provides broad-based exposure to commodities. Combines the returns of BCOM with the returns on cash collateral invested in three-month U.S. Treasury Bills.
- ¹² HFR Risk Parity Institutional Custom Index—Includes funds in which OPERS is currently invested, with a volatility target of 15% or greater and are classified as Volatility Target: 15%. Funds must have assets under management of USD \$500 million or greater in order to be considered for inclusion in an HFR Risk Parity Institutional Index.
- ¹³ Bloomberg Barclays U.S. TIPS Index—Consists of inflation-protected securities issued by the U.S. Treasury.
- ¹⁴ Bloomberg Barclays U.S. Treasury Index—Is designed to measure U.S. dollar-denominated, fixed-rate, nominal debt issued by the U.S. Treasury. Treasury bills are excluded, but are part of a separate Short Treasury bond index. Separate Trading of Registered Interest and Principal of Securities (STRIPS) are excluded from the index. The U.S. Treasury index is a component of the U.S. Aggregate, U.S. Universal, Global Aggregate and Global Treasury indices.

Investment Returns

The Health Care portfolio reported an investment return of 14.34% in 2021. The overall returns are compared to a composite benchmark return that could be achieved by a portfolio that is passively invested in the broad market, with percentage weights allocated to each asset class as specified in the *OPERS Statement of Investment Objectives and Policies*. The return of the policy benchmark for 2021 was 13.76%.

Prior to 2017, health care assets were included in two trusts established under Internal Revenue Code Sections 115 and 401(h). Accordingly, historical information reported in this section reflects both the 401(h) Health Care Trust portfolio and the more recent 115 Health Care Trust portfolio. The 401(h) Health Care Trust portfolio was transferred to the 115 Health Care Trust portfolio on July 1, 2016 resulting in one health care portfolio. Historical information in this section reflects the different health care portfolios in place for the time periods reported.

¹ Annual Rates of Return—The Health Care portfolio return is based on a time-weighted calculation. The policy benchmark is derived by a market value-weighted calculation of the Health Care investment policy benchmarks. All returns are net of external manager fees, overdraft charges, debit interest, registration expenses, stamp duties, and taxes spent on foreign securities.

² The Health Care portfolio (previously known as the 401(h) Health Care Trust portfolio) was segregated from the Defined Benefit portfolio in 2005; thus, the 30-year rolling return information does not exist.

³ The 115 Health Care Trust portfolio was established in September 2014, and the 401(h) Health Care Trust portfolio was closed on June 30, 2016 with the assets transferring to the 115 Health Care Trust portfolio on July 1, 2016. Beginning 2017, one health care trust exists, referred to as the Health Care portfolio. The Rolling 10-Year returns are the combined returns of the former 401(h) Health Care Trust portfolio and the current 115 Health Care Trust portfolio for all years prior to 2017.

Health Care Portfolio

Investment Returns

The Defined Contribution portfolio reported an investment return of 13.99% in 2021. The portfolio composite is derived from the individual investment option returns and their actual year-end market values. Members may not invest in this portfolio composite, but choose to invest in the individual investment options provided. The returns for the investment options, and their respective indices, are shown on the next page.

¹ Annual Rates of Return—The Defined Contribution portfolio return is the result of the returns generated by defined contribution investments based on a combination of time-weighted and market value-weighted calculations. The defined contribution plans began in 2003; thus, 30-year return information does not exist.

- ¹³ Russell 3000 Stock Index Benchmark—A capitalization-weighted stock index consisting of the 3,000 largest publicly traded U.S. stocks by capitalization. This index is a broad measure of the performance of the aggregate domestic equity market.
- ¹⁴ Russell 1000 Stock Index Benchmark—A capitalization-weighted stock index consisting of the 1,000 largest companies in the Russell 3000 Index, which represents approximately 92% of the total market capitalization of the Russell 3000 Index.
- ¹⁵ Russell 2000 Stock Index Benchmark—A capitalization-weighted stock index consisting of the 2,000 smallest companies in the Russell 3000 Index, which represents approximately 8% of the total market capitalization of the Russell 3000 Index.
- ¹⁶ MSCI All Country World Net Dividend Return x U.S. Index (MSCI ACWI Net Dividend Return x U.S. Index) Benchmark—A capitalization-weighted index of stocks representing 45 developed and emerging country markets, excluding the U.S. market.

Top Ohio Companies

The largest direct investments in the state of Ohio, measured at the fair value of OPERS' investment in the securities of firms headquartered in Ohio, totaled approximately \$0.5 billion at the end of the year.

The largest indirect investments, measured at the fair value of OPERS' investment in the securities of companies with the largest employment presence in the state, totaled approximately \$2.0 billion. Employment presence is measured by the number of employees at a business located in Ohio, as defined by the Office of Strategic Research, Ohio Department of Development. Firms with the largest employment presence in Ohio in which OPERS held investments at the end of 2021 employed more than 248,000 people.

Top Ohio Holdings (as of December 31, 2021)

Investment Objectives and Policies

The investment and fiduciary responsibilities of the Board are governed by Ohio Revised Code (ORC) 145.11, the requirements of the *OPERS Code of Ethics and Personal Trading Policy* and applicable state statutes. The Board discharges its duties solely in the interest of participants and beneficiaries, for the exclusive purpose of providing benefits and defraying reasonable administrative expenses. Prudent Person standards apply.

The Board reviews all policies and approves changes or additions as appropriate. The Investment staff fulfills the mandates and obligations described in the policies and recommends changes to the Board, as appropriate. The following policies reflect those in place for the 2021 fiscal year.

The OPERS Board manages the assets in a fashion that reflects OPERS' unique liabilities, funding resources and portfolio size, by incorporating accepted investment theory and reliable, empirical evidence. The Board ensures adequate risk control of the portfolios through diversification, adhering to portfolio guidelines, providing risk budgeting, adhering to compliance and ongoing monitoring.

The purpose of the OPERS policies is to provide a broad strategic framework for managing portfolios. Approved Board asset class policies are summarized beginning on page 129 and are posted on the OPERS website, OPERS.org, where they can be viewed in their entirety.

Note: Policies have been adapted to meet plain-language standards of the OPERS Annual Comprehensive Financial Report *and provide an overview. Complete policy information, with exact verbiage approved by the Board, is available on* OPERS.org.

Rebalancing

Markets are dynamic and portfolios must be reviewed regularly to ensure holdings remain within their strategic asset allocations. To ensure conformance with the asset allocation policies, the portfolios are reviewed daily for compliance within the target asset allocation percentages, specified by portfolio, reasonable costs, and best interest of OPERS.

The Board establishes and reviews asset allocation targets, ranges and investment policies against capital market expectations, the investment landscape, and an annual actuarial assessment by the actuarial consultant. A comprehensive strategic asset allocation review is completed approximately every three-to-five years or if market conditions change substantially. This review helps to assess the continuing appropriateness of the asset allocation policy. Additionally, the review may also include a study of portfolio design and comparisons with peers.

Defined Benefit Investment Policies

Investment Objective

The primary objective of the Defined Benefit portfolio is to secure statutory benefits provided by OPERS and to keep OPERS costs reasonable for employees and employers.

Asset Allocation and Performance Objectives

The Board's asset allocation policy establishes a framework designed to achieve the OPERS long-term investment objectives. The Defined Benefit portfolio performance objectives are to exceed the OPERS performance benchmark, net of investment expenses over five-year periods, and exceed the actuarial interest rate, currently 6.9%, over the long term.

The Board sets target allocations to various asset classes designed to meet the OPERS long-term investment objectives. Allocations for the Public Equity and Fixed Income asset classes are 44% and 25%, respectively, with the remaining 26% and 5% allocated to Alternatives (Private Equity, Real Estate, Commodities, and Opportunistic) and Risk Parity, respectively. The Board also establishes a band of minimum and maximum allowable allocations, or ranges, surrounding each asset class target. The purpose of ranges is to appropriately and cost-effectively balance the Board's investment policy with the investment strategies pursued over shorter time-periods. The following table lists the Defined Benefit portfolio target allocations, ranges and performance benchmarks for each asset class:

Asset Class	Target Allocation	Range	Benchmark Index
Public Equity	44.0%	37.3 to 55.9%	
U.S. Equity	Custom Allocation ¹	+/- 5%	Russell 3000 Stock Index
Non-U.S. Equity	Custom Allocation ¹	+/- 5%	Custom benchmark of the following indices: 55% MSCI World Index x U.S. Standard (net) 10% MSCI World Index x U.S. Small Cap (net) 31% MSCI Emerging Markets Standard Index (net) 4% MSCI Emerging Markets Small Cap Index (net)

Operating Cash	0.0%	0 to 5%	N/A
Total	100.0%		

¹ The custom allocation is set to the fixed U.S. Equity and Non-U.S. Equity target weights.

Health Care Investment Policies

Investment Objective

The primary objective of the Health Care portfolio is to provide funding for discretionary health care for eligible members. The assets of the Health Care portfolio are invested with the objectives of: a) preservation of capital, b) earning a reasonable return, and c) liquidity.

Asset Allocation and Performance Objectives

The approved asset allocation policy establishes a framework designed to achieve the long-term investment objective. The Health Care portfolio performance objective is to exceed the performance benchmark net of investment expenses. The table below sets forth targets, ranges and performance benchmarks for each asset class:

Health Care As	set Allocation	1	
Asset Class	Target Allocation	Range	Benchmark Index
Public Equity	50.0%	42.1 to 63.1%	
U.S. Equity	Custom Allocation ¹	+/- 5%	Russell 3000 Stock Index
Non-U.S. Equity	Custom Allocation ¹	+/- 5%	Custom benchmark of the following indices: 55% MSCI World Index x U.S. Standard (net) 10% MSCI World Index x U.S. Small Cap (net) 31% MSCI Emerging Markets Standard Index (net) 4% MSCI Emerging Markets Small Cap Index (net)

Operating Cash	0.0%	0 to 5%	N/A
Total	100.0%		

¹ The custom allocation is set to the fixed U.S. Equity and Non-U.S. Equity target weights.

Investment Objectives and Policies

Defined Contribution Investment Policies

Investment Objective

The Defined Contribution portfolio investment options are intended to be primary retirement savings vehicles for members. The long-term objectives of the Defined Contribution portfolio are to support defined contribution plan members in having independent control over their OPERS retirement assets, while providing a suitable framework to invest their assets over the long-term.

Asset Allocation

The asset allocation and diversification objective is based on three components: target date funds, OPERS funds and the self-directed brokerage account that offers members in the defined contribution plans (the Member-Directed Plan and the Combined Plan) diversified investment options. The default investment option for defined contribution plan members who fail to make a selection is the target date fund that most closely corresponds to the member's current age, assuming a payout at age 65.

• Target Date Funds

Target Date Funds is a passive program that links a defined contribution member's investment portfolio to a particular time horizon, typically an expected retirement date. A target date fund with a corresponding target date in the distant future will have an allocation tilted more toward equities and other higher risk/higher reward asset classes to enhance the opportunity to accumulate capital. As target date funds move toward their target payout dates, allocations to such assets are reduced to better preserve accumulated capital, while simultaneously increasing allocation to fixed income and cash. These transitions, called glide paths, are accomplished by assigning each target date fund an asset class investment allocation and an asset class range surrounding such targets. The asset class ranges for each OPERS target date fund, for the period December 1, 2020 through March 11, 2022, are on the next page. On March 11, 2022, OPERS transitioned the Target Date Funds to BlackRock LifePath funds with similar investment time horizons.

Defined Contribution Asset Allocation											
		OPERS Target Date Funds									
	Pay	/out	20	25	20	30	20)35	2040

Investment Objectives and Policies

• Funds

OPERS offers members in the defined contribution plans low cost, primarily passive, asset class specific investment funds. Those funds, and their respective indices, are as follows:

OPERS Fund	Market Index
Stable Value	Custom Index ¹
Bond Index	Bloomberg Barclays U.S. Aggregate
Stock Index	Russell 3000
Large Cap	Russell 1000
Small Cap	Russell 2000
Non-U.S. Stock Index	MSCI ACWI Net Dividend Return x U.S.

¹ The Stable Value Fund (SVF) is managed actively. Its primary objective is to preserve the value of principal. Its secondary objective is to exceed the long-term return of a custom index comprised of 45% of the Bloomberg Barclays 1-5 Year Government/Corporate Bond Index, 35% of the Bloomberg Barclays Intermediate Government/Corporate Bond Index, 15% of the Bloomberg Barclays Aggregate Bond Index and 5% of the Bank of America Merrill Lynch 3-Month U.S. Treasury Bill Index. A typical stable value fund return fluctuates less than 1% a year; therefore, neither the short-term returns nor volatility of the SVF is consistent with market value instruments such as those in the custom index.

Self-Directed Brokerage Account

The self-directed brokerage account option provides defined contribution members more flexibility in choosing their own retirement savings investments by allowing them to invest in a variety of active and passive mutual funds. The program parameters are the following:

- > Only designated mutual funds can be purchased through the window.
- Maximum of 50% of a member's portfolio is allowed to be invested through the brokerage window. (The plan will not rebalance the brokerage investments should they grow to exceed 50% of participant's assets.)
- > Account minimum of \$5,000 is required before a participant can use the window.
- > The annual cost of the window is borne by the participant using the window.

Rebalancing

The ranges specified for the target date funds are a function of the expected volatility of each asset class and the proportion of the total fund allocated to the asset class. The staff ensures target date funds conform to the asset allocation policy through quarterly review and rebalancing.

Performance Objectives and Risk Management

The performance objective for the target date funds is to meet the return of the respective performance benchmarks primarily through the use of passive index funds. The performance benchmarks are a custom index comprised of market indices for the component funds weighted in accordance with the target date fund target allocations as specified in the Defined Contribution Fund policy. The performance objective for the OPERS funds is to meet the return of respective performance benchmarks, gross of investment manager fees. There is no plan-level performance objective for the self-directed brokerage account because the mutual funds purchased through it are selected by members.

Defined contribution fund investment options offer diversification to minimize the impact of loss from individual positions. In addition to diversification, the program is passively managed for the target date funds and OPERS funds. The self-directed brokerage account offers participants a broad range of mutual fund choices that are self-selected and subject to the program parameters.

Investment Section

Cash

Cash management seeks to preserve principal, provide liquidity and exceed its target benchmark, net of fees. This program actively invests cash and lending cash collateral relative to the target benchmarks for each portfolio. Interest rate, credit and liquidity risk are managed with quantitative and qualitative constraints.

Commodities

Commodity investments provide exposure to global commodities and achieve returns comparable to or in excess of the benchmark return, net of fees. Commodity portfolios are governed by guidelines that establish management parameters to achieve competitive commodity-based returns. Commodity investments may include commodities not specified in the Standard and Poor's Goldman Sachs Commodity Index and/or the Bloomberg Commodity Total Return Index at the time of purchase.

Derivatives

Derivative instruments are used periodically to mitigate risk and to smooth trading efficiencies so that the risk/return profile of individual securities or portfolios are better managed. Derivative instruments may be used to enhance returns and reduce risk by managing or hedging exposure including, but not limited to stock markets, commodities and currencies.

Derivative instruments are grouped into three categories:

- Category I: Securities-based and traded either via an exchange or over-the-counter transactions.
- Category II: Non-securities-based, exchange-traded such as futures, options on futures or options.
- Category III: Non-securities-based, over-the-counter transactions.

To manage overall fund liquidity and to balance the use of derivative instruments and physical securities, limits have been established:

- Use of Category III derivative instruments are limited to 10% of the total net asset value of public market assets held in separate accounts, excluding foreign exchange derivative instruments used for hedging. (Additional portfolio-level restrictions may apply.)
- The combined gross notional exposure of Category II and Category III derivative instruments will not exceed 25% of total net asset value, excluding foreign exchange derivative instruments used for hedging. (Additional portfolio-level restrictions may apply.)
- Currency forwards are one year or less to maturity, unless approved by the chief investment officer.

Fixed Income

A broad exposure to fixed-income asset classes to ensure diversification and provide a competitive return is the overriding goal. In doing so, OPERS is better positioned to provide for the known liabilities associated with the defined benefit plan and the health care trust. Diversification is established via activity in a variety of sub-asset classes including market debt, floating rate debt, securities debt, Treasury inflation-protected securities (TIPS), high yield and U.S. Treasuries.

Both active and passive management strategies are used by internal and external portfolio managers. Internal managers position the majority of the fixed income portfolio with risk-controlled active strategies, focusing on investment-grade securities and managing the TIPS and U.S. Treasury allocations as indices. External managers, with special expertise, manage the high yield, emerging debt and floating rate debt investments.

Asset Class Policies

Opportunistic

Investments in the Opportunistic sub-asset class include investment strategies or assets not currently used or employed to the level desired in the respective Defined Benefit or Health Care portfolios, but which have the potential to improve investment results over time. Assets and strategies used must have the potential to be mainstreamed into the investment program over time, or be opportunistic-based on either valuation or circumstances.

Every strategy within the Opportunistic sub-asset class has a specific performance benchmark. The overall benchmark is the market value weight of the underlying benchmarks. Long-term returns should match or exceed the OPERS Total Fund benchmark, which is a measure of the cost of investing in this category.

The primary risk control mechanisms are the limited size of the opportunistic allocation and the limits on the size of single assets and strategies. No single investment strategy or portfolio assigned to the same benchmark within the Opportunistic sub-asset class may exceed 1% of the sum of the Defined Benefit or Health Care portfolio assets at the time of funding.

Private Equity

Private equity seeks competitive returns plus a liquidity premium by investing with managers who have a consistent record of producing superior returns. Not publicly traded, this sub-asset class provides access to opportunities that may be long term.

Exclusively using external managers who employ active management strategies, private equity adds diversification to the Defined Benefit portfolio. Risk is managed by limiting the commitment amount to single, closed-end commingled funds to \$600 million for primary funds and to \$800 million for fund of funds, including secondary fund of funds. Additionally, specific quantitative and qualitative constraints govern the fund.

Performance is benchmarked against the State Street Private Equity Index (SSPEI).

Public Equities (domestic and international stocks)

With both active (active trades) and passive (indexed funds) components, this program provides broad exposure to global, publicly traded, stock markets. The active management of the program is structured to allow managers to identify and capture opportunities.

Both active and passive components are designed to produce risk-adjusted return, net of fees, that exceeds benchmarks over a complete market cycle—at all times conducting business within preestablished risk constraints.

This program is monitored using a tracking error range—tracking error is a statistical variance measurement that shows the degree to which OPERS returns differ from industry returns:

Asset Class	Benchmark	Tracking Error Range
U.S. Equity	Russell 3000 Stock Index	0-100 basis points
Non-U.S. Equity	Custom benchmark of the following indices: 55% MSCI World Index x U.S. Standard (net) 10% MSCI World Index x U.S. Small Cap (net) 31% MSCI Emerging Markets Standard Index (net) 4% MSCI Emerging Markets Small Cap Index (net)	0-300 basis points

Real Estate

The global real estate program encompasses both private and public markets.

The private market real estate program uses active management strategies implemented through external managers. Single managers are limited to no more than 20% of the program. A summary of the long-term guidelines are as follows:

- Holdings outside the U.S. are limited to no more than 25% of the total.
- Any single direct investment is limited to 10% of the target allocation.
- Single closed-end commingled funds are limited to either \$400 million or 5% of the target allocation, whichever is greater.
- Single open-end commingled funds are limited to 10% of the target allocation.

The public market real estate portfolio may engage in active and index management strategies through internal and external managers.

The OPERS real estate program performance is monitored, or benchmarked, using the National Council of Real Estate Investment Fiduciaries (NCREIF) Fund Index—Open End Diversified Core Equity (ODCE). This asset class is expected to meet or exceed the net ODCE plus 85 basis points, over rolling five-year periods. Health Care portfolio real estate is benchmarked against the Dow Jones U.S. Select RESI Total Return Index.

Risk Parity

Risk Parity is an alternative allocation of assets designed to achieve a better balance of economic outcomes in growth and inflation environments. This requires investing in multiple asset types and leveraging exposures to global markets in order to obtain the desired risk exposure. The Risk Parity allocation is structured to achieve roughly balanced risk exposure across equities, nominal fixed income, and inflation-sensitive assets, targeting a total volatility level comparable to that of the Defined Benefit and Health Care portfolios.

The overall benchmark is the market value weight of the underlying managers' benchmarks. The Board sets performance expectations through approval of the *Annual Investment Plan*. By allocating to multiple Risk Parity managers, concentration to any one manager is limited.

Securities Lending

The Securities Lending program actively lends securities through various programs to qualified borrowers to provide incremental income to the respective asset classes. Performance of the securities lending program is assessed annually.

Cash reinvestment risk and counterparty risk are managed through a combination of quantitative and qualitative constraints. Excess collateral, marked-to-market daily, is held for each loan in the amount of 102% for domestic securities and 105% for international securities. The maximum percentage of assets that may be on loan is 50% of the eligible assets while the maximum amount that may be on loan with any one borrower is 15% of the eligible assets.

Investment Rates by Portfolio—Defined Benefit and Health Care

OPERS uses several rates to evaluate the results of the investment portfolios. Actual and benchmark returns for the years listed can be found in this section. The expected rate of return is based on the asset allocation in place during the year presented and the actuarial assumed rate of return is the assumption used for the annual actuarial valuations, described further in the Actuarial Section. Finally, the single discount and long-term municipal bond rates reflect the requirements of Governmental Accounting Standards Board Statement No. 74. These rates are used in the Accounting Basis valuations for health care and are not available prior to 2016.

Rates are presented for nine years in the following table:

Investment Rates by Portfolio									
	2021	2020	2019	2018	2017	2016	2015	2014	2013

¹ In 2016, the 401(h) Health Care Trust closed and assets were transferred to the 115 Health Care Trust. The 2016 partial year results for both portfolios can be found in this section, reflecting six month returns for the 401(h) Health Care Trust. For 2016, this chart displays the combined health care rates as disclosed in this section. For previous years, the rates represent the 401(h) Health Care Trust, as the majority of the health care assets resided in this trust until transferred to the 115 Health Care Trust.

² Projected benefit payments are required to be discounted to their actuarial present value using a Single Discount Rate that reflects (1) a long-term expected rate of return on other post-employment benefits (OPEB) plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits), and (2) a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met). Additional information on the Single Discount Rate can be found in Note 7 of the Notes to Combining Financial Statements found in the Financial Section.

Investment Section

Structure and Relationship of Investment Policies

The following exhibit illustrates the structure and relationship of the 25 investment policies within the total System and its three investment portfolios in 2021.

Actuarial Forecasting helps provide intergenerational equity

For a pension system to consistently be in the position of meeting its commitments, extensive forecasting must be completed. Only by anticipating future needs and targeting earnings-and-actions to meet those needs, can a pension system confidently expect to fund the liabilities associated with current and future generations of retirees.

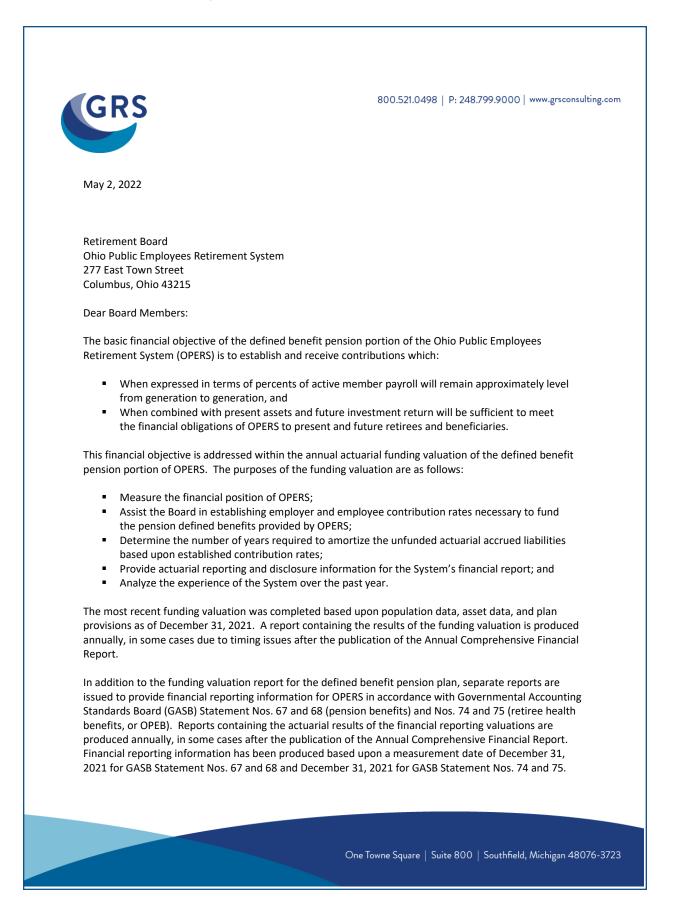

Incremental, phased-in adjustments to pension benefits can yield significant results over time. As a mature system, OPERS has to generate year-over-year investment returns to fund the benefits of each generation of members and retirees. Changes are made only when necessary to ensure the pension benefit provided continues to give members a strong financial foundation in retirement—for present and future generations.

Connecting members to the future: Throughout every generation, employers know that retaining a viable workforce is critical for success. A significant factor in attracting businesses and individuals has always been a strong educational system. Ohio public employees help administer and support the state's public universities and colleges—helping employers (public and private) attract and retain individuals to form Ohio's workforce of today and tomorrow.

Section 4

Letter from the Actuary

Retirement Board Ohio Public Employees Retirement System May 2, 2022 Page 2

The following schedules in the Financial Section and Actuarial Section of the Annual Comprehensive Financial Report were prepared based upon certain information presented in the previously mentioned funding and financial reporting valuation reports:

Financial Section

- Net Pension Liability/(Asset)
- Key Methods and Assumptions Used in Valuation of Total Pension Liability/(Asset)
- Sensitivity of Net Pension Liability/(Asset) to Changes in the Discount Rate
- Net OPEB Liability/(Asset) Health Care
- Key Methods and Assumptions Used in Valuation of Total OPEB Liability/(Asset)
- Sensitivity of Net OPEB Liability/(Asset) to Changes in the Discount Rate
- Sensitivity of Net OPEB Liability/(Asset) to Changes in the Health Care Cost Trend Rate
- Schedule of Changes in Net Pension Liability/(Asset) and Related Ratios
- Schedules of Member and Employer Contributions
- Schedule of Changes in Net OPEB Liability/(Asset) and Related Ratios

Actuarial Section

- Summary of Assumptions
- Schedules of Average Defined Benefits Paid
- Actuarial Valuation Data Pension
- Schedules of Funding Progress
- Short-Term Solvency Test
- Analysis of Financial Experience

The individual member statistical data required for the valuations was furnished by OPERS, together with pertinent data on financial operations. The cooperation of OPERS in furnishing these materials is acknowledged with appreciation. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the data. Assets are valued on a market related basis that recognizes each year's difference between actual and assumed investment return over a closed four-year period. For determining the Net Pension Liability/(Asset) under GASB Statement No. 67, assets are valued on a market basis. The long-term assumed rate of investment return on pension fund assets is 6.90%. Based upon the results of a projection performed in accordance with GASB Statement No. 67 parameters, the Single Discount Rate for purposes of discounting pension liability/(Asset) under GASB Statement No. 74, assets are valued on a market basis. The long-term assumed rate of investment return on Health Care fund assets is 6.00%. Based upon the results of a projection performed in accordance with GASB Statement No. 74, assets are valued on a market basis. The long-term assumed rate of investment return on Health Care fund assets is 6.00%. Based upon the results of a projection performed in accordance with GASB Statement No. 74 parameters, the Single Discount Rate for purposes of discounting Health Care liabilities for OPEB financial reporting purposes is also 6.00%.

Retirement Board Ohio Public Employees Retirement System May 2, 2022 Page 3

Actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rates of investment return and payroll growth, eligibility for the various classes of benefits, and longevity among retired lives. The Board adopted the actuarial assumptions after considering the advice of the actuary and other professionals. The assumptions and methods used for funding and financial reporting purposes are in conformity with the Actuarial Standards of Practice issued by the Actuarial Standards Board. They are also in conformity with the Board's funding policy. The December 31, 2021 valuations were based upon assumptions that were recommended in connection with an Experience Study covering the 2016-2020 period.

The computed pension amortization period as of the December 31, 2021 annual valuation is 16 years and the System is 84% funded with respect to pension benefits, based upon the actuarial accrued liability and the funding value of assets.

Based upon the results of the December 31, 2021 valuations, we are pleased to report to the Board that the Public Employees Retirement System of Ohio is meeting its basic financial objective and continues to operate in accordance with the actuarial principles of level percent of payroll financing.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

Readers desiring a more complete understanding of the actuarial condition of OPERS are encouraged to obtain and read the complete valuation reports. The Actuarial and Financial Sections of this Annual Comprehensive Financial Report contain some, but not all of, the information in the valuation reports.

Brian B. Murphy and Mita D. Drazilov are Members of the American Academy of Actuaries (MAAA), are independent of the plan sponsor and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

Actuarial Section

Summary of Assumptions

The defined benefit pension and health care actuarial information presented in this 2021 Annual Comprehensive Financial Report (annual report) is based on the most current actuarial valuations for the System. This section presents actuarial information for pension and health care on a Funding Basis. The pension funding valuation results are valued and presented as of December 31, 2021; the health care funding valuation results are valued and presented as of December 31, 2020, based on the most recent data available. The pension actuarial assumptions are applicable to 2021. The health care actuarial assumptions are applicable to 2020, unless otherwise noted. In conjunction with Governmental Accounting Standards Board (GASB) Statement No. 67 (GASB 67), *Financial Reporting for Pension Plans—an amendment of GASB Statement No. 25*, OPERS is reporting actuarial results of pensions as of the December 31, 2021 valuation date in the Financial Section of the annual report on a financial reporting basis, or Accounting Basis. Also, in conjunction with GASB Statement No. 74 (GASB 74), *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans* (or OPEB), OPERS is reporting actuarial results of health care as of the December 31, 2020 valuation date, rolled forward to the measurement date of December 31, 2021.

The Accounting Basis calculation methodologies defined by GASB 67 and 74 require different methods and may require different assumptions than are used to calculate the funded status of a plan. For example, both GASB 67 and 74 require the use of the fair value of assets, instead of the smoothed value of assets used for the Funding Basis. Both GASB 67 and 74 require that the actuarial information presented under the Accounting Basis represent the most current year-end or measurement period. Therefore, the GASB 67 net pension liability/(asset) and the GASB 74 net OPEB, or health care, liability/(asset) results will differ from the unfunded actuarial accrued liability results provided in the Schedules of Funding Progress included in this section, beginning on page 151. GASB 67 and 74 break the link between accounting and funding. These changes affect the accounting information, both included in the Financial Section. However, the changes do not impact the actuarial methods and assumptions used by OPERS to determine the contributions needed to fund the plans. The assumptions disclosed in this section were used for both funding and financial reporting valuations, unless otherwise noted.

OPERS conducts an experience study every five years in accordance with Ohio Revised Code Section 145.22 with the most recent experience study occurring in 2021 for the period 2016-2020. In addition to the experience studies, conditions are monitored and assumptions are reviewed annually to ensure the assumptions remain reasonable until the next scheduled experience study. If conditions change materially, it may become necessary to review and update assumptions in advance of the next scheduled experience study. In consultation with the actuary, in 2021 the Board adopted changes to reduce the long-term pension investment return assumption from 7.2% to 6.9%. In 2018, the long-term health care investment return assumption was reduced from 6.5% to 6.0%, and remained at 6.0% following the most recent experience study. Prior year (2020) valuation results are stated under the original actuarial assumptions as reported last year and are restated under the revised actuarial assumptions applicable to the 2021 valuation results.

These methods and assumptions apply to the pension plans (Traditional Pension Plan, Combined Plan, and Member-Directed Plan), as well as health care.

Pension plan and health care details can be found in the Plan Statement beginning on page 213.

Valuation Data

The demographic and financial data used in the actuarial valuations were provided to the actuary by OPERS. The actuary examined the data for general reasonableness and year-to-year consistency, but did not audit the information.

Summary of Assumptions

Funding Method

The individual entry-age actuarial-cost method of valuation was used in determining pension and health care liabilities and normal costs under both of the funding valuations included in this section, as well as the financial reporting valuations done under GASB 67 and 74 included in the Financial Section. Differences between assumed and actual experience (actuarial gains and losses) become part of actuarial accrued liabilities. For funding valuation purposes, unfunded actuarial accrued liabilities are amortized to produce payments (principal and interest), which are a level percent of payroll contributions.

Asset Valuation Method

For actuarial purposes, and under the Funding Basis, the funding value of defined benefit pension and health care assets recognizes total assumed investment returns each year. Differences between actual and assumed investment returns are phased in over a closed four-year period. The funding value is not permitted to deviate from market value by more than 12%.

Economic Assumptions

The following economic assumptions were used by the actuary in the pension and restated healthcare valuations, as noted:

- *Investment Return*—For pension, 6.90% compounded annually, net of administrative expenses. For health care, 6.00% compounded annually, net of administrative expenses.
- **Wage Inflation Rate**—Calculated at 2.75% per year. Wage inflation is defined to be the portion of total pay increases for an individual due to macroeconomic forces including productivity, price inflation, and labor market conditions. The wage-inflation rate does not include the effects of pay changes related to individual merit and seniority.
- *Price Inflation*—Of the investment return rate and wage inflation rate, 2.35% is assumed to be price inflation.
- Assumed Real Rate of Return Over Wage Inflation—For pension, 4.15% per year. For health care, 3.25% per year. The assumed real rate of return for the Funding Basis is defined as the portion of the pension and the health care investment return, 6.90% and 6.00%, respectively, that is more than the assumed total wage growth rate of 2.75%. Refer to the Notes to Combining Financial Statements, Note 7, in the Financial Section for more information on the Single Discount Rate used for the Accounting Basis calculations of the health care liability.
- Active Member Population—For pension, the sum of the active members in the Traditional Pension Plan and Combined Plan is assumed to remain constant. For purposes of financing the unfunded actuarial accrued liabilities, total payroll is assumed to grow at the wage-inflation rate of 2.75% per year.
- *Heath Care Payments*—For the 2020 health care valuation, non-Medicare retirees' health care premiums were assumed to remain level from 2020 to 2021. Beginning in 2022, these retirees were assumed to receive monthly allowances toward a health reimbursement arrangement (HRA) account, similar to Medicare retirees. The HRA allowances for eligible retirees were assumed to remain level through 2025, then increase by 3.00% annually thereafter. For projection and valuation purposes, HRA and retiree medical accounts (RMA), including Member-Directed Plan health care and wellness RMA accounts, are assumed to be allocated to the members and cannot be used in the future to fund other retiree health care expenses.

Actuarial Section

• Individual Member Pay Increases—An active member's pay is assumed to increase each year, in accordance with an age-based table. Part of the assumed increase was for merit and/or seniority increases, and the balance recognizes the wage inflation rate. The following table describes annual increase percentages for sample ages.

Individual	Individual Member Pay Increases								
	Merit and Seniority				Total Increase Next Year				
Age	State	Local	Public Safety	Law	Wage Inflation	State	Local	Public Safety	Law
30	3.88%	3.88%	4.20%	4.20%	2.75%	6.63%	6.63%	6.95%	6.95%
40	2.34	2.14	1.46	1.46	2.75	5.09	4.89	4.21	4.21
50	1.10	1.10	0.74	0.74	2.75	3.85	3.85	3.49	3.49
60	0.42	0.42	0.40	0.40	2.75	3.17	3.17	3.15	3.15

Demographic Assumptions

• **Turnover**—Represents the probabilities of separation from OPERS-covered employment before ageand-service retirement because of employment termination (withdrawal from service), death, or disability. The separation probabilities are based on historical trends of OPERS actual experience, without consideration of the manner in which the members' accounts are distributed.

Summary of Assumptions

The turnover probabilities in the tables on the previous page estimate the number of active members who will separate from employment based on the criteria of age, gender, and years of service. These members may be eligible for a refund of their account or an annuity benefit, depending on the nature of the separation. Members eligible for an annuity benefit may be eligible to participate in one of the OPERS health care plans. The method of distribution and the resulting liabilities are calculated for this population based on the following assumptions:

- Withdrawal from Service—Assumes that members terminating with less than five years of service and a percentage of all other members will withdraw their contributions and forfeit their entitlement to an employer financed benefit. For State and Local Government members, the percentage withdrawing their contributions is 35% for ages at or below 48 and is reduced for each year of age after 48, becoming 0% at age 55. For Public Safety and Law Enforcement division members, the percentage withdrawing their contributions is 50% for ages at or below 40 and is reduced for each year after age 40, becoming 0% at age 45.
- Death-in-service and Disability Benefits—Assumes that members with at least five years of service will elect to receive an annuity benefit. It is assumed that Combined Plan members will transfer to, and take a benefit from, the Traditional Pension Plan, unless a lump-sum distribution from the Combined Plan would have a greater value. It is assumed death-in-service members have two qualified survivor beneficiaries. Members eligible for an annuity may be eligible to participate in OPERS health care.
- Mortality—For pension and healthcare, pre-retirement mortality rates are based on 130% of the Pub-2010 General Employee Mortality tables (males and females) for State and Local Government divisions and 170% of the Pub-2010 Safety Employee Mortality tables (males and females) for the Public Safety and Law Enforcement divisions. Post-retirement mortality rates are based on 115% of the PubG-2010 Retiree Mortality Tables (males and females) for all divisions. Post-retirement mortality rates for disabled retirees are based on the PubNS-2010 Disabled Retiree Mortality Tables (males and females) for all divisions. For all of the previously described tables, the base year is 2010 and mortality rates for a particular calendar year are determined by applying the MP-2020 mortality improvement scales (males and females) to all of these tables.
- **Retirement**—Probabilities of age-and-service retirement applicable to members eligible to retire are as shown in the schedules on pages 143-147.

Senate Bill (SB) 343 was enacted into law with an effective date of January 7, 2013. In the legislation, members were categorized into three pension groups with varying provisions of the law applicable to each group:

- **Transition Group A**—Members eligible to retire under law in effect prior to SB 343, or who were eligible to retire no later than five years after January 7, 2013.
- Transition Group B—Members who had earned at least 20 years of service credit prior to January 7, 2013, or who will be eligible to retire no later than 10 years after January 7, 2013.
- **Transition Group C**—Members who are not in either of the other groups, as well as members who were hired on or after January 7, 2013.

See the Plan Statement beginning on page 213 for additional information.

Percent of Eligible Active Members Retiring Within Next Year

With Unreduced Age-and-Service Retirement Benefits

Members may retire with no reduction in benefits if they have attained the following division specific years of service credit and minimum ages:

Transition Group A

- State and Local—30 years of service at any age; five years of service at age 65:
 - > A service-based probability is used for members who attain 30 years of service prior to age 65;
 - > An age-based probability is used for members who attain 30 years of service on or after age 65.
- Public Safety-25 years of service and attained the age of 52; 15 years of service at age 62.
- Law Enforcement-25 years of service and attained the age of 48; 15 years of service at age 62.

Percent of Eligible Active Members Retiring Within Next Year

With Reduced Age-and-Service Retirement Benefits

Transition Group A

Members in the State and Local divisions who have a minimum of 25 years of total service credit and who have attained age 55, and members with five years of service who have attained age 60 may retire with a reduced benefit. Members in the Public Safety and Law Enforcement divisions who have a minimum of 25 years of service and who have attained age 48, and members with 15 years of service and who have attained age 52 may also retire with a reduced benefit.

Schedules of Average Defined Benefits Paid

The following tables display statistical information regarding the average defined pension benefits paid to retirees receiving an age-and-service, disability or survivor benefit. Additional benefits paid through the additional annuity and re-employed retiree programs, and annuities purchased from defined contribution accounts are excluded, as these benefits are not calculated under the defined benefit formula.

^a In 2018, the data aggregation methodology was modified for active and inactive member counts after system reconfigurations. No material impact to the actuarial valuations resulted.

¹ The number of employer units exceeds the number of reporting or participating employers as some employers report multiple divisions or agencies. The employer unit count also includes private-sector employers that have assumed privatized functions from public employers for indeterminate periods. The number of participating employers is included to comply with GASB 67 requirements for presentation of a primary government and its component units as one employer.

² The Annual Payroll, Average Pay and Percent Increase in Average Pay values in this table, for 2014 through 2016, were restated to reflect the annual covered payroll calculated under the Funding Basis. The annual covered payroll under the Funding Basis represents the annualized pay rate for all active Traditional Pension Plan members. The previous amounts reported were calculated under the Accounting Basis, which calculated annual covered payroll based on member contributions submitted within a given calendar year.

³ The number of Retired Lives represents an individual count of retirees and primary beneficiaries.

Retirees and Beneficiaries Added to and Removed from Rolls Actuarial Section

The tables below display the changes in the retiree population that occurred each year within the Traditional Pension Plan and the Combined Plan. The Annual Allowances in the Rolls at End of Year and the Average Annual Allowances represent the value of pension payments for the retiree population on the rolls at December 31, 2021.

The statistics presented below represent the number of retired members' accounts under which either the member or the members' beneficiaries are receiving defined formula benefits for age-and-service retirements, disability or survivor benefits. Annual Allowances include annual cost-of-living adjustments, but exclude other annuities such as money purchase or additional annuities.

Actuarial Section

Schedules of Funding Progress

The Schedules of Funding Progress below include the Traditional Pension Plan, the defined benefit component of the Combined Plan, and the liabilities and assets associated with the annuitized defined contribution accounts for the Combined Plan and Member-Directed Plan. Members in the Combined Plan and Member-Directed Plan have the option of converting their defined contribution accounts to a defined benefit annuity at retirement. This section also includes the Schedules of Funding Progress for health care. Separate schedules are displayed for each pension plan and health care reflecting the funding status of the plans on a valuation, or funding, basis. See pages 191 and 193 in the Statistical Section for the schedules of funding progress on an accounting, or financial, basis, for pension and health care, respectively. Separate schedules are included in the Required Supplementary Information of the Financial Section disclosing the 10-year schedule of actuarially determined contributions and actual contributions paid.

^a Revised actuarial assumptions based on experience study.

^b Results from original valuation prior to restatement after completion of experience study.

¹ The amounts reported on this schedule do not include assets or liabilities for health care. For the health care funding progress, refer to the table on page 153.

^c Results after change in discount rate from 7.5% to 7.2%.

Schedules of Funding Progress

The Combined Plan is a retirement plan with both a defined benefit and a defined contribution component. At retirement, members have the option to convert their defined contribution account to a defined benefit annuity. The schedule below includes the funding status for both defined formula benefits and the purchased annuities, when applicable.

Schedul	e of Funding P	rogress—	Funding Basis ¹ (\$ in millions)		Con	nbined Plan
Valuation Year	Actuarial Accrued Liabilities (AAL)	Valuation Assets	Unfunded Actuarial Accrued Liabilities/(Assets) (UAAL)	Ratio of Assets to AAL	Active Member Payroll	UAAL as Percent of Active Member Payroll	Amortization Years
2021	\$567	\$874	(\$307)	154.2%	\$458	0%	0
2020 ^a	508	752	(244)	148.1	443	0	0
2020 ^b	502	752	(250)	149.8	443	0	0
2019	461	646	(185)	140.1	448	0	0
2018	420	552	(132)	131.3	431	0	0
2017 ^c	382	479	(97)	125.3	413	0	0
2017	365	479	(114)	131.0	413	0	0

2012	2,666	2,524	142	94.7	N/A	N/A

^a Revised actuarial assumptions based on experience study.

^b Results from original valuation prior to restatement after completion of experience study.

e Restated upon finalization of actuarial valuation subsequent to issuance of the 2016 Comprehensive Annual Financial Report.

^d Change in discount rate from 7.5% to 7.2% did not have an impact on the results from original valuation prior to the change in discount rate.

¹ The amounts reported on this schedule do not include assets or liabilities for health care. Participants in the Member-Directed Plan do not have access to health care provided to the members of the Traditional Pension Plan or Combined Plan. Instead, a portion of the employer contributions are deposited in a retiree medical account. The retiree medical account can reimburse qualified medical expenses when a Member-Directed Plan participant terminates service or retires. For the health care funding progress, refer to the table on the next page.

Actuarial Section

Schedules of Funding Progress

The health care assets provide funding for a group of cost-sharing, multiple-employer health care plans that provide health care coverage for eligible benefit recipients in the Traditional Pension Plan and Combined Plan, as well as the Member-Directed Plan retiree medical accounts. The schedule below displays the estimated solvency years the health care assets will be able to provide health care under the intermediate actuarial assumptions.

Schedul	e of Funding P	rogress—	Funding Basis (\$	in millions)			Health Care
Valuation Year	Actuarial Accrued Liabilities (AAL)	Valuation Assets	Unfunded Actuarial Accrued Liabilities/(Assets) (UAAL)	Ratio of Assets to AAL	Active Member Payroll	UAAL as Percent of Active Member Payroll	Solvency Years ¹
2020 ^a	\$11,215	\$12,385	(\$1,170)	110.4%	\$14,383	(8%)	25
2020 ^b	11,414	12,385	(971)	108.5	14,383	(7)	25
2019 ^d	11,462	11,943	(481)	104.2	14,380	(3)	23
2018	17,849	11,647	6,202	65.3	13,807	45	11
2017°	18,393	12,021	6,372	65.4	13,498	47	13
2017	17,389	12,021	5,368	69.1	13,498	40	13

2011	31,020	12,115	18,905	39.1	12,399	153	10

^a Revised actuarial assumptions based on experience study.

^b Results from original valuation prior to restatement after completion of experience study.

 $^{\rm c}$ Results after change in discount rate from 6.5% to 6.0%.

^d Results reflect health care program changes effective January 2022, approved by the Board in January 2020.

¹ Solvency Years represents an estimate of the number of years the fund will be able to provide health care under the intermediate actuarial assumptions. Indefinite indicates funds are expected to be sufficient to fund future health care needs.

Short-Term Solvency Test

The OPERS funding objective is to pay for retirement benefits through contributions that remain approximately level from year to year as a percent of member payroll. If the contributions to the System are level in concept and soundly executed, the System will pay all promised benefits when due—the ultimate test of financial soundness.

A short-term solvency test is one method of validating the progress of the funding program. In a shortterm solvency test, the plan's present assets (cash and investments) are successively compared to: 1) active and inactive member contributions on deposit; 2) liabilities for future benefits payable to present retired lives; and 3) liabilities for service already rendered by active and inactive members.

In a plan following the discipline of level percent of payroll financing, the liabilities for member contributions on deposit (Column (1)) and the liabilities for future benefits payable to present retired lives (Column (2)) will be fully covered by existing assets (except in rare circumstances). In addition, the liabilities for service already rendered by active and inactive members (Column (3)) will be partially or fully covered by the remaining assets.

The following tables display the results of the Short-Term Solvency Test for asset values in the defined benefit Traditional Pension Plan and Combined Plan, based on the actuarial value of assets at year end.

Accrued Per	Accrued Pension Liabilities (\$ in millions) Traditional Pension Plan									
	Age	gregate Accrued L	iabilities for		Portions of Accrued Liabilities Covered by Reported Assets					
Valuation Year	(1) Active Member Contributions	(2) Retirees and Beneficiaries	(3) Active/Inactive Members (Employer-Financed Portion)	Valuation Assets ¹	(1)	(2) ^d	(3)

2012	12,640	49,667	21,357	67,670	100	100	25			

^aResults restated based on experience study.

^b Results from original valuation prior to completion of experience study.

^cResults after change in discount rate from 7.5% to 7.2%.

^d By law, OPERS is obligated to pay certain benefits that have commenced with retirees. In order to make these payments each year and hold sufficient assets in this fund to pay the vested benefits of all retirees and beneficiaries as of the actuarial valuation date, OPERS transfers funds from the active member employer fund (the Employers' Accumulation Fund) to the pension funds (the Annuity and Pension Reserve Fund and the Survivors' Benefit Fund). Thus, the amount available for active member funding is negatively impacted.

¹Does not include assets set aside for health care.

^a Results restated based on experience study.

^b Results from original valuation prior to completion of experience study.

^c Results after change in discount rate from 7.5% to 7.2%.

^d By law, OPERS is obligated to pay certain benefits that have commenced with retirees. In order to make these payments each year and hold sufficient assets in this fund to pay the vested benefits of all retirees and beneficiaries as of the actuarial valuation date, OPERS transfers funds from the active member employer fund (the Employers' Accumulation Fund) to the pension funds (the Annuity and Pension Reserve Fund and the Survivors' Benefit Fund). Thus, the amount available for active member funding is negatively impacted.

¹ Does not include assets set aside for health care.

Actual vs. Recommended Contribution Rates

The Board adopted all contribution rates as recommended by the actuary.

Analysis of Financial Experience

The following tables display the actual financial experience in relation to the actuarially assumed experience for each of the defined benefit pension plans and health care. Actuarial gains and losses in accrued liabilities result from differences between the assumed experience and actual experience.

Analysis of Financial Experience (\$ in millions, continued on next page)				
	Gains (or Losses) for Year			
Type of Activity	2021	2020	2019	2018
Age-and-Service Retirements				
When members retire at older ages than assumed, a gain results.	(\$99.6)	(\$53.3)	\$16.9	\$51.2
If members retire at ages younger than assumed, a loss occurs.				
Disability Retirements				
When disability claims are less than assumed, a gain results.	57.8	96.3	95.2	79.6
If claims are greater than assumed, a loss occurs.				
Death-In-Service Annuities				
When survivor claims are less than assumed, a gain results.	34.7	37.4	35.2	45.9
If claims are greater than assumed, a loss occurs.				
Other Separations				
When liabilities released by other separations are greater than assumed,	96.6	41.5	14.1	31.1
a gain results. If liabilities released are less than assumed, a loss occurs.				
Pay Increases				
When pay increases are less than assumed, a gain results.	(424.6)	476.7	189.7	183.0
If pay increases are greater than assumed, a loss occurs.				
Investment Return				
When investment returns are greater than assumed, a gain results.	2,996.3	2,541.8	1,565.8	(1,743.5)
If investment returns are less than assumed, a loss occurs.				, ,
Retiree Mortality ¹				
When liabilities released due to death of members are greater than assumed,	139.9	231.3	12.3	121.8
a gain results. If liabilities released are less than assumed, a loss occurs.				
Retiree Cost-of-Living Adjustments				
When cost-of-living adjustments are less than assumed, a gain results.	(178.2)	262.1	108.0	(104.6)
If cost-of-living adjustments are greater than assumed, a loss occurs.				
Gains/(Losses) During Year From Financial Experience	\$2,622.9	\$3,633.8	\$2,037.2	(\$1,335.5)

Statistical Building trust through the decades

When boarding a plane in Ohio, passengers trust the airport is well-managed and well-maintained functions handled by public employees at some airports. That trust in Ohio public employees has been earned over the decades of quality performances from Ohio's public-use airports that handle millions of business and leisure passengers each year.

Connecting members to the future: Similarly, OPERS has built trust over the decades by never missing a pension payment—each month, hundreds of thousands of retirees depend on their pension benefit, and OPERS has delivered. That trust begins in the working years of each public employee—each paycheck provides employees with contribution information—annually, all public employees are provided with a personal account statement detailing the status of their account—building trust over the decades of their public working career.

Traditional Pension Plan

Section 5

Overview

The Statistical Section provides pertinent information to assist readers when viewing the Financial Statements, Notes to the Financial Statements and Required Supplementary Information to help in understanding and assessing the System's overall financial condition. The information reported here is in compliance with Governmental Accounting Standards Board (GASB) Statement No. 44, *Economic Condition Reporting: The Statistical Section.* This statement establishes standardized reporting requirements for the supplementary information provided in this section.

The schedules and graphs beginning on the next page show financial trend information about the growth of assets for the past 10 years (where available). These schedules provide detailed information about the trends of key sources of additions and deductions to the System's assets and assist in providing a context framing how the OPERS financial position has changed over time. The financial trend schedules presented are:

- Net Position by Plan,
- Statutory Fund Balance by Plan,
- Fiduciary Net Position,
- Changes in Fiduciary Net Position,
- Deductions by Type,
- Benefits by Type,
- Health Care Expenses by Type,
- Refunds by Type, and

Additions by Source,

• Number of Refund Payments by Plan.

The schedules on pages 191-192 compare the pension assets accumulated to cover the projected pension liabilities that are ultimately due at retirement for each of the defined benefit plans and the corresponding funded ratio under both the accounting basis (GASB Statement No. 67) and the funding basis. Health care coverage is not statutorily guaranteed and may be changed to ensure long-term solvency of the plans and OPERS' ability to provide future coverage for all eligible retirees. The schedules on pages 193-194 display similar information for health care assets and projected liabilities under both the accounting basis (GASB Statement No. 74) and the funding basis. The Health Care Solvency schedule shows the estimated number of years, under the funding basis, for which assets are available to cover the projected liabilities. Refer to the schedules of pension and health care assets vs. liabilities.

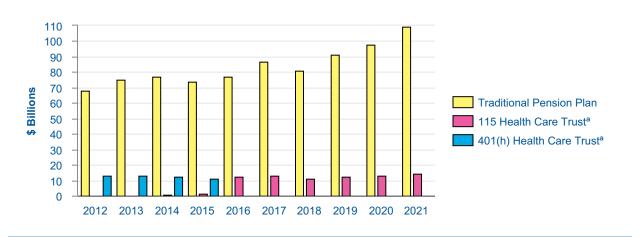

The schedules beginning on page 190 show demographic and economic information and operating information. The demographic and economic information is designed to assist in understanding the environment in which OPERS operates. The operating information is intended to provide contextual information about operations to assist in assessing the System's economic condition. The demographic and economic information and the operating information presented include:

- Funds Restricted for Member Health Care Accounts,
- · Pension Assets vs. Pension Liabilities,
- · Health Care Assets vs. Health Care Liabilities,
- Contribution Rates (Health Care),
- Health Care Self-Funding Rate,
- · Number of Retirees/Benefit Recipients by Category,
- Number of Covered Lives by Category,
- · Schedule of Retirees by Benefit Type and Amount,
- Number of New Pension Retirees,
- Schedule of Average Benefits (Traditional Pension Plan and Combined Plan),
- Member Counts by Plan,
- · 2021 Pension Benefits and Retirees by Ohio County,
- Retirees by Geographical Location,
- Contribution Rates (Pension Plans),
- · Number of Employer Units, and
- Principal Participating Employers.

All non-accounting data is derived from OPERS internal sources.

Net Position Restricted for OPEB, Beginning of Year				
Net Position Restricted for OPEB, End of Year				

¹ GASB Statement No. 74 requires health care expenses be reported net of certain health care receipts. The presentation of Retiree-Paid Health Care Premiums, Federal Subsidy and formulary rebates included in Contract and Other Receipts has been revised and is now included in Health Care Expenses, starting in 2017 upon implementation of this standard.

² The 115 Health Care Trust was established in 2014. The 401(h) Health Care Trust and the VEBA Trust were terminated as of June 30, 2016. The net positions of these trusts were consolidated into the 115 Health Care Trust on July 1, 2016. The Special Item represents this interplan activity and nets to zero in consolidation.

³ Beginning October 2014, the Board approved the funding of the VEBA Trust participant accounts using the reserves in the VEBA Trust rather than the allocation of employer contributions. Instead, employer contributions were allocated to the Member-Directed Plan to repay the original plan start-up and administrative costs. Contributions to the VEBA Trust resumed January 1, 2016.

¹ GASB Statement No. 74 requires health care expenses be reported net of certain health care receipts. The presentation of Retiree-Paid Health Care Premiums, Federal Subsidy and formulary rebates included in Vendor Rebates and Other Receipts (beginning on page 176) has been revised. Starting in 2017, upon implementation of GASB 74, these line items are included in Health Care Expenses. In this schedule, the receipts are included with Medical, Dental and Vision line items beginning in 2017.

² The 115 Health Care Trust was established in 2014. The 401(h) Health Care Trust and the VEBA Trust were terminated as of June 30, 2016. The net positions of these trusts were consolidated into the 115 Health Care Trust on July 1, 2016.

¹ Prior to 2016, the Member-Directed Retiree Medical Account Plan Claims were categorized with Annuities and Installment Payments. In order to consistently report all health care activity, the Member-Directed Retiree Medical Account Plan Claims is included on a separate line, similar to Wellness Retiree Medical Account Plan Claims and Health Reimbursement Account Plan Claims. The line item for Annuities and Installment Payments has been reduced for the Retiree Medical Account Plan Claims for all previous years presented.

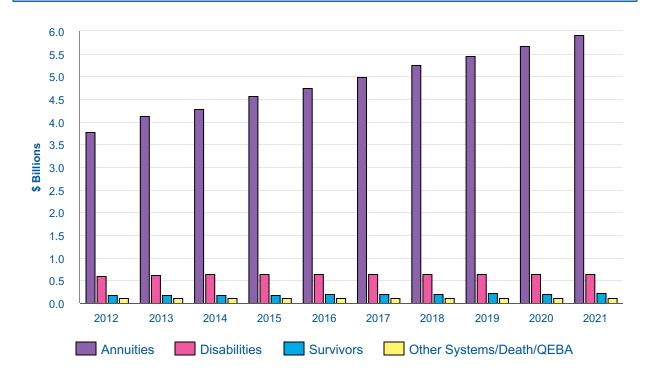

² QEBA represents Qualified Excess Benefit Arrangements.

³ The 115 Health Care Trust was established and funding began in 2014. Notional deposits to retiree accounts and initial health care disbursements began in October 2015, during the initial open enrollment period, for January 2016 premium reimbursements. The 401(h) Health Care Trust and the VEBA Trust were terminated as of June 30, 2016. The net positions of these trusts consolidated into the 115 Health Care Trust on July 1, 2016.

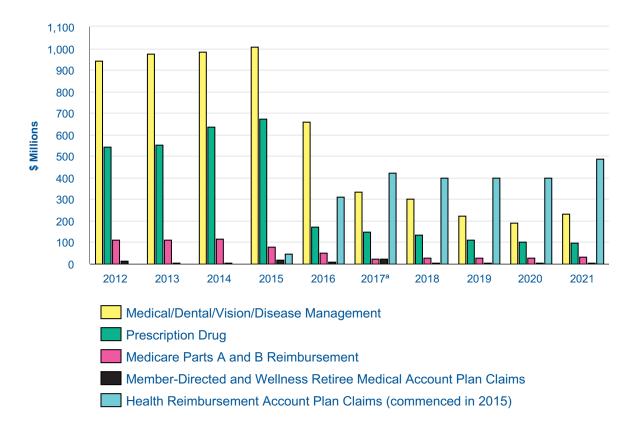

⁴ GASB statement No. 74 requires health care expenses be reported net of certain health care receipts. The presentation of Retiree-Paid Health Care Premiums, Federal Subsidy and formulary rebates included in Vendor Rebates and Other Receipts (beginning on page 176) has been revised and is now included in health care deductions, starting in 2017 upon implementation of this standard. These health care receipts are broken out by Annuities, Disabilities and Survivors on this schedule.

Pension Benefits by Type

^a Beginning in 2017, GASB Statement No. 74 requires health care expenses to be reported net of certain health care receipts. The presentation of Retiree-Paid Health Care Premiums, Federal Subsidy and formulary rebates included in Vendor Rebates and Other Receipts (beginning on page 176) has been revised and is now included in health care deductions. In this table, the receipts are netted against the Medical/Dental/Vision/Disease Management category.

OPERS notionally funds and tracks member balances in the health reimbursement arrangement (HRA) accounts, Member-Directed Plan retiree medical accounts (RMA), and wellness retiree medical accounts. The Combining Statement of Fiduciary Net Position recognizes health care payments as liabilities when a present obligation exists and a condition requires that the event creating the liability has taken place. Therefore, health care liabilities are recognized when the benefits are currently due and payable in accordance with benefit terms, as clarified in GASB 74. Health care liabilities recorded in the combining financial statements also contain estimates on incurred but not reported amounts for the current year. As a result, unspent balances remaining in the member health care accounts are not recorded as liabilities in the combining financial statements beyond what is described here as clarified in GASB 74. Total funds restricted for health care costs of all OPERS health care plans are \$14.2 billion as of December 31, 2021. While OPERS is not required to disclose the funds restricted for health care by individual plans, funds set aside in member health care accounts are tracked. This table shows these balances and a summary of activity for the year for the member HRA accounts, Member-Directed Plan, and wellness RMAs, starting with the year 2016 as that was the year of implementation for the HRA and the consolidation of all health care assets into one trust.

¹ Enrollment in wellness incentive programs was discontinued December 2016. Therefore, deposits to the wellness RMA ceased. If wellness RMA account holders also had an HRA account, the balance in the wellness RMA was transferred to the HRA. In addition, OPERS initiated an automatic claims payment process for reimbursements for retiree health care costs paid through pension deduction. This process will reimburse members for eligible health care premiums paid to OPERS up to the member's available wellness RMA balance.

² Upon the death of an HRA participant, the participant's coverage terminates. Any unused amount in the deceased participant's HRA is forfeited 24 months after the date of death. Prior to September 3, 2019, forfeitures occurred 24 months following the later of the date of death or the date the last claim was submitted on a rolling basis.

³ Upon the death of an RMA participant, the participant's coverage terminates. Any unused amount in the deceased participant's RMA is forfeited 12 months after the later of the date of death or the date the last claim was submitted on a rolling basis. Prior to March 25, 2015, forfeitures occurred 24 months following the later of the date of death or the date the last claim was submitted on a rolling basis.

¹ The Accounting Basis is calculated under GASB 67. GASB 67 was initially implemented in 2014; data for years prior to 2014 is not available. For more information on the Accounting Basis, refer to Note 6 beginning on page 65 in the Financial Section.

The calculation method defined in GASB 67 (Accounting Basis) requires different assumptions than are used to calculate the funded status of a plan (Funding Basis). The following table identifies the two key differences between the two methods. Additional details on the Accounting Basis actuarial assumptions can be found in the Financial Section (see Note 6 beginning on page 65). Funding Basis assumptions can be found in the Actuarial Section beginning on page 135.

Pension Assumptions—Key Differences Between Accounting and Funding Valuations									
Valuation Basis	Accounting	Funding							
Measurement and Valuation Date	December 31, 2021	December 31, 2021							
Assets Valuation Method	Fair Value	4-year, smoothed market-12% corridor ²							
Investment Rate of Return Used to Calculate Liability	Single Discount Rate ¹ 6.90%	Actuarial Assumed 6.90%							

¹ As required in GASB 67, a Single Discount Rate may be required to measure the pension liability if existing assets are not projected to be available to make all projected future benefit payments of current plan members. The GASB 67 pension calculation determined that a blended rate for the year ended December 31, 2021 was not needed. Therefore, the long-term expected rate of return on pension plan investments, 6.90%, was applied to all periods of projected benefit payments to determine the Total Pension Liability.

² For actuarial purposes, and under the Funding Basis, the funding value of defined benefit assets recognizes total assumed investment returns fully each year. Differences between actual and assumed investment returns are phased in over a closed four-year period. The funding value is not permitted to deviate from fair value by more than 12%.

^a Information after completion of the experience study.

^b Information prior to completion of the experience study.

^c Information prior to benefit changes enacted January 7, 2013.

^d Valuation revised to reflect benefit changes enacted January 7, 2013.

^e Restated upon finalization of actuarial valuation subsequent to issuance of 2016 Comprehensive Annual Financial Report.

^f Information after change in discount rate from 7.5% to 7.2%.

¹ Table presents actuarial information on a Funding Basis. For more information on the Funding Basis, refer to the Actuarial Section beginning on page 135.

² For actuarial purposes, and under the Funding Basis, the funding value of defined benefit assets recognizes total assumed investment returns each year. Differences between actual and assumed investment returns are phased in, or smoothed, over a closed four-year period. The funding value is not permitted to deviate from fair value by more than 12%. This amount represents the net unrealized investment gains/losses remaining at the end of each year to be smoothed in future years.

Health Care Assets vs Health Care Liabilities—Acco	unting Ba	asis¹ (last fiv	e years, \$ in r	millions)	
Year	2021	2020	2019	2018	2017
Plan Fiduciary Net Position	\$14,225	\$13,227	\$12,647	\$11,253	\$12,819
Total OPEB Liability	\$11,093	\$11,446	\$26,460	\$24,291	\$23,678
Net OPEB Liability/(Asset)	(\$3,132)	(\$1,781)	\$13,813	\$13,038	\$10,859
Plan Fiduciary Net Position as a Percentage of Total OPEB Liability	128.23%	115.57%	47.80%	46.33%	54.14%

¹ The Accounting Basis is calculated under GASB 74. GASB 74 was implemented as of December 31, 2017, data prior to 2017 is not available. For more information on the Accounting Basis, refer to Note 7 beginning on page 67 in the Financial Section.

The calculation method defined in GASB 74 (Accounting Basis) requires different assumptions than are used to calculate the funded status of the program (Funding Basis). The following table identifies the key differences between the two methods. Additional details on the Accounting Basis actuarial assumptions can be found in the Financial Section (see Note 7 on page 67). Funding Basis assumptions can be found in the Actuarial Section starting on page 135.

Health Care Assumptions—Key Difference	es Between Accounting	and Funding Valuations
Valuation Basis	Accounting	Funding
Actuarial Valuation Date	December 31, 2020	December 31, 2020
Rolled-Forward Measurement Date	December 31, 2021	N/A
Asset Valuation Method	Fair Value	4-year, smoothed market—12% corridor ²
Investment Rate of Return Used to Calculate Liability	Single Discount Rate ¹ 6.00%	Actuarial Assumed 6.00%

¹ Projected benefit payments are required to be discounted to their actuarial present value using a Single Discount Rate that reflects: (1) a long-term expected rate of return on OPEB plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits), and (2) a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the rolled-forward measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met). For the purpose of this rolled-forward measurement date valuation, the expected rate of return on OPEB plan investments is 6.00%; the municipal bond rate is 1.84% (based on the daily rate closest to but not later than the measurement date of the Fidelity 20-year Municipal GO AA Index). The resulting Single Discount Rate is 6.00%.

² For actuarial purposes, and under the Funding Basis, the funding value of defined benefit assets recognizes total assumed investment returns each year. Differences between actual and assumed investment returns are phased in over a closed four-year period. The funding value is not permitted to deviate from fair value by more than 12%.

^d Results reflect health care program changes effective January 2022, approved by the Board in January 2020.

¹ This table presents actuarial information on a Funding Basis. For more information on the Funding Basis, refer to the Actuarial Section beginning on page 135. ² Funds expected to be sufficient to fund future health care needs.

³ For actuarial purposes, and under the Funding Basis, the funding value of defined benefit assets recognizes total assumed investment returns each year. Differences between actual and assumed investment returns are phased in, or smoothed, over a closed four-year period. The funding value is not permitted to deviate from fair value by more than 12%. This amount represents the net unrealized investment gains/losses remaining at the end of each year to be smoothed in future years. The Board approved changes to the OPERS health care plans in 2012. The ultimate goal of the health care changes was to match the income to the health care trust and disbursements from the health care trust. Additionally, the Board established a health care stabilization fund to hold excess income. The balance of the stabilization fund will supplement income to the health care core (operating) fund when employer contributions, investment income or disbursements do not meet targets. The stabilization fund is an accounting function only and not listed separately in the combining financial statements. Health care valuations disclosed previously (both on a Funding and Accounting basis) are prepared using total health care fund assets. The table below displays the valuation results for the health care plans using only the core fund assets and no stabilization fund assets.

2011	6.4

^a From 2008 through 2010, the employer contribution rate allocated to health care by the Combined Plan was less than the Traditional Pension Plan. Payment of the impact of the rate difference commenced in 2011 and continued in 2012. The total repaid to the 401(h) Health Care Trust exceeded the required amount. As a result, the amount contributed to the 401(h) Health Care Trust by the Combined Plan in 2013 was less than the actual contribution rate listed above.

^b Information after completion of the experience study.

^c Information prior to completion of the experience study.

^d Information after change in discount rate from 6.5% to 6.0%.

^e The significant decrease in contribution rate is a result of health care program changes effective January 1, 2022.

¹ The self-funding rate is the percentage of contribution required to fund health care indefinitely without regard to repayment of the liability within 30 years.

Number of Retirees/Benefit Recipients by Category

The values included in the following tables represent the number of individuals receiving benefit payments. The counts represent retired member accounts only, regardless of the number of recipients designated by the retiree's plan of payment. These statistics are representative of the OPERS contributing membership.

Traditional Pensio	n Plan			
Year End	Annuities	Disabilities	Survivors	Total
2021	187,238	18,373	12,546	218,157
2020	183,950	19,287	12,491	215,728
2019	181,623	20,090	12,565	214,278
2018	179,113	20,684	12,541	212,338

2014	167,608	22,532	12,649	202,789
2013	160,815	22,791	12,743	196,349
2012	155,008	22,768	12,712	190,488

Annuities are comprised of a defined formula benefit paid to contributing members retiring with an ageand-service benefit, as well as, benefit annuities paid through the Additional Annuity and Money Purchase plans (refer to Plan Statement beginning on page 213). Members who retired from other Ohio retirement systems may return to OPERS-covered employment under the OPERS Money Purchase plan. These members receive an annuity in accordance with that program, based on the contributions paid during the re-employment period.

The table below displays the composition of the Traditional Pension Plan Annuities by type for 2012 through 2021. The Other Annuities column represents Money Purchase and Additional Annuity plan benefits. These benefits may accrue to members whose primary retirement is with OPERS or through another Ohio retirement system (ORS retirees).

Traditional Pens	sion Plan Annuiti	es			
Year End	Age-and-Service Annuities	Age-and-Service Receiving Other Annuities	Subtotal Age-and-Service Annuities	Other Annuities (ORS retirees)	Total
2021	182,347	3,355	185,702	1,536	187,238
2020	179,090	3,321	182,411	1,539	183,950
2019	176,792	3,266	180,058	1,565	181,623
2018	174,382	3,166	177,548	1,565	179,113

2012	151,765	2,112	153,877	1,131	155,008

Number of Retirees/Benefit Recipients by Category (continued)

The values included in the table below represent the number of retirees receiving benefit payments. Members in the Combined Plan receive an age-and-service defined formula benefit annuity from their employer contribution account, and may not elect a retirement distribution from their defined contribution (DC) account until they qualify for a defined benefit retirement. Prior to 2012, members in both the Combined Plan and Member-Directed Plan had the option to defer all or a portion of their defined contribution account, annuitize, or elect to receive installment payments from the defined contribution account. Effective April 1, 2012, the installment payment options were eliminated and new retirees may elect to annuitize, transfer their defined contribution account to another financial institution, or refund their account (refer to the Plan Statement beginning on page 213).

Year End	Age-and-Service Annuities	Annuitized DC Accounts	Installment Payments	Liquidated or Deferred DC Accounts ²	Number of Retirees
2021	549	365	2		549
2020	465	311	4		465
2019	391	266	4		391
2018	337	229	4		337
2017	283	193	6		283
2016	238	158	6		238
2015	196	128	7		196
2014	156	99	7		156
2013	100	64	7	1	100
2012	55	37	13	5	55

¹As of April 1, 2012, no member had elected a combination annuity and installment payment benefit distribution since commencement of the plan January 1, 2003. Retirements effective on or after April 1, 2012 no longer have this option.

² Beginning in 2013, the number of members receiving a defined benefit age-and-service benefit does not equal the number of members receiving a defined contribution benefit. The defined contribution options of transferring the defined contribution account to another financial institution or refunding the account are recorded in OPERS systems as refund transactions. These specific types of refunds cannot be segregated from withdrawal from service refunds.

Member-Di	Member-Directed Plan ¹							
Year End	Annuities	Installment Payments	Total					
2021	382	2	384					
2020	330	3	333					
2019	316	4	320					
2018	278	5	283					
2017	242	5	247					
2016	219	7	226					
2015	185	9	194					
2014	154	13	167					
2013	131	14	145					
2012	62	16	78					

¹As of April 1, 2012, no member had elected a combination annuity and installment payment benefit distribution since commencement of the plan on January 1, 2003. Retirements effective on or after April 1, 2012 no longer have this option.

Number of Covered Lives by Category

The values included in the tables below represent the number of lives covered by OPERS health care plans. The counts for the Health Care Plans table reflect the number of retirees and primary beneficiaries receiving coverage through the group health care plans or enrolled in the HRA program, and the number of additional dependents and other beneficiaries receiving coverage through the group health care plans. In addition to a retiree, a primary benefit recipient could be a survivor of a deceased retiree continuing to receive coverage on the member's account. The values in the retirees and primary beneficiaries column represent OPERS contributing membership, while dependents and other beneficiaries represent other family members receiving primarily dental and vision coverage through a retiree's account. These counts represent all Traditional Pension Plan and Combined Plan retirees, dependents, and beneficiaries receiving post-employment health care coverage.

Health Care	Health Care Plans							
Year End	Number of Retirees and Primary Beneficiaries	Number of Dependents and Other Beneficiaries	Total Covered Lives					
2021 ^b	134,453	—	134,453					
2020	138,906	25,130	164,036					
2019	142,369	28,141	170,510					
2018	146,410	31,670	178,080					
2017 ^a	150,363	36,362	186,725					
2016 ^a	153,272	42,230	195,502

2014	167,327	58,692	226,019					
2013	165,967	61,041	227,008					
2012	163,940	62,456	226,396					

^a Restated amounts for Health Care Connector.

^b Effective December 31, 2021, OPERS no longer provided self-insured group health care or prescription drug plans for non-Medicare retirees or their eligible dependents. Eligible non-Medicare retirees can select an individual health care plan on the open market and receive an HRA allowance. Number of Retirees and Primary Beneficiaries in the table above includes Medicare retirees as of December 31, 2021 and 29,697 retirees newly enrolled in the Connector program as of January 1, 2022.

The Member-Directed Plan Retiree Medical Account is an account in the member's name that can be used to reimburse qualified medical expenses for Member-Directed Plan retirees and eligible family members. Funding for Member-Directed Plan health care was accumulated in a Voluntary Employees' Beneficiary Association Trust (VEBA Trust). The VEBA Trust was closed as of June 30, 2016 and the net position transferred into the 115 Health Care Trust (115 Trust) on July 1, 2016. Beginning July 1, 2016, funding for the Member-Directed Plan health care is accumulated in the 115 Trust.

Member-Directed Plan Retiree Health Care

Totals	182,347	3,355	185,702	18,373	12,546	1,536	218,157			

Effective April 1, 2012, members electing to retire in the Combined Plan and Member-Directed Plan have the option to use their defined contribution account to annuitize, to transfer their defined contribution account to another financial institution, or to receive a refund of their defined contribution account. Prior to April 1, 2012, these members also had the option to draw on their defined contribution account under an installment payment plan. The installment payment option is still effective for members who retired prior to April 1, 2012.

Combined Plan members are also eligible for a defined formula benefit from their employer contributions. The Employer Age-and-Service Annuities column represents members receiving a formula benefit. Members may receive payments of their defined contribution accounts under the methods described above. For those members who retired prior to April 1, 2012, only installment payments with a remaining account balance are counted.

Number of New Pension Retirees

The values included in the following tables represent the number of new benefit recipients each year. The counts represent retired members only, regardless of the number of recipients designated by the retiree's plan of payment. These statistics are representative of contributing membership.

Traditional F	Traditional Pension Plan								
Year	Annuities	Disabilities	Survivors	Total					
2021	8,995	456	440	9,891					
2020	7,823	465	345	8,633					
2019	7,204	527	404	8,135					
2018	7,475	513	364	8,352					
2017	7,668	550	446	8,664					
2016	7,388	641	430	8,459					
2015	7,209	737	355	8,301					
2014	11,011	702	368	12,081					
2013	9,831	971	446	11,248					
2012	9,793	1,245	358	11,396					

Annuities are comprised of a defined formula benefit paid to contributing members retiring with an ageand-service benefit, as well as benefit annuities paid through the Additional Annuity and Money Purchase plans (refer to the Plan Statement beginning on page 213). Members who retired from another Ohio retirement system may return to OPERS-covered employment under the OPERS Money Purchase plan. These members receive an annuity in accordance with that program based on the contributions paid during the re-employed period.

The table below displays the composition of the 2012 through 2021 Traditional Pension Plan Annuities by type. The Other Annuities column represents Money Purchase and Additional Annuity plan benefits. These benefits may accrue to members whose primary retirement is with OPERS or through another Ohio retirement system (ORS retirees).

2013	9,476	53	9,529	302	9,831					
2012	9,607	53	9,660	133	9,793					

Number of New Pension Retirees (continued)

Effective April 1, 2012, members electing to retire in the Combined Plan and Member-Directed Plan have the option to use their defined contribution account to annuitize, to transfer their defined contribution account to another financial institution, or to receive a refund of their defined contribution account. Prior to April 1, 2012, these members also had the option to draw on their defined contribution account under an installment payment plan. The installment payment option is still effective for members who retired prior to April 1, 2012 with no new elections after that date.

Combined Plan members are also eligible for a defined formula benefit from their employer contributions. The Employer Age-and-Service Annuities column represents members receiving a formula benefit. Members may receive payments of their defined contribution accounts under the methods described above.

Combined	Combined Plan

Schedule of Average Benefits

This schedule displays the number of new retirees each year, grouped by years of credited service. Prioryear numbers are not adjusted as members roll off the rolls. Retirement benefits are calculated based on the final average salary (FAS) of the member, representing the member's three (or five) highest years of earnings (refer to the Plan Statement beginning on page 213 for benefit eligibility requirements). The Average Final Average Salary represents a composite for each group.

¹ All years begin January 1 and end December 31.

Member Counts by Plan

The tables below represent the number of retired members in each retirement plan based on their status in the plan, regardless of the number of recipients designated by the retiree's plan of payment. These statistics are representative of OPERS contributing membership. Eligible members have the ability to change plans during their career, and leave their contribution accounts behind with the plan under which the contribution was made. Accordingly, a member may be active in one plan and inactive in another. See the table at the bottom of the next page for a composite total count of active, inactive, and retired members regardless of plan.

Member Counts by Plan (continued)

The values included in the tables below represent the number of individuals covered by the OPERS health care plans. Members include active and inactive employees, retirees, primary beneficiaries, dependents and other beneficiaries. In addition to a retiree, a primary benefit recipient could be a survivor of a deceased retiree. The survivor is continuing to receive coverage on the retiree's account, which is representative of the OPERS contributing membership. Dependents and Other Beneficiaries primarily receive dental and vision coverage.

^a Restated amounts for Health Care Connector.

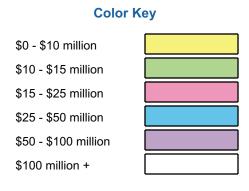

^b Effective December 31, 2021, OPERS no longer provided self-insured group health care or prescription drug plans for non-Medicare retirees or their eligible dependents. Retirees and Primary Beneficiaries in the tables above includes Medicare retirees as of December 31, 2021 and 29,697 retirees newly enrolled in the Connector program as of January 1, 2022. Refer to the Plan Statement beginning on page 213 for more information.

Member Counts by Plan (continued)

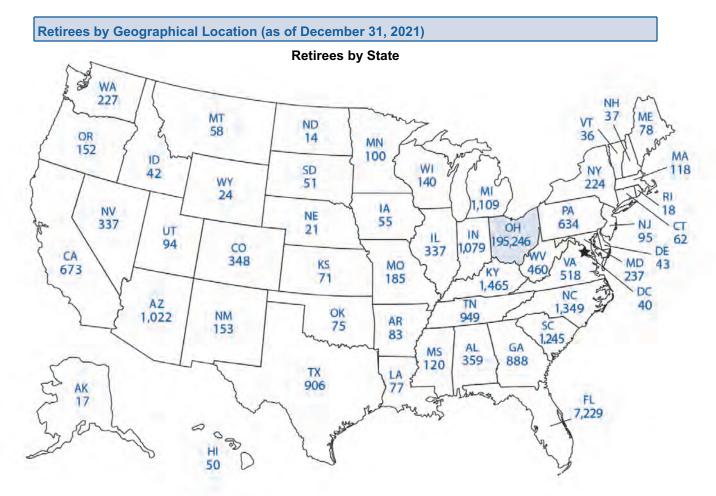

The Member-Directed Health Care Plan table represents participant counts in this plan for members in the Member-Directed Plan. Contributions are paid into the account during the member's career for use after retirement. The account is in the member's name and can only be used by the member to pay qualified medical expenses for the retiree and eligible family members. (Refer to the Plan Statement beginning on page 213.)

Member Cou	Member Count—Health Care Plans Member-Directed Health Care Plan							
Year End	Active	Inactive	Retiree Recipients	Total

¹ Beginning October 2014, the Board approved the funding of participant Member-Directed Plan health care accounts using the reserves in the Member-Directed Plan health care plan (formerly VEBA Trust) rather than the allocation of employer contributions. Instead, employer contributions were allocated to the Member-Directed Plan through December 31, 2015 to repay the plan start-up and administrative costs. Contributions resumed to the Member-Directed health care plan January 2016.

² Beginning 2020, a portion of the mitigating rate is funded with reserves.

¹ The number of employer units exceeds the number of reporting employers as some employers report multiple divisions or agencies. This count also includes private-sector employers that have assumed privatized functions from public employers for indeterminate periods. The number of employers reporting at December 31, 2021 was 3,219.

^a The implementation of GASB 67 in 2014 modified the requirements of this schedule. Prior to GASB 67, OPERS reported number of employer units only. Beginning 2014, OPERS changed the presentation to reflect the number of participating employers, which is most associated with the reporting entities. A reporting entity can include multiple employer units. For example, a single reporting entity (a county) may report as three employer units (a county, hospital and law enforcement). The OPERS employer system is dynamic and historical reports based on participating employers by employer type, or reporting entities by employer type, do not exist. As a result, the values for 2012 in this table reflect the number of employers based on employer units.

¹ This table displays additional information on the All Others category in the table above and the table on the previous page presenting the 10 largest employers. To get the total number of employers reported in the table and related footnote on the previous page, combine the numbers in this table with those on the previous page for the employer units (10 plus 3,680 = 3,690 for 2021) and participating employers (10 plus 3,209 = 3,219 for 2021). GASB requires a 10 year look-back to the year being presented. Therefore, information for 2013 through 2020 is not relevant.

Plan Statement Enhancing the quality of life for all Ohioans

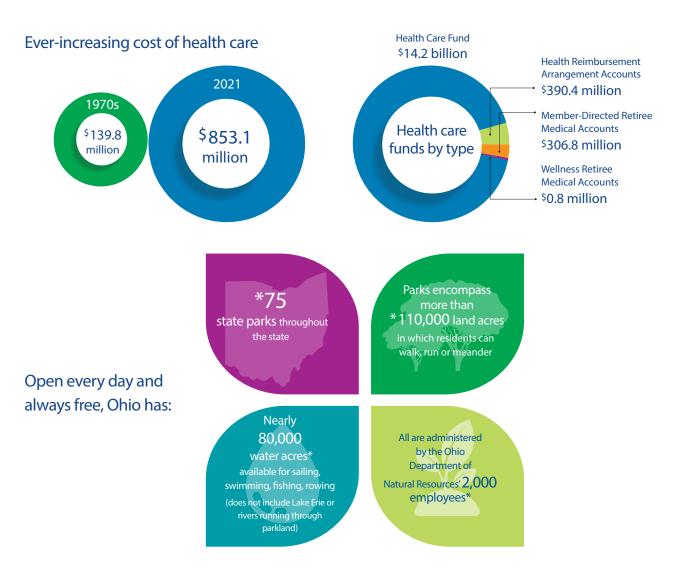

Ohio's public employees help ALL residents at work, at home and at play. Quality-of-life enhancements provided by Ohio's public employees—including public transportation, community events, recreational opportunities, and healthy lifestyle programs—make Ohio a great place to live—and visit.

Section 6

Access to health care is an important quality-of-life element. Although OPERS-provided health care is neither mandated nor guaranteed, the importance of access to health care in retirement is recognized. OPERS has provided access to quality health care in retirement since 1974.

Ohio's public employees (OPERS members) provide an array of quality-of-life activities that positively impact residents going about daily life—including lifeguards, administrators (who implement community programs such as parades, fireworks, and veteran programs), utilities and environmental inspectors, safety inspectors and more.

Connecting members to the future: A significant contributor to controlling health care costs for retirees is adopting healthy lifestyles during working careers. Healthy lifestyles include engaging in leisure-time activities—Ohio's public employees provide recreational activities that are now recognized across the nation. Columbus Zoo and Aquarium employees are OPERS members, hosting 2.3 million visitors each year—providing a tourism opportunity for members and retirees. These activities and opportunities provide an enhanced quality of life for residents and make Ohio a tourist destination—a strong economic driver.

*Recreation information from Columbus Zoo and Aquarium website or Ohio Department of Natural Resources website.

The Ohio Public Employees Retirement System (OPERS or System) was created in 1935 by the Ohio General Assembly to provide retirement, disability, and survivor benefit programs to state and local employees. This summary outlines the plan features; however, it is not a substitute for the state and federal laws that govern OPERS.

All public employees in Ohio, except those covered by another state retirement system in Ohio or by the Cincinnati Retirement System, are required to become contributing members of OPERS when beginning public employment unless exempted or excluded.

The law provides for optional membership for elected public officials who did not contribute on prior elective service. Students, not already members, working for the public school, college, or university that they are attending may be exempt from contributing to OPERS by filing a request for exemption within the first month of employment.

OPERS provides special retirement coverage for certain Law Enforcement officers whose primary duties are to preserve the peace, to protect life and property, and to enforce the laws of Ohio. The Law Enforcement division has its own retirement, disability, and survivor benefit eligibility provisions.

Plan Types

For more than 85 years, OPERS has provided members with retirement benefits under a defined benefit plan, known as the Traditional Pension Plan.

In 2000, legislation required OPERS to establish one or more defined contribution plans to be offered to members in addition to the existing Traditional Pension Plan. OPERS began offering three retirement plans to members on January 1, 2003. The plans include the Traditional Pension Plan, the Member-Directed Plan, and the Combined Plan. A brief overview of each plan is provided below.

• The Traditional Pension Plan

The Traditional Pension Plan is a defined benefit plan under which a member's retirement benefit is based on a formula. The formula is determined by the years of service credit and the average of the three or five (based on retirement group) highest years of eligible salary, referred to as final average salary (FAS). OPERS investment professionals manage the investment of member and employer contributions to ensure that funds are available to pay the formula benefit.

• The Member-Directed Plan

The Member-Directed Plan is a defined contribution plan under which member and a portion of the employer contributions are deposited into a member's individual account and the member directs the investment by selecting from professionally managed OPERS investment options. Members become vested in the employer contributions at a rate of 20% for each year of participation until the member is fully vested at the end of five years. The account value available at retirement is based on member and vested employer contributions and the investment gains and losses on those contributions.

• The Combined Plan

The Combined Plan is a retirement plan with both a defined benefit and a defined contribution component. The employer contributions fund the defined benefit portion of the Combined Plan. The member's defined benefit retirement component is determined by a formula similar to, but lower than, the Traditional Pension Plan formula. OPERS investment professionals manage the investment of the employer contributions to ensure that funds are available to pay the formula benefit. Under the defined contribution component of the Combined Plan, member contributions are deposited into the member's individual account and the member directs the investment by selecting from professionally managed OPERS investment options. The defined contribution account value available at retirement is based on member contributions and the investment gains and losses on those contributions. The Combined Plan is no longer available for new members after December 31, 2021.

Contributions

Employers are required to make contributions to the System on the basis of a percent of eligible salary and at a rate based upon the recommendations of the OPERS actuary, subject to the statutory limitations. Penalties and interest are assessed for late payments. The contribution rate for State and Local employers in 2021 was 14.0%. Employers in the Law Enforcement and Public Safety divisions contributed 18.1%.

The 2021 member contribution rate for State and Local members was 10.0% of eligible salary. Members in the Public Safety division contributed 12.0% of eligible salary, while members in the Law Enforcement division contributed 13.0%. Funds contributed by members of the Traditional Pension Plan are fully refundable at service termination or death. The refund value of contributions made by members of the Combined Plan and the Member-Directed Plan are subject to the investment results (gains or losses) of the member's selected investment options.

Benefits under the Traditional Pension Plan or the Combined Plan

Age-and-Service Retirement

In 2012, the Ohio General Assembly enacted into law a number of significant plan design changes that became effective on January 7, 2013. In the legislation, members were categorized into three groups with varying provisions of the new law applicable to each group. Members who were eligible to retire under the law in effect prior to the legislation or who were eligible to retire no later than five years after January 7, 2013, comprise retirement Group A. Members who had 20 years of service credit prior to January 7, 2013, or who will be eligible to retire under the law in effect prior to the legislation no later than 10 years after January 7, 2013, are included in retirement Group B. Retirement Group C includes those members who are not in either of the other groups and members who were hired on or after January 7, 2013.

Retirement benefits are specific to each plan and members must meet the eligibility requirements based on their age and years of service within the plan. Retirement eligibility also varies by division and retirement group. The charts below show the retirement eligibility requirements for all divisions and retirement groups. The requirements for the State and Local divisions apply to members who participate in either the Traditional Pension Plan or the Combined Plan. The Law Enforcement and Public Safety divisions are only applicable to the Traditional Pension Plan.

Unreduced	Group A		Gro	up B	Group C	
Unreduced	Age	Service	Age	Service	Age	Service
	Any	30	52	31	55	32
State/Local		Any		32		
	65	5	66	5	67	5
Law Enforcement	48	25	50	25	52	25
Law Enforcement	62	15	64	15	64	15
Dublic Sofety	52	25	54	25	56	25
Public Safety	62	15	64	15	64	15
Law and Public Safety (public safety benefit)	52	25	54	25	56	25

Reduced	Group A		Group B		Group C	
	Age	Service	Age	Service	Age	Service
State (Lana) 55	25	55	25	57	25	
State/Local	60	5	60	5	62	5
Lew Enforcement	famour 50	15	52	15	56	15
Law Enforcement 52	52		48	25	48	25
Dublic Sofety	52	15	52	15	56	15
Public Safety	48	25	48	25	52	25
Law and Public Safety (public safety benefit)	48	25	48	25	52	25

Benefit payments vary in amount depending on years of service credit, FAS, age, and plan of payment selection. FAS is the average of the three highest years of eligible salary for Groups A and B; and the average of the five highest years of eligible salary for members in Group C. The age-and-service formula benefit cannot exceed 100% of FAS (Law Enforcement is 90%), or the limits under Internal Revenue Code Section 415, and may be subject to the contribution-based benefit cap. The base benefit amount calculated by the formula will be reduced if a member begins receiving a retirement benefit before they reach the age-and-service requirements for an unreduced benefit.

Disability Benefits

OPERS members are eligible for one of two disability programs: the original plan or the revised plan. Members who had contributions on deposit with OPERS on July 29, 1992, had a one-time opportunity to select coverage under one of these programs. Employees hired after July 29, 1992, are covered only under the revised plan. A number of features are common to both plans.

A member who has at least five years of service credit in either the Traditional Pension Plan or the Combined Plan and who becomes permanently mentally or physically disabled from the performance of their last public position may apply to OPERS for monthly disability benefits. Members in the Law Enforcement or Public Safety divisions may apply for disability at any time if the disabling condition was the result of an on-duty illness or injury. Coverage is limited to illness or injury that occurs before the member's contributing service terminates or, in the case of illness or injury that results from the member's employment, becomes evident no later than two years after the date the contributing service ends. The coverage does not extend to disability resulting from elective cosmetic surgery other than reconstructive surgery.

Survivor Benefits

A member's beneficiary is determined by statutory automatic succession unless a specific designation is made in writing on a form provided by OPERS.

Qualified beneficiaries will be eligible to receive monthly survivor benefits if, at the time of the member's death, certain qualifications were met.

If those qualifications were not met, a refund of the member's OPERS account value as defined by the Ohio Revised Code may be made.

Additional Benefits

Cost-of-Living Adjustment

When a benefit recipient has received benefits for 12 months, current law provides for an annual cost-ofliving adjustment. This cost-of-living adjustment is calculated on the base retirement benefit at the date of retirement and is not compounded. For those who retired prior to January 7, 2013, the cost-of-living adjustment is 3%. For those retiring subsequent to January 7, 2013, beginning in calendar year 2019, the cost-of-living adjustment is based on the increase in the Consumer Price Index, capped at 3%.

Death Benefit

Upon the death of an age-and-service or disability benefit recipient, a lump-sum death benefit is paid to the qualified beneficiary. The benefit ranges from \$500 to \$2,500 based on the recipient's years of service credit.

Qualified Excess Benefit Arrangement

Total benefit payments to an individual are subject to the limitations identified in Section 415(b) of the Internal Revenue Code. In 2003, OPERS implemented a Qualified Excess Benefit Arrangement (QEBA) that allows OPERS recipients to receive the amount of their benefit that is subject to the IRS limits.

Refunds

A refund may be issued after two months have elapsed since the member terminated public service. For members of the Traditional Pension Plan, the refund value is equal to their member contributions plus interest. Members of the Combined Plan may refund their defined contribution account balance comprised of member contributions and investment gains or losses on those contributions, and any member contributions plus interest in the defined benefit portion of the plan arising from the purchase of eligible service. Members of the Traditional Pension Plan and the Combined Plan may also qualify for an additional amount calculated on their eligible contributions. Under the Traditional Pension Plan, full recovery of all member contributions to OPERS is guaranteed.

Refunded service credit may be restored in the Traditional Pension Plan and the Combined Plan if the member returns to OPERS-covered employment for at least 18 months in the plan from which the refund was issued. The amount refunded, including interest and the additional amount (if applicable), must be repaid for service credit to be restored. The member must also pay interest (compounded annually) at a rate determined by the Board for the period from the date of refund to the date the refunded amount is repaid.

Benefits under the Member-Directed Plan

Retirement

Members participating in the Member-Directed Plan are eligible to retire after they reach age 55. The current vested value of the individual account is available at retirement. The balance can be converted to a lifetime annuity through OPERS; or a portion of the balance can be converted to an annuity through OPERS and the remainder can be rolled over to another eligible retirement plan or made payable to the member with taxes withheld.

Disability and Survivor Benefits

Participants in the Member-Directed Plan are not eligible for disability or survivor benefits. In the event of disability or death, the vested portion of the member's individual account is available for refund to the member or qualified beneficiaries.

Refunds

A refund may be issued after two months have elapsed since the member terminated public employment. Members participating in the Member-Directed Plan may receive member contributions and investment gains or losses on those contributions. Depending on length of participation in the Member-Directed Plan, a member may also receive a portion of the employer contributions, plus any investment gains or losses on those contributions, based on the schedule below.

Years of Participation	Percent Vested		
Less than 1 year	0%		
1 year	20%		
2 years	40%		
3 years	60%		
4 years	80%		
5 or more years	100%		

Benefits for Re-employed Retirees

After a member retires, re-employment in an OPERS-covered job, including service in an elected position, is permitted but may affect continuing receipt of an age-and-service retirement benefit. Contributions must begin from the first day of re-employment. However, members who are re-employed anytime within the first two months after their effective retirement benefit date will forfeit their retirement benefit during this two-month period. This prohibition applies even if salary is waived for the two-month forfeiture period. OPERS health care coverage is also not available during any period of pension benefit forfeiture, and contributions remitted during the two-month forfeiture period will not be included in the calculation of a Money Purchase Plan benefit.

During re-employment, the retiree participates in the Money Purchase Plan. Upon termination of reemployment, retirees under age 65 may receive a refund of their Money Purchase account consisting of their member contributions made during the period of re-employment, plus interest. Retirees age 65 and older may receive an annuity benefit or lump sum payment that is based on the amount of their member contributions during the period of re-employment plus interest, and an amount from the employer's contributions established by the Board.

Health Care Coverage for Traditional Pension Plan and Combined Plan

With one exception, OPERS-provided health care coverage is neither guaranteed nor statutorily required. Ohio law currently requires Medicare Part A equivalent coverage or Medicare Part A premium reimbursement for eligible retirees and their eligible dependents.

Eligibility

Members who applied for age-and-service retirement with effective dates of December 1, 2014, or earlier, and who had 10 or more years of service credit, had access to OPERS-provided health care coverage on a subsidized basis. Beginning January 1, 2015, members must be at least age 60 with 20 years of qualifying service. Members in Group A are eligible for coverage at any age with 30 or more years of qualifying service. Members in Group B are eligible at any age with 32 years of qualifying service, or at age 52 with 31 years of qualifying service. Members in Group C are eligible for coverage with 32 years of qualifying service and a minimum age of 55. See the Age-and-Service Retirement section beginning on page 215 for a description of Groups A, B and C.

Beginning January 1, 2014, qualifying contributing service credit for health care will be accumulated only if the member's eligible salary is at least \$1,000 per month. Partial health care credit will not be granted for months in which eligible salary is less than \$1,000. Credit earned prior to January 2014 will not be affected by this requirement.

In addition to retirees, access to health care coverage is also available for disability recipients and survivor recipients. Spouses and dependents of eligible recipients, as defined in rules governing the health care plans, may be covered through additional premiums.

Recipients of disability benefits prior to January 1, 2014, have continued access to health care coverage while the disability benefit continues and will not be subject to the five-year rule described below. The allowance will be determined in the same way as an age-and-service retiree. If the recipient does not meet minimum age-and-service requirements, the minimum allowance will be used. Recipients with an initial disability effective date on or after January 1, 2014, will have coverage during the first five years of disability benefits. After five years, the recipient must meet minimum age-and-service health care eligibility requirements or be enrolled in Medicare (due to disability status) to remain enrolled in OPERS health care. If enrolled, the allowance will be determined in the same way as an age-and-service retiree.

Coverage Options

Currently, Medicare-eligible retirees are able to select medical and prescription drug plans from a range of options and may elect optional vision and dental plans. Retirees and eligible dependents enrolled in Medicare Parts A and B have the option to enroll in a Medicare supplemental plan with the assistance of the OPERS Medicare Connector. The OPERS Medicare Connector is a relationship with a vendor selected by OPERS to assist retirees, spouses and dependents with selecting a medical and pharmacy plan. Monthly allowances, based on years of service and the age at which the retiree first enrolled in OPERS coverage, are provided to eligible retirees, and are deposited into a health reimbursement arrangement (HRA) account.

For non-Medicare retirees and eligible dependents, OPERS sponsors medical and prescription coverage through a professionally managed self-insured plan. An allowance to offset a portion of the monthly premium is offered to retirees and eligible dependents. The allowance is based on the retiree's years of service and age when they first enrolled in OPERS coverage.

OPERS provides a monthly allowance for health care coverage for eligible retirees and their eligible dependents. The base allowance is determined by OPERS. For those retiring on or after January 1, 2015, the allowance has been determined by applying a percentage to the base allowance. The percentage applied is based on years of qualifying service credit and age when the retiree first enrolled in OPERS

health care. Monthly allowances range between 51% and 90% of the base allowance. Those who retired prior to January 1, 2015 will have an allowance of at least 75% of the base allowance.

Medicare Part A

OPERS reimburses retirees who are not eligible for premium-free Medicare Part A (hospitalization) for their Part A premiums as well as any applicable surcharges (late-enrollment fees). Retirees within this group must enroll in Medicare Part A and select medical coverage, and may select prescription coverage, through the OPERS Medicare Connector. OPERS also will reimburse 50% of the Medicare Part A and confirmation that the retiree is not receiving reimbursement or payment from another source must be submitted. The premium reimbursement is added to the monthly pension benefit.

Medicare Part B

When members become Medicare-eligible, recipients and their covered dependents enrolled in OPERS health care must enroll in Medicare Part B (medical) to participate in a plan sponsored by OPERS.

Health Care for Member-Directed Plan Participants

Members participating in the Member-Directed Plan have a portion of the employer contribution credited to an individual retiree medical account. Since January 1, 2017, interest on the accounts accrued only if the defined benefit investment portfolio earned a return greater than zero in the prior year. Beginning January 1, 2020, interest will accrue based on the investment performance of the OPERS Stable Value Fund, not to exceed 4%. Members with an account prior to July 1, 2015, become vested in the account at a rate of 20% for each year of participation until the member is fully vested at the end of five years. For members establishing accounts on or after July 1, 2015, the vesting schedule is below. Upon a refund or retirement, distribution of the vested balance in the member's account may be used for the reimbursement of qualified medical expenses.

Years of Participation	Percent Vested
0-5 years	0%
6 years	10%
7 years	20%
8 years	30%
9 years	40%
10 years	50%
11 years	60%
12 years	70%
13 years	80%
14 years	90%
15 years	100%

Summary of Upcoming Changes to Pension Plans

Board-Approved Changes to the Combined Plan

On September 18, 2019, the Board approved changes to the Combined Plan. Effective January 1, 2022, new members will no longer be able to select the Combined Plan, and current members will no longer be able to make a plan change to the Combined Plan. For those participating in the plan prior to the closure,

the plan will retain all current plan design features so that participants in the plan will experience no changes. The plan will continue to be administered as it is today.

Summary of Upcoming Changes to Health Care

On January 15, 2020, the Board voted to adopt additional changes to health care coverage for Medicare and non-Medicare retirees. These changes are designed to improve the sustainability of the health care program.

Effective January 1, 2022, OPERS will discontinue the group plans currently offered to non-Medicare retirees and re-employed retirees. Instead, eligible non-Medicare retirees will select an individual medical plan. OPERS will provide an HRA allowance to those retirees who meet health care eligibility requirements. Retirees will be able to seek reimbursement for plan premiums and other qualified medical expenses. Below is a summary of the changes effective January 1, 2022.

Eligibility

Current retirees eligible (or who become eligible prior to January 1, 2022) to participate in the OPERS health care program will continue to be eligible after January 1, 2022. Eligibility requirements will change for those retiring after January 1, 2022.

Effective January 1, 2022, retirees in the Traditional Pension Plan or Combined Plan must meet the following health care eligibility requirements to receive an HRA allowance:

- 1) Medicare Retirees—Medicare-eligible with a minimum of 20 years of qualifying service credit.
- 2) **Non-Medicare Retirees**—Non-Medicare retirees qualify based on the following age-and-service criteria:
 - a) Group A-30 years of qualifying service credit at any age;
 - b) Group B—32 years of qualifying service credit at any age or 31 years of qualifying service credit and minimum age 52;
 - c) Group C-32 years of qualifying service credit and minimum age 55; or,
 - d) A retiree from groups A, B or C who qualifies for an unreduced pension, but a portion of their service credit is not health care qualifying service, can still qualify for health care at age 60 if they have at least 20 years of qualifying health care service credit.

Retirees who don't meet the requirement for coverage as a non-Medicare participant can become eligible for coverage at age 65 if they have at least 20 years of qualifying service.

HRA Allowances

Effective December 31, 2021, OPERS will no longer sponsor a medical and prescription drug group plan for non-Medicare retirees. Instead, effective January 1, 2022, eligible non-Medicare retirees may receive a monthly HRA allowance for reimbursement of health care coverage premiums and other qualified medical expenses. Non-Medicare retirees will have access to the OPERS non-Medicare Connector to help them determine if the OPERS HRA allowance or the Premium Tax Credit provided through the Affordable Care Act (if they are eligible) would be most beneficial. The non-Medicare Connector will also assist them with enrolling in a medical plan on the open market. The non-Medicare monthly base allowance will be \$1,200. Retirees will receive a percentage (ranging between 51%-90%) of the base allowance determined by their age and qualified years of service at retirement.

Also effective January 1, 2022, the base allowance used to determine the monthly HRA allowance for Medicare retirees will decrease from \$450 per month to \$350 per month. Additionally, Medicare retirees

who retired prior to January 1, 2015 and were granted an allowance of 75% will have their allowance determined based on their age and years of service at the time of first entry into the health care plan. Their allowance percentage will be between 51% and 74% of the base allowance as calculated on the OPERS allowance table.

Transition Deposit

A one-time HRA deposit of \$1,200 was provided to non-Medicare retirees who were enrolled in the OPERS group plan effective December 1, 2021. This deposit is to assist in the transition to the individual marketplace.

Dependent Children

Effective January 1, 2022, retirees will no longer receive an additional allowance for eligible dependent children, regardless of age, ability or mental capacity. The retiree will be able to use their HRA to reimburse any qualified medical expenses incurred by their eligible dependents.

Note: The information contained in this section is intended to be a summary only. Complete pension and health care details can be obtained through OPERS. This document reflects approved information as of the date listed. All plans are subject to change. Health care is not a statutorily guaranteed benefit. As such, the Board has the discretion to review, rescind or modify the health care plans at any time. There is no promise, guarantee, contract, or vested right to health care coverage or an allowance.

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

Independent Auditor's Report

To Management and the Board of Trustees Ohio Public Employees Retirement System and the Honorable Keith Faber, Auditor of State

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Ohio Public Employees Retirement System (OPERS) as of and for the year ended December 31, 2021 and the related notes to the financial statements, which collectively comprise OPERS' basic financial statements, and have issued our report thereon dated May 9, 2022. We have also audited the Traditional Pension Plan, the Combined Plan, the Member-Directed Plan, and the 115 Health Care Trust of OPERS as of December 31, 2021, as displayed in OPERS' basic financial statements.

We have also audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the schedule of employer allocations of OPERS' Traditional Pension Plan, Combined Plan, and Member-Directed Plan (the "specified plans"), as of and for the year ended December 31, 2021; the columns titled net pension liability (asset), total deferred outflows of resources, total deferred inflows of resources, and total employer pension expense (income) as of and for the year ended December 31, 2021 (the "specific column totals") included in the schedule of collective pension amounts of the specified plans; and the related notes to the schedule and have issued our report thereon dated May 9, 2022.

We have also audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the schedule of employer allocations of OPERS' 115 Health Care Trust (the "Trust"), as of and for the year ended December 31, 2021; the columns titled net OPEB liability (asset), total deferred outflows of resources, total deferred inflows of resources, and total employer OPEB expense (income) as of and for the year ended December 31, 2021 included in the schedule of collective OPEB amounts; and the related notes to the schedule and have issued our report thereon dated May 9, 2022.

Report on Internal Control Over Financial Reporting

In planning and performing our audits of the financial statements, the schedule of employer allocations for the specified pension and OPEB plans, and the specified column totals included in the schedules of collective pension/OPEB amounts referred to above, we considered OPERS' internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, the schedule of employer allocations for the specified pension and OPEB plans, and the specified column totals included in the schedules of collective pension/OPEB amounts referred to above but not for the purpose of expressing an opinion on the effectiveness of OPERS' internal control.

To Management and the Board of Trustees Ohio Public Employees Retirement System and the Honorable Keith Faber, Auditor of State

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of OPERS' financial statements, schedules of employer allocations, and the specified column totals included in the schedules of collective pension/OPEB amounts will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audits we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether OPERS' financial statements, the schedule of employer allocations for the specified pension and OPEB plans, and the specified column totals included in the schedules of collective pension/OPEB amounts referred to above are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audits, and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of OPERS' internal control or on compliance. This report is an integral part of audits performed in accordance with *Government Auditing Standards* in considering OPERS' internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
